- ✓ During the initial conversion period, NPI decreases, due to (a) temporary drop in occupancy, (b) loss in efficiency from subdivision of space and renovations and (c) bearing additional property related expenses.
- ✓ However, in the long run and as occupancy normalises, the overall NPI is expected to gradually increase with built-in rental escalations in our committed rents, subject to market conditions
- ✓ With approximately 13% of CIT's portfolio due for lease renewal in 2016, the illustration provides background on the anticipated effects on NPI in the initial stages of conversions
