(S\$ million)

- Gross Revenue was 0.8% marginally higher mainly due to commencement of new leases for certain properties in 2Q FY20; NPI was however 0.6% lower marginally from S\$22.0 mil in 1Q FY20 mainly due to higher revenue partially offset by higher property expenses incurred from the portfolio.
- 2Q FY20 distributable income **increased 33.3%** to S\$14.5 mil from S\$10.9 mil in 1Q FY20. On a like-for-like basis, 2Q FY20 was up **4.6%**.<sup>(3)</sup>

# 1H FY20 vs 1H FY19 Performance

## Stable Operating Metrics

### Gross Revenue and Net Property Income

(S\$ million)

### Distributable Income

(S\$ million)

- Gross Revenue and NPI decreased by 1.4% and 0.7% respectively, due to:
  - i. transitory downtime between replacement tenants at ALOG Cold Centre and Pandan Logistics Hub;
  - ii. rental waivers to be given to qualifying SME tenants as part of the rental relief framework under the COVID-19 (Temporary Measures) (Amendment) Bill;
  - iii. weaker Australian dollar; and
  - iv. partially offset by higher revenue at ALOG Commodity Hub with the commencement of new leases in 2Q FY20 and additional rental contribution from the property in Altona, Victoria, Australia acquired in April 2019.
- 1H FY20 distributable income would have been **2.1% higher** as compared to 1H FY19 on a like-for-like basis.<sup>(3)</sup>

Notes:

- (1) One-off S\$0.7 mil tax-exempt distribution from the divestment of Jinshan Chemical Warehouse, S\$2.5 mil distribution from 51 Alps Avenue and S\$0.6 mil capital distribution in 1H FY19.
- (2) S\$2.0 mill of distributable income is retained to address potential mandatory rental deferral and/or waivers required to support some tenants. Amount shown for purpose of like-for-like comparisons only.
- (3) Excluding footnote (1) and including footnote (2).

# Market Outlook – Singapore

Stable Logistics Market Fundamentals with High Growth Potential

## Moderated Supply Pipeline

Singapore Warehouse Annual Net Completion, Absorption and Vacancy Rate (%)

# Market Outlook - Singapore

## Stable Logistics Market Fundamentals with High Growth Potential LOGISTICS TRUST

- Leasing volume in 1Q 2020 increased at a moderate pace of 0.7% as compared to 1Q 2019.
- Even though some firms held back on expansion or relocation plans as orders and revenue lowered in tandem with the COVID-19 outbreak, overall leasing demand for warehouse properties still experienced an increase of 3.6% Y-O-Y in the number of tenancies signed in the first quarter of 2020.
- This higher demand for logistics and storage facilities largely arises from an increase in demand from the e-commerce, food, healthcare and pharmaceutical industries.
- Logistics and warehouse properties' rents are expected to perform slightly better with a more marginal decline of 5.0% Y-O-Y in 2020, due to reviving demand for food and cold storage facilities, and logistics warehouses. <sup>(1)</sup>

# Market Outlook - Australia

## Stable and Resilient Logistics Market Fundamentals

- Deloitte's forecasted a 5.2% contraction in GDP growth in 2020.
- Improved outlook is however expected to be underpinned by:
  - Sizable fiscal stimulus packages amounting to 16.4% of GDP, designed to help businesses and workers;
  - Reduction in the official cash rate to a record low of 0.25% and easing in the AUS dollar, providing further stimulus; and
  - Ongoing infrastructure pipeline.
- Robust leasing activity experienced across the eastern seaboard markets in 1Q 2020, amidst lower enquiry levels on the back of short term economic outlook uncertainty.
- Higher demand for additional warehouse space seen from sectors under e-commerce, essential goods, pharmaceutical supplies, medical equipment and online retail sectors.
- Industrial property markets are expected to be relatively resilient and long-term growth drivers for the Australian industrial market remain intact with continued expansion in ecommerce and infrastructure investment.
