3Q 2022 Business Updates

04 Looking Ahead

CapitaLand Investment

Channelling the energy and flexibility of water in our strategies to embrace new opportunities and create value with our Asian heritage

Business Outlook

- Global economic uncertainty continues to impact financial and property markets worldwide. With inflation remaining high in many markets, numerous central banks continue to raise interest rates seeking to bring it under control. Additionally, on-going global geopolitical tensions are adding greater instability and ambiguity to the economic outlook.
- Given the macroeconomic headwinds and market volatility, CLI continues to exercise patience and prudence in its investments and new business development. At the same time, we continue to ensure that CLI has a strong balance sheet to capture opportunities that may arise in this rapidly changing market.
- CLI's business is anchored by a high-quality global real estate portfolio that generates healthy recurring rentals, as well as fund and lodging management platforms that produce stable fee income. We remain focused on creating value in our properties through asset enhancements and redevelopment and will continue to build our fee-related income from fund management and lodging.
- With deep experience and expertise in CLI's core markets of Singapore, China and India, as well as an increasing presence in South Korea, Japan, Australia, Europe and the US, the Group is well positioned for future growth.
- In line with CLI's growth plans, the Group is committed to achieving Net Zero emissions by 2050. This builds on sustainability targets outlined in CapitaLand's 2030 Sustainability Master Plan and current on-going efforts to reduce carbon, water and waste consumption intensities across our properties and improve renewable energy procurement.
