GRI 102-14

Global Dragon Limited and its subsidiaries (the “**Group**”) is pleased to present its third Sustainability Report (the “**Report**”) for the financial year ended 30 June 2020 (“**FY2020**”).

The Group’s strategy is to expand its presence in the property development segment, reinforce its foundation in property investment as well as enhance its financial position for sustainable growth. Currently, the Group’s reportable business segments comprise the property development segment, property investment segment and hospitality segment.

As at 30 June 2020, the Group had secured properties for its development projects for a total land acquisition cost of more than S\$136.70 million. The total Gross Development Value (“**GDV**”) of these property development projects were valued at more than S\$285.10 million by accredited professional valuers.

After the takeover by JK Global Assets Pte. Ltd. for the third financial year since December 2017, the Group’s net assets increased significantly by more than 14 times to S\$86.01 million as at 30 June 2020, from S\$6.00 million as at 31 December 2017. This represents a significant milestone in our history and heritage since our Company’s founding in 1981 and granting of SGX listing status in 1999.

For the financial year ending 30 June 2021 (“**FY2021**”), the business climate is increasingly challenging as markets continue to deal with greater uncertainties arising from the COVID-19 pandemic. Despite this, we are confident that the Group is well positioned in building a sustainable platform for our business growth stories.

Barring any unforeseen circumstances, in order to achieve a sustainable business growth, the Group will continue to focus on completing its current residential and hotel pipelines in Singapore and take a disciplined approach towards exploring new property investment opportunities.

For FY2020, the Group operated three (3) reportable business segments, comprising the property development segment, property investment segment and hospitality segment in a single principal geographical segment in Singapore, which form the Group's strategic business units.

The strategic business units each offer different products and services, and are managed separately because they are targeting different market segments and require different marketing strategies. For each strategic business unit, the Group's Executive Chairman reviews internal management reports at least on a monthly basis.

The following summary describes the operations of each of the Group's reportable business segments:

- (a) Property development segment relates to development of residential properties;
- (b) Property investment segment relates to holding of investment properties to earn rentals and for capital appreciation; and
- (c) Hospitality segment relates to the leasing of hotels to operators with limited variability in rental income.

Performance is measured based on segment profit for the year, as included in the internal management reports that are reviewed by the Group's Executive Chairman. Segment profit is used to measure performance as management believes that such information is the most relevant in evaluating the results of certain segments. For more information on our financial performance in FY2020, please refer to the Annual Report 2020.
