These risk factors may cause you to lose some or all of your investment, and your principal may be at risk:	Please refer to "Risk Factors" section of the Prospectus and Section D of Schedule 23 of the Prospectus for further details.
Market and Credit Risks	
<ul style="list-style-type: none"> • Market prices for shares may be different from their NAV – The Singapore Shares traded on the SGX-ST will be transacted on a willing-buyer-willing-seller basis at market prices throughout the trading day. Liquidity Risks	
<ul style="list-style-type: none"> • Most of the trading activity for shares of Class 1C in Singapore is expected to occur on the SGX-ST. • The secondary market (i.e. the SGX-ST) may be illiquid – The Sub-Fund shall ensure that at least one Designated Market Maker(s) ("DMM") is appointed at all times to provide for an adequately liquid market for the Singapore Shares on the SGX-ST. However, there can be no assurance as to the price at which a market will be made or that a liquid secondary market on the SGX-ST will exist for the Singapore Shares. • The Singapore Shares may be compulsorily repurchased in certain events – If the Singapore Shares are delisted from the SGX-ST or the CDP is no longer able to act as the depository, the Singapore Shares in your securities account with the CDP or held by the CDP may be repurchased (compulsorily or otherwise): (i) by the DMM at a price calculated by reference to the NAV of the Sub-Fund; or (ii) in such other manner as the Company may consider appropriate. The currencies of some emerging markets are controlled and there may be risks of limited liquidity in these markets. • Securities lending, buy-sell or sell-buy back transactions and repurchase and reverse repurchase agreement transactions – There can be no assurance that the objective sought to be obtained from such use will be achieved. The Sub-Fund may be exposed to a net counterparty risk and possible resulting loss in case of default or insolvency of the relevant counterparty. • There may be additional risks associated with investment in emerging markets – Investments in the markets to which the Reference Index relates are currently exposed to certain risks (for example, due to investment ceiling limits, constraints imposed on trading of listed securities etc.) pertaining to emerging markets generally. The laws and regulations of emerging markets may be less developed and may be subject to interpretation. There can be no assurance of obtaining effective enforcement of rights through legal proceedings and generally the 	Please refer to "Foreign exchange risks" and "Specific risks in relation to Direct Replication Funds" sections of the Prospectus and "Additional risks associated with investment in emerging markets" in Section D(3) of Schedule 23 of the Prospectus for further details.

Foreign investment in emerging economies' primary and secondary securities markets is often still relatively new and much of the relevant securities laws may be ambiguous. These factors could negatively affect the NAV of the Sub-Fund.</p>
