

**PRESS RELEASE**

**Rex's subsidiary starts production at Yumna 3 well in Block 50 Oman**

**SINGAPORE, 22 February 2021** – Rex International Holding Limited (“Rex International Holding”, “Rex” or the “Company”, and together with its subsidiaries, the “Group”), a technology-driven oil company, is pleased to refer to the press release issued on 22 February 2021 by its 86.37 per cent subsidiary, Masirah Oil Ltd, which had announced the following:

**“Muscat, 22 February 2021:** Masirah Oil Limited (“Masirah Oil”) is pleased to announce that production has commenced from the third development well drilled in the Yumna Field. The well was spudded on 20 January 2021 and production commenced on 18 February 2021. The well has been tested at a rate of 12,984 stb/d of oil on natural flow through an 80/64” choke.

Yumna 3 encountered hydrocarbons in 10.4 metres of Lower Aruma sandstone with a very good porosity of 23.4 per cent, proving that the good quality reservoir sand is extensive to the South East of Yumna 1, with exceptional permeability of about 2,000 md. The reservoir pressure depletion over the first year of production is around 100 psi, confirming that excellent pressure support is provided by a strong aquifer.

The Shelf Drilling Tenacious jack-up rig has been moved from the Yumna Field to the Zakhera exploration well location which is about 12 km to the south of the Yumna Field.”

Mr Dan Broström, Executive Chairman of Rex, said, “We are very pleased with the Yumna 3 well initial results. The next step is to put all three production wells (Yumna 1, Yumna 2 and Yumna 3) on production simultaneously. For this reason, the processing capacity on the Yumna Mobile Offshore Production Unit (MOPU) is being upgraded to handle up to 30,000 bpd. We expect the upgrade to be completed in March 2021. The operating costs for the field are estimated at USD 80,000 per day, which with higher production levels, will translate into lower production cost per barrel.

MOL holds a 100 per cent interest in Block 50 Oman and is the operator.

stb/d: stock tank barrels per day

md: millidarcy, measure of permeability, with units of area

psi: pound-force per square inch; a unit of pressure

bpd: barrels per day

--- END ---

*This press release may contain projections and forward-looking statements that reflect the Company's current views with respect to future events and financial performance. These views are based on estimates and current assumptions which are subject to business, economic and competitive uncertainties and contingencies as well as various risks and these may change over time and in many cases are outside the control of the Company and its directors. Actual future performance, outcome and results may differ materially from those expressed in forward-looking statements as a result of a number of risks, uncertainties and assumptions. Representative examples of these factors include (without limitation) general industry and economic conditions, interest rate trends, cost of capital and capital availability, availability of real estate properties, competition from other companies and venues for the sale/distribution of goods and services, shifts in customer demands, customers and partners, changes in operating expenses, including employee wages, benefits and training, governmental and public policy changes and the continued availability of financing in the amounts and the terms necessary to support future business. No assurance can be given that future events will occur, that projections will be achieved, or that the Company's assumptions are correct. The Company does not assume any responsibility to amend, modify or revise any forward-looking statements, on the basis of any subsequent developments, information or events, or otherwise. These statements can be recognised by the use of words such as "expects," "plans," "will," "estimates," "projects," or words of similar meaning. Such forward-looking statements are not guarantees of future performance and actual results may differ from those forecast and projected or in the forward-looking statements as a result of various factors and assumptions. Shareholders and investors are cautioned not to place undue reliance on these forward-looking statements, which are based on the current view of management of future events.*

**About Rex International Holding**

*Rex International Holding was listed on Singapore Exchange Securities Trading Limited's Catalist Board on 31 July 2013. The Company de-risks its portfolio of exploration and development assets using its proprietary liquid hydrocarbon indicator Rex Virtual Drilling technology, which can pinpoint the location of oil reservoirs in the sub-surface using seismic data. Since the Company's listing in July 2013, the Group has achieved four offshore discoveries, one in Oman and three in Norway. The Group also offers Rex Virtual Drilling screening services to other oil exploration companies as an additional tool to increase the success rate of finding oil.*
