#### **Notes to the Condensed Interim Financial Statements**

#### 1 Corporate information

Charisma Energy Services Limited (the "Company") is incorporated in Singapore and whose shares are publicly traded on the Catalist of the Singapore Exchange.

These condensed interim consolidated financial statements of the Group as at and for the period ended 30 September 2023 comprise the Company and its subsidiaries (together referred to as the "**Group**" and individually as "**Group Entities**") and the Group's interest in joint ventures.

The principal activities of the Company are those of investment holding and the provision of management services to its subsidiaries. The principal activities of the Group are mainly generating and sale of energy and power generation services.

#### 2 Going concern

The Group incurred a net loss of US\$368,000 (30 September 2022: US\$8,068,000) for the financial period ended 30 September 2023. As at 30 September 2023, the Group was in a net liability position of US\$42,974,000 (2022: US\$42,904,000) and in a net current liability position of US\$61,815,000 (2022: US\$63,189,000) respectively. The net current liability position was a result of certain liabilities being reclassified from non-current to current as the Group did not meet the repayment schedule, financial covenants and the general undertaking imposed by the lenders.

In the assessment of the appropriateness of going concern assumption used in the preparation of the financial statements, the directors of the Company have considered future inflows of fresh investment funds from the conditional subscription agreement with an investor, restructuring plans to be agreed with creditors and lenders, continuous support from shareholders, as well as the expected cash flows from the Group's continuing operations and asset divestment plans.

On 10 January 2022, the Company entered into a conditional subscription agreement (the "CSA") with an investor (the "Investor") for the subscription of new ordinary shares amounting and share options. The Company, the creditors and the Investor were not able to reach an agreement in relation to the terms and conditions of the Proposed Debt Restructuring under the CSA, pursuant to which, the Longstop Date of the CSA had lapsed on 9 July 2022. Notwithstanding the lapse of the Longstop Date of the CSA, the Company remained engaged in discussions with all of its creditors and the Investor, to evaluate and assess all available options.

On 18 January 2023, the Company entered into a new conditional subscription agreement (the "New CSA") with the same Investor for the subscription of new ordinary shares amounting to S\$13,576,000 and share options amounting to S\$16,291,200.

Under the New CSA, the Company will undertake the following:

- (a) divestments of its existing assets and quoted securities (the "Proposed Divestments") such that pursuant to the Proposed Divestments, the Company will retain its ownership in the holding entities of its operations in Sri Lanka and the operating companies in Sri Lanka (the "Sri Lanka Sub-Group") (being the owners of the 13 units of mini-hydroelectric power plants in Sri Lanka with a combined capacity of 43.46 megawatt (the "Hydro-Power Plants")), together with their receivables, cash and inventories (including the Hydro-Power Plants) (the "Remaining Assets");
- (b) propose a scheme of arrangement which will be a compromise or arrangement between the Company and class(es) of certain of its unsecured creditors, in accordance with Section 210 of the Companies Act 1967 of Singapore or the Insolvency, Restructuring and Dissolution Act 2018 of Singapore or under any applicable law(s) of Singapore, to settle certain of the Company's debt (the "Past Liabilities") with a combination of cash and issue of new Shares (the "Scheme of Arrangement");

#### 2 Going Concern (cont'd)

Under the New CSA, the Company will undertake the following (cont'd):

- (c) the creation of a fresh debt obligation to the Subscriber and/or its nominee, in consideration for the Subscriber procuring (a) full discharge of all liabilities and debts owing by the Sri Lanka Sub-Group to Overseas Chinese Banking Corporation ("OCBC"); and (b) OCBC's consent to discharge any and all mortgage, charge, pledge, lien or other security interest securing any obligation of the Sri Lanka Sub-Group for the benefit of OCBC (the "OCBC Loan Restructuring");
- (d) settlement agreement with holders of the redeemable exchangeable preference shares, which is envisaged to comprise a combination of cash and issue of new Shares to such creditors, with such new Shares to be issued under the Scheme of Arrangement and the Bilateral Settlement (the "Settlement Shares") (the "Bilateral Settlement", together with the Scheme of Arrangement, the "Proposed Debt Restructuring"); and
- (e) a share consolidation of all of the issued Shares pursuant to the above transactions (the "**Proposed Share Consolidation**").

The completion of the New CSA and Proposed Debt Restructuring is contingent upon the following:

- (a) completion of the New CSA with the Investor;
- (b) realisation of the forecasted operating cashflow from the Group's continuing businesses; and
- (c) the successful divestment planned for some of the Group's assets, other than the Remaining Assets.

These conditions may affect the Group's ability to meet its debts obligations as and when they fall due, at least in the next 12 months from the reporting date. If for any reason the Group and Company are unable to continue as a going concern, it could have an impact on the Group's and Company's classification of assets and liabilities and the ability to realise assets at their recognised values and to extinguish liabilities in the normal course of business at the amounts stated in the financial statements.

#### Recent Developments for the financial year ending 31 December 2023

In 2023, the Group has made significant progress in its holistic plan to recapitalise and restructure the Group.

The Group had entered into the New CSA as mentioned above. Pursuant to the New CSA and the binding termsheet entered into with the Subscriber, half of the loan owing in respect of the Sri Lanka Hydro assets would be capitalised pursuant to the New CSA while the terms of the remaining loan would also be restructured into a 5-year convertible loan with no principal repayment obligations during the tenure.

In relation to the Bilateral Settlement, the Company, together with its wholly-owned subsidiary, CES Hydro Power Group Pte. Ltd. ("CES Hydro"), had entered into a deed of settlement on 6 June 2023 with holders of the non-voting, redeemable and exchangeable preference shares issued by CES Hydro, Venstar Investments III Ltd (In Members' Voluntary Liquidation) ("Venstar") and Evia Growth Opportunities III Ltd (In Members' Voluntary Liquidation) ("Evia") in relation to the settlement of outstanding arrangements and to terminate the deed of charge under a subscription agreement dated 3 August 2015 signed between CES Hydro, Venstar and Evia.

In relation to the Scheme of Arrangement, the Company had convened a meeting with class(es) of certain of its creditors (the "Scheme Creditors") on 7 June 2023 (the "Scheme Meeting") and at this Scheme Meeting, the Scheme Creditors have, by a majority in number of each class of Scheme Creditors voting, either in person or by proxy on the resolution, representing three-fourths in value of each class of Creditors present and voting, either in person or by proxy on the resolution, approved the Scheme of Arrangement dated 12 April 2023 between the Company and its Scheme Creditors pursuant to Section 210 of the Companies Act.

The Singapore High Court (the "Court") had on 6 July 2023 granted an Order of Court sanctioning the Scheme of Arrangement pursuant to Section 210(4) of the Act. The Company had lodged a copy of the sealed Order of the Court with the Registrar of Companies on 7 July 2023 and with the lodgement, the Scheme is binding on the Company and the Scheme Creditors.

The Group has successfully divested of the two remaining anchor handling tug supply ("AHTS"), the proceeds of which were applied towards reducing the respective secured loans.

#### 2 Going Concern (cont'd)

The Company has on 13 October 2023, entered into a supplemental agreement with the Investor to extend the Longstop Date of the New CSA from 17 October 2023 to 31 March 2024.

In view of the above recent developments, the Company has on 10 November 2023, submitted an application to the Singapore Exchange Securities Trading Limited ("SGX-ST") on the lifting of suspension of trading of the ordinary shares of the Company on the SGX-ST in accordance with Chapter 13 of the Listing Manual Section B: Rules of Catalist of the SGX-ST.

#### 3 Basis of preparation

The condensed interim financial statements for the nine months ended 30 September 2023 have been prepared in accordance with Singapore Financial Reporting Standards (International) ("SFRS(I)") 1-34 Interim Financial Reporting issued by the Accounting Standards Council Singapore. The condensed interim financial statements do not include all the information required for a complete set of financial statements. However, selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Group's financial position and performance of the Group since the last annual financial statements for the year ended 31 December 2022.

The accounting policies adopted are consistent with those of the previous financial year which were prepared in accordance with SFRS(I), except for the adoption of new and amended standards as set out in Note 3.1.

The condensed interim financial statements are presented in United States dollar ("US\$"), which is the Company's functional currency. All financial information presented in United States dollars have been rounded to the nearest thousand, unless otherwise stated.

#### 3.1 New standards and interpretations not yet adopted

A number of new standards, interpretations and amendments to standards that have been published, and are relevant for the Group's annual periods beginning on or after 1 January 2024 and which the Group has not early adopted the new or amended standards and interpretations in preparing these financial statements.

The new SFRS(I)s, interpretations and amendments to SFRS(I)s are as follows:

- Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to SFRS(I) 10 and SFRS(I) 1-28)
- Classification of Liabilities as Current or Non-current (Amendments to SFRS(I) 1-1)
- Classification of Liabilities as Current or Non-current Deferral of Effective Date (Amendments to SFRS(I) 1-1)
- Lease Liability in a Sale and Leaseback (Amendments to SFRS(I) 1-16)
- Non-current Liabilities with Covenants (Amendments to SFRS(I) 1-1)
- Supplier Finance Arrangements (Amendments to SFRS(I) 1-7 and SFRS(I) 7)
- Lack of Exchangeability (Amendments to SFRS(I) 1-21)

The Group is currently assessing the impact of the new SFRS(I)s, interpretations and amendments to SFRS(I)s and plans to adopt the new standards on the recognised effective date.

#### 3.2 Use of estimates and judgements

In preparing the condensed interim financial statements, management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

The significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements as at and for the year ended 31 December 2022.

#### 3 Basis of preparation (cont'd)

#### 3.2 Use of estimates and judgements (cont'd)

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial interim period are discussed as follows:

#### Cash flow forecast

The Group reviews its forecasts of future cash flows in the foreseeable future and the availability of positive cash flows to repay its lenders in the next 12 months. Such an assessment requires the Group to review its operations, including future market demand for its services and its cash deployment in different locations. Significant judgement is required in deriving the Group's forecasts.

#### Valuation of non-financial assets

The Group assesses the impairment of non-financial assets, including property, plant and equipment, right-of-use assets and intangible assets, whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Factors considered important that could trigger an impairment review include (but are not limited) to the following:

- Extended periods of idle capacity;
- Significant decline in market prices;
- Inability to renew contracts upon expiry; and
- Significant adverse industry, regulatory or economic trends.

The complexity of the estimation process and issues related to the assumptions, risks and uncertainties inherent in the application of the Group's accounting estimates in relation to the non-financial assets could affect the amounts reported in the financial statements. If business conditions were different, or if different assumptions were used in the application of this and other accounting estimates, it is likely that materially different amounts could be reported in the Group's financial statements.

#### Valuation of investments in subsidiaries

The Company determines whether there is impairment on the investments in subsidiaries where events or changes in circumstances indicate that the carrying amount of the investments may be impaired. If any such indications exist, the recoverable amount is estimated. The level of allowance is evaluated by the Company on the basis of factors that affect the recoverability of the investments. These factors include, but are not limited to, the activities and financial position of the entities, and market estimates in order to calculate the present value of the future cash flows. The valuation of the investments in subsidiaries are dependent on the outcome of these factors affecting management's forecasts of future cash flows. Actual events that result in deviations from management's estimation may result in higher impairment losses on the investments.

#### Impairment of trade receivables

Based on the Group's historical credit loss experience, trade receivables exhibited significantly different loss patterns for each revenue segment. The Group has applied credit evaluations by customer within each revenue segment. Accordingly, management has determined the expected loss rates by grouping the receivables in each revenue stream. No loss allowance for trade receivables of the Group was recognised as at 30 September 2023 and 31 December 2022.

#### 3 Basis of preparation (cont'd)

#### 3.2 Use of estimates and judgements (cont'd)

Impairment of trade receivables from subsidiary corporations

Impairment loss are measured based on the loss pattern of the receivables and credit risk of the exposure. During the financial year ended 31 December 2022, the Company has recognised loss allowance of US\$923,000 on trade receivables from subsidiary corporations due to uncertainty of recovery. No loss allowance was recognised as at 30 September 2023.

#### 4 Seasonal operations

The Group's businesses are dependent on the weather conditions in Sri Lanka and China during the financial period where the mini hydro power plants and solar photovoltaic power plant are located respectively.

#### 5 Segment and revenue information

The Group's revenue, capital expenditure, assets and liabilities were mainly derived from one single business segment in the business of generating and sale of energy and power generation services.

Other operations include management services, which are not individually material reportable segments.

Information regarding the results of the reportable segment is included below. Performance is measured based on segment profit before tax, as included in the internal management reports that are reviewed by the Group's Chief Executive Officer (the Chief Operating Decision Maker). Segment profit is used to measure performance as management believes that such information is the most relevant in evaluating the results of certain segments relative to other entities that operate within these industries.

#### **Impairment Loss**

The Group continues to face challenging market conditions and uncertain financial performances in the businesses of the respective cash-generating units. In the current period, the identified indicators of impairment on the following cash-generating units that belong to the Energy and Power Services segment:

- Mini hydro power plants ("Hydro Plants CGUs"); and
- Solar Photovoltaic power plant ("Solar Plant CGU")

The Hydro Plants CGUs and Solar Plant CGU belong to the Group entities operating in Sri Lanka and China, respectively. There are 13 mini hydro power plants and 1 solar photovoltaic power plant (collectively "power generation equipment") in the Hydro Plants CGUs and Solar Plant CGU, respectively. For the purpose of impairment assessment, each individual hydro power plant is a stand-alone CGU and the non-financial assets (before impairment loss) allocated to the Hydro Plants CGUs and the Solar Plant CGU are as follows:

	Hydro Pla	ants CGUs	Solar Pla	ant CGU
	30.09.2023 US\$'000	31.12.2022 US\$'000	30.09.2023 US\$'000	31.12.2022 US\$'000

Rights of use assets – office premises	115	47	_	_
	6,003	6,239	12,648	13,780

Management has estimated the recoverable amounts of the Hydro Plants CGUs and Solar Plant CGU based on their value-in-use calculations.

The value in use calculation for the respective CGUs was based on cash flow projections with the following key assumptions:

	<b>Hydro Plants CGUs</b>		Solar Pla	ant CGU
	30.09.2023	31.12.2022	30.09.2023	31.12.2022

Projected efficiency rate	N.A.	N.A.	Average 20 years projected efficiency rate	Average 21 years projected efficiency rate	
Pre-tax discount rate	22%	22%	8.5%	8.5%	

The cash flow projections were based on forecasts prepared by the management taking into account past experience, current and expected weather conditions and legislation. The discount rates applied to the cash flow projections were estimated based on weighted average cost of capital with inputs from market comparables.

Based on the cash flow projections, the derived recoverable amounts of the Hydro Plants CGUs have significantly reduced primarily due to weakening of Sri Lankan Rupee and high discount rate used in view of the prevailing economic situation in Sri Lanka. Accordingly, the impairment losses were identified and allocated to the individual assets of the Hydro Plants CGUs and Solar Plant CGU as follows:

<b>Hydro Plants CGUs</b>		Solar Plant CGU	
30.09.2023 US\$'000	30.09.2022 US\$'000	30.09.2023 US\$'000	30.09.2022 US\$'000

The impairment charge of US\$Nil million (30 September 2022: US\$7.9 million) is derived based on the value-inuse of the CGUs. With the improving economic situation in Sri Lanka, there were no impairment indicators identified by the Company in the financial period ended 30 September 2023. Accordingly, no impairment losses on the Group's CGUs were identified.

In estimating the recoverable amounts of the mini-hydro power plants, the Group assumed the concessions will continue beyond the existing contract periods. However, the assumed tariff rates as well as the plant factor are subject to estimation uncertainties that may result in material adjustments on the mini-hydro power plants' recoverable amounts in future periods.

In estimating the recoverable amounts of the solar photovoltaic power plant, the tariff rates include the Group's entitlement to government subsidies which account for a major portion of total tariff. The timing of settlement of tariff premium, and the collection of such subsidies is subject to allocation of funds by the relevant local government authorities that could take a longer time to settle. The assumed tariff rates, timing of receipt of subsidies as well as the efficiency rate are therefore subject to estimation uncertainties that may result in material adjustments on the solar photovoltaic power plant's recoverable amount in future periods.
