Strategic Investment Approach

Partnership	Two-Pronged Approach	Clustering
PLife REIT is a specialised REIT where: 1) Properties tend to be purposed-built (e.g. hospital, medical centre) 2) Lease terms tend to be long (typically > 10 years) 3) Lessee/operator tend to specialise in their area of operation		Imperative for PLife REIT to achieve economies of scale in its countries of investment in order to: 1) Establish a country HQ for closer monitoring and management of its portfolio of properties 2) Structure its investment holdings to take advantage of tax or regulatory benefits where available
→ Seek out long-term and strategic partnership with good lessee/operator where possible		→ Prioritise & seek out investment opportunities in countries where PLife REIT already has investments

5. Capital and Financial Management

Capital & Financial Management Strategy

5 Key principles:

1. Acquisition financing has to be long-term: at least 3 years or more

✓ To mitigate immediate refinancing risks post-acquisition

2. PLife REIT's S\$1.96 billion¹ portfolio is unencumbered

- Ensures financing flexibility for future fund raising initiatives as the new financing bank will rank pari passu with existing banks
- For future overseas acquisitions, may consider asset-level financing to ensure optimal tax positions and procure best pricing

3. Diversified funding sources

- ✓ Banks are core funding sources (cultivates a panel of relationship banks)
- ✓ Capital markets financing products (with the objective to lengthen debt maturity)
- ✓ Other non-traditional funding sources (Convertible Bonds, Equity etc.)

4. Natural hedge financing strategy

- Match asset currency with financing currency to mitigate principal forex risks arising from overseas acquisitions
- ✓ At least 50% natural hedge; remaining 50% depending on the interest rate differential and nature of the currency involved

5. Prudent financial risk management strategy

- ✓ Hedge at least 50% of interest rate and forex exposures on the net income from foreign investments
- To mitigate risks from adverse interest rate and forex fluctuations
- Aim to have no more than 30% of the total debts due in a single year, to avoid bunching effect
- Constantly monitoring the market to extend the debt maturity period

END GOALS:

- Minimise short or near term refinancing risks
- Unencumbered portfolio and diversified funding sources provide financial flexibility and acquisitive "firepower" to support future growth with optimal cost of capital
- Maintain stability of distributions and net asset value of PLife REIT with prudent capital management
