MEDIA RELEASE

CNA Group to benefit as Urbanise prepares for ASX IPO

Singapore, 11 July 2014: Singapore Mainboard-listed Master System Integrator (“MSI”), CNA Group Ltd. (“CNA” or “the Group”), a long standing minority shareholder in Australian Urbanise.com Ltd (“Urbanise”), is pleased to announce that Urbanise is positioned for an Initial Public Offering (“IPO”) on the Australian Securities Exchange (“ASX”) after Urbanise’s shareholders passed the required resolutions.

CNA formed a strategic partnership with Urbanise, then known as Majitek Pty. Ltd. in December 2009, to deliver intelligent building management solutions to the rapidly expanding global smart-cities market. Since then, CNA has been a long-standing shareholder in Urbanise alongside with Pierce Group Asia and Cisco Systems, Inc. Over the last four years, Urbanise has successfully launched its Industry Cloud Platform for the facilities management market segment and grown its install base to over 45,000 end-users. Urbanise’s critical systems monitoring platform has been operating in more than 100 buildings and developments in South East Asia, the Middle East, the United Kingdom and Ireland.

Mr Michael Ong, CNA’s Group CEO and President commented: ***“CNA has always been at the forefront of technology shifts and advances. Our investment in Urbanise is reflective of our longstanding belief of creating a partner ecosystem that delivers both short and long term benefits to our customers and shareholders. Having access to cloud based technologies that offer our customers higher performance and significant cost savings is a win-win for CNA and its customers. We look forward to continuing our relationship with Urbanise as we participate in the rewards of being a shareholder in a high-growth technology company”***

About Urbanise.com Ltd

Urbanise.com Ltd (“Urbanise”) is the first cloud-based platform designed specifically for delivering services to buildings. We transform the traditional engineering approach to building operations and maintenance into a dynamic online experience; improving customer service, removing operational cost and enabling new revenue streams that Building Operators never believed possible.

Facility Managers, Property Managers, Corporate Real Estate Owners and Utilities and Telcos all use Urbanise to extend and enhance the range of services they deliver. Integrated into the world's largest towers and adopted by the most prestigious communities, Urbanise is changing the way services are provided to buildings and the people who live or work in them.

About CNA Group Ltd.

Incorporated in 1990, CNA Group Ltd. ("CNA") is an award-winning specialist in the provision, design, implementation and maintenance of open, integrated building and facility management solutions that can integrate and control a diverse range of mechanical, electrical, security and climate control systems within a building or facility.

CNA's service and products portfolio focuses on both information communication technology ("ICT") and Mechanical, Electrical and Plumbing ("MEP") solutions intended to address newly emerging demands of sustainability, energy management, renewable energy and low carbon emission technologies. The Group also provides system maintenance and value-enhancement services and the sale of environmental control and engineering products.

Additionally, CNA is in the fast-growing industrial wastewater treatment sector in China through its Dongying wastewater plant and concession agreement with the Dongying Economic and Technological Development Zone of Dongying City, Shandong Province, China.

Headquartered in Singapore, CNA has direct presence in many countries in Asia and the Middle East. The Group serves an impressive list of customers in Singapore, Malaysia, Myanmar, Philippines, Thailand, India, China, Vietnam, Dubai having implemented a broad range of projects for commercial and government buildings, educational institutes, residential developments, semiconductor wafer fabs, pharmaceutical plants, other industrial manufacturing facilities, wastewater treatment facilities, and aviation and transportation infrastructure.
