CORPORATE
PROFILE

Established in 1999, Darco Water Technologies (the “**Group**”) is principally a systems integrator involved in the designing, building, operating and maintaining of water management processes that employ the membrane, ion exchange and thermal technologies.

CHAIRMAN'S STATEMENT

DEAR STAKEHOLDERS,

On behalf of our Board of Directors, it is my pleasure to present our Sustainability Report for the financial year ended 31 December 2017 ("FY2017").

Darco is always determined to make a positive impact to the environment by providing comprehensive solutions to our customers. As the economy developed, the Group diligently kept pace with the changing demands of different industries and strived to enhance its engineering capability in the environmental protection industry.

Today, apart from designing, manufacturing and servicing water and wastewater systems for a wide range of industries, including electronics, petrochemicals, pharmaceuticals and food and beverage, the Group has since evolved into an integrated environmental solutions provider.

In this year's report, we will focus on the sustainability aspects of Wuhan Kaidi, one of the largest contributors to the Group's 2017 results. In view of huge business opportunities in the growing China market, the Group has acquired an additional 12% of the total equity interest in Wuhan Kaidi, bringing the Group's shareholdings to 72%.

Since incorporation, Wuhan Kaidi has always focused its corporate responsibility to ensure that wastewater is properly treated and clean drinking water is available to the people, by extending their business scope and investing in new technologies.

CHAIRMAN'S STATEMENT

Faced with ever increasing world populations, rural areas are fast becoming urbanised and cities around the world are faced with mounting challenges to support the influx. Having access to clean and safe drinking water, as well as proper treatment of wastewater, is imperative for a stable society and economic development.

To further this cause, Wuhan Kaidi has completed more than 600 water treatment projects in the power, municipal, steel metallurgy, petrochemical, coal chemical, paper, food, pharmaceutical and other industries, and holds more than 20 proprietary and patented technologies with independent intellectual property rights.

Lastly, we wish to confirm that the Board has considered sustainability issues as part of its strategic formulation, determined the material environmental, social and governance (“**ESG**”) factors and overseen the management and monitoring of the material ESG factors.

At Darco, we will continue to be committed to providing sustainable technologies and solutions to provide safeguard our water supply and environment for our future generations.

WANG YAOYU
Executive Chairman

OUR MISSION

To be the water company of choice by providing customer driven multi-technology solutions.

To design and manufacture a wide range of high performance water and wastewater systems and provide services of highest quality at affordable prices.

SCOPE OF SUSTAINABILITY REPORT

Darco Water Technologies Limited (“**Darco**” or the “**Group**”) and its subsidiaries is a provider of integrated engineering and knowledge-based water treatment solutions and waste water treatment. Established in 1999 to design, fabricate, assemble, install, commission and service engineered water systems for industrial use, the Group has since expanded into air management system, soil remediation and solid-waste recycling.

The scope of the report covers information on material sustainability aspects of Darco, covering Wuhan Kaidi Water Services Co., Ltd. (“**Wuhan Kaidi**”) relating to the Water Treatment segment in China, from 1 January 2017 to 31 December 2017 unless otherwise specified. This should sufficiently address stakeholders’ concerns in relation to sustainability issues arising from the major business operations of the Group.

This report is prepared in accordance with the Global Reporting Initiative (“**GRI**”) Standards: Core Option as it provides a set of an extensive framework that is widely accepted as a global standard for sustainability reporting. It also considers the Sustainability Reporting Guide in Practice Note 7.6 of the Singapore Exchange Securities Trading Limited (“**SGX-ST**”) Listing Manual. In preparing our report, we applied the GRI’s principles for defining report content and report quality by considering the Group’s activities, impacts and substantive expectations and interests of its stakeholders.

Sustainability Contact

We welcome your views and feedback on our sustainability practices and reporting at sr@darcowater.com.

APPROACH TO SUSTAINABILITY

Sustainability Organisational Structure

Sustainability is a vital part of our corporate strategy for achieving long-term growth. The values we create for our people, the environment and society at large very much determine our financial performance. We developed a sustainability organisational structure to move things forward.

Sustainability Strategy

At the Group, our sustainability strategy aims to create integrated values. Together with disciplined execution of our strategy and a commitment to doing business responsibly, we commit to deliver value to all our stakeholders through the following:

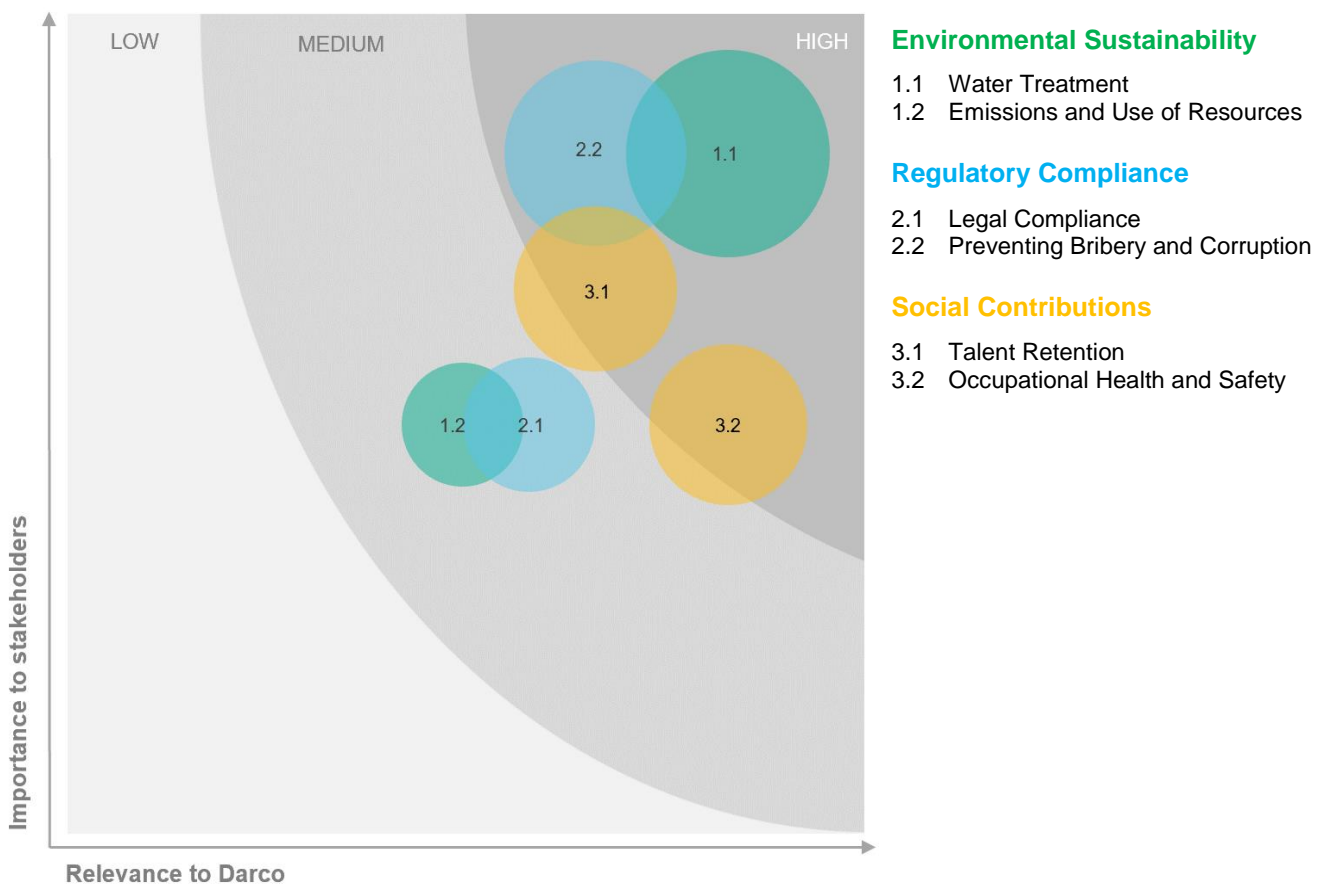

The sustainable strategy is underpinned by our Employee Code of Conduct, which establishes a clear tone at the top with regards to employees' business and ethical conduct. The strategy is also guided by external sources, including the Global Reporting Initiative Standards and Sustainability Reporting Guide in Practice Note 7.6 of the Singapore Exchange Listing Rules.

APPROACH TO SUSTAINABILITY

Sustainability Materiality Matrix

We recognise the need to continuously develop our responsible business approach in order to address growing stakeholder expectations around our impact on the environment, economy and society. As such, we periodically consult with our stakeholders to determine the issues that are most relevant to them and Darco. Some of our stakeholder's comments can be found in **Appendix B**.

Using a materiality index, we align our responsible business priorities with Darco's principal business and operational risks. We have also developed metrics to help us measure our progress, as indicated in our sustainability scorecard in **Appendix A**. We will review and adjust the matrix each year, as the external and business context changes.

OUR PERFORMANCE

How We Measure Our Performance

Our sustainability strategy is embedded into the appropriate parts of our business, with dedicated teams for each focus area, and coordination by our relevant departmental managers.

Progress will be tracked in two key ways: measuring performance against metrics, and evaluating how well the programs have advanced, through a series of 'commitments'.

Metrics and Targets

We have established key performance indicators for each of the three focus areas outlined in our sustainability strategy. As this is our first year adopting sustainability reporting, we will be establishing targets within the next year to hold ourselves accountable and track how we are doing.

Periodically, we plan to introduce new metrics and update targets to ensure alignment with our strategy.

Commitments

To ensure we have a robust sustainability program in place, we will also publish the key initiatives we plan to implement within the next year.

Environmental SUSTAINABILITY

We are committed to providing world-class water management services that add tangible value to the communities we serve and to operate. We strive to maintain those facilities with a strong emphasis on the triple bottom line of economy, environment and society.

Water Treatment

Water is the source of life. It is necessary to ensure that wastewater is properly treated and clean drinking water is available to the people. We focus on the needs of the people and strive to solve the water supply problem by extending our business scope and investing in technologies to treat wastewater and provide people with safe drinking water.

The main business areas of Wuhan Kaidi are as follows:

- Industrial water treatment, including desalinated water treatment, reclaimed water reuse, pure water preparation, condensed water treatment, seawater desalination.
- Industrial wastewater treatment, including treatment of industrial wastewater to achieve standard or zero discharge,
- Municipal water supply and drainage, including municipal tap water, municipal sewage, landfill leachate treatment.

Wuhan Kaidi has completed more than 600 water treatment projects in the power, municipal, steel metallurgy, petrochemical, coal chemical, paper, food, pharmaceutical and other industries. They also have more than 20 proprietary and patented technologies with independent intellectual property rights, and recently introduced condensate cone separation technology from the United Kingdom and evaporation crystallisation technology from the United States.

In addition, Wuhan Kaidi have established strategic partnerships with many colleges and universities and well-known enterprises in the water industry, and has established a leading market position and outstanding competitive advantages in the field of water treatment.

ENVIRONMENTAL SUSTAINABILITY

Case Studies: Water Treatment

Seawater Desalination

Completed in 2015, the China Resources Haifeng Power Plant Desalination EPC Project has an operational capability of 21,600 m³/day.

This is the first seawater desalination project using the EPC model in China. The project uses multi-layer and multi-grid horizontal filters in the filtration process.

Zero Discharge System

Utilising the patented VCC One-Step!™ technology from the United States, the Tianjin Beijiang Power Plant Wastewater Desulphurisation Zero Discharge Project is designed to process sulphurised wastewater at a rate of 24 m³/hour.

After undergoing a precipitation and filtration process, the treated sulphurised wastewater will be passed through the VACOM evaporative crystallisation system to produce the crystalline salt and water, which will be recycled.

Municipal Wastewater

Commencing construction in 2015, the Yinchuan Binhe New District Sewage Treatment Plant (Phase 1) has a total operational capacity of 50,000 tonnes/day. This operational capacity is expected to reach 150,000 tonnes/day in 2030.

ENVIRONMENTAL SUSTAINABILITY

Emissions and Use of Resources

Emissions

Emissions for the Wuhan Kaidi include Greenhouse Gas (“GHG”) (Scope 1) emissions from petrol claims for personal vehicles, GHG (Scope 2) emissions from the use of purchased electricity in Wuhan Kaidi’s Wuhan office, GHG (Scope 3) emissions from business air travel, and municipal wastewater and solid waste generated by the office staffs. No hazardous waste were generated by Wuhan Kaidi in FY2017.

In FY2017, the total GHG emissions intensity of Wuhan Kaidi was 1.01 kgCO₂e/¥’000.

Purchased Electricity

Wuhan Kaidi’s electricity consumption came from regular operations of the office. In FY2017, the total electricity consumption intensity of Wuhan Kaidi is 0.96 kWh/¥’000. All employees stringently complied with Wuhan Kaidi’s policy of saving energy.

Wuhan Kaidi utilised electricity-saving light bulbs at its office building as well as educated its employees about energy conservation and emission reductions. To ensure the effective use of electricity, Wuhan Kaidi conducted the following practices:

- Turn off lights, computers and air conditioning system before clocking out
- Place energy saving reminder labels next to switches
- Clean office equipment (such as refrigerator, air-conditioner) regularly to maintain high efficiency
- Use energy saving equipment
- Set temperature of air conditioners to 25°c

Wuhan Kaidi established policies and procedures to reduce energy consumption in the office, to assess the energy efficiency, to increase the use of clean energy, if possible, to set applicable targets to monitor energy consumption, and to ensure power is turned off when electrical appliances are not in use.

ENVIRONMENTAL SUSTAINABILITY

Emissions and Use of Resources (cont'd)

Water Consumption

Wuhan Kaidi water consumption is mainly from domestic water use. In FY2017, the total water consumption intensity of Wuhan Kaidi was 6.22 litres/¥'000. To further improve the utilisation efficiency of water resources, the Group adopted the following practices:

- Place posters on 'Saving Water' to encourage water conservation
- Strengthen inspection and maintenance on water taps and fixing dripping taps immediately to avoid wastage
- Use water saving equipment

Paper

Paper was mainly consumed by the Wuhan Kaidi's office. In FY2017, the total weight of paper recycled by Wuhan Kaidi is 231 kg. We strive to reduce paper waste at source by adopting the following practices:

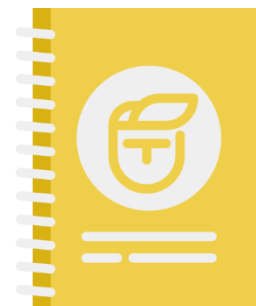

- Think before print
- Set duplex printing as the default mode for most network printers
- Use email to reduce fax paper consumption
- Separate single-sided paper and double-sided paper for better recycling
- Use the back of old single-sided documents for printing or as draft paper

KEY STATISTICS: Environmental Sustainability

Performance Indicators	2017	Units
Completed water treatment projects	>600	Number
Intellectual property rights registered	>20	Number
Environmental and operating expenditures	350	¥'000
Carbon emission intensity	1.01	kgCO ₂ e/ ¥'000
Electricity consumption intensity	0.96	kWh/¥'000
Water consumption intensity	6.22	litres/¥'000
Paper recycled	231	kg

REGULATORY COMPLIANCE

To maintain a fair, ethical and efficient business and working environment, Darco strictly adheres to the local laws and regulations relating to anti-corruption and bribery, irrespective of the area or country where the Group conducts its business.

Legal Compliance

In FY2017, the Group, through its Company Secretary, has updated the Board on relevant new laws and regulations affecting the Company. From time to time, and through Board meetings and other meetings, both formal and informal, our Chief Executive Officer (“**CEO**”) has been advising our Directors of the changing commercial and business risks faced by our Company.

The Directors are also updated regularly with changes to the SGX-ST Listing Rules, risk management, corporate governance, insider trading and the key changes in the relevant regulatory requirements and financial reporting standards and the relevant laws and regulations to facilitate effective discharge of their fiduciary duties as Board or Board Committees members. New releases issued by the SGX-ST and Accounting and Corporate Regulatory Authority (“**ACRA**”) which are relevant to the Directors are circulated to the Board by the Company Secretary.

The Directors are encouraged to attend seminars and receive training to improve themselves in the discharge of Directors’ duties and responsibilities. Changes to regulations and accounting standards are monitored closely by the Management. To keep pace with such regulatory changes, the Company provides opportunities for ongoing education and training on Board processes and best practices as well as updates on changes in legislation and financial reporting standards, regulations and guidelines from the SGX-ST Listing Rules that affect the Company and/or the Directors in discharging their duties. Such training costs are borne by the Company.

In FY2017, the Group was not in violation of any of the relevant laws and regulations in relation to bribery, extortion, fraud and money laundering that have a significant impact on the Group.

REGULATORY COMPLIANCE

Preventing Bribery and Corruption

The Group prohibits all forms of bribery and corruption. The Group requires all employees to strictly abide by professional ethics and eliminate any corruption and bribery. All employees are expected to discharge their duties with integrity, to act fairly and professionally, and to abstain from engaging in bribery activities or any activities, which might exploit their positions against the Group's interests.

Whistle-blowers can report verbally or in writing to the senior management of the Group for any suspected misconduct with full details and supporting evidence. The management will conduct investigations against any suspicious or illegal behaviour to protect the Group's interests. The Group advocates a confidentiality mechanism to protect the whistleblowers against unfair dismissal or victimisation. Where criminality is suspected, a report is made to the relevant regulators or law enforcement authorities when the management considers necessary.

In addition, the staff handbook lays out the Group's expectation and guiding provisions on code of conduct. The Group encourages employees, customers, suppliers, or other parties to report incidents relating to any conflicts of interest, extortion, bribery, fraud and money laundering.

KEY STATISTICS: Regulatory Compliance

Performance Indicators	2017	Units
Regulatory and compliance incidents	0	Number
Confirmed incidences of corruption and actions taken	0	Number
Non-compliance with laws and/or regulations which resulted in significant fines and non-monetary sanctions	0	Number
Non-compliance with environmental laws and/or regulations which resulted in significant fines and non-monetary sanctions	0	Number

SOCIAL CONTRIBUTIONS

People are the cornerstone of our businesses. One of our most important and fundamental responsibilities lies in respecting and protecting the rights of all employees. Creating an environment where every employee can maintain both physical and mental health is essential to ensuring that they can maximise their potential.

Talent Retention

Personal and professional development is an ongoing journey. The Group considers an effective learning and development program to be a critical part of keeping our employees motivated and encouraging them to build a strong sense of loyalty and pride towards our business.

Training and Development

In October 2017, a Company-wide training was conducted by Wuhan Kaidi to improve quality, environment, occupational health and safety awareness of the company's staff, and to further standardise the company's operation. The training comprised of the following:

- New quality management requirements (GB/T19001 & GB/T50430)
- New environmental management requirements (GB/T14001) and environmental awareness training
- Occupational health and safety management requirements (GB/T28001) and safety awareness training
- Environmental factors identification and evaluation
- Hazard identification and risk assessment

Through our training and education programme, we are developing people, improving their employability and growing their careers in the engineering industry.

SOCIAL CONTRIBUTIONS

Talent Retention (cont'd)

Equal Opportunity

We endeavour to be an equal opportunity employer to provide a fair workplace for employees, following the principles of equality and non-discrimination. Recruitment, remuneration, promotion, and benefits are required to be handled based on objective assessment, equal opportunity and non-discrimination regardless of gender, race, marital status, pregnancy, disability, age or family status.

The Group attracts talent through fair, and flexible recruitment strategy that includes recruitment application, job description, job applications, interview, selection, approval, and job offer. Promotion is based on performance and suitability.

The Group offers competitive remuneration to attract and retain talented staff members. Remuneration packages (which includes the necessary social benefits) are reviewed periodically to ensure consistency with employment market. Dismissal also complies with employment laws and regulations relating to non-discrimination.

Encouraging Work-Life Balance

We organised a variety of employee activities to help them relax their mind and body, develop teamwork, explore their talent, so as to develop a positive attitude in both work and life.

To enhance employee teamwork and cohesion, improve employee health and improve employee work-life balance, Wuhan Kaidi has been organising periodic employee gatherings during major festivals and annual orientation for new staff.

SOCIAL CONTRIBUTIONS

Occupational Health and Safety

We are committed to maintaining a healthy and safe workplace for employees, and to preventing workplace injuries and illnesses. As noted above, we conducted periodic trainings to improve quality, environment, occupational health and safety awareness of the company's staff, and to further standardise the company's operation.

In FY2017, there is no instances of serious incidents and workplace injuries in Wuhan Kaidi.

Others

We also seek to create long-term economic benefits for our communities through supplier development, supporting a reliable local supply network to drive economic growth.

All of our suppliers and contractors must adhere to our requirements regarding safety, health, security and the environment, as well as the principles of our Standards of Business Conduct. We are also focused on developing local businesses through regular meetings with them to ensure they are aware of the opportunities created by our projects and understand our requirements.
