# Footfall Up with Successful Tenants Committed to Omni-Channel

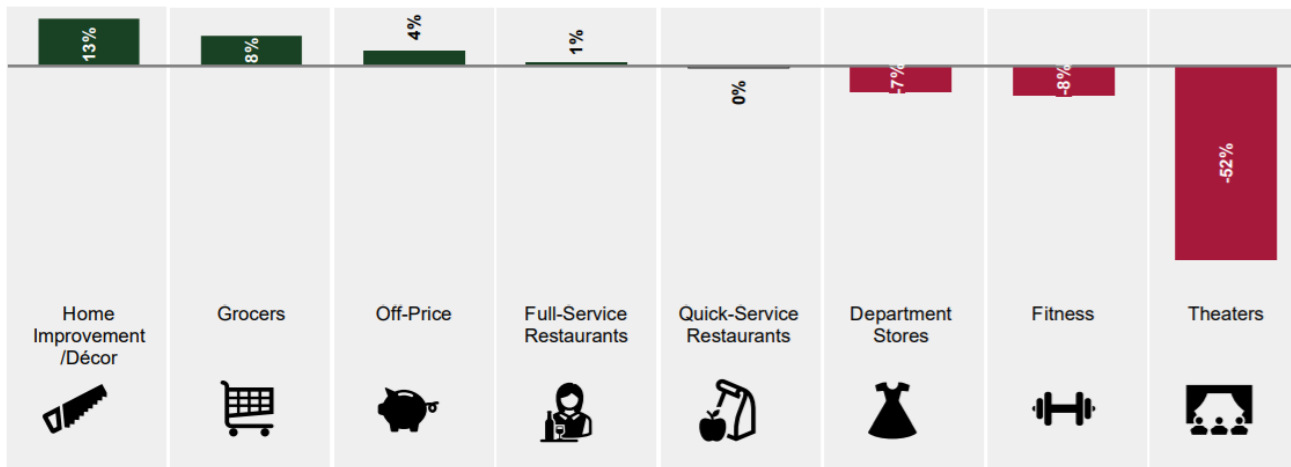

- Multi-channel retail is the future as consumers demand a seamless experience toggling between channels
- Retailers making investment in frictionless shopping technologies including cashierless checkout, digital pricing and smart carts
- Many retailers fulfill a large portion of online demand through physical stores
- Physical stores can help retailers to lower online fulfillment and delivery costs while improving delivery speed, including offering same-day buy online, pick up in store ("BOPIS")

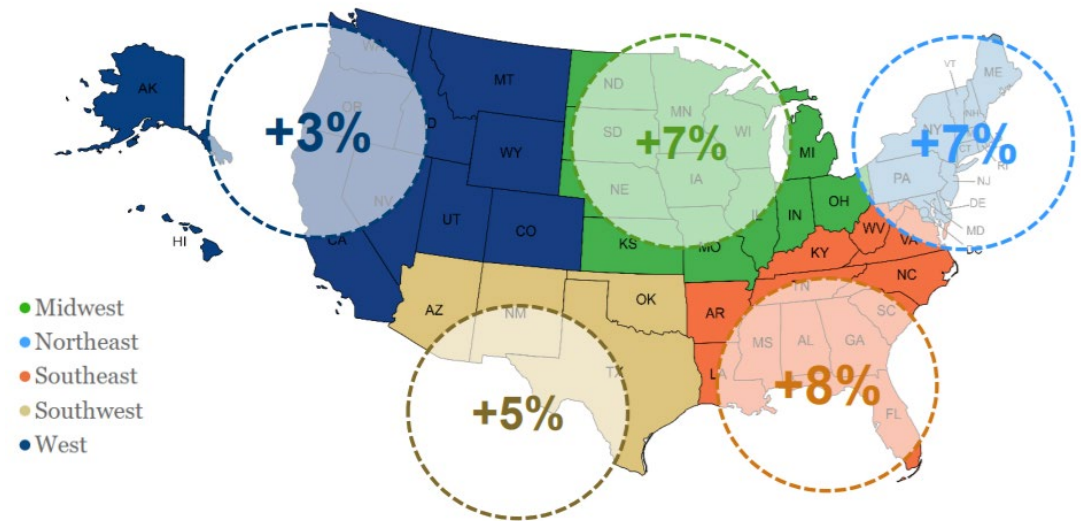

# Strip Centers Foot Traffic Continued to Rebound

Change in Foot Traffic by Retail Category  
July '21 vs. July '19

Strip Center Foot Traffic by Region July '21 vs. July '19

- Foot traffic at home improvement, grocers and off-price retailers exceeds pre-pandemic levels by a decent margin. On the contrary, traffic at department stores (apparel heavy), fitness and theaters is still materially behind

- Strip Center foot traffic in recent months has been on a steady upward trend across regions with some disruption due to the delta variant. The West Coast, slower to recover, crossed the pre-covid mark for the first time in June. The Southeast still leads on foot traffic growth, but the gap with other regions has narrowed

Hybrid work from home dynamics will continue to boost the self-storage sector

Self-storage demand and homeownership have historically been positively correlated, suggesting strong home sale activity will remain a tailwind for storage<sup>1</sup>

Within the UHREIT Portfolio, occupancies have been trending upwards, and opportunities to accelerate rental rate increases for existing customers when the rental rate caps imposed by the Government at the onset of the pandemic are lifted

# Outlook – Sector

- As of June 2021, the total retail store openings stand at 4,969, a 58.3% y-o-y increase, a sign that retailers are confident in the future of their businesses. Closures have also decreased by 37.9% y-o-y to 4,889<sup>1</sup>
- Strip center foot traffic has been on a solid upward trend (now up ~4% vs. 2019). Spending on restaurants and apparel picked up significantly in the quarter, and exceeded '19 levels for the first time since the pandemic<sup>2</sup>
- Grocery anchored retail assets represented almost a third of the record high \$5.3B in deal volume in the third quarter. The sector saw a 61% increase in activity compared to the average 3Q through 2015-2019. Individual grocery anchored sales during the 3<sup>rd</sup> quarter recovered to their 5-year average levels, while retail, as a whole, was 3% below it's pre-pandemic level<sup>3</sup>
- Home improvement retailers have been riding the housing boom and lead the pack based on same store sales. Grocers continue to fare well, despite further ecommerce market share gains, as stores play a pivotal role in fulfilling most online grocery orders<sup>2</sup>
- Cap rates for strip centers range from 6.10% to 6.49% across the Northeast and Mid-Atlantic regions<sup>4</sup>
- Self-Storage occupancy hit new all-time highs (96%) driven by a robust housing market and sticky incremental demand from Covid<sup>5</sup>
- Self-Storage move-out activity is expected to pick up in late '21 and result in lower occupancy rates in '22. That said, with higher aggregate demand and the ever-increasing sophistication of revenue management systems, it is likely that the 'new normal' for occupancy will be above pre-Covid levels moving forward<sup>5</sup>
