Important Notice

This presentation is for information only and does not have regard to your specific investment objectives, financial situation or your particular needs. This presentation does not constitute an invitation, offer or solicitation of any offer to sell or subscribe for, acquire or purchase any units in Mapletree Pan Asia Commercial Trust (“MPACT” and units in MPACT (“Units”)).

The past performance of the Units and MPACT is not indicative of the future performance of MPACT or MPACT Management Ltd. (“Manager”). The value of Units and the income derived from them, if any, may rise or fall. The Units are not obligations of, deposits in, or guaranteed by the Manager, DBS Trustee Limited (as trustee of MPACT) (the “Trustee”) or any of their respective related corporations or affiliates. An investment in the Units is subject to investment risks, including the possible loss of the principal amount invested. Investors have no right to request the Manager to redeem their Units while the Units are listed. It is intended that unitholders may only deal in their Units through trading on Singapore Exchange Securities Trading Limited (the “SGX-ST”). Listing of the Units on the SGX-ST does not guarantee a liquid market for the Units.

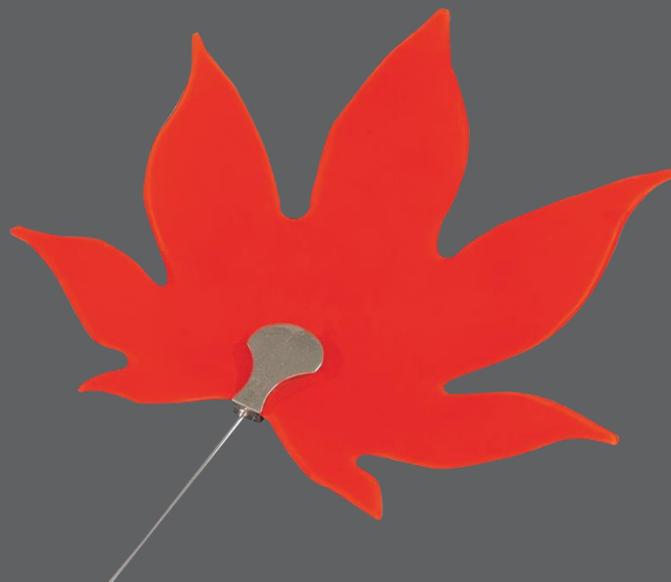

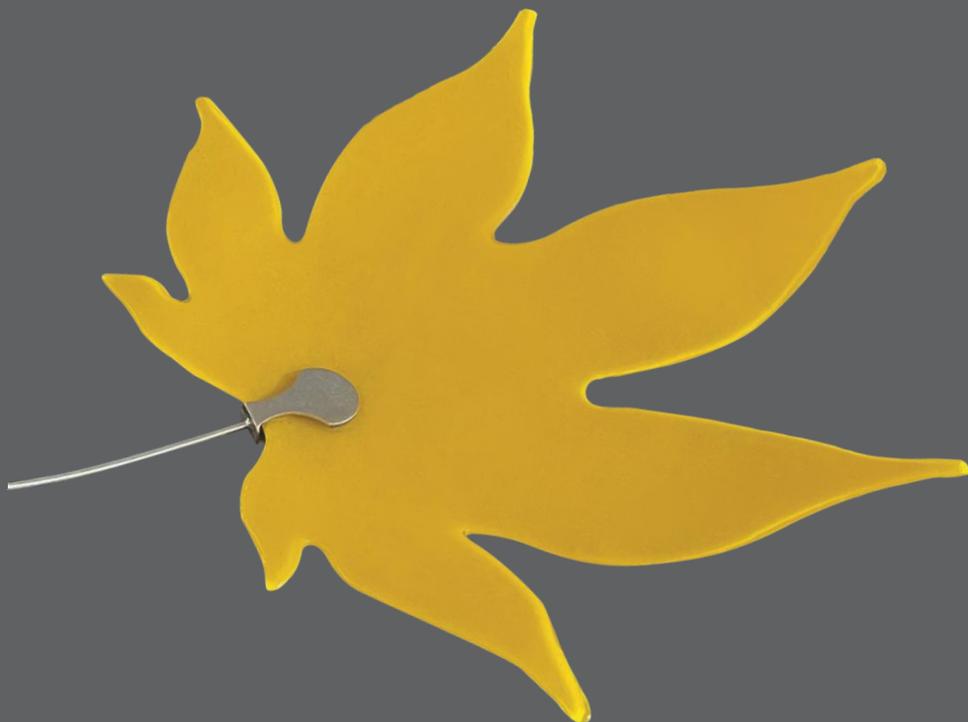

This presentation may also contain forward-looking statements and financial information, including those that involve risks and uncertainties. Such forward-looking statements and financial information involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of MPACT or the Manager, or industry results, to be materially different from any future results, performance or achievements, expressed or implied by such forward-looking statements and financial information. Such forward-looking statements and financial information are based on numerous assumptions regarding the Manager’s present and future business strategies and the environment in which MPACT or the Manager will operate in the future. Actual future performance, outcomes and results may differ materially from these forward-looking statements and financial information. Because these statements and financial information reflect the Manager’s current views concerning future events, these statements and financial information necessarily involve risks, uncertainties and assumptions. These forward-looking statements speak only as of the date of this presentation. No assurance can be given that future events will occur, that projections will be achieved, or that assumptions are correct.

Representative examples of these factors include (without limitation) general industry and economic conditions, interest rate trends, cost of capital, occupancy rate, construction, development risks, capital availability, competition from similar developments, shifts in expected levels of property rental income, changes in operating expenses (including employee wages, benefits and training costs), property expenses, governmental, public policy changes and the continued availability of financing. You are cautioned not to place undue reliance on these forward-looking statements, which are based on the Manager’s current view of future events.

Nothing in this presentation should be construed as financial, investment, business, legal or tax advice and you should consult your own independent professional advisors. Neither the Manager nor any of its affiliates, advisers or representatives shall have any liability whatsoever (in negligence or otherwise) for any loss howsoever arising, whether directly or indirectly, from any use, reliance or distribution of this presentation or its contents or otherwise arising in connection with this presentation. This presentation shall be read in conjunction with MPACT’s financial results for First Half Financial Period ended 30 September 2022 in the SGXNET announcement dated 27 October 2022.

The directors of the Manager (including those who may have delegated detailed supervision of this presentation) have taken all reasonable care to ensure that the facts stated and opinions expressed in this presentation which relate to MPACT and/or the Manager are fair and accurate and that there are no other material facts not contained in this presentation the omission of which would make any statement in this presentation misleading. The directors of the Manager jointly and severally accept responsibility accordingly.

Where any information has been extracted or reproduced from published or otherwise publicly available sources or obtained from a named source, the sole responsibility of the directors of the Manager has been to ensure through reasonable enquiries that such information is accurately extracted from such sources or, as the case may be, reflected or reproduced in this presentation.

1. On committed basis for all leases with expiry dates in FY22/23, rental reversion is calculated based on the change in the average effective fixed rental rates of the new leases compared to the expiring leases. It takes into account rent-free periods and step-up rental rates over the lease term (if any). It excludes rental rates for short-term leases that are less than or equal to 12 months where rental rates are not reflective of prevailing market rents that are on normal lease tenure basis.

Outlook

Singapore Retail¹

- Retail indicators continued to show signs of recovery with the lifting of COVID-19 restrictions, further supported by improved business and consumer confidence in Q1 and Q2 2022.
- Approximately 1.23 million square feet of space is expected to be delivered from 2022 to 2024, translating to 412,000 square feet per year, lower than the past five-year annual average of 715,000 square feet.
- Consequently, the limited upcoming supply should support improvements in occupancy levels and rents and retail absorption is expected to recover. However, global inflationary pressures, rising energy prices, interest rate hikes, supply chain disruptions, and manpower shortages will pose challenges.

Singapore Office¹

- Moderate economic growth and eased workplace restrictions will boost confidence in office leasing and expansion plans. The CBD is expected to have the strongest rebound due to resilient demand by traditional occupier sectors.
- Approximately 4.44 million square feet of space is expected to be delivered from 2022 to 2024, translating to 1.48 million square feet per year, lower than the past five-year annual average of 1.57 million square feet.
- Island-wide rents are expected to continue on an upward growth trajectory on the back of diversified occupier demand and relatively limited supply.

Singapore Business Parks¹

- Robust demand for business park space has been driven by high-value and knowledge industries, on the back of eased restrictions and output expansions in industrial sectors, and is expected to continue for the next few years.
- Approximately 3.17 million square feet of space is expected to be delivered from 2022 to 2024, translating to 1.05 million square feet annually predominately in the Rest of Island submarket. The Fringe submarket, where MBC is located, is not expected to be significantly impacted by the upcoming supply with its locational advantage and scale. Furthermore, about half of the upcoming developments are purpose-built to companies or catered for specialised sectors.
- The limited supply, coupled with high demand, has supported rental growth in Q1 and Q2 2022. Rental growth is expected to continue in the Fringe submarket particularly favouring the newer and higher specification developments that are preferred by tenants.

1. Source: Colliers, 11 October 2022

Hong Kong Retail¹

- The alleviation of the fifth wave of COVID and Phase II of the consumption voucher distribution scheme in August 2022 have lent support on retail sales in the short term.
- While a full-scale border re-opening has not been implemented, quarantine requirements for travellers have been removed. However, visitors are still subject to medical surveillance for three days and COVID-19 testing for seven days. As Mainland Chinese are still required to be quarantined upon returning home, a significant uptick in visitors from Mainland is unlikely until such requirements are also lifted. The locals will remain the key source of consumption in 2022.
- Vacancy levels are expected to remain largely unchanged for the rest of the year. A major recovery of rental rates for the retail market is not expected for this year and will depend on the return of visitors and an improvement in the general economic situation.

Beijing Office¹

- Market activities have dropped significantly due to lockdowns. Q3 2022 recorded negative net absorption largely driven by downsizing of some prominent internet companies and vacating by several state-owned enterprises.
- Market activity has gradually resumed since the end of May and demand is expected to rebound with the introduction of a normalised COVID prevention protocol. However, further recovery this year will be hindered as internet companies slow down expansion and look to acquire buildings for their own use.

Shanghai Business Parks¹

- With the end of lockdowns, leasing activities in Shanghai business parks have resumed in June 2022. Strong growth recorded by sectors such as biomedicine, integrated circuits and AI is expected to drive robust leasing demand. Colliers expects rents of Shanghai business parks to grow 1.8% year-on-year in 2022.
- Looking forward, the influx of supply in H2 2022 is likely to push up vacancy rates and limit rental growth in the short term.

Japan Office¹

- Rents have declined in general across Greater Tokyo and this rental downtrend is expected to continue due to the longer free rent periods across Greater Tokyo.
- New supply in 2023 will be significant in the five central wards of Tokyo, particularly in the Minato ward. However, the impact of new supply is not expected to be significant in the 18 wards of Tokyo, Yokohama and Chiba markets.
- Accordingly, vacancies are expected to increase in the five central wards of Tokyo, while the occupancy levels in the 18 wards of Tokyo, Yokohama and Chiba are expected to remain stable.

Seoul Office¹

- Demand from tech companies, one of the major leasing drivers in GBD, is expected to continue to grow. Rental levels are also expected to continue to increase with a lack of significant supply in GBD up until 2025.
- GBD's vacancy rates are now the lowest in Seoul compared to the other districts. With limited new supply, the vacancy rate in GBD is expected to remain low.

Conclusion

- Although positive indicators have been observed in most of the markets, the external economic environment has deteriorated due to the ongoing Russia-Ukraine conflict. Increasing inflationary pressures especially from rising energy prices and interest rate hikes, as well as volatilities in the global financial markets could heighten downside risks.
- The Manager will keep its focus on maintaining healthy portfolio occupancy and steady rental income, while managing costs in a sustainable manner.
- In navigating the volatile interest rate environment, the management priority will be to ensure reasonable certainty over interest expenses while achieving an optimal balance of risks and costs
- MPACT, as a flagship commercial REIT with stability and scale across key gateway markets of Asia, is expected to stay resilient through economic cycles in the long term. The enlarged scale and stronger financial muscles will also enable the vehicle to pursue capital recycling, asset enhancement and acquisition opportunities.

Singapore Office – Market Overview

Leasing demand and rent growth picked up pace in Q1 and Q2 2022 with economic recovery and back-to-office momentum

Key Office Districts

- The rising rents and tight vacancies in the CBD over the past few years have seen a move towards a decentralised business operation model.
- Our office assets are predominantly in the HarbourFront/Alexandra and Tanjong Pagar Micro-markets. In the longer term, with the gradual completion of projects under the Greater Southern Waterfront master plan, the myriad of new land uses, as well as refreshed supporting amenities and facilities, will position the precinct as the gateway to “Future Live, Work and Play”.

Singapore Business Parks – Market Overview

Robust demand for business park space expected to continue for the next few years

Existing and Planned Business Park Clusters

- Business parks are campus-like business spaces that occupy at least five hectares of land. The campuses typically have lush greenery, a full suite of amenities and facilities and high quality building designs. These spaces are generally occupied by businesses that are engaged in advanced technology, research and development in high value-added and knowledge intensive activities.
- Mapletree Business City, located in the Fringe Submarket, and features Grade A building specifications within an integrated business hub with a full suite of contemporary amenities.

Planned New Supply

Hong Kong Retail – Market Overview

2022 GDP outlook downgraded amid weaker 1H performance and deterioration of global economic prospects

Key Retail Areas

- Festival Walk is directly linked to the Kowloon Tong station, the interchange for the local underground Kwun Tong Line of the Mass Transit Railway of Hong Kong. With its direct connection to the MTR, Festival Walk is easily accessible from the north-eastern part of the New Territories, the whole of Kowloon Peninsula, Hong Kong Island and across the border from the Shenzhen area of China.
- The direct rail connectivity to the Shenzhen border will support on-going growth in the number of shoppers coming from China. Festival Walk also offers excellent direct access via private transport, providing 830 car parking spaces that are open 24 hours a day, seven days a week.

Beijing Office Market – Market Overview

Market activities have dropped significantly due to lockdowns but have gradually resumed since May 2022

Key Office Districts

- Eight major office sub-markets in Beijing
- The Lufthansa district of Beijing, where Gateway Plaza is located, is one of the most established international commercial zones in Beijing.
- Lufthansa has a strong presence of international schools, western supermarkets, international dining options and shopping malls.
- Coupled with its good accessibility to the Beijing International Airport, the Lufthansa district is a popular area for expats and multinational companies (MNCs).

Shanghai Business Parks – Market Overview

Leasing activities have resumed in June 2022 with the end of lockdowns

Core and Emerging Business Parks

- There are six key business parks as well as other emerging business parks in Shanghai.
- Predominantly located in decentralised locations, which are increasingly popular among corporates. Rents are typically around half the level of traditional offices.
- At Zhangjiang Science City where Sandhill Plaza is located, biomedical, semi-conductors and technology companies have clustered to create an innovation hub.

Greater Tokyo Office – Market Overview

Impact of COVID on the economy is weakening but prolonged spike in oil prices and fluctuations in yen could negatively impact the economy

Map of Office Markets

- Greater Tokyo Area's office market comprises Tokyo 23 wards (which includes the Tokyo Central 5 wards), Chiba City and Yokohama City.
- Tokyo's five central wards are home to the largest agglomeration of office buildings and the headquarters of many global enterprises.
- More companies have set up subsidiaries or satellite offices in the surrounding regions outside of Tokyo such as Chiba and Yokohama to ensure business continuity.

Planned New Supply
