Press Release

MIT secures orders worth \$13.7m of semiconductor equipment Delivers 24 units of solar equipment to major customer in China

Singapore, 2 December 2014 - The Board of Directors of Manufacturing Integration Technology Ltd ("MIT" or "the Company") is pleased to announce that it had recently secured new orders worth a total of \$13.7m for its vision inspection, die sorting and laser marking equipment for delivery in 1Q2015.

These new orders bring its outstanding order book to \$32.9m as at 2 December 2014.

In the solar arena, we have completed the delivery of 24 units of laser scribers and laser ablation equipment worth RMB26.4m (refer to our press release of 13 October 2014) to our major customer in China.

These solar deliveries will add to the strong sales and financial results of the Company for the financial year ending 31 December 2014 while the new semiconductor orders will contribute positively to next year's performance.

None of the Directors or controlling shareholders has any direct or indirect interest in these transactions.

About Manufacturing Integration Technology Ltd ("MIT")

Incorporated in 1992 and listed on the Singapore Exchange's Mainboard since 1999, MIT is a leading provider of integrated automation solutions to the semiconductor industry worldwide. Its range of high-end equipment include wafer level die marking, sorting and inspection systems, It has also entered into the renewable energy market by producing its proprietary range of solar panel manufacturing equipment for the PV market. The Group has furthermore diversified its business to provide contract equipment manufacturing and precision engineering services to the broader markets with a manufacturing footprint in Shanghai, China.
