

GOLDEN ENERGY AND RESOURCES LIMITED
(Incorporated in the Republic of Singapore)
Company Registration No. 199508589E
(the “**Company**”)

**COMPLETION OF STANMORE RESOURCES LIMITED’S ACQUISITION OF 80 PER CENT.
INTEREST IN BHP MITSUI COAL PTY LTD**

The Board is pleased to announce that the Company’s subsidiary, Stanmore Resources Limited (“**Stanmore**”) (ASX:SMR) had on 3 May 2022 completed the previously announced acquisition from BHP Minerals Pty Ltd of its 80% interest in BHP Mitsui Coal Pty Ltd (“**BMC**”).

Stanmore has released an announcement via the Australian Securities Exchange (“**ASX**”) in relation to the completion, which is found in the appended ASX announcement.

Commenting on the successful completion of the acquisition, Mr. Fuganto Widjaja, Executive Chairman of GEAR, said

“The successful acquisition marks a transformational milestone for GEAR and is a clear testament to the strong M&A and execution capabilities of our teams at GEAR and Stanmore.”

BMC will complement our current metallurgical coal platform to include high quality, low cash cost reserves with long mine life, which are well developed, capitalised and are cash generating in Australia. With this successful completion, GEAR will become one of the largest global producers of metallurgical coal via Stanmore and expects significant contributions from this segment going forward, rapidly accelerating our diversification strategy.”

STANMORE COMPLETES ACQUISITION OF 80% INTEREST IN BMC

Stanmore Resources Limited (“Stanmore” or the “Company”) (ASX: SMR) refers to its previous announcements regarding its agreement with BHP Minerals Pty Ltd (“BHP”) to acquire BHP’s 80% interest in BHP Mitsui Coal Pty Ltd (“BMC”) (the “Acquisition”).

The Company is pleased to announce that it has today successfully completed the Acquisition on schedule and in accordance with the sale agreement.

Commenting on the successful completion of the Acquisition, CEO Marcelo Matos said:

“The completion of this transaction marks an important milestone in our history. Metallurgical and PCI coal prices remain at historically high levels and Stanmore will benefit from those prices with the addition of production of approximately 10 million tonnes of marketable metallurgical quality coal creating substantial additional value for the Company.”

The amounts payable by Stanmore on completion of the Acquisition were funded by Stanmore’s cash reserves following its successful pro-rata entitlement offer in March 2022 and Stanmore and its subsidiaries fully drawing down the debt facilities including the US\$625 million acquisition debt facility (refer to announcement dated 7 January 2022). Full funding is in place for the purchase consideration as well as for a completion adjustment of approximately US\$200 million for working capital as a result of higher BMC working capital balances acquired at completion driven primarily by stronger market conditions, which should translate into a healthier balance sheet and cash position at BMC post completion than envisaged by Stanmore when the sale agreement was signed.

Approval

This announcement has been approved for release by the Board of Directors of Stanmore.
