NEWS RELEASE

Revolutionary Audio Technology, iNarrator, on Trial at Gardens by the Bay - Instantaneous synchronised narration for exhibits

SINGAPORE, 2 July 2015 – Citrine Wireless Pte Ltd (“**Citrine**”), a Singapore-based technology solutions provider for mobile devices and a joint venture partner of SGX Catalist Company, Equation Summit Limited, today announced that its revolutionary audio technology, iNarrator, will be trialled in the iconic Gardens by the Bays’ Flower Dome, where users will be able to hear perfectly synchronised narration of the floral exhibits on their personal smartphones.

iNarrator is a globally patent-pending audio solution that delivers real-time, multi-language audio content directly to users’ smartphone. The deployment of such similar solution within a short span of time exemplifies the growing popularity of the concept of “Bring your Own Device” or “BYOD”.

iNarrator has the potential to support more than one language, but for a start, the trial version will support English language only. Nevertheless, moving forward, visitors from different countries will be able to select more languages when the application is ready.

Mr Eddie Chng, Chief Executive Officer, Equation Summit Limited said, “We are confident that our technology is able to help Singapore’s places of interest enhance visitors’ experience.”

iNarrator is highly scalable and completely transplantable across geographic boundaries.
