### **SGX-LISTED CIVMEC SECURES AUD68 MILLION WORTH OF NEW CONTRACTS**

**SINGAPORE, 2 June 2015** – Integrated construction and engineering services provider **Civmec Limited** (“**Civmec**”) announced today that it has secured new projects and additional work for existing contracts worth AUD68 million, including work for mining giant Rio Tinto.

The clients and new projects secured are as follows:

- **Rio Tinto:** Vertical package to deliver a Pilbara fuel facility
- **Sedgman:** Structural, mechanical and piping works at Alcoa’s Kwinana filtration plant
- **GE Oil & Gas:** Fabrication and testing of Gorgon’s 34 inch Subsea Pig Launcher/Receiver
- **FMC Technologies:** Fabrication, surface treatment and testing of a production manifold for the Persephone Project

The increased scope for existing projects includes:

- **Brookfield Multiplex:** Precast concrete components for the new Perth Stadium
- **Roy Hill:** Bulk earthworks and 36kms of trenching

Mr. Patrick Tallon, Chief Executive Officer of Civmec, said: “We are delighted to announce these new awards with existing clients and feel this highlights a satisfaction in the market for our service offering and demonstrates the breadth and depth of our capabilities, along with our commitment to providing our clients with the highest levels of service.”

**RIO TINTO:** Under a direct Rio Tinto contract, Civmec will carry out the development of a new fuel facility located between Rio Tinto’s Brockman 2 and Brockman 4 Mine Operations in the Pilbara region of Western Australia.

Civmec will commence work on the project immediately, with an expected completion date of September 2015 and will involve up to 90 workers at its peak.

The vertical package project involves fabrication, civil works, structural, mechanical and piping (SMP) and electrical works. This includes the construction of a facility to unload 16 Rail Tank Cars (RTCs) simultaneously into diesel storage tanks (constructed by others), along with a facility to load road tankers. It also includes construction of a number of related facilities for minor truck maintenance, and the installation of a fuel management system and fire protection system.

---

**SEDGMAN:** Civmec will be undertaking structural, mechanical, platework and piping installation works for a new filtration plant at Alcoa's Kwinana operations, south of Perth.

The project will involve peak manning of 140 workers, building and installing tanks and filter equipment including six filter presses, each weighing in excess of 135 tonnes. Work is commencing immediately, with completion scheduled for November 2015.

**GE OIL & GAS:** Civmec will be undertaking the fabrication and testing of Gorgon's new 34 inch Subsea Pig Launcher/Receiver (SSPLR) on behalf of GE Oil & Gas in two stages.

Stage 1 works will commence immediately and will involve the fabrication of a 34 inch barrel for a Subsea Pig Receiver from supplied materials, with the complete structure weighing 104 tonnes. Completion of Stage 1 is scheduled for November 2015. Fabrication of a 6 inch kicker header, testing of the SSPLR and retro fitting will be carried out at a later date as part of Stage 2 works.

**FMC TECHNOLOGIES:** Civmec will immediately commence work on behalf of FMC Technologies for the fabrication, surface treatment and testing of a production manifold.

The manifold is designed for installation at the Persephone Project, located on Australia's North West Shelf and is scheduled for completion by March 2016.

**BROOKFIELD MULTIPLEX:** Following on from Civmec being awarded a major contract for the fabrication and erection of steelwork for the structure and roof of the new Perth Stadium (as announced to the market on 4 March 2015), Brookfield Multiplex has selected the Company to supply and install approx. 5,300 tonnes of precast concrete units for the new Perth Stadium.

Work on the project will commence in July 2015, with completion due by May 2016.

**ROY HILL:** Civmec will be carrying out bulk earth works and trenching on behalf of SCT (Samsung C&T) at the Roy Hill iron ore project in the Pilbara region of Western Australia.

The project includes excavation and backfilling of in excess of 36 km of trenching, installation of conduits and cable into trenches, and provision of other electrical services. Work on the project is commencing immediately, with completion scheduled for mid-2015.
