Singapore, 7 August 2025 – SGX Catalist-listed Abundance International Limited (the “**Company**” and together with its subsidiaries, the “**Group**”) today announced its results for the half year ended 30 June 2025 (“**1H2025**”).

Comparing 1H2025 to the half year ended 30 June 2024 (“**1H2024**”):

- Revenue decreased by US\$99.3 million to US\$258.4 million from US\$357.7 million
- LBITDA of US\$0.5 million down by US\$1.9 million from EBITDA of US\$1.4 million
- Loss after tax of US\$1.1 million down by US\$1.6 million from profit after tax of US\$0.5 million

The decrease in revenue is mainly due to the weaker global economic outlook in 1H2025 resulting in reduced customer demand as well as a drop in the average selling price of chemical products as compared to 1H2024.

Managing Director, Mr Sam Kok Yin said, “Barring unforeseen circumstances including global economy recession, fluctuations in chemical prices or significant rises in freight costs, we expect that the OSC Group’s business will be stable in the next 12 months with the continued support from our customers, suppliers and bankers.”

Mr Sam added, “As announced on 20 January 2025, our wholly owned subsidiary Abundance Investments Pte. Ltd. (“**AIPL**”) has entered into a joint venture agreement to build and own a hundred-ton facility to demonstrate the commercial-scale production of furan dicarboxylic

methyl ester from glucose that is derived from agriculture waste and non-grain biomass. As announced on 30 June 2025, AIPL and the JV Partners have mutually agreed to terminate the JVA. We intend to explore this project again upon the completion and operational readiness of the hundred-ton facility designated for the commercial-scale production of FDME.

Separately, as announced on 20 May 2025, we have sold our 12.74% equity in the Sunrise Group for RMB62 million (approximately US\$8.7 million). After taxes and stamp duty, the net consideration amounts to RMB58 million (approximately US\$8.1 million). Our original investment cost was RMB20 million.

We will continue to explore and evaluate other chemical related investment opportunities, striking a balance between long- and short-term investments. We will also seek appropriate exits for our investments when the time is right.”
