*Includes a one-off impairment loss of a trade debtor of US$1.4 million

Singapore, 7 August 2019 - SGX Mainboard-listed Excelpoint Technology Ltd ("Excelpoint" or "the Group") announces a revenue of US$231.1 million and a profit after tax of US$0.2 million for 2Q2019.

This quarter remained slow due to significant market volatilities such as the continued US-China trade tensions and a weaker economic climate, which has resulted in a challenging business operating environment.

Commenting on the Group’s overall performance for first half of 2019, Mr. Albert Phuay Yong Hen, Chairman and Group Chief Executive Officer, said, "The US-China trade tensions, alongside a weaker economic climate has affected the business environment within the electronics industry, which has inevitably impacted our business for the first half of 2019. We are closely monitoring market developments and remain confident that with our value-added technical capabilities, and strong business presence within the Asia Pacific region, we can capture rising opportunities. As we exercise caution in our business in view of the current volatilities, we are also focusing on long-term strategies of pursuing higher value business opportunities through strategic alliances to aid the business and enhance shareholder value."

The Group’s revenue decreased by 36.2% from US$362.2 million to US$231.1 million and gross profit decreased by 21.8% from US$20.0 million to US$15.7 million, mainly due to lower sales from the Singapore and Hong Kong business units. However, gross margin improved by 1.3% from 5.5% to 6.8% due to product mix.
Sales and distribution costs decreased by 15.7% from US$10.4 million to US$8.8 million, and general and administrative expense decreased by 25.5% from US$5.2 million to US$3.9 million. These were mainly due to lower staff cost and lower net foreign exchange loss in 2Q2019 arising from the translation of balances denominated in foreign currency into functional currency.

Impairment losses on financial assets increased by US$1.4 million. This was due to allowance for doubtful trade debts.

Interest expense decreased by 14.2% from US$1.7 million to US$1.5 million, due to lower borrowings.

Overall, the Group reported profit after taxation of US$0.2 million for 2Q2019.
