Revenue was RMB 12.6 billion (US\$ 2.0 billion) compared with RMB 10.0 billion in the same period last year.

The total number of engines sold by GYMCL in 1H 2021 rose by 33.8% to 285,342 units compared with 213,182 units in the same period last year. The increase was mainly due to higher engine sales in the heavy-duty truck and off-road segments, particularly power generator sets, and agricultural and industrial engines.

Gross profit was RMB 1.6 billion (US\$ 251.4 million), compared with RMB 1.5 billion in the same period last year. Gross margin decreased to 12.9% as compared with 14.8% a year ago. The decline in gross margin was mainly attributable to a change in the revenue mix and higher material costs.

Other operating income increased to RMB 111.7 million (US\$ 17.3 million) compared with RMB 105.7 million in the same period last year.

Research and development (“R&D”) expenses increased by 48.2% to RMB 315.7 million (US\$ 48.9 million) compared with RMB 213.0 million in the same period last year. Higher R&D expenses in 1H 2021 were mainly due to an increase in R&D activities (including the rectification costs largely for one engine model), hence higher testing and experimental costs, and consultancy fees for National VI and Tier 4 engines. In addition, products under development for strategic partners as well as new energy products, contributed to higher R&D expenses in 1H 2021 compared with 1H 2020. The total R&D expenditure including capitalized costs, was RMB 450.2 million (US\$ 69.7 million) in 1H 2021 as compared to RMB 402.7 million, representing 3.6% of revenue compared with 4.0% in the same period last year.

Selling, general and administrative (“SG&A”) expenses increased by 21.5% to RMB 920.1 million (US\$ 142.4 million) from RMB 757.4 million in the same period last year. The increase was mainly due to higher warranty expenses, and an increase in activity level compared with the same period last year. SG&A expenses represented 7.3% of revenue for 1H 2021 compared with 7.6% in the same period last year.

Operating profit decreased by 18.5% to RMB 499.8 million (US\$ 77.4 million) from RMB 613.2 million in the same period last year. The operating margin was 4.0% compared with 6.2% in the same period last year.

Finance costs increased to RMB 68.4 million (US\$ 10.6 million) from RMB 63.2 million in the same period last year.

Net profit attributable to equity holders of the Company was RMB 253.7 million (US\$ 39.3 million) compared with RMB 305.7 million in the same period last year.

Basic and diluted earnings per share were RMB 6.21 (US\$ 0.96) compared with RMB 7.48 in the same period last year.

Basic and diluted earnings per share for 1H 2021 and 1H 2020 were based on a weighted average of 40,858,290 shares.

- Cash and bank balances were RMB 5.7 billion (US\$ 876.6 million) compared with RMB 6.4 billion at the end of 2020;
- Trade and bills receivables were RMB 10.6 billion (US\$ 1.6 billion) compared with RMB 8.1 billion at the end of 2020;
- Inventories were RMB 3.8 billion (US\$ 590.5 million) compared with RMB 4.5 billion at the end of 2020;
- Trade and bills payables were RMB 8.5 billion (US\$ 1.3 billion) compared with RMB 7.5 billion at the end of 2020;
- Short-term and long-term bank borrowings were RMB 2.4 billion (US\$ 367.3 million) compared with RMB 2.2 billion at the end of 2020.

Mr. Weng Ming Hoh, President of China Yuchai, commented, “We experienced robust growth in many of our target markets in the first half of 2021. Our heavy-duty truck engine unit sales (excluding gasoline-powered and electric-powered vehicles) grew by 33.3%. And our off-road unit sales grew by 60.7% with strong growth in power generator sets, and agricultural and industrial engines.”

“Part of the engine market growth was due to the pre-buy of National V-compliant emission engines before the more stringent National VI emission standards become nationally mandated during 2021. We expect the market of commercial vehicle engines to slow after a strong pre-buying in 1H 2021. We however have a portfolio of National VI(a) engines to meet the Chinese National VI emission standards.”

“We paid a cash dividend of US\$1.70 per common share in early July 2021. Building and maintaining our financial strength to support our growth and new product development is a top priority during this period of automotive technology change,” Mr. Hoh concluded.
