KEY PRODUCT FEATURES					
•	AT ARE YOU INVESTING IN? You are investing in an exchange traded fund constituted as a sub- fund of an umbrella unit trust in Singapore. The investment objective of the Fund is to track the performance of the Index in US dollar terms.	Details on the values and construction methodology of the Index are available online at			
•	The objective of the Index aims to exceed the minimum technical requirements laid out for European Union (" EU ") Climate Transition Benchmarks (" CTBs ") in the EU's Delegated Acts on climate benchmarks - Regulation (EU) 2016/1011 as amended by Regulation (EU) 2019/2089, as may be amended or replaced, while maximizing exposure to positive environmental, social and governance (" ESG ") factors and maintaining risk and return characteristics similar to those of its underlying market capitalisation weighted index, the MSCI India Index. The MSCI India Index is a free-float adjusted market capitalisation weighted index that is designed to track the equity market performance of Indian securities listed on the National Stock Exchange ³ and the BSE Limited (formerly known as the Bombay Stock Exchange). The Fund will carry out its investment strategy by investing substantially all of its assets in Indian securities.	www.msci.com. Refer to the "Index and Indian Share Market" in the "Description of the Index Funds – MSCI India ETF" section of the Prospectus for further information on the Index.			
•	The Manager currently does not intend to make any distributions of the income of the Fund to unitholders.				
	Investment Strategy				
•	The Fund includes ESG factors as its key investment strategy, with a focus on climate transition, by tracking the Index. The Manager intends to pursue a Representative Sampling Strategy (i.e. an indexing strategy that involves investing in a representative sample of Indian securities that collectively has an investment profile similar to the Index) to achieve the Fund's investment objective by investing directly in Indian securities. As such, the Manager may overweight the holdings of Indian securities of the Fund relative to the respective weightings of the underlying securities in the Index e.g. where the Manager considers certain securities in the Index should be excluded in view of comparative illiquidity and possible settlement difficulties for such securities, and where there are Indian law limits on holdings by foreign institutional investors. The Fund may invest in financial derivative instruments for hedging and/or efficient portfolio management purposes.	Refer to "Investment Strategy" in the "Description of the Index Funds – MSCI India ETF" section of the Prospectus setting out the description of the Fund's investment strategy.
