

PRESS RELEASE**Rex's subsidiary to take part in Norwegian Sea drilling**

- *New well to be drilled in PL838 in the Norwegian Sea*
- *The well will be drilled about 4.5 kilometres southeast of the AkerBP operated Skarv field and can be tied back to the Skarv facilities in the event of a discovery*

SINGAPORE, 2 September 2019 – Rex International Holding Limited (“Rex International Holding”, “Rex” or the “Company”, and together with its subsidiaries, the “Group”), a technology-driven oil company, is pleased to announce that the operator, PGNiG Upstream Norway AS (“**PGNiG**”), which is part of the PGNiG Group, has started drilling an exploration well on the Shrek prospect in the Norwegian Sea licence PL838 on 30 August 2019. Rex’s 90 per cent subsidiary Lime Petroleum AS (“**LPA**”), had on 21 June 2019, signed an agreement with DEA Norge (“**DEA**”) to acquire 30 per cent interests in the two licences PL838 and PL838B. The transfer of interests is pending regulatory approval, but will be effective from 1 January 2019 (a standard practice for licence transactions in Norway) when approved.

Mr Dan Broström, Executive Chairman of Rex International Holding, said, “We have farmed in to this licence just before drilling, in line with our business model in Norway to find oil, monetise and recycle capital.”

The 6507/5-9S well (as indicated in the image below) in PL838 will be drilled about 4.5 kilometres southeast of the AkerBP operated Skarv field and can be tied back to the Skarv facilities in the event of a discovery. The licence is located in the prolific Donna Terrace area of the Norwegian Sea in water depth of some 350 metres. LPA has based the farm-in to the exploration well on positive Rex Virtual Drilling indications correlating with oil and also other geophysical techniques to de-risk the prospect. The operator PGNiG has a 40 per cent interest, while AkerBP holds a 30 per cent interest in the licence. The licence was awarded in February 2016 in the Awards in Predefined Areas (APA) 2015.

About Lime Petroleum AS

Lime Petroleum AS (“LPA”) was established in 2012 and is located in Oslo. The company was pre-qualified in February 2013 and has since built a portfolio of licences focusing on mature areas close to existing oil and gas infrastructure. The company had participated in the Rolvsnes discovery in PL338C in the North Sea and had monetised this asset recently. The organisation has vast expertise in oil & gas exploration and production, both from Norway and internationally. The company uses high-quality seismic data and the unique Rex Virtual Drilling technology together with conventional seismic attributes and analysis of the petroleum systems in its exploration efforts. LPA benefits from the Norwegian tax system with 78 per cent cash-back for exploration expenditures, which has been a huge success since introduced in 2005, enabling a diversity of companies drilling sufficient number of wells to result in a string of significant discoveries in all provinces of the Norwegian Continental Shelf.

This press release may contain projections and forward-looking statements that reflect the Company's current views with respect to future events and financial performance. These views are based on estimates and current assumptions which are subject to business, economic and competitive uncertainties and contingencies as well as various risks and these may change over time and in many cases are outside the control of the Company and its directors. Actual future performance, outcome and results may differ materially from those expressed in forward-looking statements as a result of a number of risks, uncertainties and assumptions. Representative examples of these factors include (without limitation) general industry and economic conditions, interest rate trends, cost of capital and capital availability, availability of real estate properties, competition from other companies and venues for the sale/distribution of goods and services, shifts in customer demands, customers and partners, changes in operating expenses, including employee wages, benefits and training, governmental and public policy changes and the continued availability of financing in the amounts and the terms necessary to support future business. No assurance can be given that future events will occur, that projections will be achieved, or that the Company's assumptions are correct. The Company does not assume any responsibility to amend, modify or revise any forward-looking statements, on the basis of any subsequent developments, information or events, or otherwise. These statements can be recognised by the use of words such as "expects," "plans," "will," "estimates," "projects," or words of similar meaning. Such forward-looking statements are not guarantees of future performance and actual results may differ from those forecast and projected or in the forward-looking statements as a result of various factors and assumptions. There is no assurance that Rex Virtual Drilling will consistently deliver accurate analyses and results, as it is dependent on many external factors such as data quality. Shareholders and investors are cautioned not to place undue reliance on these forward-looking statements, which are based on the current view of management of future events.

About Rex International Holding

Rex International Holding was listed on Singapore Exchange Securities Trading Limited's Catalist Board on 31 July 2013. The Company de-risks its portfolio of exploration and development assets using its proprietary liquid hydrocarbon indicator Rex Virtual Drilling technology to identify the location of oil reservoirs in the sub-surface through analysis of seismic data. Since the Company's listing in July 2013, the Group has achieved two offshore discoveries, one each in Oman and Norway. The Group also offers Rex Virtual Drilling screening services to other oil exploration companies as an additional tool to increase the success rate of finding oil.
