## **NEWS RELEASE:**

### **Digital Life Line Pte. Ltd. and OneMedic Collaborate on a Proof-of-Concept Pilot to Improve Community Vision Screening in Vietnam**

**SINGAPORE – 11 February, 2026** — DISA Limited (the “**Company**”, and together with its subsidiaries, the “**Group**”) is pleased to announce Digital Life Line Pte. Ltd. (“**DLL**”), a subsidiary of DiSa Digital Safety Pte. Ltd. that is a wholly-owned subsidiary of the Company, has entered into a Memorandum of Understanding (“**MOU**”) with OneMedic Joint Stock Company (“**OneMedic**”) to collaborate on a Proof-of-Concept (“**PoC**”) pilot project in Vietnam, aimed at addressing the critical shortage of accessible, specialist-quality vision screening.

The PoC pilot will integrate DLL’s portable, Artificial Intelligence (“**AI**”)-powered vision screening devices - Automated Visual Acuity Test device (“**AVAT**”) for visual acuity testing, and Mobile Imaging Device for Anterior Segment (“**MIDAS**”) for point-of-care cataract screening, into OneMedic’s established AI healthcare platform and local healthcare network in Vietnam. The PoC pilot will evaluate the feasibility and effectiveness of delivering fast, accurate, and scalable vision screening that can be deployed in rural and community healthcare settings, addressing barriers such as the shortage of ophthalmologists and limited clinic infrastructure.

The core objective of the PoC pilot is to develop an integrated, portable vision-screening workflow while validating its operational and clinical effectiveness and generating a comprehensive vision health dataset from underserved communities to support evidence-based public health planning and policy development.

The PoC pilot is expected to commence in February 2026, subject to mutual agreement on implementation details.
