Upon any transaction that is subject to, and that complies with the provisions of, this "*Merger, Consolidation and Sale of Assets*" covenant, the successor Person formed by such consolidation or into or with which the Issuer is merged, shall succeed to, and be substituted for (so that from and after the date of such transaction, the provisions of the applicable Debenture Trust Deed referring to the applicable "Issuer" and the applicable "Guarantor" shall instead include a reference to the successor Person and not to the applicable Issuer or the applicable Guarantor, as the case may be), and may exercise every right and power of the applicable Issuer and the applicable Guarantor, as the case may be, under the applicable Debenture Trust Deed, with the same effect as if such successor Person had been named as the applicable Issuer and the applicable Guarantor, as the case may be, in the applicable Debenture Trust Deed and the applicable Issuer and the applicable Guarantor shall be released from all obligations under the Debenture Trust Deeds and the NCDs.

Parent Guarantor Loans Undertaking

The Parent Guarantor shall (i) ensure that all interest which is due and payable to the Issuers on each interest payment date under any Parent Guarantor Loan is paid to the applicable Issuer by a Person (other than by any of the other Issuers) in full in cash on or prior to such interest payment date and (ii) deliver an Officer's Certificate to the Debenture Trustees, within fifteen (15) Business Days of the applicable interest payment date under each of the Parent Guarantor Loans, confirming that interest which was due and payable to the applicable

Issuer as of the immediately preceding interest payment date in relation to each Parent Guarantor Loan has been paid in full to the applicable Issuer in cash (such undertaking, the "**Parent Guarantor Loans Undertakings**").

IPGL Infusion Undertaking

Should the Initial Investor deliver a notice to the Debenture Trustees by no later than the Initial Investor Put Right Notice Long-Stop Date of its intention to irrevocably exercise its Initial Investor Put Right, then the Parent Guarantor shall ensure that an amount equal to the amount of the Initial Parent Guarantor Loan has been invested in and/or repaid to one or more of the Issuers prior to the Initial Investor Put Right Date by way of (i) repayment of the Initial Parent Guarantor Loan, (ii) a capital contribution and/or (iii) the incurrence by one or more of the Issuers of Subordinated Funding Debt (such undertaking, the "**IPGL Infusion Undertaking**").

RSEPL Cash Flow Undertaking

The Parent Guarantor shall ensure that (i) an amount equal to (such amount, the "**Annual RSEPL Injection Amount**") the greater of (x) US$2.0 million (or the Dollar Equivalent thereof) and (y) all free cash flows accruing after the Original Issue Date from the Rooftop Assets (to the extent that such assets were assets of Renew Solar Energy Private Limited as of March 31 of the relevant year) is invested into one or more Issuers no later than 180 days after March 31 of each year as Equity Interests (any such Equity Interests that are in the form of Subordinated Funding Debt, the "**RSEPL Subordinated Loans**"), *provided* that such Equity Interests must be invested by a Person other than the Issuers and the Parent Guarantor and (ii) to the extent that the Rooftop Assets are assets of Renew Solar Energy Private Limited, Renew Solar Energy Private Limited shall not, directly or indirectly, incur, assume or permit to exist any Liens on any of the Rooftop Assets to secure Indebtedness (*provided* that the sale of any or all of the Rooftop Assets) shall not be a breach or default of this covenant.

Repayment of REC Loan Undertaking

The Parent Guarantor shall ensure that the REC Loan is repaid no later than 60 days after the Original Issue Date.

Co-obligor Loan Undertaking

The Parent Guarantor shall ensure that no later than 60 days after the Original Issue Date (i) the Co-obligor Loan is (x) repaid in full or (y) amended in such a manner that none of the Issuers remains liable thereunder or (ii) an amount equal to the principal amount outstanding as of the Original Issue Date under the Co-obligor Loan is invested into one or more Issuers as Equity Interests; provided that (A) such Equity Interests must be invested by a Person other than any of the Issuers and (B) such amount remains within the Restricted Group until such time as the Co-obligor Loan is either repaid in full or amended in such a manner that none of the Issuers remains liable thereunder.

Business Activities

The Issuers will not engage in any business other than a Permitted Business.

Limitation on Subsidiaries

None of the Issuers shall have any Subsidiaries.

Amendments to Parent Guarantor Loans

The Parent Guarantor and the Issuers agree that no amendments that are adverse to any Issuer and/or to any Holder shall be made to the terms of any of the Parent Guarantor Loans.

Amendments to RSEPL Subordinated Loans

The Parent Guarantor and the Issuers agree that no amendments that are adverse to any Issuer and/or to any Holder shall be made to the terms of any of the RSEPL Subordinated Loans.

Use of Proceeds

The Issuers will not use the net proceeds from the sale of the NCDs issued on the Original Issue Date for any purpose other than (1) in the approximate amounts and for the purposes specified under the section entitled "Use of Proceeds" in the Offering Memorandum, and (2) pending the application of such net proceeds in such manner, to invest the portion of such net proceeds not yet so applied in Temporary Cash Equivalents.

No Payments for Consent

None of the Issuers will directly or indirectly pay or cause to be paid any consideration to or for the benefit of any Holder for or as an inducement to any consent, waiver or amendment of any of the terms or provisions of the applicable Debenture Trust Deed or applicable series of NCDs unless such consideration is offered to be paid and is paid to all Holders that consent, waive or agree to amend in the time frame set forth in the solicitation documents relating to such consent, waiver or agreement. Notwithstanding the foregoing, in any offer or payment of consideration for, or as an inducement to, any consent, waiver or amendment of any of the terms or provisions of the applicable Debenture Trust Deed or applicable series of NCDs in connection with an exchange offer, the applicable Issuer may exclude (a) in connection with an exchange offer, holders or beneficial owners of the applicable series of NCDs that are not "qualified institutional buyers" as defined in Rule 144A under the Securities Act, and (b) in connection with any consent, waiver or amendment, holders or beneficial owners of the applicable series of NCDs in any jurisdiction where the inclusion of such holders or beneficial owners would require the applicable Issuer to (i) file a registration statement, prospectus or similar document or subject the applicable Issuer to ongoing periodic reporting or similar requirements under any securities laws (including, but not limited to, the United States federal securities laws and the laws of the European Union or its member states), (ii) qualify as a foreign corporation or other entity as a dealer in securities in such jurisdiction if it is not otherwise required to so qualify, (iii) generally consent to service of process in any such jurisdiction, or (iv) subject the applicable Issuer to taxation in any such jurisdiction if it is not otherwise so subject, or the solicitation of such consent, waiver or amendment from, or the granting of such consent or waiver, or the approval of such amendment by, holders or beneficial owners in such jurisdiction would be unlawful, in each case as determined by the applicable Issuer in its sole discretion.

Government Approvals and Licenses; Compliance with Law

Each of the Issuers will (1) obtain and maintain in full force and effect all governmental approvals, authorizations, consents, permits, concessions and licenses as are necessary to engage in the Permitted Businesses; (2) preserve and maintain good and valid title to its properties and assets (including land-use rights); and (3) comply with all laws, regulations, orders, judgments and decrees of any governmental body, except to the extent that failure so to obtain, maintain, preserve and comply would not reasonably be expected to have a material adverse effect on (a) the business, results of operations or prospects of the Restricted Group, taken as a whole, or (b) the ability of the applicable Issuer to perform its obligations under the particular series of NCDs, the Guarantees, the Debenture Trust Deeds or the applicable Collateral Documents.

Anti-Layering

Each of the Issuers will not Incur any Indebtedness if such Indebtedness is contractually subordinated in right of payment to any other Indebtedness of such Issuer unless such Indebtedness is also contractually subordinated in right of payment to the NCDs and the Guarantees, on substantially identical terms. This covenant does not apply to distinctions between categories of Indebtedness that exist by reason of any Liens or guarantee securing or in favor of some but not all of such Indebtedness or by virtue of some Indebtedness being secured on a junior priority basis.

Provision of Financial Statements and Reports

Provided that no Parent Guarantor Release Event has occurred, the Parent Guarantor will provide to the Debenture Trustees and furnish to the Holders upon request, as soon as they are available but in any event not more than ten (10) calendar days after they are filed with the principal international recognized stock exchange on which the Parent Guarantor's Common Stock is at any time listed for trading, true and correct copies of any financial or other report in the English language (and a certified English translation of any financial or other report in any other language) filed with such exchange, provided that if at any time the Common Stock of the Parent Guarantor is not listed for trading on an internationally recognized stock exchange, the Parent Guarantor will file with the Debenture Trustees, in the English language (or accompanied by a certified English translation thereof),

(1) within 120 days after the end of the Parent Guarantor's fiscal year beginning with the first fiscal year ending after the Original Issue Date, an annual report containing the following information: (a) audited consolidated balance sheets of the Parent Guarantor as of the end of the two most recent fiscal years and audited consolidated statements of income and cash flow of the Parent Guarantor for the two most recent fiscal years, including footnotes to the financial statements and an audit report of a member firm of an internationally recognized accounting firm on the financial statements; and (b) an operating and financial review of the audited consolidated financial statements; and

(2) within 90 days after the end of the half-year period in each fiscal year of the Parent Guarantor beginning with the half-year period ending after the Original Issue Date, half-yearly reports containing (a) an unaudited consolidated balance sheet as of the end of such half-yearly period and unaudited condensed statements of income and cash flow for the most recent half-yearly period ending on the unaudited consolidated balance sheet date, and the comparable period in the prior year; and (b) an operating and financial review of the unaudited consolidated financial statements.

The Issuers will provide to the Debenture Trustees the following reports, in the English language (or accompanied by a certified English translation):

(1) within 120 days after the end of the Restricted Group's fiscal year beginning with the first fiscal year ending after the Original Issue Date, an annual report containing the following information: (a) audited combined balance sheets of the Restricted Group as of the end of the two most recent fiscal years and audited combined statements of income and cash flow of the Restricted Group for the two most recent fiscal years, including footnotes to the financial statements and an audit report of a member firm of an internationally recognized accounting firm on the financial statements; and (b) an operating and financial review of the audited combined financial statements; and

(2) within 90 days after the end of the half-year period in each fiscal year of the Restricted Group beginning with the half-year period ending after the Original Issue Date, a half-year report containing (a) a reviewed combined balance sheet of the Restricted Group as of the end of such half-year period and reviewed combined statements of income and cash flow of the Restricted Group for the most recent half-year period ending on the unaudited combined balance sheet date, and the comparable period in the prior year; and (b) an operating and financial review of the reviewed combined financial statements.

The Issuers will provide to the Debenture Trustees (a) within 120 days after the close of each fiscal year, an Officer's Certificate stating the Interest Service Coverage Ratio at the end of such fiscal year and showing in reasonable detail the calculation of such ratio; and (b) as soon as possible and in any event within 10 Business Days after the Parent Guarantor or any of the Issuers becomes aware or should reasonably become aware of the occurrence of a Default or an Event of Default, an Officer's Certificate setting forth the details of the Default or Event of Default, and the action which the Issuers propose to take with respect thereto.

The Parent Guarantor or any of the Issuers shall provide to the Debenture Trustees, within 180 days after the close of each fiscal year of the Restricted Group, an Officer's Certificate stating the Annual RSEPL Injection Amount invested into one or more Issuers in accordance with the covenant "*Certain Covenants—RSEPL Cash Flow Undertaking*".

All financial statements of (i) the Parent Guarantor will be prepared in accordance with Ind-AS as in effect on the date of such report or financial statement and on a consistent basis for the periods presented and (ii) the Restricted Group will be prepared in accordance with Ind-AS as modified by commonly used carve-out principles as in effect on the date of such report or financial statements and on a consistent basis for the periods presented; provided that the financial statements and reports set forth in this covenant may, if applicable financial reporting standards change, present earlier periods on a basis that applied to such periods.

Events of Default and Remedies

Each of the following is an "**Event of Default**" under each series of NCDs:

(1) default in the payment of principal on, or premium, if any, on, any series of NCDs when the same becomes due and payable at maturity, upon acceleration, redemption or otherwise and the continuance of any such failure for 1 Business Day;

(2) default in the payment of interest on any series of NCDs when the same becomes due and payable and the continuance of any such failure for 10 Business Days;

(3) default (i) with the covenant described under the caption "—*Certain Covenants—Merger, Consolidation and Sale of Assets*", (ii) with the covenant described under the caption "—Change of Control Redemptions—Change of Control Redemptions Where all NCDs are Initial Investor NCDs—Change of Control Coupon Step-Up Event" or (iii) by the Parent Guarantor with respect to its obligation to comply with the IPGL Infusion Undertaking or the Parent Guarantor Loans Undertaking;

(4) any other default under any of the Debenture Trust Deeds (other than a default specified in (1), (2) or (3) above) and the continuance of any such default for a period of 60 consecutive days after written notice by the applicable Debenture Trustee or the Holders of 25.0% or more in aggregate principal amount of the applicable series of NCDs is given to the applicable Issuer;

(5) with respect to any Indebtedness of any of the Issuers having an outstanding principal amount of US$10.0 million (or the Dollar Equivalent thereof) or more, (a) an event of default causing the holder thereof to declare such Indebtedness to be due prior to its Stated Maturity and/or (b) the failure to make a principal payment when due (after giving effect to any grace period);

(6) the passage of 60 consecutive days following entry of a final judgment or order against any of the Issuers that causes the aggregate amount for all such final judgments or orders outstanding and not paid, discharged or stayed (once such amounts are due) to exceed US$10.0 million (or the Dollar Equivalent thereof) (exclusive of any amounts for which a solvent (to any of the Issuers' best knowledge) insurance company has acknowledged liability for);

(7) an involuntary case or other proceeding commenced against any of the Issuers or (provided that no Parent Guarantor Release Event has occurred) the Parent Guarantor seeking the appointment of a receiver or trustee and which remains undismissed and unstayed for 60 consecutive days; or an order for relief is entered under any bankruptcy or other similar law with respect to any such entity which remains undismissed and unstayed for 60 consecutive days;

(8) any of the Issuers or (provided that no Parent Guarantor Release Event has occurred) the Parent Guarantor:

    (i) commences a voluntary case under any bankruptcy or other similar law, or consents to the entry of an order for relief in an involuntary case,

    (ii) consents to the appointment of a receiver or trustee, or

    (iii) effects any general assignment for the benefit of creditors;

(9) any of the Guarantors or (provided that no Parent Guarantor Release Event has occurred) the Parent Guarantor denies its obligations under any of their respective Guarantees or any such Guarantee is determined to be unenforceable or invalid or shall for any reason cease to be in full force and effect;

(10) any default by any of the Issuers or the Parent Guarantor in the performance of any of their respective obligations under the applicable Collateral Documents which adversely affects the enforceability, validity, perfection or priority of the applicable Lien on the applicable Collateral or which adversely affects the condition or value of the applicable Collateral, taken as a whole, in any material respect;

(11) the repudiation by any of the Issuers or the Parent Guarantor of any of their respective obligations under the applicable Collateral Documents or any of the Collateral Documents ceases to be or is not in full force or effect, or the Debenture Trustee ceases to have the prescribed priority of security interest in any of the Collateral;

(12) the failure by any Issuer or the Parent Guarantor or any other security provider, as the case may be to create and perfect a security interest over the applicable Collateral, or, where specifically provided, to take commercially reasonable steps to create and perfect a security interest over the applicable Collateral (in each case as specified in Appendix A), for securing the NCDs and the performance of all other obligations of the Issuers in the form and manner and within the time prescribed in Appendix A; or

(13) in the event that (a) only some, but not all, NCDs are Initial Investor NCDs, upon a Change of Control Non-Coupon Step-Up Event effected without the consent of all Holders, or (b) all NCDs are Initial Investor NCDs, upon a Change of Control Non-Coupon Step-Up Event effected without the consent of the Initial Investor.

If an Event of Default (other than an Event of Default specified in clause (7) or (8) above) occurs and is continuing under any of the Debenture Trust Deeds, the applicable Debenture Trustee or the Holders of at least 25.0% in aggregate principal amount of the applicable series of NCDs then outstanding, by written notice to the applicable Issuer (and to the applicable Debenture Trustee if such notice is given by the Holders), may, and such Debenture Trustee at the written direction of such Holders (subject to it being indemnified and/or secured and/or pre-funded to its satisfaction) will, declare the principal of, premium, if any, and accrued and unpaid interest on the applicable series of NCDs to be immediately due and payable. Upon a declaration of acceleration, such principal of, premium, if any, and accrued and unpaid interest will be immediately due and payable. If an Event of Default specified in clause (7) or (8) above occurs, the principal of, premium, if any, and accrued and unpaid interest on each series of NCDs then outstanding will automatically become and be immediately due and payable without any declaration or other act on the part of any of the applicable Debenture Trustees or any Holder.

The Holders of at least a majority in principal amount of each applicable series of outstanding NCDs by written notice to the applicable Issuer and to the applicable Debenture Trustee, may on behalf of all the Holders of such series of the NCDs, waive all past defaults and rescind and annul a declaration of acceleration and its consequences if:

(1) all existing Events of Default, other than the non-payment of the principal of, premium, if any, and interest on the applicable series of the NCDs that have become due solely by such declaration of acceleration, have been cured or waived; and

(2) the rescission would not conflict with any judgment or decree of a court of competent jurisdiction.

Upon such waiver, the Default will cease to exist, and any Event of Default arising therefrom will be deemed to have been cured in relation to such series of NCDs, but no such waiver will extend to any subsequent or other Default or impair any right or consequence thereon, provided that such waiver will not prejudice any rights which a Holder who has not voted in favor of this waiver, has under law applicable in relation to insolvency or recovery of debt.

If an Event of Default occurs and is continuing, the applicable Debenture Trustee may pursue, in its own name or as trustee of an express trust, any available remedy by proceeding at law or in equity to collect the payment of principal of and interest on the applicable series of the NCDs or to enforce the performance of any provision of such series of the NCDs or the relevant Debenture Trust Deed, including, but not limited to, directing a foreclosure on the Collateral in accordance with the terms of the Collateral Documents and take such further action on behalf of the Holders with respect to the Collateral in accordance with such Holders' instruction and the relevant Collateral Documents. A Debenture Trustee may maintain a proceeding even if it does not possess any of the NCDs or does not produce any of them in the proceeding.

The Holders of at least a majority in aggregate principal amount of the applicable series of the outstanding NCDs may direct the time, method and place of conducting any proceeding for any remedy available to the relevant Debenture Trustee or exercising any trust or power conferred on such Debenture Trustee. However, the Debenture Trustee may refuse to follow any direction that conflicts with law or the applicable Debenture Trust Deed, that may involve the Debenture Trustee in personal liability, or that the Debenture Trustee determines may be unduly prejudicial to the rights of Holders not joining in the giving of such direction and may take any other action it deems proper that is not inconsistent with any such direction received from Holders. In addition, the applicable Debenture Trustee will not be required to expend its own funds in following such direction if it does not believe that reimbursement or satisfactory indemnification and/or security and/or pre-funding is assured to it.

A Holder may not institute any proceeding, judicial or otherwise, with respect to the applicable Debenture Trust Deed or the relevant series of NCDs, or for the appointment of a receiver or the applicable Debenture Trustee, or for any other remedy under the applicable Debenture Trust Deed or the relevant series of NCDs, unless:

(1) the Holder has previously given the relevant Debenture Trustee written notice of a continuing Event of Default;

(2) such Holder or Holders offer the applicable Debenture Trustee indemnity and/or security and/or pre-funding satisfactory to the applicable Debenture Trustee against any fees, costs, liability or expenses to be incurred in compliance with such request; and

(3) the applicable Debenture Trustee does not comply with the request within sixty (60) days after the receipt of the offer of indemnity and/or security and/or pre-funded pursuant to clause (2) above.

However, such limitations do not apply to the contractual right of any Holder of a particular series of NCDs to receive payment of the principal of, premium, if any, or interest on, such series of NCDs, or to bring suit for the enforcement of any such contractual right to payment, on or after the due date expressed in such series of NCDs, which right will not be impaired or affected without the consent of the Holder.

An officer of the Parent Guarantor or any of the Issuers must certify to the Debenture Trustees in writing, on or before a date not more than 120 days after the end of each fiscal year, that a review has been conducted of the activities of the Issuers and of their respective performance under the Debenture Trust Deeds and NCDs, and the Collateral Documents, and that the Issuers have fulfilled all of their respective obligations thereunder, or, if there has been a default in the fulfillment of any such obligation, specifying each such default and the nature and status thereof. The Issuers will also be obligated to notify the Debenture Trustee in writing of any Event of Default, Default or defaults in the performance of any covenants or agreements under the applicable Debenture Trust Deed.

Meeting of Holders

Subject to the provisions set forth under "*—Events of Default and Remedies*," each of the Issuers shall, at its own expense, on the written request of the applicable Debenture Trustee or of the Holders of at least 10% in principal amount of the outstanding series of NCDs, summon a meeting of the Holders of such series for the purpose of such Holders giving directions to the applicable Debenture Trustee in relation to the exercise of its powers. Every meeting summoned in accordance with this paragraph shall be summoned by sending a notice by first class mail to the Holders, specifying the time and place of the meeting, to the address of each Holder as shown in the applicable register not later than 45 days before the date of the proposed meeting. Any such meeting shall be held under the chairmanship of a person nominated by the applicable Issuer or, if no nomination is made within 15 minutes after the time appointed for holding the meeting, the Holders at the meeting. If neither the applicable Issuer nor the Holders appoint a chairman, the applicable Debenture Trustee may appoint one.

Voting by Holders

Each Rs.1 amount of a series of NCDs will afford the Holder thereof one (1) vote in favor of or against any matter to be voted upon by such Holder from time to time. In addition, any Holder of a series of NCDs need not use all of its votes or cast all of the votes to which it is entitled in the same way.

No Personal Liability of Incorporators, Promoters, Directors, Officers, Employees and Stockholders

No incorporator, promoter, director, officer, employee or stockholder of any of the Issuers or the Parent Guarantor, as such, will have any liability for any obligations of any of the Issuers or the Parent Guarantor under the NCDs, the Debenture Trust Deeds, any Guarantee, the Collateral Documents or for any claim based on, in respect of, or by reason of, such obligations or their creation. Each Holder, by accepting an NCD, waives and releases all such liability. The waiver and release are part of the consideration for issuance of the NCDs. The waiver may not be effective to waive liabilities under United States federal securities laws.

Legal Defeasance and Covenant Defeasance

Each of the Issuers may at any time, at the option of its Board of Directors evidenced by a resolution set forth in an Officer's Certificate, elect to have all of its obligations discharged with respect to the outstanding series of NCDs and all obligations of the Guarantors discharged with respect to the Guarantees in relation to such series of NCDs ("**Legal Defeasance**"), except for:

(1) the rights of Holders to receive payments in respect of the principal of, or interest or premium, if any, on, NCDs when such payments are due from the trust referred to below;

(2) the Issuer's obligations with respect to such series of NCDs concerning issuing temporary NCDs, registration of NCDs, mutilated, destroyed, lost or stolen NCDs and the maintenance of an office or agency for payment and money for security payments held in trust;

(3) the rights, powers, trusts, duties and immunities of the applicable Debenture Trustee, and the Issuers' and the Guarantors' obligations in connection therewith; and

(4) the Legal Defeasance and Covenant Defeasance provisions of the applicable Debenture Trust Deed.

In addition, each of the Issuers may, at its option and at any time, elect to have its obligations and the obligations of the Parent Guarantor and the Guarantors, released with respect to substantially all of the covenants that are described in the applicable Debenture Trust Deed ("**Covenant Defeasance**") and thereafter any omission to comply with those covenants will not constitute a Default or an Event of Default with respect to the series of NCDs. If Covenant Defeasance occurs, certain events (not including non-payment, bankruptcy, receivership, rehabilitation and insolvency events) described under "Events of Default and Remedies" will no longer constitute an Event of Default with respect to the NCDs.

In order to exercise either Legal Defeasance or Covenant Defeasance:

(1) the applicable Issuer must irrevocably deposit with the applicable Debenture Trustee, in trust, for the benefit of the applicable Holders, cash in Indian rupees in amounts as will be sufficient, in the opinion of a nationally recognized investment bank, appraisal firm or firm of independent public accountants, to pay the principal of, or interest and premium, if any, on, the outstanding NCDs of the series on the stated date for payment thereof or on the applicable redemption date, as the case may be, and the applicable Issuer must specify whether the NCDs of the series are being defeased to such stated date for payment or to a particular redemption date;

(2) no Default or Event of Default has occurred and is continuing on the date of such deposit (other than a Default or an Event of Default resulting from the borrowing of funds to be applied to such deposit and the granting of Liens securing such borrowing);

(3) such Legal Defeasance or Covenant Defeasance will not result in a breach or violation of, or constitute a default under, any material agreement or instrument (other than the applicable Debenture Trust Deed) to which the applicable Issuer is a party or by which the applicable Issuer is bound;

(4) the Issuer must deliver to the applicable Debenture Trustee an Officer's Certificate stating that the deposit was not made by the applicable Issuer with the intent of preferring the Holders over the other creditors of the applicable Issuer with the intent of defeating, hindering, delaying or defrauding any creditors of the applicable Issuer or others; and

(5) the applicable Issuer must deliver to the applicable Debenture Trustee an Officer's Certificate and an Opinion of Counsel, each stating that all conditions precedent relating to the Legal Defeasance or the Covenant Defeasance have been complied with.

Amendment, Supplement and Waiver

Except as provided in the next two succeeding paragraphs, the applicable Debenture Trust Deed, the NCDs of a series, any Guarantee, the applicable Collateral Document(s) and the applicable Trust and Retention Account Agreement may be amended or supplemented with the consent of the Holders of a majority in aggregate principal amount of the series of NCDs then outstanding (including, without limitation, consents obtained in connection with a purchase of, or tender offer or exchange offer for, such NCDs), and any existing Default or Event of Default or compliance with any provision of the applicable Debenture Trust Deed, NCDs of a series, any Guarantee, the applicable Collateral Document(s) or the applicable Trust and Retention Account Agreement may be waived with the consent of the Holders of a majority in aggregate principal amount of the then outstanding NCDs of a series (including, without limitation, consents obtained in connection with a purchase of, or tender offer or exchange offer for, such NCDs).

Without the consent of Holders holding at least 90.0% in principal amount of each series of NCDs, an amendment, supplement or waiver may not (with respect to any NCDs held by a non-consenting Holder):

(1) reduce the principal amount of NCDs whose Holders must consent to an amendment, supplement or waiver;

(2) reduce the principal of or change the fixed maturity of any series of NCDs;

(3) change the place, currency or time of payment of principal of, or premium, if any, or interest on, any series of NCDs;

(4) reduce the rate of or change the currency or change the times for payment of, interest, including default interest, on any series of NCDs;

(5) waive a Default or an Event of Default in the payment of principal of, or interest or premium, if any, on, a series of NCDs (except a rescission of acceleration of NCDs by the Holders of a majority in aggregate principal amount of the then outstanding NCDs of a particular series and a waiver of the payment default that resulted from such acceleration);

(6) reduce the amount payable upon a Mandatory COC Redemption, a Change of Control Non-Coupon Step-Up Event Redemption or an Excess Proceeds Repurchase Offer or change the time or manner a

Mandatory COC Redemption, a Change of Control Non-Coupon Step-Up Event Redemption or an Excess Proceeds Repurchase Offer may be made or by which the NCDs must be redeemed pursuant to a Mandatory COC Redemption, a Change of Control Non-Coupon Step-Up Event Redemption or an Excess Proceeds Repurchase Offer, in each case after the obligation to make such Mandatory COC Redemption, Change of Control Non-Coupon Step-Up Event Redemption or Excess Proceeds Repurchase Offer has arisen;

(7) make any change in the provisions of any of the Debenture Trust Deeds relating to waivers of past Defaults or the rights of Holders to receive payments of principal of, or interest or premium, if any, on, the particular series of NCDs;

(8) waive a redemption payment with respect to any series of NCDs;

(9) release any Guarantor or the Parent Guarantor from any of their respective obligations under its Guarantee or the Debenture Trust Deeds, except as set forth under "Brief Description of the NCDs and the Guarantees—The Guarantees";

(10) release any Collateral from the applicable Lien of the applicable Debenture Trust Deed and the applicable Collateral Document, except as set forth under the caption "—Security" for which no consent of any Holders would be required;

(11) amend, supplement or grant any waiver under any Trust and Retention Account Agreement (i) that would adversely impact the priority of payments with respect to the NCDs and/or the right to receive payments with respect to the NCDs (other than in relation to any Indebtedness, payments in respect of which are proposed to made on a pari passu basis with payments in respect to the NCDs); or (ii) relating to any action or change not permitted by the terms of the Debenture Trust Deeds; or

(12) make any change in the preceding amendment and waiver provisions.

Notwithstanding the preceding, without the consent of any Holder of NCDs of a series, the applicable Issuer, the Parent Guarantor, the Guarantors and the applicable Debenture Trustee may amend or supplement the applicable Debenture Trust Deed, the series of NCDs, any Guarantee, the applicable Collateral Documents or the applicable Trust and Retention Account Agreement:

(1) to cure any ambiguity, defect, omission or inconsistency;

(2) to provide for certificated NCDs of such series in addition to or in place of uncertificated NCDs of such series;

(3) to provide for the assumption of the applicable Issuer's or the Guarantors' obligations to Holders in the case of a merger or consolidation;

(4) to make any change that would provide any additional rights or benefits to the Holders or that does not adversely affect the legal rights under the applicable Debenture Trust Deed of any such Holder;

(5) to conform the text of the applicable Debenture Trust Deed, the NCDs of such series, the Guarantees or the applicable Collateral Documents to any provision of this Description of the NCDs to the extent that such provision in this Description of the NCDs was intended to be a verbatim recitation of a provision thereof;

(6) to effect any changes to the applicable Debenture Trust Deed in a manner necessary to comply with the procedures of the relevant clearing system;

(7) to allow a Guarantor to execute a supplemental debenture trust deed to the applicable Debenture Trust Deed and/or a Guarantee with respect to the NCDs of such series or to release the Parent Guarantor and/or a Guarantor from its Guarantee in accordance with the terms of the applicable Debenture Trust Deed;

(8) to enter into additional or supplemental Collateral Documents or to release Collateral from a Lien of the applicable Debenture Trust Deed or applicable Collateral Document in accordance with the terms of the applicable Debenture Trust Deed or applicable Collateral Document;

(9) to evidence and provide for the acceptance of appointment by a successor Debenture Trustee; or

(10) to enter into any amendment or supplement to, or grant any waiver under, any Trust and Retention Account Agreement in order to account for the Incurrence of any Permitted Indebtedness or for any other action which is permitted under or not restricted by the Debenture Trust Deed.

Notwithstanding the preceding, consent of Holders holding at least 75.0% in aggregate principal amount of NCDs will be required to remove the Debenture Trustee.

Satisfaction and Discharge

The applicable Debenture Trust Deed will be discharged and will cease to be of further effect as to all NCDs issued thereunder when the applicable Issuer has paid or caused to be paid all sums payable by it under the applicable Debenture Trust Deed and the applicable series of NCDs. In addition, the applicable Issuer must deliver an Officer's Certificate and an Opinion of Counsel to the applicable Debenture Trustee stating that all conditions precedent to satisfaction and discharge have been satisfied.

Concerning the Debenture Trustee

Axis Trustee Services Limited is to be appointed as Debenture Trustee under each of the Debenture Trust Deeds and the Debenture Trustee Agreement.

Except during the continuance of a Default, the applicable Debenture Trustee will not be liable, except for the performance of such duties as are specifically set forth in the applicable Debenture Trust Deed and no implied covenant or obligation shall be read into the applicable Debenture Trust Deed or the applicable series of NCDs against the applicable Debenture Trustee. If an Event of Default has occurred and is continuing, the applicable Debenture Trustee will use the same degree of care and skill in its exercise of the rights and powers vested in it under the applicable Debenture Trust Deed as a prudent person would exercise under the circumstances in the conduct of such person's own affairs.

Each Holder, by accepting the NCDs of a series will agree, for the benefit of the applicable Debenture Trustee, that it is solely responsible for its own independent appraisal of and investigation into all risks arising under or in connection with the NCDs of a series and has not relied on and will not at any time rely on the applicable Debenture Trustee in respect of such risks.

If the applicable Debenture Trustee becomes a creditor of any of the applicable Issuer, the applicable Debenture Trust Deed limits the right of the applicable Debenture Trustee to obtain payment of claims in certain cases, or to realize on certain property received in respect of any such claim as security or otherwise. The applicable Debenture Trustee will be permitted to engage in other transactions and nothing herein shall obligate the Debenture Trustee to account for any profits earned from any business or transactional relationship; provided that, if it acquires any conflicting interest it must eliminate such conflict within 90 days, or resign.

The Holders of a majority in aggregate principal amount of the then outstanding NCDs of a series will have the right to direct the time, method and place of conducting any proceeding for exercising any remedy available to the applicable Debenture Trustee, subject to certain exceptions. Subject to applicable provisions, the applicable Debenture Trustee will be under no obligation to exercise any of its rights or powers under the applicable Debenture Trust Deed at the request of any Holder, unless such Holder has offered to the applicable Debenture Trustee security and/or indemnity and/or pre-funded satisfactory to it against any loss, liability or expense.

The applicable Debenture Trustee shall not be deemed to have knowledge of any Event of Default or Default unless a responsible officer of the applicable Debenture Trustee has received express written notice of such Event of Default or Default. The applicable Debenture Trustee shall be deemed to have knowledge of an Event of Default or a Default unless it has been notified in writing of such an Event of Default or Default.

Additional Information

Any Holder may inspect a copy of any of the Debenture Trust Deeds and, once executed, the Collateral Documents, during regular business hours at the corporate trust office of the Debenture Trustee.

Jumbo Certificate

Each series of the NCDs will be represented by a Jumbo Certificate without interest coupons attached.

Each Issuer shall issue a Jumbo Certificate for the aggregate principal amount of the NCDs being issued by it, which shall be kept with the applicable Debenture Trustee. The NCDs will be issued by the Issuers in dematerialized form and credited to the account of the relevant Holders, held with National Securities Depository

Limited and/or Central Depository Services Limited through their respective depositary participant. Each person that is, for the time being and from time to time, the holder of the NCDs of a particular series and whose name appears in the register of beneficial owners of the NCD of a particular series maintained by National Securities Depository Limited and/or Central Depository Services Limited, shall be considered a Holder of the particular series of NCDs.

Payments on the NCDs

Payments of any amounts owing in respect of the NCDs (including principal, premium, if any, interest and Additional Amounts, if any) will be made by the Issuers to the Holders as of the Record Date without deduction or withholding for, or on account of, any present or future taxes, duties, assessments or governmental charges of whatever nature, except as may be required by law and as described under "*—Additional Amounts*."

Under the terms of the Debenture Trust Deeds, the Issuers and the Debenture Trustees will consider such Holders whose name is appearing in the register of beneficial owners of the National Securities Depository Limited and/or Central Depository Services Limited as of the Record Date for the purpose of receiving payments and for all other purposes. Consequently, none of the Issuers, the Debenture Trustees or any of their respective agents has or will have any responsibility or liability for:

(1) any aspect of the records of National Securities Depository Limited and/or Central Depository Services Limited or any participant or indirect participant relating to or payments made on account of register maintained, or for maintaining, supervising or reviewing any of the records of National Securities Depository Limited and/or Central Depository Services Limited or any participant or indirect participant relating to or payments made on account of entry made in the register of beneficial owners; or

(2) National Securities Depository Limited and/or Central Depository Services Limited or any participant or indirect participant.

Transfers

The NCDs are freely transferrable subject to any restriction imposed by applicable law.

Certain Definitions

Set forth below are certain defined terms used in the Debenture Trust Deeds. Reference is made to the applicable Debenture Trust Deed for a full disclosure of all defined terms used therein, as well as any other capitalized terms used herein for which no definition is provided.

"**Affiliate**" of any specified Person means any other Person directly or indirectly controlling or controlled by or under direct or indirect common control with such specified Person. For purposes of this definition, "**control,**" as used with respect to any Person, means the possession, directly or indirectly, of the power to direct or cause the direction of the management or policies of such Person, whether through the ownership of voting securities, by agreement or otherwise. For purposes of this definition, the terms "**controlling,**" "**controlled by**" and "**under common control with**" have correlative meanings.

"**Applicable Premium**" means, with respect to an NCD of a series at any redemption date, the greater of (1) 1.00% of the principal amount of such NCD and (2) the excess of (a) the present value at such redemption date of the principal amount of such NCD at [_], plus all required remaining scheduled interest payments due on such NCD through [_] (but excluding accrued and unpaid interest, if any, to (but not including) the applicable redemption date), computed using a discount rate equal to the Treasury Rate plus 50 basis points, over (b) the principal amount of such NCD on such redemption date.

"**Asset Acquisition**" means an acquisition by any of the Issuers of the property and assets of any Person (other than an Issuer) that constitute substantially all of a division or line of business of such Person.

"**Asset Disposition**" means the sale or other disposition by any Issuer (other than to another Issuer) of all or substantially all of the assets that constitute a division or line of business of any Issuer.

"**Asset Sale**" means the sale, lease, conveyance or other disposition of any assets or rights (including by way of merger, consolidation or Sale and Leaseback Transaction) in one transaction or a series of related transactions by any of the Issuers to any Person; *provided* that "Asset Sale" shall not include:

(1) the sale, lease, transfer or other disposition of inventory, products, services, accounts receivable or other current assets in the ordinary course of business (including, for the avoidance of doubt, the sale of power);

(2) Restricted Payments permitted to be made under the covenant described under "*—Certain Covenants– Restricted Payments*" or any Permitted Investment;

(3) sales, transfers or other dispositions of assets with a Fair Market Value not in excess of US$1.0 million (or the Dollar Equivalent thereof);

(4) any sale or other disposition of damaged, worn-out or obsolete or permanently retired assets (including the abandonment or other disposition of property that is no longer economically practicable to maintain or useful in the conduct of the business of any of the Issuers);

(5) a transaction covered by the "*—Certain Covenants—Merger, Consolidation and Sale of Assets*" (other than a Qualified Asset Sale) or "*—Change of Control Redemptions*" (other than a Qualified Asset Sale) covenants;

(6) any sale, transfer or other disposition deemed to occur in connection with creating or granting any Lien;

(7) any sale, transfer or other disposition of any assets by any of the Issuers to any of the other Issuers;

(8) any sale, transfer or other disposition of any national, state or foreign production tax credit, tax grant, renewable energy credit, carbon emission reductions, certified emission reductions or similar credits based on the generation of electricity from renewable resources or investment in renewable generation and related equipment and related costs, or the sale or issuance of Capital Stock entitling the holder thereof to benefit from any such items;

(9) any sale, transfer or other disposition of licenses and sublicenses of software or intellectual property in the ordinary course of business;

(10) any surrender or waiver of contract rights or settlement, release, recovery on or surrender of contract, tort or other claims in the ordinary course of business;

(11) the sale or other disposition of cash or Temporary Cash Equivalents;

(12) dispositions of receivables in connection with the compromise, settlement or collection thereof in the ordinary course of business or in bankruptcy or similar proceedings and exclusive of factoring or similar arrangements;

(13) transfers resulting from any casualty or condemnation of property;

(14) dispositions of investments in joint ventures to the extent required by or made pursuant to buy/sell arrangements between the joint parties;

(15) the unwinding of any Hedging Obligation; and

(16) the sale, transfer or other disposition of contract rights, development rights or resource data obtained in connection with the initial development of a project prior to the commencement of commercial operations of such project.

"**Attributable Indebtedness**" means, in respect of a Sale and Leaseback Transaction, the present value, discounted at the interest rate implicit in the Sale and Leaseback Transaction, of the total obligations of the lessee for rental payments during the remaining term of the lease in the Sale and Leaseback Transaction.

"**Average Life**" means, at any date of determination with respect to any Indebtedness, the quotient obtained by dividing (1) the sum of the products of (a) the number of years from such date of determination to the dates of each successive scheduled principal payment of such Indebtedness and (b) the amount of such principal payment by (2) the sum of all such principal payments.

"**Board of Directors**" means:

(1) with respect to a corporation, the board of directors of the corporation;

(2) with respect to a partnership, the Board of Directors of the general partner of the partnership;

(3) with respect to a limited liability company, the managing member or members or any controlling committee of managing members thereof; and

(4) with respect to any other Person, the board or committee of such Person serving a similar function,

including, in each case, any committee thereof or person duly authorized to act on its behalf.

"**Board Resolution**" means any resolution of the Board of Directors taking an action which it is authorized to take and adopted at a meeting duly called and held at which a quorum of disinterested members (if so required) was present and acting throughout or adopted by written resolution executed by the applicable members of the Board of Directors or any circular resolution passed in accordance with the relevant Companies Law of India.

"**Business Day**" means a day (other than a Saturday or a Sunday) on which banks and foreign exchange markets are open for business in each of New York, Hong Kong, London, Mauritius, Mumbai, Delhi and Singapore.

"**Capital Stock**" means:

(1) in the case of a corporation, corporate stock;

(2) in the case of an association or business entity, any and all shares, interests, participations, rights or other equivalents (however designated) of corporate stock;

(3) in the case of a partnership or limited liability company, partnership interests (whether general or limited) or membership interests; and

(4) any other interest or participation that confers on a Person the right to receive a share of the profits and losses of, or distributions of assets of, the issuing Person, but excluding from all of the foregoing any debt securities convertible into Capital Stock, whether or not such debt securities include any right of participation with Capital Stock.

"**Capitalized Lease Obligations**" means, at the time any determination is to be made, the amount of the liability in respect of a capital lease that would at that time be required to be capitalized on a balance sheet prepared in accordance with Ind-AS, and the Stated Maturity thereof shall be the date of the last payment of rent or any other amount due under such lease prior to the first date upon which such lease may be prepaid by the lessee without payment of a penalty.

"**CCDs**" means debentures which are compulsorily convertible into Common Stock of any Issuer or the Parent Guarantor.

"**Change of Control**" means any Change of Control Coupon Step-Up Event or any Change of Control Non-Coupon Step-Up Event.

"**Change of Control Offer**" has the meaning assigned to that term in the Debenture Trust Deed.

"**Change of Control Coupon Step-Up Event**" means the occurrence of any of the following events:

(1) the direct or indirect sale, transfer, conveyance or other disposition (other than by way of merger or consolidation), in one or a series of related transactions, of all or substantially all of the properties or assets of the Parent Guarantor and the Restricted Group, taken as a whole, to any "person" (within the meaning of section 13(d) of the Exchange Act), other than to one or more Permitted Holders (for the avoidance of doubt, any sale, transfer, conveyance or other disposition of all or substantially all of the properties or assets of the Parent Guarantor and the Restricted Group, taken as a whole, required by applicable law, rule, regulation or order (other than to one or more Permitted Holders) will constitute a Change of Control Coupon Step-Up Event under this definition);

(2) any "person" or "group" (as such terms are used in sections 13(d) and 14(d), respectively, of the Exchange Act), other than one or more Permitted Holders, is or becomes the "beneficial owner" (as such term is used in Rule 13d-3 of the Exchange Act), directly or indirectly, of more than 50.0% of the total voting power of the Voting Stock of the Parent Guarantor; and

(3) the adoption of a plan relating to the liquidation or dissolution of the Parent Guarantor.

"**Change of Control Non-Coupon Step-Up Event**" means the occurrence of any of the following events:

(1) the direct or indirect sale, transfer, conveyance or other disposition (other than by way of merger or consolidation), in one or a series of related transactions, of all or substantially all of the properties or assets of the Restricted Group, taken as a whole, to any "person" (within the meaning of section 13(d) of the Exchange Act), other than to one or more Permitted Holders (for the avoidance of doubt, any sale, transfer, conveyance or other disposition of all or substantially all of the properties or assets of the Restricted Group required by applicable law, rule, regulation or order (other than to one or more Permitted Holders) will constitute a Change of Control Non-Coupon Step-Up Event under this definition);

(2) any of the Issuers consolidates with, or merges with or into, any Person (other than with or into one or more Permitted Holders), or any Person (other than one or more Permitted Holders) consolidates with, or merges with or into, any of the Issuers, in any such event pursuant to a transaction in which any of the outstanding Voting Stock of such Issuer or such other Person is converted into or exchanged for cash, securities or other property, other than any such transaction where the Voting Stock of the applicable Issuer outstanding immediately prior to such transaction is converted into or exchanged for (or continues as) Voting Stock (other than Disqualified Stock) of the surviving or transferee Person constituting a majority of the outstanding shares of Voting Stock of such surviving or transferee Person (immediately after giving effect to such issuance);

(3) the Parent Guarantor (including any entity with or into which the Parent Guarantor is merged or consolidated or liquidated) ceases to own, directly or indirectly, at least 50.1% of the total voting power of the Voting Stock of any Issuer, other than (a) where one or more Permitted Holders owns, directly or indirectly, at least 50.1% of the total voting power of the Voting Stock of such Issuer or (b) where, immediately post the consummation of an INVIT Offering, the Parent Guarantor and the Permitted Holders collectively own, directly or indirectly, at least 50.1% of the total voting power of the Voting Stock of each of the Issuers; or

(4) the adoption of a plan relating to the liquidation or dissolution of any of the Issuers.

"**Collateral**" means the assets over which a Lien is created pursuant to the Collateral Documents.

"**Collateral Documents**" means the documents described in the second column of the table found in Appendix A.

"**Combined EBITDA**" means, for any period, any Annual RSEPL Injection Amount, *plus* Combined Net Income for such period plus, to the extent such amount was deducted in calculating such Combined Net Income:

(1) any expenses in relation to Hedging Obligations;

(2) Combined Interest Expense and finance costs;

(3) income taxes (other than income taxes attributable to extraordinary gains (or losses) or sales of assets outside the ordinary course of business);

(4) depreciation expense, amortization expense and all other non-cash items (including impairment charges and write-offs) reducing Combined Net Income (other than non-cash items in a period which reflect cash expenses paid or to be paid in another period), less all non-cash items increasing Combined Net Income (other than the accrual of revenues in the ordinary course of business);

(5) any losses arising from the acquisition of any securities or extinguishment, repurchase, cancelation or assignment of Indebtedness, less any gains arising from the same; and

(6) any unrealized losses in respect of Hedging Obligations or other derivative instruments or forward contracts or any ineffectiveness recognized in earnings related to a qualifying hedge transaction or the fair value of changes therein recognized in earnings for derivatives that do not qualify as hedge transactions, in each case, in respect of Hedging Obligations, less any unrealized gains in respect of the same;

all as determined on a combined basis in conformity with Ind-AS.

"**Combined Interest Expense**" means, with respect to the Restricted Group for any period, the amount that would be included in gross interest expense on a combined income statement prepared in accordance with Ind-AS for such period of the Restricted Group, plus, to the extent not included in such gross interest expense, and to the extent accrued or payable during such period by the Restricted Group, without duplication, (1) interest expense attributable to Capitalized Lease Obligations, (2) amortization of debt issuance costs, any redemption premium and original issue discount expense and non-cash interest payments in respect of any redemption premium, (3) the interest portion of any deferred payment obligation, (4) all commissions, discounts and other fees and charges with respect to letters of credit or similar instruments issued for financing purposes or in respect of any Indebtedness, (5) the net costs associated with Hedging Obligations with respect to Indebtedness (including the amortization of fees), (6) interest accruing on Indebtedness of any other Person that is guaranteed by, or secured by a Lien on any asset of, the Restricted Group, and (7) any capitalized interest (other than in respect of Subordinated Funding Debt).

"**Combined Net Income**" means, for any period, the aggregate of the net income plus any interest income of the Restricted Group for such period, on a combined basis, as determined in accordance with Ind-AS; *provided* that:

(1) the net income (or loss) of any Person that is accounted for by the equity method of accounting will be included only to the extent of the amount of dividends or similar distributions paid in cash to the Restricted Group;

(2) the cumulative effect of a change in accounting principles will be excluded; and

(3) any translation gains or losses due solely to fluctuations in currency values and related tax effects will be excluded.

"**Commodity Hedging Agreement**" means any spot, forward, commodity swap, commodity cap, commodity floor or option commodity price protection agreements or other similar agreement or arrangement.

"**Common Stock**" means, with respect to any Person, any and all shares, interests or other participations in, and other equivalents (however designated and whether voting or non-voting) of such Person's common stock or ordinary shares, whether or not outstanding on the Original Issue Date, and includes all series and classes of such common stock or ordinary shares.

"**Co-obligor Loan**" means facility availed by Tarun Kiran Bhoomi Private Limited, ReNew Wind Energy (MP Three) Private Limited, ReNew Wind Energy (Rajasthan Four) Private Limited, ReNew Wind Energy (Maharashtra) Private Limited and Bhumi Prakash Private Limited along with four other subsidiaries of ReNew Solar Power Private Limited, as co-borrowers, from IDFC Bank, Tata Cleantech Capital Limited, Union Bank of India pursuant to a loan agreement dated October 28, 2016.

"**Currency Hedging Agreement**" means any currency swap agreement, currency cap agreement, currency floor agreement, currency futures agreement, currency option agreement or any other similar agreement or arrangement.

"**Debenture Trustee**" means Axis Trustee Services Limited.

"**Default**" means any event that is, or with the passage of time or the giving of notice or both would be, an Event of Default.

"**Designated Subordinated Working Capital Parent Loans**" means any Subordinated Indebtedness Incurred by any of the Issuers owed to the Parent Guarantor or any entity majority owned, directly or indirectly, by the Parent Guarantor which, by its terms or by the terms of any agreement or instrument pursuant to which such Indebtedness is issued or remains outstanding, (i) does not mature or require any amortization and is not required to be repaid, redeemed, repurchased or otherwise retired, pursuant to a sinking fund obligation, event of default or otherwise (including any redemption, retirement or repurchase which is contingent upon events or circumstance), in whole or in part, prior to the earlier of (x) six (6) months after the final Stated Maturity of the NCDs and (y) six (6) months after the first date on which there are no NCDs outstanding, (ii) does not provide for any right to call a default prior to the earlier of (x) six (6) months after the final Stated Maturity of the NCDs and (y) six (6) months after the first date on which there are no NCDs outstanding, (iii) bears interest at a rate which is no more than the rate which is payable under any outstanding Senior Indebtedness (including related hedging costs), (iv) does not require any cash payment of interest (or premium, if any) prior to the earlier of (x) six (6) months after the final Stated Maturity of the NCDs and (y) six (6) months after the first date on which there are no NCDs outstanding, (v) is not secured by a Lien on any assets of any of the Issuers and is not guaranteed by any of the Issuers and (vi) has been designated by the applicable Issuer as a "Designated Subordinated Working Capital Parent Loan" under the applicable Trust and Retention Account Agreement (to the extent that such agreement has been executed and is in effect); *provided* that upon any event or circumstance that results in such Indebtedness ceasing to qualify as "Designated Subordinated Working Capital Parent Loans", such Indebtedness shall constitute either (x) Subordinated Funding Debt if it meets the conditions set forth in the definition thereof or (y) an Incurrence of such Indebtedness by the applicable Issuer. The foregoing limitations shall not be violated by provisions that permit payments of principal, premium or interest on such Indebtedness if such Issuer would be permitted to make such payment under the covenant described under "**—Certain Covenants—Restricted Payments**".

"**Disqualified Stock**" means, with respect to any Person, any Capital Stock of such Person which by its terms (or by the terms of any security into which it is convertible or for which it is exchangeable) or upon the happening of any event:

(1) matures or is mandatorily redeemable for cash or in exchange for Indebtedness pursuant to a sinking fund obligation or otherwise;

(2) is convertible or exchangeable at the option of the holder thereof for Indebtedness or Disqualified Stock; or

(3) is or may become (in accordance with its terms) upon the occurrence of certain events or otherwise redeemable or repurchasable for cash or in exchange for Indebtedness at the option of the holder of the Capital Stock in whole or in part,

in each case on or prior to the earlier of (a) the Stated Maturity of the NCDs or (b) the date on which there are no NCDs outstanding; *provided* that (i) only the portion of Capital Stock which so matures or is mandatorily redeemable, is so convertible or exchangeable, or is so redeemable at the option of the holder thereof prior to such date will be deemed to be Disqualified Stock, and (ii) any Capital Stock that would constitute Disqualified Stock solely because the holders thereof have the right to require the applicable Issuer to repurchase such Capital Stock upon the occurrence of a change of control or asset sale (howsoever defined or referred to) shall not constitute Disqualified Stock if any such redemption or repurchase obligation is not prohibited by the covenant described under "*—Certain Covenants—Restricted Payments.*"

"**Dollar Equivalent**" means, with respect to any monetary amount in a currency other than U.S. dollars, at any time for the determination thereof, the amount of U.S. dollars obtained by converting such foreign currency involved in such computation into U.S. dollars at the noon buying rate for U.S. dollars in New York City for cable transfers as certified for customs purposes by the Federal Reserve Bank of New York on the date of determination.

"**Equity Interests**" means Capital Stock, all warrants, options or other rights to acquire Capital Stock (but excluding any debt security that is convertible into, or exchangeable for, Capital Stock), Redeemable Preference Shares, Subordinated Indebtedness and CCDs.

"**Equity Offering**" means a public or private sale of either (1) Equity Interests of the Parent Guarantor by the Parent Guarantor (other than Disqualified Stock and other than to a Subsidiary of the Parent Guarantor) or (2) Equity Interests of any of the Issuers or an affiliate of the Parent Guarantor (other than to the Parent Guarantor or a Subsidiary of the Parent Guarantor), in each case to the extent that the net proceeds therefrom are contributed in the form of Equity Interests in any of the Issuers.

"**Exchange Act**" means the U.S. Securities Exchange Act of 1934, as amended.

"**Fair Market Value**" means the value that would be paid by a willing buyer to an unaffiliated willing seller in a transaction not involving distress or necessity of either party, determined in good faith by the Board of Directors or an executive officer of the Parent Guarantor (unless otherwise provided in the applicable Debenture Trust Deed), whose determination shall be conclusive if evidenced by a Board Resolution or an Officer's Certificate.

"**Fitch**" means Fitch Inc. and its successors.

"**guarantee**" means a guarantee other than by endorsement of negotiable instruments for collection in the ordinary course of business, direct or indirect, in any manner including, without limitation, by way of a pledge **of assets or through letters of credit or reimbursement agreements in respect thereof, of all or any part of any Indebtedness (whether arising by virtue of partnership arrangements, or by agreements to keep-well, to purchase assets, goods, securities or services, to take or pay or to maintain financial statement conditions or otherwise).**

"**Hedging Obligations**" means, with respect to any specified Person, the obligations of such Person pursuant to Commodity Hedging Agreements, Currency Hedging Agreement or Interest Rate Hedging Agreements.

"**Holder**" means the Person in whose name an NCD is registered in the NCD register.

"**Incur**" means, with respect to any Indebtedness or Disqualified Stock, to incur, create, issue, assume, guarantee or otherwise become liable for or with respect to, or become responsible for, the payment of, contingently or otherwise, such Indebtedness or Disqualified Stock; *provided* that the accretion of original issue discount, the accrual of interest, the accrual of dividends, the payment of interest in the form of additional Indebtedness and the payment of dividends on Disqualified Stock in the form of additional shares of Disqualified Stock (to the extent provided for when the Indebtedness or Disqualified Stock on which such interest or dividend is paid was originally issued) will not be considered an Incurrence of Indebtedness. The terms "**Incurrence**," "**Incurred**" and "**Incurring**" have meanings correlative with the foregoing.

"**Ind-AS**" means (a) with respect to the Parent Guarantor, Indian Accounting Standards as in effect as of the Original Issue Date, and (b) with respect to the Restricted Group, Indian Accounting Standards as in effect as of the Original Issue Date, as modified by commonly used carve-out principles as in effect on the date of such report or financial statement; provided that for purposes of compliance with the covenant described under the caption "*—Provision of Financial Statements and Reports*", Ind-AS shall mean Indian Accounting Standards as in effect from time to time.

"**Indebtedness**" means, with respect to any Person at any date of determination (without duplication):

(1) all indebtedness of such Person for borrowed money;

(2) all obligations of such Person evidenced by bonds, debentures, notes or other similar instruments;

(3) all obligations of such Person in respect of letters of credit, bankers' acceptances or other similar instruments;

(4) all Capitalized Lease Obligations (other than leases which, as of the Original Issue Date, were not Capitalized Lease Obligations (regardless of any amendments to such leases)) and Attributable Indebtedness;

(5) all Indebtedness of other Persons secured by a Lien on any asset of such Person, whether or not such Indebtedness is assumed by such Person; provided that the amount of such Indebtedness will be the lesser of (a) the Fair Market Value of such asset at such date of determination and (b) the amount of such Indebtedness;

(6) all Indebtedness of other Persons Guaranteed by such Person to the extent that such Indebtedness is Guaranteed by such Person;

(7) to the extent not otherwise included in this definition, Hedging Obligations; and

(8) all Disqualified Stock issued by such Person valued at the greater of its voluntary or involuntary liquidation preference and its maximum fixed repurchase or redemption price plus accrued dividends,

if and to the extent any of the preceding items (other than items described in clauses (3), (6) and (8) above) would appear as a liability on the Person's consolidated/combined balance sheet (excluding the footnotes thereto) prepared in accordance with Ind-AS.

The amount of Indebtedness of any Person at any date will be the outstanding balance at such date of all unconditional obligations as described above and, with respect to contingent obligations, the maximum liability upon the occurrence of the contingency giving rise to the obligation; *provided* that:

(1) the amount outstanding at any time of any Indebtedness issued with original issue discount is the face amount of such Indebtedness less the remaining unamortized portion of the original issue discount of such Indebtedness at such time as determined in conformity with Ind-AS;

(2) money borrowed and set aside at the time of the Incurrence of any Indebtedness in order to prefund the payment of the interest on such Indebtedness will not be deemed to be "Indebtedness" so long as such money is held to secure the payment of such interest; and

(3) the amount of Indebtedness with respect to any Hedging Obligation will be equal to the net amount payable or receivable if the Commodity Hedging Agreement, Currency Hedging Agreement or Interest Rate Hedging Agreement giving rise to such Hedging Obligation were terminated at that time due to default by such Person.

For the avoidance of doubt, Subordinated Funding Debt, Preferred Stock (including Redeemable Preference Shares) and CCDs will not constitute Indebtedness.

"**Initial Investor**" means India Green Energy Holdings and its successors.

"**Initial Investor NCDs**" means, at any time, the NCDs of any series held by the Initial Investor.

"**Initial Parent Guarantor Loan**" means a Parent Guarantor Loan in an amount of US$100,000,000 (or the Dollar Equivalent thereof).

"**Interest Rate Hedging Agreement**" means any interest rate protection agreement, interest rate future agreement, interest rate option agreement, interest rate swap agreement, interest rate cap agreement, interest rate collar agreement, interest rate hedge agreement, option or future contract or other similar agreement or arrangement.

"**Interest Service**" means, for any period, the sum of (i) all interest payments (other than voluntary or optional payments) paid, payable, accrued or amortized in relation to such period in respect of Indebtedness of any of the Issuers (other than any Indebtedness owed to any other Issuer), (ii) all settlement payments net of receipts on account of gross settlement under Interest Rate Hedging Agreements and Currency Hedging Agreements (excluding (a) any payments for mark-to-market settlement and (b) any prepayment under Interest Rate Hedging Agreements and Currency Hedging Agreements made from non-operating cash flows of the Restricted Group) and (iii) all fees, expenses and other charges paid, payable, accrued or amortized (without double counting) in relation to such period in respect of all such Indebtedness of the Issuers (other than amortized expenses relating to the offering of the NCDs or the Incurrence of other Indebtedness), calculated without duplication for Guarantees with respect to Indebtedness already included in such calculation. For avoidance of doubt, any redemption premium payable will not be included in calculation of Interest Service.

"**Interest Service Coverage Ratio**" means, for any period, the ratio of (x) Combined EBITDA for such period to (y) Interest Service for such period. In making the foregoing calculation:

(1) *pro forma* effect will be given to any Indebtedness Incurred, repaid, repurchased, defeased or redeemed since the beginning of such period in each case as if such Indebtedness had been Incurred, repaid, repurchased, defeased or redeemed on the first day of such period (other than Indebtedness Incurred or repaid under a revolving credit or similar arrangement or any predecessor revolving credit or similar arrangement);

(2) interest expense attributable to interest on any Indebtedness (whether existing or being Incurred) computed on a pro forma basis and bearing a floating interest rate will be computed as if the rate in effect on the date of determination (taking into account any Interest Rate Hedging Agreement applicable to such Indebtedness if such Interest Rate Hedging Agreement has a remaining term in excess of 12 months or, if shorter, at least equal to the remaining term of such Indebtedness) had been the applicable rate for the entire period; and

(3) *pro forma* effect will be given to Asset Dispositions and Asset Acquisitions (including giving *pro forma* effect to the application of proceeds of any Asset Disposition) that occur during such period as if they had occurred and such proceeds had been applied on the first day of such period;

provided that to the extent that clause (3) of this sentence requires that *pro forma* effect be given to an Asset Acquisition or Asset Disposition (or asset acquisition or asset disposition), such pro forma calculation will be based upon the then most recent two semi-annual periods immediately preceding the date of determination of the Person, or division or line of business of the Person, that is acquired or disposed for which financial information is available.

"**Investments**" means, with respect to any Person, all direct or indirect investments by such Person in other Persons (including Affiliates) in the forms of loans (including Guarantees or other obligations), advances (excluding commission, travel and similar advances to officers and employees made in the ordinary course of business), capital contributions, purchases or other acquisitions for consideration of Indebtedness, Equity Interests or other securities, together with all items that are or would be classified as investments on a balance sheet prepared in accordance with Ind-AS. The acquisition by any of the Issuers of a Person that holds an Investment in a third Person will be deemed to be an Investment by such Issuer in such third Person in an amount equal to the Fair Market Value of the Investments held by the acquired Person in such third Person in an amount determined as provided in the final paragraph of the covenant described above under "*—Certain Covenants—Restricted Payments*". The amount of an Investment will be determined at the time the Investment is made and without giving effect to subsequent changes in value.

"**INVIT Offering**" means an offering of the units of an infrastructure investment trust, whether through a private placement or a public offering, with all of the Issuers, the Parent Guarantor or an Affiliate of the Parent Guarantor (including all of their respective assets) or all of the assets of the Issuers, the Parent Guarantor or an Affiliate of the Parent Guarantor, forming all or a part of the assets of such infrastructure investment trust.

"**Jumbo Certificate**" means the debenture certificate duly executed and issued by an Issuer evidencing the issue of the applicable series of the NCDs by it.

"**Lien**" means, with respect to any asset, any mortgage, lien, pledge, charge, security interest or encumbrance of any kind in respect of such asset, whether or not filed, recorded or otherwise perfected under applicable law, including any conditional sale or other title retention agreement, any lease in the nature thereof, any option or other agreement to sell or give a security interest in and any filing of or agreement to give any financing statement under the Uniform Commercial Code (or equivalent statutes) of any jurisdiction.

"**Moody's**" means Moody's Investors Service, Inc.

"**NCDs**" means the rupee denominated non-convertible debentures issued by the Issuers under the respective Debenture Trust Deeds.

"**NCDs Subscription Agreement**" means the subscription agreement to be dated on or about October 20, 2020, by and between each of the Issuers, the Parent Guarantor and the Initial Investor.

"**Net Cash Proceeds**" means with respect to any Asset Sale, the proceeds of such Asset Sale in the form of cash or cash equivalents, including payments in respect of deferred payment obligations (to the extent corresponding to the principal, but not interest, component thereof) when received in the form of cash or cash equivalents and proceeds from the conversion of other property received when converted to cash or cash equivalents, net of:

(1) brokerage commissions and other fees and expenses (including fees and expenses of counsel and investment bankers) related to such Asset Sale;

(2) provisions for all taxes (whether or not such taxes will actually be paid or are payable) as a result of such Asset Sale without regard to the combined results of operations of the Restricted Group;

(3) payments made to repay Indebtedness or any other obligation outstanding at the time of such Asset Sale that either (x) is secured by a Lien on the property or assets sold or (y) is required to be paid as a result of such sale; and

(4) appropriate amounts to be provided by such Issuer as a reserve against any liabilities associated with such Asset Sale, including, without limitation, pension and other post-employment benefit liabilities, liabilities related to environmental matters and liabilities under any indemnification obligations associated with such Asset Sale, all as determined in conformity with Ind-AS and reflected in an Officer's Certificate delivered to the applicable Debenture Trustee.

"**Offering Memorandum**" means the offering memorandum of the Issuers dated [•], 2020, in connection with the offering of the NCDs by the Issuers.

"**Officer's Certificate**" means a certificate signed by one of the directors, officers or other duly authorized representatives of the Parent Guarantor, an Issuer or a Guarantor, as applicable.

“**Opinion of Counsel**” means a written opinion from external legal counsel selected by the Parent Guarantor or any of the Issuers.

“**Original Issue Date**” means [_].

“**Original Issue Date Receivables**” means all rights which exist as of the Original Issue Date by any of the Issuers to receive payment arising from generation based incentives, receivables from O&M contractors, EPC contractors, insurance companies, the sale or lease of goods or the performance of services by any of the Issuers pursuant to an arrangement with another Person pursuant to which such other Person is obligated to pay to any of the Issuers for goods and services under terms that permit the purchase of such goods and services on credit.

“**Parent Guarantor Cross-Default**” means, provided that no Parent Guarantor Release Event has occurred, with respect to any Indebtedness of the Parent Guarantor having an outstanding principal amount of (i) on or prior to March 5, 2023, US$75.0 million (or the Dollar Equivalent thereof) or more and (ii) thereafter, US$150.0 million (or the Dollar Equivalent thereof) or more, (a) an event of default causing the holder thereof to declare such Indebtedness to be due prior to its Stated Maturity and which Indebtedness remains outstanding for a period of 60 days after such declaration and/or (b) the failure to make a principal payment when due (after giving effect to any grace period).

“**Parent Guarantor Loans**” means any loan (which, for the avoidance of doubt, is non-convertible) made by the Issuers to either (x) the Parent Guarantor or (y) any of the Parent Guarantor’s affiliates, *provided* that any such loan to any such affiliate is guaranteed by the Parent Guarantor; *provided further* that, (i) such loans bear interest at a rate of at least 8.0% per annum and such interest will be payable no less frequently than annually (subject to a five (5) Business Day cure period) and in cash, (ii) the applicable Issuer agrees that it shall not waive any right to any payment of such interest and (iii) such loans are made in accordance with the applicable Trust and Retention Account Agreement (to the extent that such agreement has been executed and is in effect).

“**Permitted Business**” means any business, service or activity engaged in by any of the Issuers on the Original Issue Date and any other businesses, services or activities that are related, complementary, incidental, ancillary or similar to any of the foregoing, or any expansions, extensions or developments thereof, including the ownership, acquisition, development, financing, operation and maintenance of renewable power generation or power transmission or distribution facilities.

“**Permitted Holders**” means any or all of the following:

(1) any shareholder of the Parent Guarantor as of the Original Issue Date;

(2) any spouse or immediate family member of any of the Persons referred to in clause (1) above;

(3) any trust established for the benefit of any of the Persons referred to in clause (1) or (2) above;

(4) any Affiliate of one or more of the Persons (considered, for these purposes, as one Person) referred to in clause (1), (2) or (3) above; and

(5) any Person the majority of the voting power of the Voting Stock of which is “beneficially owned” (as such term is used in Rule 13d-3 of the Exchange Act), directly or indirectly, by one or more of the Persons referred to in clause (1), (2), (3) or (4) above.

“**Permitted Investments**” means:

(1) any Investment in any of the Issuers;

(2) any Investment in Temporary Cash Equivalents;

(3) any Investment made as a result of the receipt of non-cash consideration from an Asset Sale that was made pursuant to and in compliance with the “*—Certain Covenants—Asset Sales*” covenant;

(4) any acquisition of assets (including Equity Interests) solely in exchange for the issuance of Equity Interests (other than Disqualified Stock) of any of the Issuers;

(5) any Investments received in compromise or resolution of (A) obligations of trade creditors or customers that were incurred in the ordinary course of business of the Parent Guarantor or any of the Issuers, including pursuant to any plan of reorganization or similar arrangement upon the bankruptcy or insolvency of any trade creditor or customer; or (B) litigation, arbitration or other disputes with Persons who are not Affiliates;

(6) Investments represented by Hedging Obligations;

(7) loans or advances to employees made in the ordinary course of business of any of the Issuers in an aggregate principal amount not to exceed US$1.0 million (or the Dollar Equivalent thereof) at any one time outstanding;

(8) repurchases of NCDs;

(9) pledges or deposits (x) with respect to leases or utilities provided to third parties in the ordinary course of business or (y) otherwise made in connection with creating or granting Liens;

(10) (x) receivables, trade credits or other current assets owing to any of the Issuers if created or acquired in the ordinary course of business and payable or dischargeable in accordance with customary trade terms, including such concessionary trade terms as such Issuer considers reasonable under the circumstances, and (y) advances or extensions of credit for purchases and acquisitions of assets, supplies, materials or equipment from suppliers or vendors in the ordinary course of business;

(11) Investments existing on the Original Issue Date and any Investment that amends, extends, renews, replaces or refinances such Investment; *provided* that such new Investment is on terms and conditions no less favorable to the applicable Issuer than the Investment being amended, extended, renewed, replaced or refinanced; and

(12) Guarantees to the extent permitted under the covenant described under the caption "*— Certain Covenants – Incurrence of Indebtedness and Issuance of Preferred Stock*".

"**Person**" means any individual, corporation, partnership, joint venture, association, joint-stock company, trust, unincorporated organization, limited liability company or government or other entity.

"**Preferred Stock**" as applied to the Capital Stock of any Person means Capital Stock of any class or classes that by its term is preferred as to the payment of dividends, or as to the distribution of assets upon any voluntary or involuntary liquidation or dissolution of such Person, over shares of Capital Stock of any other class of such Person.

"**Qualified Asset Sale**" means the simultaneous sale, conveyance, transfer, lease or other disposition by all of the Issuers of all or substantially all of their properties and assets (computed on a combined basis) to the same Person (or any of such Person's Affiliates) whereby (i) prior to the allocation of the proceeds from such Qualified Asset Sale in accordance with the "*—Certain Covenants—Asset Sales*" covenant, the Initial Investor shall have provided its consent to such Qualified Asset Sale (taking into account the proposed use of the proceeds from such Qualified Asset Sale) and (ii) such Qualified Asset Sale is undertaken in compliance with the "*—Certain Covenants—Asset Sales*" covenant.

"**REC Loan**" means each of the following:

(1) the facility availed by Pugalur Renewable Private Limited from REC Limited pursuant to the facility agreement dated March 29, 2018; and
(2) the facility availed by Bidwal Renewable Private Limited from REC Limited pursuant to the facility agreement dated March 29, 2018.

"**Redeemable Preference Shares**" means Preferred Stock which is redeemable on its maturity date.

"**Restricted Group**" means collectively the Issuers.

"**Rooftop Assets**" means the 55 projects adding up to 38.26 MW of cumulative rooftop capacity directly held by Renew Solar Energy Private Limited as further described under "*Business—Overview of our identified Rooftop Projects*" in the Offering Memorandum.

"**Sale and Leaseback Transaction**" means any direct or indirect arrangement relating to property (whether real, personal or mixed), now owned or hereafter acquired whereby any of the Issuers transfers such property to another Person and any of the Issuers leases it from such Person.

"**Securities Act**" means the U.S. Securities Act of 1933, as amended.

"**Senior Indebtedness**" means, with respect to any Person, all obligations of such Person, whether outstanding on the Original Issue Date or thereafter created, incurred or assumed, without duplication, consisting of principal and premium, if any, accrued and unpaid interest on, and fees and other amounts relating to, all Indebtedness of such Person, including interest accruing on or after the filing of any petition in bankruptcy or for reorganization relating to such Person, regardless of whether post-filing interest is allowed in such proceeding.

"**S&P**" means Standard & Poor's Ratings Group.

"**Stated Maturity**" means, with respect to any installment of interest or principal on any series of Indebtedness, the date on which the payment of interest or principal was scheduled to be paid in the documentation governing such Indebtedness as of the date it was first Incurred in compliance with the Debenture Trust Deed, and will not include any contingent obligations to repay, redeem or repurchase any such interest or principal prior to the date originally scheduled for the payment thereof.

"**Subordinated Funding Debt**" means any indebtedness that is subordinated in right of payment to the NCDs or the Guarantees incurred by any of the Issuers and owed to the Parent Guarantor or any entity majority owned, directly or indirectly, by the Parent Guarantor or owed to any of the Permitted Holders, which, by its terms or by the terms of any agreement or instrument pursuant to which such indebtedness is issued or remains outstanding, (i) does not mature or require any amortization and is not required to be repaid, redeemed, repurchased or otherwise retired, pursuant to a sinking fund obligation, event of default or otherwise (including any redemption, retirement or repurchase which is contingent upon events or circumstance), in whole or in part, prior to the earlier of (x) six (6) months after the final Stated Maturity of the NCDs and (y) six (6) months after the first date on which there are no NCDs outstanding, (ii) does not provide for any right to call a default prior to the earlier of (x) six (6) months after the final Stated Maturity of the NCDs and (y) six (6) months after the first date on which there are no NCDs outstanding, (iii) does not require any cash payment of interest (or premium, if any) prior to the earlier of (x) six (6) months after the final Stated Maturity of the NCDs and (y) six (6) months after the first date on which there are no NCDs outstanding, and (iv) is not secured by a Lien on any assets of any of the Issuers and is not guaranteed by any of the Issuers; *provided* that upon any event or circumstance that results in such indebtedness ceasing to qualify as Subordinated Funding Debt, such indebtedness shall constitute an incurrence of such Indebtedness by the applicable Issuer. Notwithstanding the foregoing, the foregoing limitations shall not be violated by provisions that permit payments of principal, premium or interest on such indebtedness if such Issuer would be permitted to make such payment under the covenant described under the caption "*—Certain Covenants—Restricted Payments*".

"**Subsidiary**" means, with respect to any specified Person:

(1) any corporation, association or other business entity of which more than 50% of the total voting power of shares of Capital Stock entitled (without regard to the occurrence of any contingency and after giving effect to any voting agreement or stockholders' agreement that effectively transfers voting power) to vote in the election of directors, managers or trustees of the corporation, association or other business entity is at the time owned or controlled, directly or indirectly, by that Person or one or more of the other Subsidiaries of that Person (or a combination thereof); and

(2) any partnership (a) the sole general partner or the managing general partner of which is such Person or a Subsidiary of such Person, or (b) the only general partners of which are that Person or one or more Subsidiaries of that Person (or any combination thereof).

"**Surplus Account**" means, in respect of any Issuer, each account which is categorized as the "Surplus Account" under its Trust and Retention Account Agreement(s) and "Surplus Accounts" means all such accounts collectively.

"**Temporary Cash Equivalents**" means any of the following:

(1) United States dollars, Indian rupees, euros or, in the case of any of the Issuers, local currencies held by such Issuer from time to time in the ordinary course of their Permitted Business;

(2) direct obligations of the United States of America, Canada, a member of the European Union or India or, in each case, any agency of either of the foregoing or obligations fully and unconditionally Guaranteed by any of the foregoing or any agency of any of the foregoing, in each case maturing within one year;

(3) demand or time deposit accounts, certificates of deposit and money market deposits maturing within 365 days of the date of acquisition thereof issued by a bank or trust company that is organized under the laws of the United States of America, the United Kingdom or India and which bank or trust company (x) has capital, surplus and undivided profits aggregating in excess of US$100.0 million

(or the Dollar Equivalent thereof) and (y)(A) has outstanding debt which is rated "A" or such similar equivalent rating) or higher by at least one nationally recognized statistical rating organization (as defined in section 3(a)(62) under the Exchange Act) or (B) is organized under the laws of India and has a long term foreign issuer credit rating or senior unsecured debt rating equal to or higher than India's sovereign credit rating by at least one nationally recognized statistical rating organization (as defined in section 3(a)(62) under the Exchange Act), or (C) is a bank owned or controlled by the government of India and organized under the laws of India;

(4) repurchase obligations with a term of not more than 30 days for underlying securities of the types described in clause (2) above entered into with a bank or trust company meeting the qualifications described in clause (3) above;

(5) commercial paper, maturing not more than six months after the date of acquisition thereof, issued by a corporation (other than an Affiliate of the Parent Guarantor) organized and in existence under the laws of the United States of America, any state thereof or any foreign country recognized by the United States of America with a rating at the time as of which any investment therein is made of "P-1" (or higher) according to Moody's or "A-1" (or higher) according to S&P or Fitch;

(6) securities with maturities of six (6) months or less from the date of acquisition thereof, issued or fully and unconditionally Guaranteed by any state, commonwealth or territory of the United States of America, or by any political subdivision or taxing authority thereof, and rated at least "A" by S&P, Moody's or Fitch;

(7) any money market fund that has at least 95.0% of its assets continuously invested in investments of the types described in clauses (1) through (5) above;

(8) any corporate debt securities which, at the date of acquisition, are rated "AAA" (or such similar equivalent rating) or higher by at least one Indian rating organization and having maturities of not more than one year from the date of acquisition; and

(9) demand or time deposit accounts, certificates of deposit and money market deposits with (i) State Bank of India, State Bank of Bikaner & Jaipur, State Bank of Hyderabad, State Bank of Indore, State Bank of Mysore, State Bank of Patiala, State Bank of Saurashtra, State Bank of Travancore, Allahabad Bank, Andhra Bank, Bank of Baroda, Bank of India, Bank of Maharashtra, Canara Bank, Central Bank of India, Corporation Bank, Dena Bank, Indian Bank, Indian Overseas Bank, Oriental Bank of Commerce, Punjab National Bank, Punjab and Sind Bank, Syndicate Bank, UCO Bank, Union Bank of India, United Bank of India, Vijaya Bank, Industrial Development Bank of India Ltd., HDFC Bank Ltd., ICICI Bank Ltd., ING Vysya Bank Ltd., Karur Vysya Bank Ltd., Kotak Mahindra Bank Ltd., and YES Bank Ltd. and (ii) any other bank or trust company organized under the laws of the India whose long-term debt is rated by Moody's, S&P or Fitch as high or higher than any of those banks listed in sub-clause (i) of this paragraph.

"**Third Party Credit Facilities**" means one or more debt or commercial paper facilities, indentures or trust deeds, in each case, with banks or other institutional lenders or other lenders providing for revolving credit loans, term loans, demand loans, debt securities, receivables financing (including through the sale of receivables to such lenders or to special purpose entities formed to borrow from such lenders against such receivables) or letters of credit, in each case, as amended, restated, modified, renewed, extended, increased, refunded, replaced (whether upon or after termination or otherwise) or refinanced (including by means of sales of debt securities to institutional investors) in whole or in part from time to time and in each case with a maturity of one year or less.

"**Treasury Rate**" means, with respect to any redemption date, the yield to maturity as of the earlier of (a) such redemption date or (b) the date on which such NCDs are defeased or satisfied and discharged, of the most recently issued United States Treasury securities with a constant maturity (as compiled and published in the most recent Federal Reserve Statistical Release H.15 (519) that has become publicly available at least two (2) Business Days prior to such date (or, if such Statistical Release is no longer published, any publicly available source of similar market data)) most nearly equal to the period from the redemption date to [_]; **provided** that if the period from the redemption date to [_] is less than one year, the weekly average yield on actually traded United States Treasury securities adjusted to a constant maturity of one year will be used. Any such Treasury Rate shall be obtained by the applicable Issuer.

"**Trust and Retention Account Agreements**" means the trust and retention account agreements entered into by each Issuer with inter alia the Debenture Trustee for establishing and maintaining certain accounts, as amended or restated from time to time.

"**Voting Stock**" of any specified Person as of any date means the Capital Stock of such Person that is at the time entitled to vote in the election of the Board of Directors of such Person.

"**VRR Investment Amount**" means the amount allocated to the Initial Investor under the VRR Scheme (being the committed portfolio size) pursuant to which the Initial Investor has invested or proposes to invest in the NCDs.

"**VRR Retention Period**" means the committed retention period applicable to the Initial Investor or any other Holder in relation to the investment made by it in the NCDs under the VRR Scheme.

"**VRR Scheme**" means the Voluntary Retention Route scheme introduced and regulated by the RBI from time to time.

APPENDIX A – DESCRIPTION OF THE COLLATERAL

Sr. No.	Assets	Collateral Document	Time period for creation of security in respect of the NCDs	Time period for creation of security in respect of the relevant Guarantees
Tarun Kiran Bhoomi Private Limited ("**Tarun Kiran**"): 20 MW ("**Alland Project**") – Liens will be created (i) over the assets of Tarun Kiran described in Sr. No. 1, to secure the NCDs and Guarantees issued by Tarun Kiran; and (ii) over the assets and shares of Tarun Kiran described in Sr. Nos. 2 to 5, to secure the NCDs issued by all Issuers and the Guarantees issued by all Guarantors.				
1	Mortgage over immovable properties of Tarun Kiran in connection with the Alland Project located at Alland, Gulbarga, Karnataka.	Equitable mortgage, indenture of mortgage or such other form of mortgage as may be agreed with the Debenture Trustee	Within the later of (i) 5 months from the Original Issue Date; and (ii) 4 months from the date of completion of final mutation of the entire land in the name of Tarun Kiran, receipt of approval for conversion of land use and the receipt of mortgage creation approval by Tarun Kiran in respect of the entire land to secure the relevant NCDs.	Tarun Kiran will take commercially reasonable steps to create such mortgage within the later of (i) 5 months from the Original Issue Date; and (ii) 4 months from the date of completion of final mutation of the entire land in the name of Tarun Kiran, receipt of approval for conversion of land use and the receipt of mortgage creation approval by Tarun Kiran in respect of the entire land to secure the relevant Guarantees.
2	Charge over all movable (tangible and intangible) assets and current assets of Tarun Kiran, including (without limitation) its cash flows, receivables, book debts, revenues, goodwill, intellectual property rights and uncalled capital, both present and future (other than in respect of certain accounts described below). ReNew Wind Energy (AP) Private Limited ("**ReNew AP**"): 18 MW ("**Chikodi Project**") and 40 MW ("**Lingasugur Project**") – Liens will be created (i) over the assets of ReNew AP described in Sr. No. 1, to secure the NCDs and Guarantees issued by ReNew AP; and (ii) over the assets and shares of ReNew AP described in Sr. Nos. 2 to 5, to secure the NCDs issued by all Issuers and the Guarantees issued by all Guarantors.				
1	Mortgage over immovable properties of ReNew AP in connection with the: • **Chikodi Project**: located at Belgaum district, Karnataka; and • **Lingasugur Project**: located at Raichur district, Karnataka.	Equitable mortgage, indenture of mortgage or such other form of mortgage as may be agreed with the Debenture Trustee	Within the later of (i) 5 months from the Original Issue Date; and (ii) 4 months from the date of receipt of mortgage creation approval by ReNew AP in respect of the entire land to secure the relevant NCDs.	ReNew AP will take commercially reasonable steps to create such mortgage within the later of (i) 5 months from the Original Issue Date; and (ii) 4 months from the date of receipt of mortgage creation approval by ReNew AP in respect of the entire land to secure the relevant Guarantees.
2	Charge over all movable (tangible and intangible) assets and current assets of ReNew AP, including (without limitation) its cash flows, receivables, book debts, revenues, goodwill, intellectual property rights and uncalled capital, both present and future (other than in respect of certain accounts described below).	Deed of hypothecation or such other security document as may be agreed with the Debenture Trustee	Within 5 months of the Original Issue Date.	ReNew AP will take commercially reasonable steps to create such charge within 5 months of the Original Issue Date.
3	Charge over all accounts opened in accordance with the Trust and Retention Account Agreement entered into by ReNew AP and all other bank accounts of ReNew AP, whether in existence at the time of execution of the applicable security document or acquired/ opened thereafter (other than certain accounts described below), together with all cash flows, receivables and other assets and securities which represent all amounts in such accounts and all the moneys, securities, instruments,	Deed of hypothecation or such other security document as may be agreed with the Debenture Trustee	Within 5 months of the Original Issue Date.	ReNew AP will take commercially reasonable steps to create such charge within 5 months of the Original Issue Date.

Sr. No.	Assets	Collateral Document	Time period for creation of security in respect of the NCDs	Time period for creation of security in respect of the relevant Guarantees
	investments and other properties deposited in, credited to or required to be deposited in or credited to or lying to the credit of such accounts, both present and future.			
4	Charge over the rights, title, interest, benefits, claims and demands whatsoever of ReNew AP under its project documents (including, without limitation the power purchase agreements, EPC contracts, operation and maintenance contracts, insurance contracts (other than third party liability insurances), letters of credit, bonds, guarantees (including bank guarantees and corporate guarantees) and clearances) in respect of the Chikodi Project and the Lingasugur Project, both present and future.	Deed of hypothecation along with a power of attorney or such other security document as may be agreed with the Debenture Trustee	Within 5 months of the Original Issue Date.	ReNew AP will take commercially reasonable steps to create such charge within 5 months of the Original Issue Date.
5	Pledge of 51.0 per cent. of the equity shares of ReNew AP which are held by ReNew Power Private Limited, both present and future.	Share pledge agreement or such other security document as may be agreed with the Debenture Trustee	Within 5 months of the Original Issue Date.	ReNew Power Private Limited will take commercially reasonable steps to create such pledge within 5 months of the Original Issue Date.

A first ranking Lien will be created over the assets set out above (except for the accounts listed below) and in respect of ReNew Wind Energy (AP 3) Private Limited, the Lien created over revenue land in Rajasthan will be subject to a first charge of the Government of Rajasthan. An exclusive Lien will be created over:

(a) the debt service account(s) (from which interest, principal and certain other amounts in respect of the NCDs issued by any Co-Issuer will be made) for the benefit of the secured parties in respect of the NCDs issued by all Issuers and the Guarantees issued by all Guarantors, with such Lien ranking *pari passu inter se* such Persons;

(b) the enforcement proceeds account(s) (into which the proceeds from enforcement of the Liens created solely in respect of the Indebtedness described in paragraph (a) above will be deposited) for the benefit of the secured parties in respect of the NCDs issued by all Issuers and the Guarantees issued by all Guarantors, with such Lien ranking *pari passu inter se* such Persons;

(c) the debt service account(s) (from which interest, principal and certain other amounts in respect of any Indebtedness of an Issuer (other than the Indebtedness described in paragraph (a) above) will be made) for the benefit of the Persons extending such Indebtedness (and their trustees and agents) and with separate accounts being created for each such Person extending such Indebtedness, if required;

(d) the debt service reserve account(s) (in which an debt reserve will be maintained in respect of any Indebtedness of an Issuer (other than the Indebtedness described in paragraph (a) above) for the benefit of the Persons extending such Indebtedness (and their trustees and agents) and with separate accounts being created for each such Person extending such Indebtedness, if required; and

(e) the enforcement proceeds account(s) (into which the proceeds from enforcement of the Liens created solely in respect of the Indebtedness of an Issuer (other than the Indebtedness described in paragraph (a) above) will be deposited) for the benefit of the Persons extending such Indebtedness (and their trustees and agents) and with separate accounts being created for each such Person extending such Secured Indebtedness, if required.

Each Issuer and other security provider, as applicable, will take all actions required under applicable law to perfect the security interest over the Collateral for the benefit of the relevant Holders within 30 days from the creation of each such security interest.

Appendix B – Form of Redemption Notice

Date:	[•]
To:	India Green Energy Holdings (the "**Company**")
Attention:	The Directors
Facsimile No.	[•]
From:	[*Name of requesting NCDs Issuer*]
Subject:	Rs.[•] [•]% Senior Secured Non-Convertible Debentures due [_] (the "**NCDs**") **IRREVOCABLE REDEMPTION NOTICE**

Dear Sirs,

Pursuant to section [•] of the debenture trust deed entered into by us on [•] (the "**NCDs Debenture Trust Deed**"), pursuant to which the NCDs were issued on [•], we hereby deliver to you this irrevocable notice (the "**Redemption Notice**").

Terms used but not otherwise defined herein shall have the meaning ascribed to them in the NCDs Debenture Trust Deed.

We hereby:

(1) confirm that we have paid to the Company, in immediately available funds and free of any deductions and costs of any nature whatsoever, the Redemption Request Fee; and

(2) request that you provide a quote to redeem the Redemption Proportion of the series of NCDs on the terms set out below.

The terms related to this particular Redemption Request are as follows:

Redemption Proportion:	[•]
Proposed Redemption Date:	[•]
No Redemption Election or a VRR Permitted Redemption Election	[No Redemption Election]/[VRR Permitted Redemption Election]

By:

[*Insert name of requesting NCDs Issuer*]

TAXATION

The information provided below does not purport to be a comprehensive description of all tax considerations which may be relevant to a decision to purchase the NCDs. In particular, the information does not consider any specific facts of circumstances that may apply to a particular purchaser. Neither these statements nor any other statements in this offering memorandum are to be regarded as advice on the tax position of any holder of the NCDs or of any person acquiring, selling or otherwise dealing with the NCDs or on any tax implications arising from the acquisition, sale or other dealings in respect of the NCDs. The statements do not purport to be a comprehensive description of all the tax considerations that may be relevant to a decision to purchase, own or dispose of the NCDs and do not purport to deal with the tax consequences applicable to all categories of investors, some of which (such as dealers in securities) may be subject to special rules.

Prospective purchasers of the NCDs are advised to consult their own tax advisers as to the tax consequences of the purchase, ownership and disposal of NCDs, including the effect of any state or local taxes, under the tax laws applicable in India and each country of which they are residents or countries of purchase, holding or disposal of the NCDs. Additionally, in view of the number of jurisdictions where local laws may apply, this offering memorandum does not discuss the local tax consequences to a potential holder, purchaser, seller arising from the acquisition, holding or disposal of the NCDs. Prospective investors must therefore inform themselves as to any tax, exchange control legislation or other laws and regulations in force relating to the subscription, holding or disposal of NCDs at their place of ordinance, and the countries of which they are citizens or countries of purchase, holding or disposal of NCDs.

Indian Taxation

The following is a summary of the existing principal Indian tax consequences for Foreign Portfolio Investors ("FPI") subscribing to the NCDs issued by the Issuers. The summary is based on existing Indian taxation law and practice in force at the date of this offering memorandum and is subject to change, possibly with retroactive effect. The summary does not constitute legal or tax advice and is not intended to represent a complete analysis of the tax consequences under Indian law of the acquisition, ownership or transfer of the NCDs. Prospective investors should, therefore, consult their own tax advisers regarding the Indian tax consequences, as well as the tax consequences under any other applicable taxing jurisdiction, of acquiring, owning and disposing of the NCDs.

Payments through India

Any payments any Issuer makes on the NCDs, including additional amounts, made through India would be subject to the regulations of RBI.

Taxation of Interest

Since the proceeds of the issuance of the NCDs are to be used for the purposes of the business of the Issuers in India, FPI would be liable to pay tax on the interest paid on the NCDs.

As of the date of this offering memorandum, the rate of tax in accordance with the Income Tax Act, 1961 (Income Tax Act) is 5% (plus applicable surcharge and health and education cess), for any interest paid on NCD before July 1, 2023 in accordance with the provisions of Sections 115A read with 194LD of the Income Tax Act, 1961. However, interest paid on NCDs after July 1, 2023 may be subject to tax at the rate of 20% (plus applicable surcharge and health and education cess) under the provisions of Sections 115AD of the Income Tax Act, unless the present concessional scheme of subjecting the interest income to be taxed at the rate of 5% is extended. The rate of tax will stand reduced if the beneficial recipient is a resident of a country with which the Government of India has entered into a double taxation avoidance agreement ("Tax Treaty") which provides for the taxation of interest and capital gains income in India at a rate lower than the rate provided under the Income Tax Act, 1961 provided the conditions prescribed therein are fulfilled.

Withholding tax

Since the interest payable on the NCDs is subject to taxation in India, there is a requirement to withhold tax at the applicable rate i.e. at 5% (plus applicable surcharge and health and education cess), provided the interest payments are made prior to July 1, 2023 and the rate of interest does not exceed the prescribed limits. With regards to the interest payments made after July 1, 2023) tax may be required to be withheld at the rate of

20% (plus applicable surcharge and health and education cess). This rate would be subject to any lower rate of tax provided by an applicable Tax Treaty. FPI could be required to provide certain documents or other information as prescribed by law to apply the beneficial withholding tax rate. Further, a Permanent Account Number ("PAN") from non-resident investor would not be required if the non-resident investor provide documentation including a tax residency certificate, a tax identification number and other details including its name, address, email details and contact number, pursuant to section 206AA(7) of the Income Tax Act, 1961 read with rule 37BC of the Income Tax Rules, 1962.

Pursuant to the terms and conditions of the NCDs, all payments of, or in respect of, principal and interest on the NCDs, will be made free and clear of and without withholding or deduction on account of any present or future taxes within India unless it is required by law or where the laws undergo any amendment, in which case as described under "Description of the NCDs – Additional Amounts", the Issuers will pay additional amounts as may be necessary in order that the net amounts received by the investors after the withholding or deduction shall equal the respective amounts which would have been receivable in respect of the NCDs in the absence of the withholding or deduction, subject to certain exceptions.

Taxation of deemed Income

As a measure to prevent laundering of unaccounted income, the Income Tax Act, 1961 provides that any person receiving certain specified assets (including the NCDs) at a price less than their fair market value, shall be subject to income tax in India on the benefit accruing to him. Tax shall be payable at the rates applicable for the regular income. However, it may be noted that this provision would not be applicable if the asset is received from a relative or under a will or by way of inheritance or any other specific instances provided under section 56(2)(x) of the Income Tax Act, 1961.

In the instant case, in case FPI receives NCDs under the above mechanism, the taxability of the same shall also be subject to the provisions of the applicable Tax Treaty, assuming the FPI is entitled to claim benefits of the Tax Treaty.

Taxation of gains arising on redemption transfer of NCDs

Any gains arising to an FPI from the transfer of a capital asset held (or deemed to be held) will be chargeable to income tax in India if such capital asset is regarded as property situated in India. Transfer has inter alia been defined under the Income Tax Act, 1961 to include sale, exchange, relinquishment of a capital asset or extinguishment of any rights therein. In this regard, the term "capital asset" has been defined to include any security held by an FPI in accordance with the Securities and Exchange Board of India Act, 1992. However, potential investors may consult their own tax advisers regarding the Indian tax consequences, as well as the computation of tax liability in India as a result of transfer of the NCDs.

The following consequences will arise upon transfer of an NCD:

(i) an FPI who has held the NCDs for a period of more than 36 months (long-term capital asset) immediately preceding the date of their disposal, would be liable to pay capital gains tax at the rate of 10% of the capital gains (plus applicable surcharge and health and education cess) in accordance with the provisions of the Income Tax Act, 1961. These rates are subject to any lower rate provided for by an applicable Tax Treaty.

(ii) an FPI who has held the NCDs for a period of 36 months or less (short term capital asset) would be liable to pay capital gains tax at rates of 30% (plus applicable surcharge and health and education cess) subject to any lower rate provided for by an applicable Tax Treaty.

As per section 196D of the Income-tax Act, 1961 no tax is required to be withheld on capital gains accruing to an FPI from transfer of securities including the NCDs.

Anti-avoidance provisions

Under the Income Tax Act, 1961 there are both specific as well as generic anti-avoidance provisions relating to tax like transfer pricing provisions and General Anti-Avoidance Rules ("GAAR").

Under the transfer pricing provisions, any income arising from an international transaction between two related parties have to be computed having regard to the arm's length price ("ALP"). In the event that the NCDs are transferred by a non-resident investor to another non-resident investor and such non-resident investors are related parties in accordance with the provisions of the Income Tax Act, 1961, then the transactions would have to be at ALP and necessary compliances are required to be undertaken by the investors.

GAAR provisions have been effective from fiscal year 2017-2018. Under the GAAR, an arrangement whose main purpose is to obtain tax benefits, may be declared as an "impermissible avoidance arrangement". According to Section 96(1) of the Income Tax Act, 1961 "impermissible avoidance arrangement" means an arrangement of which the main purpose is to obtain a tax benefit, and which, inter alia, creates rights, or obligations, which are not ordinarily created between persons dealing at arm's length. Further, an arrangement is presumed, unless proved to the contrary by the taxpayer, to have been entered into, for the main purpose of obtaining a tax benefit.

If GAAR provisions are invoked, it could result in significant implications for the parties to the transaction including inter alia, disregarding, combining or re-characterisation of any step in or part or whole of the impermissible avoidance arrangement, denial of any tax benefit claimed by the taxpayer, or denial of benefit claimed by the non-resident under a Tax Treaty.

Estate Duty

No estate duty is payable at present in India in relation to the NCDs.

Gift Tax

No gift tax is payable at present in India in relation to the NCDs.

Stamp Duty

A transfer of the NCDs outside India will not give rise to any Indian stamp duty liability unless brought into India. Stamp duty would be payable if the NCDs are brought into India for enforcement or for any other purpose. The amount of stamp duty payable would depend on the applicable State Stamp Act and the duty will have to be paid within a period of three months from the date the NCDs are first received in India.

INDIAN GOVERNMENT FILINGS AND APPROVALS

Subscription to the NCDs by the NCD Subscriber

The SEBI FPI Regulations lay down the provisions under which an eligible foreign investor can deal in securities issued by an Indian entity, including listed and unlisted non-convertible debentures issued by an Indian company in the infrastructure sector.

The SEBI FPI Regulations require such foreign portfolio investor ("FPI") to obtain a certificate, for the purposes of dealing in securities issued by an Indian entity, from a designated depository participant on behalf of SEBI. Accordingly, for the purpose of subscription to the NCDs, the NCD Subscriber has obtained a certificate of registration from a designated depository participant on behalf of SEBI under the SEBI FPI Regulations.

The NCDs are proposed to be issued under the VRR, which permits an FPI to invest in debt markets in India without complying with the minimum residual maturity requirement, concentration limit or single/group investor-wise limits otherwise applicable to FPI investment in corporate bonds, subject to the FPI retaining at least 75% of the amount allotted for investment ("Committed Portfolio Size" or "CPS") for a period of not less than 3 years (or such other period as may be notified by the RBI at the time of allotment) which the FPI voluntarily commits, at the time of such allotment, to retain in India ("Retention Period"). The CPS will be allotted to an FPI through auctions or an on-tap window. No FPI (including its related FPIs) will be allotted an investment limit greater than 50% of the amount offered for each allotment by tap or auction in case there is a demand for more than 100% of amount offered. FPIs are further required to invest at least 75% of their respective allocated amount within three months of the date of allotment of the allocated amount.

In the event of liquidation of an FPI investment made under the VRR during its Retention Period, any repatriation of amounts exceeding 25% of the CPS will require the prior approval of the RBI. However, if the whole or any part of such investment is transferred to other FPI(s) (which shall abide by all the terms and conditions applicable to the selling FPI under the VRR), the selling FPI will be able to make an unfettered exit and repatriate the amount received from the purchasing FPI without seeking any approval for repatriation.

Issuance of NCDs

In terms of the Section 42 of the Companies Act, 2013 and Rule 14 of the Companies (Prospectus and Allotment of Securities) Rules, 2014 (the "Companies PAS Rules"), every company making a private placement, i.e., an offer of securities or invitation to subscribe or issue securities to a select group of persons (other than by way of public offer), is required to make such private placement through a private placement offer letter (the "Offer Letter"). The Offer Letter shall be prepared in accordance with the requirements prescribed under Rule 14 of the Companies PAS Rules. Further, the company making the offer is required to record the names of the persons to whom the offer is to be made and such persons have to be identified by the board of directors of the company. The Offer Letter, along with an application form, shall be sent by the company making the private placement to the identified persons within 30 days of the recording of their names. Upon receipt of application money, the allotment shall be completed within 60 days, failing which the application money will be returned to the subscribers. The return of allotment of securities is required to be filed with the Registrar of Companies within a period of 15 days of allotment, failing which the company shall not be permitted to utilize the monies raised through such private placement.

Accordingly, each Issuer will be required to prepare an Offer Letter in respect of the NCDs, as required under Section 42 of the Companies Act, 2013, record the names of the identified offerees, issue the Offer Letter within 30 days of such recording and file a return of allotment with the Registrar of Companies within 15 days of the allotment of the NCDs.

Registration of charges

In terms of Section 77 of the Companies Act, 2013 every company creating a charge on its property or assets or any of its undertakings is required to register such charge with the Registrar of Companies within 30 days of creation of the charge. The Registrar of Companies may, on an application filed by the company, allow such registration to be made within a period of 60 days of creation of the charge on payment of additional fees. The Registrar of Companies may, on an application filed by the company allow such registration to be made within a period of: (i) 300 days of creation of the charge on payment of additional fees where the charge was created prior to November 2, 2018 (being the date of commencement of the Companies (Amendment) Ordinance

2018) or within six months from November 2, 2018; and (ii) 60 days of creation of charge on payment of additional fees where the charge was created after November 2, 2018 and if not, the Registrar of Companies may, on application allow the registration to be made in a further period of 60 days on payment of prescribed fees. The particulars of the charge shall be filed in the form prescribed under Rule 3 of the Companies (Registration of Charges) Rules, 2014 with the Registrar of Companies within the aforementioned time period.

Certain documents creating a mortgage over immovable properties are required to be registered under the Registration Act, 1908 with the sub-registrar of assurances within four months of their execution. If a document is not registered within this time period, the registrar of assurances may on an application, permit registration within a further period of 4 months subject to payment of penalties.

In view of COVID-19 pandemic, the GoI has provided the following relaxation in relation to registration of charges, within the period of March 1, 2020 to December 31, 2020, subject to certain conditions:

(a) Where the charge has been created before March 1, 2020 and the time period of registering the charge (as provided under Section 77 of the Companies Act, 2013) has not expired as of March 1, 2020, the time period between March 1, 2020 and December 31, 2020 will not be considered for calculating the time period under Section 77.

(b) If the charge has been created/modified between March 1, 2020 and December 31, 2020, the time period between date of creation/modification of the charge till December 31, 2020 will not be considered for calculating the time period under Section 77.

PLAN OF DISTRIBUTION

India Green Energy Holdings (the “NCD Subscriber”) has, pursuant to a Subscription Agreement dated October 20, 2020 (the “Subscription Agreement”) agreed to subscribe for the NCDs, subject to the provisions of the Subscription Agreement. The issue size, issue price and the interest rate of the NCDs will be determined in accordance with the mechanics provided under the Subscription Agreement. The Subscription Agreement may be terminated in certain circumstances prior to payment of the issue price.

Pursuant to the Subscription Agreement, the Issuers have agreed to indemnify the NCD Subscriber against certain liabilities, including liabilities under the Securities Act.

Each Issuer has agreed that, for a period of 90 days after the closing of this offering, it will not directly or indirectly, offer for sale, sell, or otherwise dispose of (or enter into any transaction or device that is designed to, or would be expected to, result in the disposition by any person at any time in the future of) any of its debt securities (excluding any debt securities offered for sale, sold, or otherwise disposed of, solely within India) substantially similar to the NCDs without the prior written consent of the NCD Subscriber.

New Issue of Securities

The NCDs will constitute a new class of securities with no established trading market. The Issuers do not intend to list the NCDs on any stock exchange. Accordingly, no assurance can be given as to the liquidity of, or trading markets for, the NCDs.

Delivery, Payment and Settlement

The Issuers expect that delivery of the NCDs will be made against payment therefor on or about the date specified on the cover page of this offering memorandum, which will be the [●] business day following the date of pricing of the NCDs (this settlement cycle being referred to as “T+[●]”).

Selling Restrictions

General

No action has been or will be taken in any jurisdiction by the Issuers that would permit a public offering of the NCDs or the possession, circulation or distribution of this offering memorandum (in preliminary or final form) or any other material relating to the Issuers or the NCDs in any jurisdiction where action for the purpose is required. Accordingly, the NCDs may not be offered or sold, directly or indirectly, and neither this offering memorandum nor any other offering material or advertisements in connection with the NCDs may be distributed or published, in or from any country or jurisdiction, except in compliance with any applicable rules and regulations of any such country or jurisdiction.

Persons into whose hands this offering memorandum comes are required by the Issuers to comply with all applicable laws and regulations in each country or jurisdiction in which they purchase, offer, sell or deliver the NCDs or have in their possession, distribute or publish this offering memorandum (in preliminary or final form) or any other offering material relating to the NCDs, in all cases at their own expense. This offering memorandum does not constitute an offer to purchase or a solicitation of an offer to sell in any jurisdiction where such offer or solicitation would be unlawful. Persons into whose possession this offering memorandum comes are advised to inform themselves about and to observe any restrictions relating to the offering, the distribution of this offering memorandum and resales of the NCDs. See “*Transfer Restrictions*.”

European Economic Area

The NCDs are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area. For the purposes of this provision, the expression “retail investor” means a person who is one (or more) of the following:

(a) a retail client as defined in point (11) of Article 4(1) of MiFID II;

(b) a customer within the meaning of the IMD, where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or

(c) not a qualified investor as defined in Directive 2003/71/EC (as amended or superseded, the "Prospectus Directive").

United States

The NCDs have not been and will not be registered under the Securities Act and may not be offered or sold within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act, and in accordance with Rule 903 of Regulation S. Accordingly, no "directed selling efforts" with respect to the NCDs may be made. In addition, until 40 days after the commencement of the offering of the NCDs, an offer or sale of the NCDs within the United States by any dealer (whether or not participating in the offering) may violate the registration requirements of the Securities Act. Terms used in this paragraph have the meanings given to them by Regulation S under the Securities Act.

United Kingdom

The communication of an invitation or inducement to engage in an investment activity (within the meaning of Section 21 of the Financial Services and Markets Act 2000 (the "FSMA")) in connection with the issue or sale of the NCDs in circumstances in which Section 21(1) of the FSMA does not apply to the Issuers may be made only where it will comply with all applicable provisions of the FSMA with respect to anything done in relation to the NCDs in, from or otherwise involving the United Kingdom.

India

(a) This offering memorandum has not and will not be registered or produced or made available as an offer document as a prospectus in respect of a public offer under the Companies Act or any other applicable Indian laws, with the Registrar of Companies, the Securities and Exchange Board of India or any other statutory or regulatory body of like nature in India, and (b) this offering memorandum or any other offering document or material relating to the NCDs will not be circulated or distributed and have not been circulated or distributed, directly or indirectly, to any person or the public or any member of the public in India or otherwise generally distributed or circulated in India which would constitute an advertisement, invitation, offer, sale or solicitation of an offer to subscribe for or purchase any securities in violation of any Indian laws.

Holders and beneficial owners of the NCDs shall be responsible for compliance with restrictions on the ownership of the NCDs imposed from time to time under the RBI regulations governing the VRR and other applicable laws or by any regulatory authority or otherwise. In this context, holders and beneficial owners of NCDs shall be deemed to have acknowledged, represented and agreed that such holders and beneficial owners are eligible to purchase the NCDs under applicable laws and regulations and are not prohibited under any applicable law or regulation from acquiring, owning or selling the NCDs.

Hong Kong

No offer or sale in Hong Kong, by means of any document, of any NCDs may be made other than (a) to "professional investors" as defined in the Securities and Futures Ordinance (Cap. 571) of Hong Kong (the "SFO") and any rules made under the SFO; or (b) in other circumstances which do not result in the document being a "prospectus" as defined in the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Cap. 32) of Hong Kong (the "C(WUMP)O") or which do not constitute an offer to the public within the meaning of the C(WUMP)O, and there may be no issue or possession for the purposes of issue, whether in Hong Kong or elsewhere, of any advertisement, invitation or document relating to the NCDs, which is directed at, or the contents of which are likely to be accessed or read by, the public of Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to NCDs which are or are intended to be disposed of only to persons outside Hong Kong or only to "professional investors" as defined in the SFO and any rules made under the SFO.

Singapore

This offering memorandum has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, the NCDs may not offered or sold or caused to be made the subject of an invitation for subscription or purchase, and this offering memorandum or any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of the NCDs may not be circulated or distributed, whether directly or indirectly, to any person in Singapore other than (i) to an institutional investor (as defined in

Section 4A of the Securities and Futures Act (Chapter 289) of Singapore, as modified or amended from time to time (the "SFA")) pursuant to Section 274 of the SFA, (ii) to a relevant person (as defined in Section 275(2) of the SFA) pursuant to Section 275(1) of the SFA, or any person pursuant to Section 275(1A) of the SFA, and in accordance with the conditions specified in Section 275 of the SFA, or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Where NCDs are subscribed or purchased under Section 275 of the SFA by a relevant person which is:

(a) a corporation (which is not an accredited investor (as defined in Section 4A of the SFA)) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or

(b) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary of the trust is an individual who is an accredited investor, securities or securities-based derivatives contracts (each term as defined in Section 2(1) of the SFA) of that corporation or the beneficiaries' rights and interest (howsoever described) in that trust shall not be transferred within six months after that corporation or that trust has acquired the NCDs pursuant to an offer made under Section 275 of the SFA, except:

   (i) to an institutional investor or to a relevant person, or to any person arising from an offer referred to in Section 275(1A) or Section 276(4)(i)(B) of the SFA;

   (ii) where no consideration is or will be given for the transfer;

   (iii) where the transfer is by operation of law;

   (iv) as specified in Section 276(7) of the SFA; or

   (v) as specified in Regulation 37A of the Securities and Futures (Offers of Investments) (Securities and Securities-based Derivatives Contracts) Regulations 2018.

Notification under Section 309B(1)(c) of the SFA: *In connection with Section 309B of the SFA and the CMP Regulations 2018, each Issuer has determined, and hereby notifies all relevant persons (as defined in Section 309A(1) of the SFA), that the NCDs are prescribed capital markets products (as defined in the CMP Regulations 2018) and Excluded Investment Products (as defined in MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).*

TRANSFER RESTRICTIONS

Because of the following restrictions, we encourage you to consult legal counsel prior to making any offer, resale, pledge or other transfer of the NCDs. The NCDs are subject to restrictions on transfer as summarized below. By purchasing the NCDs, you will be deemed to have made the following acknowledgements, representations to, and agreements with, the Issuers:

1. You understand and acknowledge that:
   - the NCDs have not been registered under the Securities Act or any other securities laws;
   - the NCDs are being offered for resale in transactions that do not require registration under the Securities Act or any other securities laws;
   - the NCDs are being offered and sold only outside the United States in "offshore transactions" as defined in, and in reliance on, Rule 903 of Regulation S under the Securities Act; and
   - unless so registered, the NCDs may not be sold or otherwise transferred except under an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act or any other applicable securities laws, and, in each case, in compliance with the conditions for transfer set forth in paragraph 4 below.

2. You represent that you are not an affiliate (as defined in Rule 144 under the Securities Act) of the Issuers you are not acting on behalf of any of the Issuers, and you are purchasing the NCDs in an "offshore transaction" as defined in, and in accordance with, Regulation S.

3. You acknowledge that none of the Issuers or any person representing the Issuers have made any representation to you with respect to the Issuers or the offering of the NCDs, other than the information contained in this offering memorandum. You represent that you are relying only on this offering memorandum in making your investment decision with respect to the NCDs. You agree that you have had access to such financial and other information concerning the Issuers and the NCDs as you have deemed necessary in connection with your decision to purchase the NCDs, including an opportunity to ask questions of and request information from the Issuers.

4. You represent that you are purchasing the NCDs for your own account, or for one or more investor accounts for which you are acting as a fiduciary or agent, in each case not with a view to, or for offer or sale in connection with, any distribution of the NCDs.

5. You acknowledge that the Issuers, the Debenture Trustee, the Transfer Agent and others will rely upon the truth and accuracy of the above acknowledgments, representations and agreements. You agree that if any of the acknowledgments, representations or agreements you are deemed to have made by your purchase of the NCDs is no longer accurate, you will promptly notify the Issuers. If you are purchasing any NCDs as a fiduciary or agent for one or more investor accounts, you represent that you have sole investment discretion with respect to each of those accounts and that you have full power to make the above acknowledgments, representations and agreements on behalf of each account.

6. You understand that the NCDs will be transferable to Eligible Investors subject to applicable Indian regulations.

7. By the purchase of the NCDs, each purchaser of the NCDs will be deemed to:
   - agree that it will inform each person to whom it transfers NCDs of any restrictions on transfer of such NCDs;
   - if such purchaser is an FPI, agree that it will be required to comply with all the terms and conditions applicable to the selling FPI under the VRR; and
   - agree that the NCDs will not be offered or sold (including by way of security) to any person who is not an Eligible Investor.

LEGAL MATTERS

Certain legal matters in connection with this offering will be passed upon for the Restricted Group by Latham & Watkins LLP as to matters of U.S. federal securities laws and Cyril Amarchand Mangaldas as to matters of Indian law.

INDUSTRY CONSULTANT

The information contained in the section entitled "*Industry Overview*" was prepared by CRISIL Limited, the Group's advisor with required expertise on the Indian wind and solar industry, in a report titled "*Renewable Power Market in India*" dated July 2020. CRISIL Limited has given and has not withdrawn its written consent to the issue of this offering memorandum with the inclusion herein of its name and all references thereto and to the inclusion of the section entitled "*Industry Overview*" in the form and context in which it appears.

INDEPENDENT AUDITORS

The Group's audited consolidated financial statements as at and for the years ended March 31, 2018, 2019 and 2020, included in this offering memorandum, have been audited by S.R. Batliboi & Co. LLP, and their auditor's reports for such years are included herein.

The Restricted Group's audited special purpose combined financial statements as at and for the years ended March 31, 2018, 2019 and 2020 prepared in accordance with recognition, measurement, presentation and disclosure principles specified in Ind AS notified under Section 133 of the Companies Act, 2013, read with the Companies (Indian Accounting Standards) Rules, 2015, (as amended) and the Guidance Note and other accounting principles generally accepted in India, included in this offering memorandum, have been audited by S.R. Batliboi & Co. LLP, and their auditor's reports for such years are included herein.

The Restricted Group's unaudited special purpose interim combined financial statements as at and for the three months ended June 30, 2019 and 2020 prepared in accordance with recognition and measurement principles of Ind AS 34 notified under Section 133 of the Companies Act, 2013, read with the Companies (Indian Accounting Standards) Rules, 2015, (as amended) and the Guidance Note and other accounting principles generally accepted in India, included in this offering memorandum, have been subjected to limited review by S.R. Batliboi & Co. LLP, and their limited review report for such period is included herein.

The Company's audited standalone financial statements as at and for the years ended March 31, 2018, 2019 and 2020, included in this offering memorandum, have been audited by S.R. Batliboi & Co. LLP, and their auditor's reports for such years are included herein.

ENFORCEABILITY OF CIVIL LIABILITIES

The Issuers are incorporated under the laws of India. Substantially all of the Restricted Group's directors and key management personnel are residents of India and all of its assets are located in India. As a result, it may not be possible for investors to effect service of process on the Restricted Group or such persons in jurisdictions outside of India, or to enforce against them judgments obtained in courts outside of India including those predicated upon civil liabilities of the Restricted Group or such directors and key management personnel under laws other than Indian laws, including judgments predicated upon the civil liability provisions of the federal securities laws of the United States.

In addition, India is not a party to any multilateral international treaty in relation to the recognition or enforcement of foreign judgments. The statutory basis for recognition and enforcement of foreign judgments is provided for under Section 13 and Section 44A of the Indian Code of Civil Procedure, 1908 (the "Civil Code"). Section 44A of the Civil Code provides that, where a foreign judgment has been rendered by a superior court in any country or territory outside India which the GoI has by notification declared to be a reciprocating territory, it may be enforced in India by proceedings in execution as if the judgment had been rendered by the relevant court in India. However, section 44A of the Civil Code is applicable only to monetary decrees other than those being in the nature of any amounts payable in respect of taxes or other charges of a like nature or in respect of a fine or other penalty and is not applicable to arbitration awards, even if such awards are enforceable as a decree or judgment.

While each of the United Kingdom, Singapore, Hong Kong and United Arab Emirates has been declared by the GoI to be a reciprocating territory for the purposes of Section 44A of the Civil Code and the High Courts in England as the relevant superior courts, the United States has not been declared by the GoI to be a reciprocating territory for the purposes of Section 44A of the Civil Code. Furthermore, the execution of foreign decree under Section 44A of the Civil Code is also subject to the exception under Section 13 of the Civil Code, as discussed below. Accordingly, a judgment of a superior court in the United Kingdom may be enforceable by proceedings in execution, and a judgment not of a superior court, by a fresh suit resulting in a judgment or order. A judgment of a court in a jurisdiction which is not a reciprocating territory, including that of a court in the United States, may be enforced only by a new suit upon the judgment and not by proceedings in execution. Section 13 of the Civil Code provides that a foreign judgment to which this section applies shall be conclusive as to any matter thereby directly adjudicated upon between the same parties or between parties under whom they or any of them claim to litigate under the same title except: (i) where it has not been pronounced by a court of competent jurisdiction; (ii) where it has not been given on the merits of the case; (iii) where it appears on the face of the proceedings to be founded on an incorrect view of international law or a refusal to recognize the law of India in cases where such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where it has been obtained by fraud; or (vi) where it sustains a claim founded on a breach of any law in force in India. A foreign judgment which is conclusive under Section 13 of the Civil Code may be enforced either by a fresh suit upon judgment or by proceedings in execution. Under the Civil Code, a court in India shall, upon the production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction unless the contrary appears on record and such presumption may be displaced by proving, want of jurisdiction. The suit must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India. Furthermore, it is unlikely that an Indian court would enforce a foreign judgment if it viewed the amount of damages awarded as excessive or inconsistent with Indian practice.

A party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI under the Foreign Exchange Management Act, 1999, to execute such a judgment and repatriate outside India any amount recovered pursuant to execution, and any such amount may be subject to income tax in accordance with applicable laws. Any judgment in a foreign currency would be converted into Rupees on the date of the judgment and not on the date of the payment.

The Restricted Group would not be entitled to immunity based on sovereignty from any legal proceedings in India. The Restricted Group cannot predict whether a suit in India will be disposed of in a timely manner or be subject to considerable delay.

DESCRIPTION OF CERTAIN DIFFERENCES BETWEEN IND AS AND IFRS

The Group's audited consolidated financial statements as at and for the years ended March 31, 2018, 2019 and 2020 have been prepared in accordance with Ind AS. Further, the Restricted Group's audited special purpose combined financial statements as at and for the years ended March 31, 2018, 2019 and 2020 wherever referenced in this offering memorandum, have been prepared in accordance with the recognition, measurement, presentation and disclosure principles of Ind AS read with Guidance Note and unaudited special purpose interim combined financial statements as at and for the three months ended June 30, 2019 and 2020 wherever referenced in this offering memorandum have been prepared in accordance with the recognition, and measurement principles of Ind AS 34 read with Guidance Note. The Group's financial information as at and for the year ended March 31, 2018 has been derived from the comparative amounts as presented in the audited consolidated financial statements of the Group as at and for the year ended March 31, 2019.

The following table summarizes certain of the areas in which differences in accounting between Ind AS and IFRS could be significant to the financial position and results of operations of the Group. This summary should not be taken as an exhaustive list of all the differences between Ind AS and IFRS. No attempt has been made to identify all recognition and measurement, presentation or classification differences that would affect the manner in which transactions or events are presented in such financial statements (or notes thereto) of the Group. Management has not quantified all of the effects of the differences discussed below.

Potential investors should consult their own professional advisors for an understanding of the differences between Ind AS and IFRS, and how those differences might affect the financial information disclosed in this offering memorandum.

S No.	Ind AS	Particulars	Treatment as per Ind AS	Treatment as per IFRS
1	Ind AS 101	Deemed cost exemption for property, plant and equipment	Ind AS 101 also provides similar deemed cost exemption. In addition, if there is no change in the functional currency at the transition date, Ind AS 101 allows a first-time adopter to continue with the previous GAAP carrying value for all of its PPE as recognized in the previous GAAP financial statements at the transition date. The same is used as deemed cost at that date, after making adjustment for decommissioning liabilities. In Ind AS CFS, the previous GAAP amount of the subsidiary is the amount used in the previous GAAP CFS. If an entity avails the option under this paragraph, no further adjustments to the deemed cost so determined is made. Similar exemption is also available for intangible assets and investment property. Fair value as deemed cost exemption is not allowed for investment property.	IFRS 1 permits a first-time adopter to measure its items of property, plant and equipment (PPE) at deemed cost at the transition date. The deemed cost can be: The fair value of the item at the date of transition A previous GAAP revaluation at or before transition date, if revaluation met certain criteria Similar exemption is also available for intangible assets and investment property measured at cost.
2	Ind AS 101	Additional exemptions relating to composite leases and land lease	Ind AS 101 provides the following additional exemptions: When a lease includes both land and building elements, a first time adopter may assess the classification of each element as finance or operating lease at the date of transition to Ind AS based on the facts and circumstances existing as at that date. If there is any land lease newly classified as finance lease, then the first time adopter may recognise asset and liability at fair value on that date. Any difference between those fair values is recognised in retained earnings.	Under IFRS 1, an entity classifies a lease based on the lease terms that are in force at its date of transition based on the circumstances that existed at the inception of the lease.

S No.	Ind AS	Particulars	Treatment as per Ind AS	Treatment as per IFRS
3	Ind AS 101	Exchange differences arising on longterm monetary items	Under the erstwhile Indian GAAP, companies recognized exchange differences arising on restatement of foreign currency monetary items, both long term and short term, in the profit or loss immediately. Alternatively, they were given an irrevocable option to defer/capitalize exchange differences on long-term foreign currency monetary items. For the companies applying second option under the erstwhile Indian GAAP, Ind AS 101 provides an additional option. They may continue to account for exchange differences arising on longterm foreign currency monetary items recognized in the financial statements for the period ending immediately before the beginning of first Ind AS reporting period using the previous GAAP accounting policy. Ind AS 21 does not apply to exchange differences arising on such long term foreign currency monetary items.	IAS 21 requires exchange differences arising on restatement of foreign currency monetary items, both long term and short term, to be recognized in the income statement for the period.
4	Ind AS 101	Additional exemption relating to noncurrent assets held for sale and discontinued operations	Ind AS 101 allows a first-time adopter to use the transition date circumstances to measure the non-current assets held for sale and discontinued operations at the lower of carrying value and fair value less cost to sell.	There is no exemption under IFRS 1 relating to non-current assets held for sale and discontinued operations.
5	Ind AS 1	Current/noncurrent classification on breach of debt covenant	First, Ind AS 1 refers to breach of material provision, instead of any provision. This indicates that breach of immaterial provision may not impact loan classification. Second, under Ind AS 1, waivers granted by the lender or rectification of breach between the end of the reporting period and the date of approval of financial statements for issue are treated as adjusting event. A corresponding change has also been made in Ind AS 10.	If an entity breaches a provision of a long-term loan arrangement on or before the period end with the effect that the liability becoming payable on demand, the loan is classified as current liability. This is the case even if the lender has agreed, after the period end and before the authorisation of the financial statements for issue, not to demand payment as a consequence of the breach. Such waivers granted by the lender or rectification of a breach after the end of the reporting period are considered as non-adjusting event and disclosed.
6	Ind AS 1	Analyses of expenses in the statement of profit and loss	Ind AS 1 requires entities to present an analysis of expenses recognized in profit or loss using a classification based on their nature only. Thus, there is no option to use functional classification for presentation of expenses.	IAS 1 requires an entity to present an analysis of expenses recognized in profit or loss using a classification based on either their nature or their function within the entity, whichever provides the information that is reliable and more relevant.
7	Ind AS 1	Materiality and aggregation	Ind AS 1 modifies these requirement by adding the words 'except when required by law. Hence, if the applicable law requires separate presentation/disclosure of certain items, they are presented separately irrespective of materiality.	IAS 1 requires: each material class of similar items to be presented separately in the financial statements; and items of a dissimilar nature or function to be presented separately unless they are immaterial Also, IAS 1 states that specific disclosure need not be provided if the same is considered immaterial.
8	Ind AS 7	Classification of interest paid and interest and dividend received	Ind AS 7 does not give an option It requires non-financial entities to classify interest paid as part of 'financing activities' and interest and dividend received as 'investing activities'.	For non-financial entities, interest paid and interest and dividends received may be classified as 'operating activities'. Alternatively, interest paid and interest and dividends received may be classified as 'financing activities' and 'investing activities' respectively.

S No.	Ind AS	Particulars	Treatment as per Ind AS	Treatment as per IFRS
9	Ind AS 7	Classification of dividend paid	Dividend paid may be classified either as operating or financing cash flows.	Dividend paid is classified as financing cash flows.
10	Ind AS 103	Bargain purchase gains	Ind AS 103 requires bargain purchase gain to be recognized in OCI and accumulated in the equity as capital reserve. However, if there is no clear evidence for the underlying reason for bargain purchase, the gain is directly recognized in equity as capital reserve, without routing the same through OCI. A similar change has also been made with regard to bargain purchase gain arising on investment in associate/JV, accounted for using the acquisition method.	Where consideration transferred for business acquisition is lower than the acquisition date fair value of net assets acquired, the gain is recognized in the income statement after a detailed reassessment.
11	Ind AS 103	Common control business combinations	Ind AS 103 requires business combinations of entities or businesses under common control to be mandatorily accounted using the pooling of interest method. The application of this method requires the following: Assets and liabilities of the combining entities are reflected at their carrying amounts. No adjustments are made to reflect fair values, or recognize any new assets or liabilities. Financial information in respect of prior periods is restated as if business combination has occurred from the beginning of the earliest period presented. The balance of the retained earnings appearing in the financial statements of the transferor is aggregated with the corresponding balance appearing in the financial statements of the transferee; alternatively, it is transferred to general reserves, if any. The identity of the reserves is preserved and appear in the financial statements of the transferee in the same form in which they appeared in the financial statements of the transferor. The difference between the amount recorded as share capital issued plus any additional consideration in cash or other assets and the amount of share capital of the transferor is transferred to capital reserve and presented separately from other capital reserves.	IFRS 3 excludes from its scope common control business combinations.
12	Ind AS 17	Straight-ling of lease rentals in operating leases	Lease payments under an operating lease are recognised as an expense on a straight-line basis over the lease term unless either: Another systematic basis is more representative of the time pattern of the user's benefit, or Payments to the lessor are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases. If payments to the lessor vary because of factors other than general inflation, then this condition is not met.	Rental under an operating lease are recognised on a straight-line basis over the lease term unless another systematic basis is more representative of the time pattern of the user's benefit.
13	Ind AS 28	Uniform accounting policies	Ind AS 28 also requires the use of uniform accounting policies. However, an exemption on the grounds of "impracticability" has been granted for associates. This is for the reason that the investor does not have "control" over the associate and it may not be able to influence the associate to prepare additional financial statements or to follow the accounting policies that are followed by the investor.	Compliance with uniform accounting policies is mandatory.

S No.	Ind AS	Particulars	Treatment as per Ind AS	Treatment as per IFRS
14	Ind AS 40	Use of the fair value model	Ind AS 40 does not permit the use of fair value model for subsequent measurement of investment property. It however requires the fair value of the investment property to be disclosed in the notes to financial statements. Consequent to the above change, companies are not allowed to use even fair value as deemed cost exemption for IP at the date of transition to Ind AS.	An entity has an option to apply either the cost model or the fair value model for subsequent measurement of its investment property. If the fair value model is used, all investment properties, including investment properties under construction, are measured at fair value and changes in the fair value are recognized in the profit or loss for the period in which it arises. Under the fair value model, the carrying amount is not required to be depreciated. Among other options, companies are allowed to use fair value as deemed cost exemption for IP at the date of transition to IFRS.
15	Ind AS 27	Use of equity method to account for investments in subsidiaries, joint ventures and associates in SFS	Ind AS 27 does not allow the use of equity method to account for investments in subsidiaries, joint ventures and associates in SFS. The reason for the same that Ind AS considers equity method to be a manner of consolidation rather than a measurement basis.	IAS 27 allows an entity to use the equity method to account for its investments in subsidiaries, joint ventures and associates in its SFS. Consequently, an entity is permitted to account for these investments either: At cost In accordance with IFRS 9 Using the equity method This is an accounting policy choice for each category of investment.
16	Ind AS 24	Definition of close members of the family of a person	Definition "close members of the family" under Ind AS 24 is similar. In addition to relations prescribed under IFRS, it includes brother, sister, father and mother in sub-paragraph (a).	As per IAS 24, "close members of the family" of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity. They may include: the person's spouse or domestic partner and children, children of the person's spouse or domestic partner, and dependents of the person or the person's spouse or domestic partner.
17	Ind AS 115	Variable consideration – Penalties	Where the penalty is inherent in determination of transaction price, it will form part of variable consideration. For example, where an entity agrees to transfer control of a good or service in a contact with a customer at the end of 30 days for INR100,000 and if it exceeds 30 days, the entity is entitled to receive only INR95,000, the reduction of INR5,000 will be regarded as variable consideration. In other cases, the transaction price will be considered as fixed.	The amount of consideration, among other things, can vary because of penalties.
18	Ind AS 115	Disclosure of reconciliation between revenue and contracted price	Ind AS 115 contains all the disclosure requirement in IFRS 15. In addition, Ind AS 115 requires presentation of a reconciliation between the amount of revenue recognised in statement of profit or loss and the contracted price showing separately adjustments made to the contracted price, for example, on account of discounts, rebates, refunds, price concessions, incentives, bonus, etc. specifying the nature and amount of each such adjustment separately.	IFRS 15 requires extensive qualitative and quantitative disclosures including those on disaggregated revenue, reconciliation of contract balances, performance obligations and significant judgments.

S No.	Ind AS	Particulars	Treatment as per Ind AS	Treatment as per IFRS
19	Ind AS 23	Exchange differences regarded as adjustment to interest costs	In accordance with IAS 23, borrowing cost includes exchange difference arising from foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs. However, it does not provide any specific guidance on measurement of such amounts.	Ind AS 23 is similar to IAS 23. However, Ind AS 23 provides following additional guidance on manner of arriving at this adjustment: The adjustment should be of an amount equivalent to the extent to which the exchange loss does not exceed the difference between the costs of borrowing in functional currency when compared to the costs of borrowing in a foreign currency. If there is an unrealized exchange loss which is treated as an adjustment to interest and subsequently there is a realized or unrealized gain in respect of the settlement or translation of the same borrowing, the gain to the extent of the loss previously recognized as an adjustment should also be recognized as an adjustment to interest.
20	Ind AS 1	Statements of comprehensive income/ Statement of profit and loss	Ind AS 1 allows only the single statement approach and does not permit the two statements approach. For deletion of two statements approach, consequential amendments have been made in other Ind AS also.	With regard to preparation of statement of profit and loss, IFRS provides an option either to follow the single statement approach or to follow the two statement approach. An entity may present a single statement of profit or loss and other comprehensive income, with profit or loss and other comprehensive income presented in two sections; or it may present the profit or loss section in a separate 'statement of profit or loss' which shall immediately precede the 'statement of comprehensive income', which shall begin with profit or loss.
21	Ind AS 1	Frequency of reporting	Ind AS 1 does not permit entities to use a periodicity other than one year to present their financial statements.	In accordance with IAS 1, an entity consistently prepares financial statements for one year period. However, for practical reasons, some entities prefer to report, for example, for a 52-week period. IAS 1 does not preclude this practice.
22	Ind AS 33	Applicability of EPS	This scope requirement has been deleted in the Ind AS as the applicability or exemptions is governed by Companies Act, 2013 and the rules made thereunder. Since there is no exemption from disclosing EPS under the Companies Act, all companies covered under Ind AS need to disclose EPS.	IAS 33 applies only to an entity whose ordinary shares or potential ordinary shares are traded in a public market or that files, or is in the process of filing, its financial statements with a securities commission or other regulatory organization for the purpose of issuing ordinary shares in a public market.
23	Ind AS 33	Presentation of EPS in separate financial statements	Ind AS 33 requires EPS related information to be disclosed both in CFS and SFS. In CFS, such disclosures will be based on consolidated information. In SFS, such disclosures will be based on information given in the SFS.	IAS 33 provides that when an entity presents both consolidated financial statements (CFS) and separate financial statements (SFS), it may give EPS related information in CFS only.
24	Ind AS 108	Applicability of operating segments	This scope requirement has been deleted in the Ind AS as the applicability or exemptions is governed by Companies Act, 2013 and the rules made thereunder. Currently, the Companies Act does not exempt any company (except few government companies in defence sector) from presentation of segment information.	IFRS 8 applies only to an entity whose ordinary shares or potential ordinary shares are traded in a public market or that files, or is in the process of filing, its financial statements with a securities commission or other regulatory organization for the purpose of issuing ordinary shares in a public market.

S No.	Ind AS	Particulars	Treatment as per Ind AS	Treatment as per IFRS
25	Ind AS 24	Aggregation of transactions for disclosure	Ind AS 24 provides an additional guidance whereby items of similar nature may be disclosed in aggregate by type of related party. However, this is not done in such a way as to obscure the importance of significant transactions. Hence, purchases or sales of goods are not aggregated with purchases or sales of fixed assets. Nor a material related party transaction with an individual party is clubbed in an aggregated disclosure.	IFRS does not provide any guidance on the aggregation of transaction for disclosure.
26	Ind AS 101	First-time adoption – Comparative information	The ITFG has clarified that due to the Companies Act notification, a first-time adopter can give Ind AS comparative information only for one year.	IFRS 1 requires comparative information for minimum one year. If an entity elects, it can give comparative information for more than one year.
27	Ind AS 101	First-time adoption – Exemption relating to borrowing cost	There is no such exemption under Ind AS 101, since Indian GAAP requires the borrowing cost relating to qualifying assets to be capitalized if the criteria laid down in AS 16 are fulfilled.	IFRS 1 permits a first time adopter to apply the requirements of IAS 23 from the date of transition or from an earlier date as permitted by the transitional requirements of IAS 23.
28	N/A	Preparation of combined and carve-out financial statements	Guidance Note on Combined and Carve Out Financial Statements issued by the Institute of The Institute of Chartered Accountants of India provides guidance on preparation of combined and carve-out financial statements.	IFRS does not provide any guidance on this matter.

INDEPENDENT AUDITOR'S REPORT

To the Members of ReNew Power Private Limited

Report on the Audit of the Consolidated Ind AS Financial Statements

Opinion

We have audited the accompanying consolidated Ind AS financial statements of ReNew Power Private Limited (hereinafter referred to as "the Holding Company"), its subsidiaries (the Holding Company and its subsidiaries together referred to as "the Group") its joint controlled entities comprising of the consolidated Balance sheet as at 31 March 2020, the consolidated Statement of Profit and Loss, including other comprehensive income, the consolidated Cash Flow Statement and the consolidated Statement of Changes in Equity for the year then ended, and notes to the consolidated Ind AS financial statements, including a summary of significant accounting policies and other explanatory information (hereinafter referred to as "the consolidated Ind AS financial statements").

In our opinion and to the best of our information and according to the explanations given to us and based on the consideration of reports of other auditors on separate financial statements and on the other financial information of the subsidiaries, the aforesaid consolidated Ind AS financial statements give the information required by the Companies Act, 2013, as amended ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the consolidated state of affairs of the Group, its jointly controlled entities as at 31 March 2020, their consolidated loss including other comprehensive income, their consolidated cash flows and the consolidated statement of changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the consolidated Ind AS financial statements in accordance with the Standards on Auditing (SAs), as specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the 'Auditor's Responsibilities for the Audit of the Consolidated Ind AS Financial Statements' section of our report. We are independent of the Group, jointly controlled entities in accordance with the 'Code of Ethics' issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the consolidated Ind AS financial statements.

Emphasis of Matter – Litigation

We draw attention to Note 51 to the Consolidated Financial Statements, related to the recoverability of dues under litigation amounting to Rs. 8,945 million from Southern Power Distribution Company of A.P. Limited by certain subsidiary companies of the Group (the "AP entities"). The AP Entities have filed writ petition and writ appeal before the Hon'ble High Court of Andhra Pradesh related to these matters. Pending the outcome of the cases, which is not presently determinable, no adjustment has been made to the Consolidated Financial Statements. Our opinion is not qualified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated Ind AS financial statements for the financial year ended 31 March 2020. These matters were addressed in the context of our audit of the consolidated Ind AS financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have determined the matters described below to be the key audit matters to be communicated in our report. We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the consolidated Ind AS financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated Ind AS financial statements. The results of audit procedures performed by us and by other auditors of components not audited by us, as reported by them in their audit reports furnished to us by the management, including those procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated Ind AS financial statements.

Key audit matters	**How our audit addressed the key audit matter**
Impairment of Goodwill *(as described in note 6 of the consolidated Ind AS financial statements)*	
The Group's balance sheet includes Rs 11,381 million of goodwill, representing 2% of total Group assets. In accordance with Ind AS, these balances are allocated to Cash Generating Units (CGUs) which are tested annually for impairment using discounted cash-flow models of each CGU's recoverable value compared to the carrying value of the assets. A deficit between the recoverable value and the CGU's net assets would result in impairment. The inputs to the impairment testing model which have the most significant impact on CGU recoverable value include: - Projected revenue; - Projected costs and - Discount rates. The impairment test model includes sensitivity testing of key assumptions, including revenue growth, operating margin and discount rate. Management has factored impact of COVID-19 on these CGU's. The annual impairment testing is considered a significant accounting judgement and estimate and a key audit matter because the assumptions on which the tests are based are highly judgmental and are affected by future performance of the plants which are inherently uncertain, and because of the materiality of the balances to the financial statements as a whole.	Our audit procedures included the following: • Obtained management's assessment for testing of goodwill for impairment and performed test of design and operating effectiveness of controls through inspection of evidence of performance of these controls. • We obtained an understanding of the Group's methodology applied in determining the CGUs to which goodwill is allocated. In making this assessment, we also evaluated the objectivity and independence of Group's internal specialists involved in the process. • We evaluated appropriateness of impairment test model prepared by management and the assumptions used by performing the following procedures: o benchmarking or assessing key market related assumptions used in the impairment models, including discount rates, long term growth rates, risk free rate of return, weighted average cost of capital; o assessing the key drivers of the cash flow forecasts including projected revenue, operation & maintenance cost, management shared service cost, debt equity ratio, cost of debt and equity and salvage value through analysis of actual past performance and comparison to previous forecasts; o assessing the recoverable value headroom by performing sensitivity testing of key assumptions used;

Key audit matters	How our audit addressed the key audit matter
	o testing the arithmetical accuracy of the models. • We read and assessed the adequacy of the related disclosures in the consolidated financial statements.
Debt repayment obligations and liquidity *(as described in note 45(iv) of the consolidated Ind AS financial statements)*	
Borrowings are an integral part of the Group's business model as it is the key source of funds used by the business to fund its projects and operations. Borrowings represent the largest liability on the balance sheet. As at March 31, 2020, the Group's borrowings amount to 73% of the balance sheet total and its Debt is to Equity ratio is 78%. Out of total external borrowings, the following are due for repayment over next 12 months: a. INR 20,010 million is the current maturities of long-term borrowings, and b. Various working capital facilities amounting to INR 12,191 million. We have identified the Group's ability to service the debt repayment obligations and liquidity as a key audit matter because of the subjective elements such as: • estimate of expected future cash flows, • realization of existing and future receivables, • forecasted results and operational performance, and • expectation around refinancing of existing debt. These estimates are based on assumptions, including expectations of future economic and market developments.	Our audit procedures include the following: • We obtained an understanding of the process followed by the management for preparation of cash flow forecast, inputs used in the model to estimate the future cash flows as well as the sensitivity analysis prepared in this context. • We discussed with management and assessed the assumptions and judgements used in the estimate of future cash flows having regards to past performance and current emerging business trends affecting the business and industry. We did this assessment with reference to budgets and the underlying substantiations. • We assessed the maturity profile of the Group's borrowings to test that loans maturing within the next twelve months were classified in current liabilities. • We obtained an understanding of management's assessment for repayment of obligations due over next 12 months. We compared the repayment obligations with that considered in the future cash flows. • We assessed the Group's ability to refinance its obligation based on the past trends, credit ratings, ability to generate steady cash flows over long term contracts and access to capital. • We also assessed the adequacy of the related disclosures in the financial statements.

Other Information

The Holding Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Directors report but does not include the consolidated Ind AS financial statements and our auditor's report thereon.

Our opinion on the consolidated Ind AS financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether such other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the preparation and presentation of these consolidated Ind AS financial statements in terms of the requirements of the Act that give a true and fair view of the consolidated financial position, consolidated financial performance including other comprehensive income, consolidated cash flows and consolidated statement of changes in equity of the Group including its jointly controlled entities in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. The respective Board of Directors of the companies included in the Group and of its jointly controlled entities are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Group and of its jointly controlled entities and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the consolidated Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated Ind AS financial statements by the Directors of the Holding Company, as aforesaid.

In preparing the consolidated Ind AS financial statements, the respective Board of Directors of the companies included in the Group and of its jointly controlled entities are responsible for assessing the ability of the Group and of its jointly controlled entities to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance of the companies included in the Group and of its jointly controlled entities are also responsible for overseeing the financial reporting process of the Group and of its jointly controlled entities.

Auditor's Responsibilities for the Audit of the Consolidated Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated Ind AS financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated Ind AS financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated Ind AS financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Holding Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group and its jointly controlled entities to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated Ind AS financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and its jointly controlled entities to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated Ind AS financial statements, including the disclosures, and whether the consolidated Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group and its jointly controlled entities of which we are the independent auditors, to express an opinion on the consolidated Ind AS financial statements. We are responsible for the direction, supervision and performance of the audit of the financial statements of such entities included in the consolidated financial statements of which we are the independent auditors. For the other entities included in the consolidated Ind AS financial statements, which have been audited by other auditors, such other auditors remain responsible for the direction, supervision and performance of the audits carried out by them. We remain solely responsible for our audit opinion.

We communicate with those charged with governance of the Holding Company and such other entities included in the consolidated Ind AS financial statements of which we are the independent auditors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated Ind AS financial statements for the financial year ended 31 March 2020 and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Other Matter

We did not audit the financial statements and other financial information, in respect of 72 subsidiaries, whose Ind AS financial statements include total assets of Rs. 79,636 million as at 31 March 2020, and total revenues of Rs. 10,793 million and net cash inflows of Rs. 1,074 million for the year ended on that date. These Ind AS financial statement and other financial information have been audited by other auditors, which financial statements, other financial information and auditor's reports have been furnished to us by the management. Our opinion on the consolidated Ind AS financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries and our report in terms of sub-sections (3) of Section 143 of the Act, in so far as it relates to the aforesaid subsidiaries is based solely on the report of such other auditors.

Our opinion above on the consolidated Ind AS financial statements, and our report on Other Legal and Regulatory Requirements below, is not modified in respect of the above matters with respect to our reliance on the work done and the reports of the other auditors and the financial statements and other financial information certified by the Management.

Report on Other Legal and Regulatory Requirements

As required by Section 143(3) of the Act, based on our audit and on the consideration of report of the other auditors on separate financial statements and the other financial information of subsidiaries and jointly controlled entities, as noted in the 'other matter' paragraph we report, to the extent applicable, that:

(a) We/the other auditors whose report we have relied upon have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit of the aforesaid consolidated Ind AS financial statements;

(b) In our opinion, proper books of account as required by law relating to preparation of the aforesaid consolidation of the financial statements have been kept so far as it appears from our examination of those books and reports of the other auditors;

(c) The Consolidated Balance Sheet, the Consolidated Statement of Profit and Loss including the Statement of Other Comprehensive Income, the Consolidated Cash Flow Statement and Consolidated Statement of Changes in Equity dealt with by this Report are in agreement with the books of account maintained for the purpose of preparation of the consolidated Ind AS financial statements;

(d) In our opinion, the aforesaid consolidated Ind AS financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Companies (Indian Accounting Standards) Rules, 2015, as amended;

(e) On the basis of the written representations received from the directors of the Holding Company as on 31 March 2020 taken on record by the Board of Directors of the Holding Company and the reports of the statutory auditors who are appointed under Section 139 of the Act, of its subsidiary companies and jointly controlled entities, none of the directors of the Group's companies and jointly controlled entities, incorporated in India, is disqualified as on 31 March 2020 from being appointed as a director in terms of Section 164 (2) of the Act;

(f) With respect to the adequacy and the operating effectiveness of the internal financial controls over financial reporting with reference to these consolidated Ind AS financial statements of the Holding Company, its subsidiary companies and jointly controlled entities incorporated in India, refer to our separate Report in "Annexure" to this report;

(g) In our opinion and based on the consideration of reports of other statutory auditors of the subsidiaries and jointly controlled entities incorporated in India, the managerial remuneration for the year ended 31 March 2020 has been paid / provided by the Holding Company, its subsidiaries and jointly controlled entities incorporated in India to their directors in accordance with the provisions of section 197 read with Schedule V to the Act;

(h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended, in our opinion and to the best of our information and according to the explanations given to us and based on the consideration of the report of the other auditors on separate financial statements as also the other financial information of the subsidiaries and jointly controlled entities as noted in the 'Other matter' paragraph:

   i. The consolidated Ind AS financial statements disclose the impact of pending litigations on its consolidated financial position of the Group and jointly controlled entities in its consolidated Ind AS financial statements – Refer Note 47(i) to the consolidated Ind AS financial statements;

   ii. Provision has been made in the consolidated Ind AS financial statements, as required under the applicable law or accounting standards, for material foreseeable losses, if any, on long-term contracts including derivative contracts – Refer Note 50 to the consolidated Ind AS financial statements in respect of such items as it relates to the Group and jointly controlled entities;

   iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Holding Company, its subsidiaries and jointly controlled entities incorporated in India during the year ended 31 March 2020.

Annexure to the Independent Auditor’s Report of even date on the consolidated financial statements of ReNew Power Private Limited

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

In conjunction with our audit of the consolidated financial statements of ReNew Power Private Limited as of and for the year ended 31 March 2020, we have audited the internal control financial controls over financial reporting of the ReNew Power Private Limited (hereinafter referred to as the “Holding Company”), its subsidiary companies and jointly controlled entities, which are companies incorporated in India, as of date.

Management’s Responsibility for Internal Financial Controls

The respective Board of Directors of the Holding Company, its subsidiary companies and jointly controlled entities, which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Holding Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India . These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor’s Responsibility

Our responsibility is to express an opinion on the company's internal financial controls over financial reporting with reference to these consolidated financial statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) and the Standards on Auditing, both, issued by Institute of Chartered Accountants of India, and deemed to be prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting with reference to these consolidated financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls over financial reporting with reference to these consolidated financial statements and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting with reference to these consolidated financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditors in terms of their reports referred to in the Other Matters paragraph below , is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls over financial reporting with reference to these consolidated financial statements.

Meaning of Internal Financial Controls Over Financial Reporting with Reference to these Consolidated Financial Statements

A company's internal financial control over financial reporting with reference to these consolidated financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting with reference to these consolidated financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting with Reference to these Consolidated Financial Statements

Because of the inherent limitations of internal financial controls over financial reporting with reference to these consolidated financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting with reference to these consolidated financial statements to future periods are subject to the risk that the internal financial control over financial reporting with reference to these consolidated financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Holding Company, its subsidiary companies and jointly controlled entities, which are companies incorporated in India, have, maintained in all material respects, adequate internal financial controls over financial reporting with reference to these consolidated financial statements and such internal financial controls over financial reporting with reference to these consolidated financial statements were operating effectively as at 31 March 2020, based on the internal control over financial reporting criteria established by the Holding Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Other Matters

Our report under Section 143(3)(i) of the Act on the adequacy and operating effectiveness of the internal financial controls over financial reporting with reference to these consolidated financial statements of the Holding Company, insofar as it relates to these 69 subsidiary companies, which are companies incorporated in India, is based on the corresponding reports of the auditors of such subsidiary incorporated in India.

1 Corporate Information

ReNew Power Private Limited ('the Company') is a private limited company domiciled in India. The Company was converted into a private limited company with effect from 8 Novemeber 2019 and consequently the name of the Company has changed from ReNew Power Limited to ReNew Power Private Limited.

The registered office of the Company is located at 138, Ansal Chamber - II Bhikaji Cama Place, New Delhi-110066. The consolidated financial statements comprise financial statements of Renew Power Private Limited (the company) and its subsidiaries (collectively, the Group) for the year ended 31 March 2020. The Group is carrying out business activities relating to generation of power through non-conventional and renewable energy sources.

The Consolidated Financial Statements of the Group have been approved for issue by the Group's Board of Directors on 08 June 2020.

2 Basis of preparation

The Consolidated Financial Statements are prepared in accordance with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 read with the Companies (Indian Accounting Standards) Rules, 2015 as amended. The Consolidated Financial Statements have been prepared on accrual basis and under the historical cost convention issued thereunder and other accounting principles generally accepted in India.

These Consolidated Financial Statements have been prepared using presentation and disclosure requirements of the Schedule III of the Companies Act 2013.

The financial statements have been prepared on a historical cost basis, except for the following assets and liabilities which have been measured at fair value:

- Derivative financial instruments
- Financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments)

3 Principles of consolidation

The Consolidated Financial Statements comprise the consolidated financial statements of the Group as at 31 March 2020. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee
- Rights arising from other contractual arrangements
- The Group's voting rights and potential voting rights
- The size of the Group's holding of voting rights relative to the size and dispersion of the holdings of the other voting rights holders.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the Consolidated Financial Statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

The Consolidated Financial Statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. If a member of the Group uses accounting policies other than those adopted in the Consolidated Financial Statements for like transactions and events in similar circumstances, appropriate adjustments are made to that Group member's financial statements in preparing the Consolidated Financial Statements to ensure conformity with the Group's accounting policies.

The financial statements of all entities used for the purpose of consolidation are drawn up to same reporting date as that of ReNew Power Private Limited (Parent Company) i.e., year ended on 31 March 2020. When the end of the reporting period of the parent is different from that of a subsidiary, the subsidiary prepares, for consolidation purposes, additional financial information as of the same date as the financial statements of the parent to enable the parent to consolidate the financial information of the subsidiary, unless it is impracticable to do so.

Consolidation procedure:

- Combine like items of assets, liabilities, equity, income, expenses and cash flows of the parent on line by line basis with those of its subsidiaries. For this purpose, income and expenses of the subsidiary are based on the amounts of the assets and liabilities recognised in the Consolidated Financial Statements at the acquisition date.

- Offset (eliminate) the carrying amount of the parent's investment in each subsidiary and the parent's portion of equity of each subsidiary. Business combinations policy explains how to account for any related goodwill.

- Eliminate in full intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the Group (profits or losses resulting from intragroup transactions that are recognised in assets, such as inventory and fixed assets, are eliminated in full). Intragroup losses may indicate an impairment that requires recognition in the Consolidated Financial Statements. Ind AS 12 Income Taxes applies to temporary differences that arise from the elimination of profits and losses resulting from intragroup transactions.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.
If the Group loses control over a subsidiary, it:

- Derecognises the assets (including goodwill) and liabilities of the subsidiary
- Derecognises the carrying amount of any non-controlling interests
- Derecognises the cumulative translation differences recorded in equity
- Recognises the fair value of the consideration received
- Recognises the fair value of any investment retained
- Recognises any surplus or deficit in profit or loss
- Reclassifies the parent's share of components previously recognised in OCI to profit or loss or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities.

4.1 Summary of Significant Accounting Policies

a) Business Combinations and goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred measured at acquisition date fair value and the amount of any non-controlling interests in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their acquisition date fair values. For this purpose, the liabilities assumed include contingent liabilities representing present obligation and they are measured at their acquisition fair values irrespective of the fact that outflow of resources embodying economic benefits is not probable. However, the following assets and liabilities acquired in a business combination are measured at the basis indicated below:

- Deferred tax assets or liabilities and the assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with Ind AS 12 Income Tax and Ind AS 19 Employee Benefits respectively.
- Liabilities or equity instruments related to share based payment arrangements of the acquiree or share – based payments arrangements of the Group entered into to replace share-based payment arrangements of the acquiree are measured in accordance with Ind AS 102 Share-based Payments at the acquisition date.
- Assets (or disposal groups) that are classified as held for sale in accordance with Ind AS 105 Non-current Assets Held for Sale and Discontinued Operations are measured in accordance with that standard.
- Reacquired rights are measured at a value determined on the basis of the remaining contractual term of the related contract. Such valuation does not consider potential renewal of the reacquired right.
- Potential tax effects of temporary differences and carry forwards of an acquiree that exist at the acquisition date or arise as a result of the acquisition are accounted in accordance with Ind AS 12

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

If the business combination is achieved in stages, any previously held equity interest is re-measured at its acquisition date fair value and any resulting gain or loss is recognised in profit or loss or OCI, as appropriate.

Any contingent consideration to be transferred by the acquirer is recognised at fair value at the acquisition date. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of Ind AS 109 Financial Instruments, is measured at fair value with changes in fair value recognised in profit or loss. If the contingent consideration is not within the scope of Ind AS 109, it is measured in accordance with the appropriate Ind AS. Contingent consideration that is classified as equity is not re-measured at subsequent reporting dates and subsequent its settlement is accounted for within equity.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests, and any previous interest held, over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in OCI and accumulated in equity as capital reserve. However, if there is no clear evidence of bargain purchase, the entity recognises the gain directly in equity as capital reserve, without routing the same through OCI.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

A cash generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

Where goodwill has been allocated to a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted through goodwill during the measurement period, or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognized at that date. These adjustments are called as measurement period adjustments. The measurement period does not exceed one year from the acquisition date.

b) Investments accounted for using the equity method.

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

The considerations made in determining whether significant influence or joint control are similar to those necessary to determine control over the subsidiaries

The Group's investments in its associate and joint venture are accounted for using the equity method. Under the equity method, the investment in an associate or a joint venture is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets of the associate or joint venture since the acquisition date. Goodwill relating to the associate or joint venture is included in the carrying amount of the investment and is not tested for impairment individually.

The statement of profit and loss reflects the Group's share of the results of operations of the associate or joint venture. Any change in OCI of those investees is presented as part of the Group's OCI. In addition, when there has been a change recognised directly in the equity of the associate or joint venture, the Group recognises its share of any changes, when applicable, in the statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and the associate or joint venture are eliminated to the extent of the interest in the associate or joint venture.

If an entity's share of losses of an associate or a joint venture equals or exceeds its interest in the associate or joint venture (which includes any long term interest that, in substance, form part of the Group's net investment in the associate or joint venture), the entity discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate or joint venture. If the associate or joint venture subsequently reports profits, the entity resumes recognising its share of those profits only after its share of the profits equals the share of losses not recognised.

The aggregate of the Group's share of profit or loss of an associate and a joint venture is shown on the face of the consolidated statement of profit and loss.
The financial statements of the associate or joint venture are prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

After application of the equity method, the Group determines whether it is necessary to recognise an impairment loss on its investment in its associate or joint venture. At each reporting date, the Group determines whether there is objective evidence that the investment in the associate or joint venture is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate or joint venture and its carrying value, and then recognises the loss as 'Share of profit of an associate and a joint venture' in the statement of profit and loss.
Upon loss of significant influence over the associate or joint control over the joint venture, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate or joint venture upon loss of significant influence or joint control and the fair value of the retained investment and proceeds from disposal is recognised in profit and loss.

c) Current versus non-current classification

The Group presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it is:
- Expected to be realised or intended to sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is treated as current when it is:
- Expected to be settled in normal operating cycle
- Held primarily for the purpose of trading
- Due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets/liabilities are classified as non-current assets/liabilities.
The operating cycle is the time between the acquisition of assets for processing and their realisation/settlement in cash and cash equivalents. The Group has identified twelve months as their operating cycle for classification of their current assets and liabilities.

d) Fair value measurement

The Group measures financial instruments, such as, derivatives at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured in the consolidated financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy.

At each reporting date, the management of the Group analyses the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the accounting policies of the Group.

For assets and liabilities that are recognised in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

This note summarises the accounting policy for determination of fair value. Other fair value related disclosures are given in the relevant notes as following:
· Disclosures for significant estimates and assumptions (Refer Note 56)
· Quantitative disclosures of fair value measurement hierarchy (Refer Note 44)
· Financial instruments (including those carried at amortised cost) (Refer Note 43 and 44)

e) Revenue recognition

(i) Revenue from contracts with customers

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services. The Group has generally concluded that it is the principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer.

Sale of Power

Income from supply of power is recognised over time on the supply of units generated from plant to the grid as per terms of the Power Purchase Agreement ("PPA") entered into with the customers.

The Group considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of power, the Group considers the effects of variable consideration and consideration payable to the customer (if any).

Transaction Price - Remaining Performance Obligation

The remaining performance obligation disclosure provides the aggregate amount of the transaction price yet to be recognised as at the end of the reporting period and an explanation as to when the Group expects to recognise these amounts in revenue. Applying the practical expedient as given in Ind AS 115, the Group has not disclosed the remaining performance obligation related disclosures for contracts as the revenue recognized corresponds directly with the value to the customer of the entity's performance completed to date.

Income from services (management consultancy)

The Company recognises revenue from projects management/technical consultancy over time because the customer simultaneously receives and consumes the benefits provided to them, as per the terms of the agreement entered with the customer

Sale of equipment

Revenue from sale of equipment is recognised at the point in time when control of the asset is transferred to the customer, generally on delivery of the equipment. The Group considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of equipment, the Group considers the effects of variable consideration, the existence of significant financing components, non-cash consideration, and consideration payable to the customer.

Income from operation and maintenanace services
Revenue from operation and maintenance services are recognised over time as per the terms of agreement.

Revenue from Engineering Procurement and Construction ("EPC") Contracts
Revenue from provision of service is recognized over a period of time on the percentage of completion method. Percentage of completion is determined as a proportion of cost incurred to date to the total estimated contract cost. Profit on contracts is recognized on percentage of completion method and losses are accounted as soon as these are anticipated. However, profit is not recognized unless there is reasonable progress on the contract. In case the total cost of a contract based on technical and other estimates is expected to exceed the corresponding contract value such expected loss is provided for. The revenue on account of extra claims on construction contracts are accounted for at the time of acceptance in principle by the customers due to uncertainties attached.

Contract revenue earned in excess of billing has been reflected under other current assets and billing in excess of contract revenue has been reflected under current liabilities in the balance sheet.

(a) Variable consideration

If the consideration in a contract includes a variable amount, the Group estimates the amount of consideration to which it will be entitled in exchange for transferring the goods or service to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

Rebates

In some PPAs, the Group provide rebates in invoice if payment is made before the due date. These are adjusted against revenue and are offset against amounts payable by the customers. To estimate the variable consideration for the expected future rebate, the Group applies the most likely method.

(b) Consideration payable to customers

In some PPAs, Group has to pay consideration to customers. Consideration payable to customers are offset against the revenue recognised as and when sale of power occurs.

(ii) Income from compensation for loss of revenue

Income from compensation for loss of revenue is recognised after certainty of receipt of the same is established.

(iii) Dividend

Dividend income is recognised when the right to receive dividend is established by the reporting date.

(iv) Sale of Reduction Emission Certificates (RECs)

Income from sale of RECs is recognised on sale of these certificates.

Contract balances:

(i) Contract assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Group performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

(ii) Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Group transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Group performs under the contract.

(iii) Trade receivables

A receivable represents the Group's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in section (s) Financial instruments – initial recognition and subsequent measurement.

f) Foreign currencies

The Financial Statements are presented in Indian rupees (INR), which is also the functional currency and the currency of the primary economic environment in which the Group operate.

Foreign currency translation

Foreign currency transactions are translated into the appropriate functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Statement of Profit and loss, except when recognised in other comprehensive income as qualifying cash flow or net investment hedges. Non-monetary assets that are measured at fair value are translated using the exchange rate at the date that the fair value was determined. Translation differences on equities and similar non-monetary items held at fair value through profit and loss are recognised in profit or loss as part of the fair value gain or loss. Translation differences on available-for-sale non-monetary financial assets, such as equity shares, are included in the fair value reserve in equity unless the asset is a hedged item inr constructive oblig

Group companies

The results and financial position of all group entities that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on the acquisition of a foreign entity, are translated into INR at foreign exchange rates ruling at the balance sheet date.

The income and expenses of foreign operations are translated into INR at average exchange rates unless these do not approximate to the foreign exchange rates ruling at the dates of the transactions in which case income and expenses are translated at the dates of the transactions.

Foreign exchange differences arising on the translation of a foreign operation are recognised in other comprehensive income and accumulated in a separate component of equity together with exchange differences arising from the translation of borrowings and other currency instruments designated as hedges of such investments. On disposal or liquidation of a foreign operation, the cumulative amount of exchange differences relating to that foreign operation are reclassified from equity and included in determining the profit or loss arising on disposal or liquidation.

g) Taxes

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in India. Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate. Current income tax assets and liabilities are offset if a legally enforceable right exists to set off these.

Deferred Tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss

- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

In situations where Group is entitled to a tax holiday under the Income-tax Act, 1961, enacted in India, no deferred tax (asset or liability) is recognized in respect of temporary differences which reverse during the tax holiday period. Deferred taxes in respect of temporary differences which reverse after the tax holiday period are recognized in the period in which the temporary differences originate. However, the Group restrict the recognition of deferred tax assets to the extent that it has become reasonably certain that sufficient future taxable income will be available against which such deferred tax assets can be realized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in OCI or equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Minimum Alternate Tax

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Group will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Group.

h) Government grants

Government grants are recognized where there is reasonable assurance that the grant will be received and all attached conditions will be compiled with. When the grant related to an expense item, it is recognized as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant related to an asset, it is recognized as income in equal amounts over the expected useful life of the related asset.

When the Group receive grants of non-monetary assets, the asset and the grant are recorded at fair value amounts and released to profit or loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset i.e. by equal annual instalments.

The Group presents grants related to an expense item as other income in the Statement of Profit and Loss. Thus, Generation based incentive and Sale of emission reduction certificates have been recognised as other income.

Generation based Incentive:
Generation based incentive is recognized on the basis of supply of units generated by the Group to the state electricity board from the eligible project in accordance with the scheme of the "Generation Based Incentive (GBI) for Grid interactive Wind Power Projects".

Subsidy (Viability Gap Funding)
The Group receives Viability Gap Funding (VGF) for setting up of certain solar power projects. The Group records the VGF proceeds on fulfilment of the underlying conditions as deferred government grant. Such deferred grant is recognized over the period of useful life of underlying asset.

i) Property, plant and equipment

On transition date to Ind AS, the Company has elected to continue with the carrying value of all of its property, plant and equipment recognised as at 1 April, 2015 measured as per previous GAAP and use that carrying value as the deemed cost of the property, plant and equipment.

Capital work in progress is stated at cost, net of accumulated impairment loss, if any. Property, plant and equipment except freehold land is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Group depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred.

Subsequent Costs
The cost of replacing a part of an item of property, plant and equipment is recognised in the carrying amount of the item of property, plant and equipment, if it is probable that the future economic benefits embodied within the part will flow to the Group and its cost can be measured reliably with the carrying amount of the replaced part getting derecognised. The cost for day-to-day servicing of property, plant and equipment are recognised in Statement of Profit and Loss as and when incurred.

Derecognition
An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the Statement of Profit and Loss when the asset is derecognised.

Gains or losses arising from de-recognition of fixed assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the Statement of Profit and Loss when the asset is derecognized.

j) Intangible assets

On transition date to Ind AS, the Company has elected to continue with the carrying value of all of its intangible assets recognised as at 1 April, 2015 measured as per previous GAAP and use that carrying value as the deemed cost of the intangible assets.

Intangible assets acquired separately are measured in initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses.

The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with finite life are reviewed at least at the end of each reporting period.

Customer related intangibles are capitalized if they meet the definitions of an intangible asset and the recognition criteria are satisfied. Customer-related intangibles acquired as part of a business combination are valued at fair value and those acquired separately are measured at cost. Such intangibles are amortized over the remaining useful life of the customer relationships or the period of the contractual arrangements.

k) Depreciation/amortization of property, plant and equipment and intangibles

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets as follows:

Category	**Life (in years)**
Plant and equipment (solar rooftop projects)*	25 years or terms of power purchase agreement, whichever is less (15-25 years)
Plant and equipment (wind & solar power projects)*	18-25
Plant and equipment (others)	5-18
Office equipment	5
Furniture and fixture	10
Computers	3
Computer servers	6
Computer softwares	3-6
Customer contracts	Life of respective power purchase agreements
Development rights	Life of respective power purchase agreements
Leasehold improvements	Over the period of lease
Building (Temporary structure)	3

* Based on an external technical assessment, the management believes that the useful lives as given above and residual value of 0%-5%, best represents the period over which management expects to use its assets and its residual value. The useful life of plant and equipment is different from the useful life as prescribed under Part C of Schedule II of Companies Act, 2013.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial period end and adjusted prospectively, if appropriate.

l) Inventories

Inventories are valued at the lower of cost and net realisable value.
Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on first in, first out basis.
Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

m) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale. Borrowing costs consist of interest, discount on issue, premium payable on redemption and other costs that an entity incurs in connection with the borrowing of funds (this cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs). The borrowing costs are amortised basis the Effective Interest Rate (EIR) method over the term of the loan. The EIR amortisation is recognised under finance costs in the Statement of Profit and Loss. The amount amortized for the period from disbursement of borrowed funds upto the date of capitalization of the qualifying assets is added to cost of the qualifying assets.

To the extent, group borrows funds for general purpose and uses them for the purpose of obtaining a qualifying asset, the group determine the amount of borrowing costs eligible for capitalisation by applying a capitalisation rate to the expenditures on that asset. The capitalisation rate used is weighted average of the borrowing costs applicable to the borrowings of the group that are outstanding during the period, other than borrowings made specifically for the purpose of obtaining a qualifying asset.

n) Leases

As per Ind AS 17 applicable till period ended 31 March 2019

As a lessee

Operating lease payments are recognised as an expense in the Statement of Profit and Loss on a straight-line basis over the lease term.

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

As a lessor

Leases in which the Group does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

As per Ind AS 116 applicable from 1 April 2019

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

As a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

The Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets (leasehold land and leasehold building) are depreciated on a straight-line basis over the lease term.

If ownership of the leased asset transfers to the Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

The right-of-use assets are also subject to impairment. Refer to the accounting policies in section (o) Impairment of non-financial assets.

ii) Lease liabilities

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including insubstance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflects the Group exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

iii) Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short-term leases and leases of low value assets are recognised as expense on a straight-line basis over the lease term.

As a lessor

Leases in which the Group does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

o) Impairment of non-financial assets

The Group assess, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimate the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating units (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre -tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Group bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Group's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Group extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the Statement of Profit and Loss.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Group estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Profit and Loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as an increase in revaluation.

p) Share based payments

Company provides additional benefits to certain members of senior management and employees of the Group in the form of share-based payments, whereby employees render services as consideration for equity instruments (equity-settled transactions).

Equity-settled transactions

The cost of equity-settled transactions is determined by the fair value at the date when the grant is made using an appropriate valuation model.

The cost is recognized, together with a corresponding increase in share-based payment reserve in equity, over the period in which the performance and/or service conditions are fulfilled in employee benefit expenses. The cumulative expense recognized for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Group's best estimate of the numbers of equity instruments that will ultimately vest. The Statement of Profit and Loss expense or credit for a period represents the movement in cumulative expense recognized as at the beginning and end of that period and is recognized in employee benefit expense.

Service and non-market performance conditions are not taken into account when determining the grant date fair value of awards, but the likelihood of the conditions being met is assessed as part of the Group's best estimate of the number of equity instruments that will ultimately vest. Market performance conditions are reflected within the grant date fair value. Any other condition attached to an award, but without associated service requirement, are considered to be non-vesting conditions. Non-vesting conditions are reflected in the fair value of an award and lead to an immediate expensing of an award unless there are also service and/or performance conditions.

No expense is recognized for awards that do not ultimately vest because of non-market performance and/or service conditions have not been met. Where awards include a market or non-market condition, the transaction are treated as vested irrespective of whether the market or non-vesting condition is satisfied, provided that all other performance and/or service condition are satisfied.

q) Retirement and other employee benefits

Retirement benefit in the form of provident fund is a defined contribution scheme. The Group has no obligation, other than the contribution payable to the provident fund. The Group recognize contribution payable to the provident fund scheme as an expense, when an employee renders the related service.

The Group operates a defined benefit plan in India, viz., gratuity. The cost of providing benefit under this plan is determined on the basis of actuarial valuation at each period-end carried out using the projected unit cost method.

Remeasurements comprising of actuarial gain and losses, the effect of the asset ceiling, excluding amount recognized in the net interest on the defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognized in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods.

Accumulated leave, which is expected to be utilized within the next twelve months, is treated as short term employee benefit. The Group measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Group treats the accumulated leave expected to be carried forward beyond twelve months, as long term employee benefit for measurement purposes. Such long term compensated absences are determined on the basis of actuarial valuation at each period-end carried out using the projected unit cost method. Remeasurements comprising of actuarial gain and losses are recognized in the balance sheet with a corresponding debit or credit to profit or loss in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods. The Group presents the leave as current liability in the balance sheet, to the extent is does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where Group has unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

Past service costs are recognised in statement of profit and loss on the earlier of:
- The date of the plan amendment or curtailment, and
- The date that the Group recognises related restructuring costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Group recognises the following changes in the net defined benefit obligation as an expense in the Consolidated Statement of Profit and Loss:
- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- Net interest expense or income

r) Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Group expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the Statement of Profit and Loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

s) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:
a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in other income in the satement of profit and loss. The losses arising from impairment are recognised in the statement of profit and loss.

Debt instruments at fair value through other comprehensive income (FVTOCI)

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:
a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
b) The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the Group recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the P&L. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to P&L. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

Debt instruments at fair value through profit or loss (FVTPL)

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the Group may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Group has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the statement of profit and loss.

Equity investments

All other equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS103 applies are classified as at FVTPL. For all other equity instruments, the Group may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Group makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Group decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Group may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised when:
- The rights to receive cash flows from the asset have expired, or
- The respective Group has transferred their rights to receive cash flows from the asset or have assumed the obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; And
- Either the Group has transferred substantially all the risks and rewards of the asset, or has neither transferred nor retained substantially all the risks and rewards of the asset, but have transferred control of the asset.

When the companies under the Group have transferred their rights to receive cash flows from an asset or have entered into a pass-through arrangement, they evaluate if and to what extent they have retained the risks and rewards of ownership. When they have neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of the continuing involvement of Group. In that case, the Group also recognise an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Impairment of financial assets

In accordance with Ind AS 109, the Group applies expected credit loss (ECL) model for measurement and recognition of impairment loss on all the financial assets and credit risk exposure.
The Group follows 'simplified approach for recognition of impairment loss allowance on trade receivables or contract revenue receivables.

The application of simplified approach does not require the Group to track changes in credit risk. Rather it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the group determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/expense in the Statement of Profit and Loss (P&L).

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The financial liabilities of the Group include trade and other payables, derivative financial instruments, loans and borrowings including bank overdraft.

Subsequent measurement

The measurement of financial liabilities depends on their classification as discussed below:-

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss. This category generally applies to borrowings.

The Group recognise debt modifications agreed with lenders to restructure their existing debt obligations. Such modifications are done to take advantage of falling interest rates by cancelling the exposure to high interest fixed rate debt, pay a fee or penalty on cancellation and replace it with debt at a lower interest rate (exchange of old debt with new debt). The qualitative factors considered to be relevant for modified financial liabilities include, but are not limited to, the currency that the debt instrument is denominated in, the interest rate (that is fixed versus floating rate), conversion features attached to the instrument and changes in covenants. The accounting treatment is determined depending on whether modifications or exchange of debt instruments represent a settlement of the original debt or merely a renegotiation of that debt. The exchange of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability.

Compulsorily convertible preference shares

Compulsorily convertible preference shares are separated into liability and equity components based on the terms of the contract.
On issuance of the convertible preference shares, the fair value of the liability component is determined using a market rate for an equivalent non-convertible instrument. This amount is classified as a financial liability measured at amortised cost (net of transaction costs) until it is extinguished on conversion or redemption.

The remainder of the proceeds is allocated to the conversion option that is recognised and included in equity since conversion option meets Ind AS 32 criteria for fixed to fixed classification. Transaction costs are deducted from equity, net of associated income tax. The carrying amount of the conversion option is not remeasured in subsequent years.

Transaction costs are apportioned between the liability and equity components of the convertible preference shares based on the allocation of proceeds to the liability and equity components when the instruments are initially recognised.

Compound Instruments- Compulsorily Convertible Debentures (CCDs)

Compulsorily Convertible Debentures (CCDs) are separated into liability and equity components based on the terms of the contract

The Group recognises interest, dividends, losses and gains relating to such financial instrument or a component that is a financial liability as income or expense in profit or loss.

The present value of the liability part of the compulsorily convertible debentures classified under financial liabilities and the equity component is calculated by subtracting the liability from the total proceeds of CCDs.

Transaction costs that relate to the issue of a compound financial instrument are allocated to the liability and equity components of the instrument in proportion to the allocation of proceeds. Transaction costs that relate jointly to more than one transaction (for example, cost of issue of debentures, listing fees) are allocated to those transactions using a basis of allocation that is rational and consistent with similar transactions.

Derecognition
A financial liability is derecognised when the obligation under the liability is discharged/ cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit and loss.

Reclassification of financial assets and liabilities
The Group determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent.

Offsetting of financial instruments
Financial assets and financial liabilities are offset and the net amount is reported in the Combined balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

t) Derivative financial instruments and hedge accounting

Initial recognition and subsequent measurement
The Group uses derivative financial instruments, such as interest rate swaps and call/put options etc., to hedge its interest rate risks and foreign currency risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to profit or loss, except for the effective portion of cash flow hedges, which is recognised in OCI and later reclassified to profit or loss when the hedge item affects profit or loss or treated as basis adjustment if a hedged forecast transaction subsequently results in the recognition of a non-financial asset or non-financial liability.

For the purpose of hedge accounting, hedges are classified as:
- Fair value hedges when hedging the exposure to changes in the fair value of a recognised asset or liability or an unrecognised firm commitment
- Cash flow hedges when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment
- Hedges of a net investment in a foreign operation

At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to which the Group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes the Group's risk management objective and strategy for undertaking hedge, the hedging/ economic relationship, the hedged item or transaction, the nature of the risk being hedged, hedge ratio and how the entity will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

Hedges that meet the strict criteria for hedge accounting are accounted for, as described below:

(i) Cash flow hedges
The effective portion of the gain or loss on the hedging instrument is recognised in OCI in the cash flow hedge reserve, while any ineffective portion is recognised immediately in the Statement of Profit and Loss.

The Group uses interest rate swaps and call/put options etc. as hedges of its exposure to interest rate risks and foreign currency risks in the foreign currency loan. The ineffective portion relating to foreign currency loan is recognised in other income or expenses.

Amounts recognised as OCI are transferred to profit or loss when the hedged transaction affects profit or loss, such as when the hedged item affects the Statement of Profit and Loss or treated as basis adjustment if a hedged item subsequently results in recognition of a non-financial asset or liability.

If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover (as part of the hedging strategy), or if its designation as a hedge is revoked, or when the hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss previously recognised in OCI remains separately in equity until the forecast transaction occurs or the foreign currency firm commitment is met.

u) Cash and cash-equivalents
Cash and short-term deposits in the balance sheet comprise cash at banks and cash in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short term deposits, as defined above, net off bank overdrafts as they are considered an integral part of the Group's cash management.

v) Measurement of EBITDA

The Group has elected to present earnings before interest, tax, depreciation and amortization (EBITDA) as a separate line item on the face of the Statement of Profit and Loss. The Group measure EBITDA on the basis of profit/ (loss) from continuing operations. In their measurement, the companies include interest income but do not include depreciation and amortization expense, finance costs and tax expense.

w) Events occurring after the Balance Sheet date

Impact of events occurring after the balance sheet date that provide additional information materially effecting the determination of the amounts relating to conditions existing at the balance sheet date are adjusted to respective assets and liabilities.

The Group does not adjust the amounts recognised in its consolidated financial statements to reflect non-adjusting events after the reporting period.

The Group makes disclosures in the financial statements in cases of significant events.

x) Contingent liabilities

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

y) Earnings per equity share

Basic earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Group by the weighted average number of equity shares outstanding during the period. Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Group by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented for any share splits and bonus shares issues including for changes effected prior to the approval of the consolidated financial statements by the Board of Directors.

'The dilutive effect of outstanding options is reflected as additional share dilution in the computation of diluted earnings per share.

4.2 Changes in accounting policy and disclosures- New and amended standards

The Group applied Ind AS 116 for the first time. The nature and effect of the changes as a result of adoption of the new accounting standard are described below.

Several other amendments and interpretations apply for the first time for the year ended 31 March 2020, but do not have an impact on the consolidated financial statements of the Group. The Group has not early adopted any standards or amendments that have been issued but are not yet effective.

a) Ind AS 116 Leases:

Ind AS 116 supersedes Ind AS 17 Leases. The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessee's to recognise most leases on the balance sheet. Lessor accounting under Ind AS 116 is substantially unchanged from Ind AS 17. Lessors will continue to classify leases as either operating or finance leases using similar principles as in Ind AS 17. Therefore, Ind AS 116 does not have an impact for leases where the Group is the lessor.

The Group adopted Ind AS 116 using the modified retrospective method of adoption, with the date of initial application of 1 April 2019, the right-of-use assets were recognised based on the amount equal to the lease liabilities, adjusted for any related prepaid and accrued lease payments previously recognised. Lease liabilities were recognised based on the present value of the remaining lease payments, discounted using the incremental borrowing rate at the date of initial application. There is no impact on equity on transition to Ind AS 116 as on 1 April 2019.

The Group elected to use the transition practical expedient to not reassess whether a contract is or contains a lease at 1 April 2019. Instead, the Company applied the standard only to contracts that were previously identified as leases applying Ind AS 17 and Appendix C to Ind AS 17 at the date of initial application. Therefore, the comparative information was not restated and continues to be reported under Ind AS 17. The Group also applied the available practical expedients wherein it:

- Used a single discount rate to a portfolio of leases with reasonably similar characteristics
- Relied on its assessment of whether leases are onerous immediately before the date of initial application
- Applied the short-term leases exemptions to leases with lease term that ends within 12 months of the date of initial application
- Excluded the initial direct costs from the measurement of the right-of-use asset at the date of initial application
- Used hindsight in determining the lease term where the contract contained options to extend or terminate the lease

The effect of adopting Ind AS 116 as at 1 April 2019 was, as follows:

Particulars	**Notes**	**(INR in Mn)** **Ind AS 116 impact as at 1 April 2019**
Assets - Increase/(decrease):		
Non-current assets		
Right of use assets	6A	4,268
Prepayments	10	(2,955)
Other non-current assets		
Deferred rent	11	(18)
Current assets		
Prepayments	10	(139)

Financial liabilities		
Lease liabilities	38	(997)
Current liabilities		
Financial liabilities		
Trade payables	24	34
Current Lease liabilites	38	(186)

b) Other regulatory changes

Pursuant to the Taxation law (Amendment) Ordinance 2019 (‘Ordinance’) issued by Ministry of Law and Justice on 20 September 2019 with an effective 01 April 2019, domestic companies have the option to pay corporate income tax at 22% plus applicable surcharge and cess subject to certain conditions. Basis the assessment carried out by the Group, 42 group entities have opted for reduced corporate tax rates and accordingly, has recognized current tax and re-measured its deferred taxes as per the provisions of the Ordinance. This has resulted in write-off of MAT credit amounting to INR 938 and reduction in DTA or recognition in DTL amounting to INR 44 on account of re-measurement of deferred tax as at 31 March, 2019. The tax charge for the year has been increased by INR 982.

#The title represented by sale deeds in respect of land amounting to INR 395 (31 March 2019 INR 634) is not yet in the name of the Group. Further, the title of land amounting to INR 510 (31 March 2019 INR 571) is held by way of General Power of Attorney (GPA) and the Group is in the process of getting title transferred in its name.

Mortgage and hypothecation on Property, plant & equipment:

Property, plant & equipment are subject to a pari passu first charge to respective lenders for project term loans, buyer's/suppliers credit, senior secured notes, working capital loan, debentures and acceptances as disclosed in note 18 and note 23.

^ Capitalised borrowing costs

The amount of borrowing costs capitalised in Property, plant and equipment and capital work in progress during the year ended 31 March 2020 was INR 1,928 (31 March 2019 INR .1,433). The rate ranging from 6.40% to 14.85% used to determine the amount of borrowing costs eligible for capitalisation was the effective interest rate of the specific borrowing.

***Adjustments to Property, Plant & Equipments are as follows**

Freehold land

Adjustment of INR 73 (31 March 2019: INR 57) pertains to actualisation of provisional capitalization.

Plant and equipments

Adjustment of INR 51 (31 March 2019: INR 107) pertains to actualisation of provisional capitalization of supply of goods and services and early closure of letter of credits.

Adjustment of INR Nil (31 March 2019: INR 118) pertains to impact of first time adoption of Ind AS 115 - Revenue from contracts with customers, using modified retrospective approach.

Capital work in progress

Adjustment of INR 188 (31 March 2019: INR 38) during the period pertains to actualisation of provision against capital expenditure.

Depreciation

Adjustment of Nil (31 March 2019: INR 2) pertains to impact taken due to first time adoption of Ind AS 115 - Revenue from contracts with customers.

Adjustment of Nil (31 March 2019: INR 2) pertains to actualisation of provisional capitalization.

**** Disposals in Capital Work in Progress includes following**

Amounting to INR 27 (31 March 2019: INR 152) has been written off to the extent of non-viability of recovery of cost in future.

Impairment of Goodwill:
The Group undertook the impairment testing of Goodwill assigned to each Cash Generating Unit (CGU) as at 31 March 2020 applying value in use approach across all the CGUs i.e. using cash flow projections based on financial budgets covering contracted power sale agreements with procurers (25 years) using a discount rate of 9.90 % (post tax) per annum. The Group has used financial projections upto 25 years as the tariff rates are fixed as per PPA.

Based on the results of the Goodwill impairment test, the estimated value in use of CGU after adjusting the carrying values of property, plant and equipment's and intangible assets was more than carrying value of Goodwill by INR 4,765 and accordingly no impairment loss provision has been recognized in the Statement of Profit and Loss.

The Management believes that any reasonably possible change in the key assumptions on which value in use is based would not cause the aggregate carrying amount of Goodwill to exceed the aggregate value in use of CGU.

As on 31 March 2020, there are no impairment indicator. Management will again perfom impairment testing in 31 March 2021. From last impairemt testing till reporting date there is no change in assumptions and conditions.

The key assumptions used in the value in use calculations for the power cash-generating unit are as follows:

(i) Discount Rate	9.90 % Post-Tax Discount rate has been derived based on current cost of borrowing and equity rate of return based on the current market expectations.
(ii) Plant load factor (PLF)	Plant load factor for future periods are estimated for each CGU based on report from expert.

(iii) Collection of revenue as per power purchase agreement rate and GBI benefit in acquired projects located in Andhra Pradesh state will be realised as per the projections and would not be impacted by the ongoing legal proceedings because management believes that matter will be concluded in favour of Group as mentioned in Note 51.

Breakeven sensitivity:

Plant load factor (PLF)	If reduced by 3.98%
Weighted Average Cost of Capital (WACC):	10.73%

6A Right of use assets

Particulars	Lease land	Building	Total
As at 1 April 2019 on account of adoption of Ind AS 116	3,897	371	4,268
Additions during the period	719	50	769
Deletions during the year	(4)	(3)	(7)

At 1 April 2018	**114**
Additions during the year	-
At 31 March 2019	**114**
Additions during the year	(224)
At 31 March 2020	**(110)**

Nature and purpose

Capital reserve represents bargain purchase on business combinations.

17D Debenture redemption reserve

At 1 April 2018	**2,422**
Amount transferred from surplus balance in retained earnings*	1,755
At 31 March 2019	**4,177**
Debenture redemption reserve created during the period*	33
Debenture redemption reserve transferred to retained earnings during the year	(1,914)
At 31 March 2020	**2,296**

Nature and purpose

As per amendments in Companies (Share capital and Debentures) Rules, 2014 the requirement of listed Companies to create Debenture redemption reserve has been removed.

*Due to insufficient profit during the year, DRR has been created only to the extent of available profit. Resultantly, there is a overall shortfall as at 31 March 2020 INR 216 (31 March 2019 INR 1,279).

17E Hedge reserve

At 1 April 2018	**(271)**
Movement in hedge reserve (refer note 50)	(258)
Attributable to non-controlling interests (refer note 50)	17
At 31 March 2019	**(512)**
Movement in hedge reserve (refer note 50)	(636)
Attributable to non-controlling interests (refer note 50)	62
At 31 March 2020	**(1,086)**

Nature and purpose

The Group uses hedging instruments as part of its management of foreign currency risk and interest rate risk associated on borrowings. For hedging foreign currency and interest rate risk, the Group uses foreign currency forward contracts, cross currency swaps, foreign currency option contracts and interest rate swaps. To the extent these hedges are effective, the change in fair value of the hedging instrument is recognised in the cash flow hedging reserve. Amounts recognised in the cash flow hedging reserve is reclassified to the statement of profit or loss when the hedged item affects profit or loss (e.g. interest payments).

17F Share based payment reserve

At 1 April 2018	**1,027**
Expense for the year	316
Amount utilised on exercise of stock options	(257)
At 31 March 2019	**1,086**
Expense for the year	207
Adjustment in ESOP reserve on forfeiture of vested options	(132)
At 31 March 2020	**1,161**

Nature and purpose

The share options based payment reserve is used to recognise the grant date fair value of options issued to employees under employee stock option plan.

17G Foreign currency translation reserve

At 1 April 2018	**-**
Additions during the year	**(2)**
At 31 March 2019	**(2)**
Additions during the year	14
At 31 March 2020	**12**

Nature and purpose

Exchange differences arising on translation of the foreign operations are recognised in other comprehensive income as described in accounting policy and accumulated in a separate reserve within equity. The cumulative amount is reclassified to profit or loss when the net investment is disposed-off.

17H Retained earnings

Notes:
Details of security

Non convertible debentures (secured)
The debentures are secured by way of first pari passu charge on the respective Company's immovable properties, movable assets, current assets, cash accruals including but not limited to current assets, receivables, book debts, cash and bank balances, loans and advances etc. present and future.

Listed senior secured notes
Notes are secured by way of exclusive mortgage over immovable properties and exclusive charge by way of hypothecation of tangible and intangible movable assets. Further secured by way of hypothecation over rights and benefit, claims and demands under all the project agreements, letter of credit, insurance contracts and proceeds, guarantees, performance bond etc. of the company. Secondary Charge over the account receivables, book debts and cash flows. Creation of charge on immovable properties of INR 800 by way of mortgage and assignment is under proces. The senior secured notes shall be repaid through one bullet payment in March 2024.

Term loan from banks (secured)
Secured by pari passu first charge by way of mortgage of all the present and future immovable properties, hypothecation of movable assets, book debt, operating cash flows, receivables, commissions, revenue of whatsoever nature, all bank accounts and assignment of all rights, title, interests, benefits, claims etc. of project documents and insurance contracts of the respective Company.

Term loan from financial institutions (secured)
Secured by a first pari passu charge by way of mortgage on immovable properties, first pari passu charge by way of hypothecation of tangible moveable assets, first charge on all the current assets and accounts. Further secured by way of assignment of all the rights, title, interest, benefit, claims and demands under all the project agreements, letter of credit, insurance contracts and proceeds, guarantees, performance bond etc. of the respective company.

Buyer's/ Supplier's credit (secured)
Secured by first pari passu first charge by way of mortgage of all the present and future immovable properties, hypothecation of movable assets, book debt, operating cash flows, receivables, commissions, revenue of whatsoever nature, all bank accounts and assignment of all rights, title, interests, benefits, claims etc. of project documents, PPA, and insurance contracts of the respective Company. Creation of charge by way of mortgage and assignment is under process.

Acceptances (secured)
Acceptances are secured by parri passu charge over all present and future current assets and movable fixed assets of the Company of respective projects for which such acceptances are taken.

Compulsorily convertible preference shares treated as financial liability as per Ind AS 109
On 27 June 2019, the Company has issued INR 20,903 Compulsory Covertible Preference Shares ('CCPS') - Series A to certain existing shareholders:

Name of Allottee	Number of shares alloted	Face value	Amount received	Balance as at 31 March 2020
GS Wyvern Holding Limited	16,395,294	425	6,968	7,734
Green Rock B 2014 Limited (acting in its capacity as trustee of Green Stone A 2014 Trust)	16,318,729	425	6,935	7,698
Canada Pension Plan Investment Board	16,470,588	425	7,000	7,768
Total	**49,184,611**		**20,903**	**23,200**

Each Series A CCPS are non-cumulative and shall be entitled to a preferred rate of dividend of 0.0001% over the Equity Shares of the Company. These are mandatorily convertible upon the occurrence of the earliest of certain events as enumerated in terms specified in board resolution passed for issuance of CCPS but no later than 3 years from the date of allotment. Conversion shall occur at conversion price which will be computed in the manner as terms specified in board resolution passed for issuance of CCPS on the date of conversion. Series A CCPS do not meet the criteria of conversion into fixed number of equity shares given conversion price is not currently assertainable, accordingly these CCPS have been recorded as financial liability and carried at amortized cost. These CCPS carry a yield of 15.02%.

Compulsorily convertible debentures (unsecured)
Compulsorily Convertible Debentures (CCD) are compulsorily convertible into equity shares in accordance with the terms of the Joint Venture Agreement at conversion ratio defined therein. CCD do not carry any voting rights.

- lease liabilities	105	-
- compulsory convertible preference shares	2,230	-
- others	17	16
Bank charges	411	376
Unamortised ancillary borrowing cost written off*	520	523
Total	**33,542**	**26,811**

* Represents transaction cost on long term borrowings charged to statement of profit & loss on account of derecognition due to substantial modification.

36 Earnings per share (EPS)		**For the year ended 31 March 2020**	**For the year ended 31 March 2019**
The following reflects the profit and share data used for the basic and diluted EPS computations:			
Profit attributable to equity holders for basic earnings		(4,842)	800
Profit attributable to equity holders of parent for basic EPS		(4,842)	800
Weighted average number of equity shares for calculating basic EPS		459,201,195	379,797,836
Basic earnings per share		(10.55)	2.11
Profit attributable to equity holders of parent for diluted EPS		(4,842)	800
Weighted average number of equity shares for calculating diluted EPS		459,201,195	385,804,858
Diluted earnings per share*		(10.55)	2.07
		No. of shares	**No. of shares**
Weighted average number of equity shares in calculating basic EPS	(a)	379,924,556	379,797,836
Effect of dilution in calculating basic EPS and diluted EPS			
Compulsory convertible preference shares	(b)	79,276,639	-
Weighted average number of equity shares in calculating basic EPS	**(c) =(a)+(b)**	**459,201,195**	**379,797,836**
Effect of dilution in calculating diluted EPS			
Convertible equity for employee stock option plan	(d)	4,866,286	6,007,022
Weighted average number of equity shares in calculating diluted EPS	**(e)= (c)+(d)**	**464,067,481**	**385,804,858**

* Since the effect of conversion of employee stock option plan was anti-dilutive in the current year, it has not been considered for the purpose of computing Diluted EPS

37 Gratuity and other post-employment benefit plans

Retirement benefit in the form of provident fund is a defined contribution scheme. The contributions to the provident fund are charged to the statement of profit and loss for the year when the contributions are due. The Group has no obligation, other than the contribution payable to the provident fund.

The Group has a defined benefit gratuity plan. Gratuity is computed as 15 days salary, for every completed year of service or part thereof in excess of 6 months and is payable on retirement/termination/resignation. The benefit vests on the employees after completion of 5 years of service. The Gratuity liability has not been externally funded. Group makes provision of such gratuity liability in the books of accounts on the basis of actuarial valuation as per the projected unit credit method.

The following tables summarize the components of net benefit expense recognized in the statement of profit and loss and the unfunded status and amounts recognized in the balance sheet for the Gratuity.

Statement of profit and loss

Net employees benefit expense recognised in employee cost	**31 March 2020**	**31 March 2019**
Current service cost	25	25
Interest cost on benefit obligation	6	5
Net benefit expense*	**31**	**30**
Net (expense)/income recognised in other comprehensive income	(13)	14

Balance sheet

Benefit liability	**31 March 2020**	**31 March 2019**
Present value of unfunded obligation	108	75
Net liability	108	75

	31 March 2020	**31 March 2019**
Changes in the present value of the defined benefit obligation		
Opening defined benefit obligation	75	53
Current service cost	25	25
Interest cost	6	5
Benefits paid	(10)	(0)
Liabilities assumed/ (settled)	(1)	
Remeasurements during the year due to:		
- Experience adjustments	2	(14)
- Change in financial assumptions	11	-
- Change in demographic assumptions	0	(0)
Assets extinguished on curtailments/settlements	-	6
Closing defined benefit obligation	108	75

Since the entire amount of plan obligation is unfunded therefore changes in fair value of plan assets, categories of plan assets as a percentage of the fair value of total plan assets and Group’s expected contribution to the plan assets for the next year is not given.

* This amount is inclusive of amount capitalised in different projects.

The principal assumptions used in determining gratuity obligations	**31 March 2020**	**31 March 2019**
Discount rate	6.85%	7.75%
Salary escalation	10.00%	10.00%

The estimates of future salary increases considered in actuarial valuation take account of inflation, total amount of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

The Group regularly assesses these assumptions with the projected long-term plans and prevalent industry standards. The impact of sensitivity due to changes in the significant actuarial assumptions on the defined benefit obligations is given in the table below:

Particulars	**Change in assumptions**	**31 March 2020**	**31 March 2019**
Discount rate	+ 0.5%	110	66
	- 0.5%	97	76
Salary escalation	+ 0.5%	110	74
	- 0.5%	97	67

The sensitivity analysis above has been determined based on a method that extrapolates the impact on defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the year.

Projected plan cash flow:

The table below shows the expected cash flow profile of the benefits to be paid to the current membership of the plan based on past service of the employees as at the valuation date:

Maturity Profile	**31 March 2020**	**31 March 2019**
Within next 12 months	5	2
From 2 to 5 years	27	20
From 6 to 9 years	36	84
10 years and beyond	226	181

The weighted average duration to the payment of these cash flows is 13.32 years (31 March 2019: 10.58 years).

Risk analysis
The Group is exposed to a number of risks in the defined benefit plans. Most significant risks pertaining to defined benefits plans and management estimation of the impact of these risks are as follows:

· Inflation risk: Currently the Group has not funded the defined benefit plans. Therefore, the Group will have to bear the entire increase in liability on account of inflation.

· Longevity risk/life expectancy: The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and at the end of the employment. An increase in the life expectancy of the plan participants will increase the plan liability.

· Salary growth risk: The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. An increase in the salary of the plan participants will increase the plan liability.

Defined contribution plan:	**31 March 2020**	**31 March 2019**
Contribution to provident fund & other fund charged to statement of profit & loss*	89	70

*This amount is inclusive of amount capitalized in different projects.

38 Leases

As per Ind AS 17 applicable till period ended 31 March 2019

The Group has entered into commercial property lease for its offices. The lease have non-cancellable commitment year which has remaining term of 5 years. The Company has the Future minimum rentals payables under non- cancellable operating lease (excluding lease equalisation reserve) are as follows

Particulars	**31 March 2019**
Within one year	110
After one year but not more than five years	330

As per Ind AS 116 applicable from 1 April 2019

The Group has entered into leases for its offices and leasehold lands. These leases generally have lease terms of 5 to 30 years.
The Group also has certain leases of regional offices and office equipment with lease terms of 12 months or less and lease of office equipments with low value. The Group applies the ‘short-term lease’ and ‘lease of low-value assets’ recognition exemptions for these leases.

The weighted average incremental borrowing rate applied to lease liabilities recognised in the balance sheet at the date of initial application is 10.40%.

Set out below are the carrying amounts of lease liabilities and the movements during the year:

Particulars	**31 March 2020**
As at 1 April 2019 on account of adoption of Ind AS 116	1,183
Additions	514
Accretion of interest	105
Interest capitalised during the year	41
Payments	(207)
Balance as on 31 March 2020	1,637

Refer note 4.2 (a) for approach followed by the Company for transition to Ind AS 116

The lease liabilities as at 1 April 2019 can be reconciled to the operating lease commitments as of 31 March 2019, as follows:

Operating lease commitments as at 31 March 2019	440
Weighted average incremental borrowing rate as at 1 April 2019	10.40%
Discounted operating lease commitments as at 1 April 2019	366
Add: Lease liabilities of lease hold land and regional office not considered in operating lease commitment	817
Lease liabilities as at 1 April 2019	1,183
Current lease liability	186
Non current lease liability	997

a) There are no restrictions or covenants imposed by leases.
b) Refer note 33 for rental expense recorded for short-term leases and low value leases for the year ended 31 March 2020.
c) There are no amounts payable toward variable lease expense recognised for the year ended 31 March 2020.
d) The maturity analysis of lease liabilities are disclosed in note 45.
e) There are no leases which have not yet commenced to which the lessee is committed (if any).

39 Share Based Payment

The Group has five share-based payment schemes for its employees:
2018 Stock Option Plan, 2017 Stock Option Plan, 2016 Stock Option Plan, 2014 Stock Option Plan and 2011 Stock Option Plan ('Group Stock Option Plans') approved by the board. According to the ESOP schemes, the employee selected by the compensation committee from time to time will be entitled to options as per grant letter issued by the committee, subject to satisfaction of prescribed vesting conditions.

The relevant terms of the ESOP schemes are as below:

Plans	**2018 Stock Option Plan Modified**	**2018 Stock Option Plan**	**2017 Stock Option Plan**	**2016 Stock Option Plan**	**2014 Stock Option Plan**	**2011 Stock Option Plan**
Grant Date	16-Aug-19	Multiple	Multiple	Multiple	Multiple	Multiple
Vesting period	Grants will vest in 5 years on quarterly basis which shall commence one year after the date of grant of options	**Time Linked Vesting**: 50 % of grants will vest in 5 years as follows: i) One year from the date of grant, the Options for the first four quarters shall vest immediately. ii) Thereafter, vesting will continue on a quarterly basis for the unvested Options. Remaining 50% will vest at the end of 5 years from the date of grant. **2018 Stock Option Plan (modified):** Grants will vest in 5 years on quarterly basis which shall commence one year after the date of grant of options.	**Time Linked Vesting:** 50 % of grants will vest in 5 years as follows: i) One year from the date of grant, the Options for the first four quarters shall vest immediately. ii) Thereafter, vesting will continue on a quarterly basis for the unvested Options. Remaining 50% will vest at the end of 5 years from the date of grant.	**Time Linked Vesting:** 5 years on quarterly basis effective from 1 December 2015 on completion of one year from the date of grant, the Options for the first seven quarters shall vest immediately. Thereafter, vesting will continue on quarterly basis for the unvested Options commencing from 1 December 2017. **Performance linked vesting:** The Options shall vest annually and shall be prorated over a period of 3 years from the date of grant and shall be subject to the EBITDA achieved by the Company for the last completed financial year. The vesting of the Options shall take place at the end of the first anniversary of the date of grant ("Vesting Date") and thereafter on 31 March 2018 and 31 March 2019 or at a later date when the audited financial statements of the Company are available.	**Time Linked Vesting:** 5 years on quarterly basis which shall commence one year after the date of grant of option	**Time Linked Vesting:** 5 years from the grant date
Exercise period	Within 10 years from date of grant upon vesting	Within 10 years from date of grant upon vesting	Within 10 years from date of grant upon vesting	Within 10 years from date of grant upon vesting	Within 10 years from date of grant upon vesting	Within 10 years from date of grant upon vesting
Exercise price	INR 400	INR 415	INR 340	INR 205	INR 100 or 131	INR 100
Settlement type	Equity Settled	Equity Settled	Equity Settled	Equity Settled	Equity Settled	Equity Settled

The details of options outstanding under the ESOP schemes are summarized below:

Particulars	**Number of options (in million)**	
	2019-20	**2018-19**
Outstanding at the beginning of the period	19	21
Granted during the period	1	1
Forfeited during the period	2	0
Exercised during the period	-	3
Outstanding at the end of the period	18	19
Exercisable at the end of the period	9	9

- The weighted average exercise price of these options outstanding was INR 280 for the year ended 31 March 2020 (31 March 2019: INR 258).
- The weighted average exercise price of these options granted during the year was INR 400 for the year ended 31 March 2020 (31 March 2019: INR 415)
- There are no options exercised during the current period. The weighted average exercise price of options exercised during 31 March 2019: INR 205.
- The weighted average exercise price of these options forfeited during the period was INR 189 for the year ended 31 March 2020 (31 March 2019 INR. 290).
- The weighted average exercise price of excercisable options was INR 206 for the period ended 31 March 2020 (31 March 2019: INR 178).

Particulars	**2019-20**	**2018-19**
Dividend yield (%)	2.9%	1.5%
Expected volatility (%)	23%	15%
Risk–free interest rate (%)	6.53%	7.70% - 8.12%
Weighted average remaining contractual life	6.30 years	6.86 years
Weighted average remaining contractual life of options granted	9.37 years	9.47 years

The fair value of share options granted is estimated at the date of grant using an appropriate valuation model, taking into account the terms and conditions upon which the share options were granted.

All the group companies listed above are engaed in generation of power through non-conventional and renewable energy sources except for ReNew Wind Energy (Jamb) Private Limited which is purely engaged in providing Engineering Procurement and Construction (“EPC”) services and ReNew Services Private Limited which is purely engaged in providing Operation and maintenance services

^ These companies are also engaged in providing Engineering Procurement and Construction (“EPC”) services apart from generation of power through non-conventional and renewable energy sources.

$These companies are engaged in provisding services for operation and management

* The remaining stakeholders in the respective entities have protective rights only. The group has evaluated that it has ability to use its power over the entities which entitile group to exposure/rights to variable returns, hence these have been accounted as subsidiaries in these consolidated financial statements of the group.

# These entities are under joint control and have been accounted for as equity method .

41 Related party disclosure

Names of related parties and related party relationship:
The names of related parties where control exists and / or with whom transactions have taken place during the year and description of relationship as identified by the management are:-

I. Key management personnel or relatives of key management personnel:

Mr. Sumant Sinha, Chairman and Managing Director
Mr. Ravi Seth, Chief Financial Officer (till 2 September 2019)
Mr. D Muthukumaran (from 3 September 2019)
Mr. Ashish Jain, Company Secretary and Compliance Officer
Mr. Parag Sharma, Chief Operating Officer and head of solar business (from 26 April 2018 till 1 November 2019)
Mr. Balram Mehta, President of wind business (till 8 November 2019)
Mr. Ravi Parmeshwar, Chief Human Resource Officer (till 8 November 2019)
Mrs. Vaishali Nigam Sinha, CSR and Communication Officer

II. Enterprise owned or significantly influenced by key management personnel or their relatives:

Cognisa Investment
Wisemore Advisory Private Limited
ReNew Foundation

III. Enterprise under joint control:

Prathamesh Solarfarms Limited (till 30 January 2019)
Heramba Renewables Limited
Aalok Solarfarms Limited
Shreyas Solarfarms Limited
Abha Solarfarms Limited

IV. Remuneration to key managerial personnel (KMP):

	For the year ended	
	31-Mar-20	**31-Mar-19**
Remuneration to key managerial personnel	413	456

Above remuneration includes share based payment of INR 179 (31 March 2019: INR 241) and gratuity and leave encashment expense of INR 15 (31 March 2019: INR 17)

V. Transactions and balances with enterprises under joint control:

42 Segment information

The Chairman and Managing Director of ReNew Power Limited takes decisions in respect of allocation of resources and assesses the performance basis the reports/ information provided by functional heads and is thus considered to be the Chief Operating Decision Maker (CODM).

The Group discloses segment information in a manner consistent with internal reporting to Chairman and Managing Director. The Group entities have segments based on type of business operations. The reportable segments of Group under Ind AS are Wind Power and Solar Power which predominantly relate to generation and sale of electricity and construction activities. The Group entities does not operate in more than one geographical segment. The Group discloses in the segment information operating profit, comparable operating profit and comparable EBITDA.

No operating segment has been aggregated to form the above reportable operating segments. Further, total assets and liabilities balance for each reportable segment is not reviewed by or provided to the CODM.

Particulars	For the year ended 31 March 2020			For the year ended 31 March 2019

Trade payables	3,690	3,690	3,029	3,029
Measured at FVOCI				
Derivative instruments	-	-	895	895

The management of the group assessed that cash and cash equivalents, trade receivables, trade payables, short term borrowings, other current financials liabilities and other current financial assets approximate their carrying amounts largely due to the short-term maturities of these instruments.

The following methods and assumptions were used to estimate the fair

i The fair values of the Group’s term loans from financial institutions including current maturities are determined by using Discounted Cash Flow (DCF) method using discount rate that reflects the issuer’s borrowing rate as at the end of the reporting period. They are classified as level 3 fair values in the fair value hierarchy due to the inclusion of unobservable inputs including own credit risk. The own non-performance risk as at 31 March 2020 was assessed to be insignificant.

ii The fair values of the liability component of compulsory convertible prefrence shares including current maturities are determined by using Discounted Cash Flow (DCF) method using discount rate that reflects the borrowing rate as at the end of the reporting period. They are classified as level 3 fair values in the fair value hierarchy due to the inclusion of unobservable inputs including own credit risk. The own non-performance risk as at 31 March 2020 was assessed to be insignificant.

iii The fair values of the security deposits given are determined by using Discounted Cash Flow (DCF) method using discount rate that reflects the lending rate as at the end of the reporting period. They are classified as level 3 fair values in the fair value hierarchy due to the inclusion of unobservable inputs including counterparty credit risk.

iv The Group enter into derivative financial instruments with various counterparties, principally financial institutions with investment grade credit ratings. Cross currency interest rate swaps are valued using valuation techniques, which employs the use of market observable inputs. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates, yield curves of the currency, interest rate curves and forward rate curves of the underlying instrument. The changes in counterparty credit risk had no material effect on the hedge effectiveness assessment for derivatives designated in hedge relationships.

44 Fair value hierarchy

The Group categorizes assets and liabilities measured at fair value into one of three levels depending on the ability to observe inputs employed in their measurement which are described as follows:
i) Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
ii) Level 2 - Inputs are inputs that are observable, either directly or indirectly, other than quoted prices included within level 1 for the asset or liability.
iii) Level 3 - Inputs are unobservable inputs for the asset or liability reflecting significant modifications to observable related market data or Group’s assumptions about pricing by market participants.

The following table provides the fair value measurement hierarchy of the assets and liabilities of the group :-

Quantitative disclosures fair value measurement hierarchy for assets/liabilities as at period end:

		31 March 2020		31 March 2019	
	Level of fair value measurement	**Carrying value**	**Fair value**	**Carrying value**	**Fair value**

45 Financial Risk Management objectives and policies

The financial liabilities comprise loans and borrowings, derivative liabilities, trade payable and other financial liabilities.
The main purpose of these financial liabilities is to finance the Group's operations. The Group's principal financial assets include loans, derivative assets, trade receivables, cash and cash equivalents and other financial assets. The Group is exposed to market risk, credit risk and liquidity risk. The Group's senior management oversees the management of these risks. The Company's senior management is supported by a various sub committees that advises on financial risks and the appropriate financial risk governance framework for the Company. These committees provides assurance to the Company's senior management that the Company's financial risk activities are governed by appropriate policies and procedure and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below:

Market Risk

Market risk is the risk that the Group's assets and liabilities will be exposed to due to a change in market prices that determine the valuation of these financial instruments. Market risk comprises 3 types of risk: interest rate risk, currency risk and other price risk. Financial instruments affected by market risk include loans and borrowings, deposits and derivative financial instruments.

The sensitivity analyses in the following sections relate to the position as at 31 March 2020 and 31 March 2019. The sensitivity analyses have been prepared on the basis that the amount of net debt, the ratio of fixed to floating interest rates of the debt and derivatives and the proportion of financial instruments in foreign currencies are all constant and on the basis of hedge designations in place as at 31 March 2020.

(i) Interest rate Risk:

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group is exposed to interest rate risk primarily from the external borrowings that are used to finance their operations. In case of external commercial borrowings ("ECB") and buyers credit the Group believes that the exposure of Group to changes in market interest rates is insignificant as the respective companies manage the risk by hedging the changes in the market interest rates through cross currency interest rate swaps. The Group also monitors the changes in interest rates and actively re finances its debt obligations to achieve an optimal interest rate exposure.

Interest Rate Sensitivity

The following table demonstrates the sensitivity to a reasonable possible change in interest rates on financial liabilities, i.e. floating interest rate borrowings in INR and USD. Interest rate sensitivity has been calculated for borrowings with floating rate of Interest. For borrowings with fixed rate of interest sensitivity disclosure has not been made. With all other variables held constant, the Group's profit before tax is affected through the impact on financial liabilities, as follows:

	31 March 2020		31 March 2019	
	Increase/decrease in basis points	**Effect on profit before tax**	**Increase/decrease in basis points**	**Effect on profit before tax**
INR	+/(-)50	(-)/+615	+/(-)50	(-)/+499
US dollar	-	-	+/(-)60	(-)/+3

	31 March 2020		31 March 2019	
	Increase/decrease in basis points	**Effect on equity**	**Increase/decrease in basis points**	**Effect on equity**
INR	+/(-)50	(-)/+397	+/(-)50	(-)/+228
US dollar	-	-	+/(-)60	(-)/+1

The assumed movement in basis points for the interest rate sensitivity analysis is based on the currently observable market environment. Though there is exposure on account of Interest rate movement as shown above but the Group minimises the foreign currency (US dollar) interest rate exposure through derivatives and INR interest rate exposure through re-financing.

(ii) Foreign Currency Risk:

Foreign Currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Group is exposed to foreign currency risk arising from imports of goods in US dollars. The Group hedges its exposure to fluctuations on the translation into INR of its buyer's/supplier's credit by using foreign currency swaps and forward contracts. The Group has followed a conservative approach for hedging the foreign currency risk so as to not use complex forex derivatives and foreign currency loan. The Group also monitors that the hedges do not exceed the underlying foreign currency exposure. The Group does not undertake any speculative transaction.

Foreign currency sensitivity

The following tables demonstrate the sensitivity to a reasonably possible change in USD and INR exchange rates, with all other variables held constant. The impact on the group's profit before tax is due to changes in the fair value of monetary liabilities comprising of buyer's/supplier's credit in US dollars. The impact on the group's pre-tax equity is due to changes in the fair value of cross-currency interest-rate swaps (CCIRS) designated as cash flow hedges. The group's exposure to foreign currency changes for all other currencies is not material.

	31 March 2020		31 March 2019	
Change in USD rate	5%	-5%	5%	-5%
Effect on profit before tax	-	-	(23)	23

(iii) Credit Risk

Credit risk is the risk that the power procurer will not meet their obligations under a financial instrument or customer contract, leading to a financial loss. The Group is exposed to credit risk from their operating activities (primarily trade receivables) and from its financing activities but this credit risk exposure is insignificant given the fact that substantially whole of the revenues are from state utilities/government entities.

Further the group sought to reduce counterparty credit risk under long-term contracts in part by entering into power sales contracts with utilities or other customers of strong credit quality and we monitor their credit quality on an on going basis.
The maximum credit exposure to credit risk for the components of the balance sheet at 31 March 2020 and 31 March 2019 is the carrying amount of all the financial assets.

Trade Receivables

Customer credit risk is managed basis established policies of Group, procedures and controls relating to customer credit risk management. Outstanding customer receivables are regularly monitored. The Group does not hold collateral as security. The group has majorly state utilities/government entities as its customers with high credit worthiness and therefore the group does not see any significant risk related to credit.

The credit quality of the customers other than state utilities/government entities is evaluated based on their credit ratings and other publicly available data.

Financial instruments and credit risk

Credit risk from balances with banks is managed by Group's treasury department. Investments, in the form of fixed deposits, loans and other investments, of surplus funds are made only with banks and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed on an annual basis by the Group, and may be updated throughout the year subject to approval of group's finance committee. The limits are set to minimize the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

(iv) Liquidity Risk

Liquidity risk is the risk that the Group will encounter in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The approach of the Group to manage liquidity is to ensure, as far as possible, that these will have sufficient liquidity to meet their respective liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risk damage to their reputation.

The Group assessed the concentration of risk with respect to refinancing its debt and concluded it to be low. The Group has access to a sufficient variety of sources of funding and debt maturing within 12 months can be rolled over with existing lenders.

The Group rely mainly on long-term debt obligations to fund their construction activities. To the extent available at acceptable terms, utilized non-recourse debt to fund a significant portion of the capital expenditures and investments required to construct and acquire our wind and solar power plants and related assets. The Group's non-recourse financing is designed to limit default risk and is a combination of fixed and variable interest rate instruments. In addition, the debt is typically denominated in the currency that matches the currency of the revenue expected to be generated from the benefiting project, thereby reducing currency risk. The majority of non-recourse debt is funded by banks and financial institutions, with debt capacity supplemented by unsecured loan from related party.

The table below summarizes the maturity profile of financial liabilities of group based on contractual undiscounted payments:

As at 31 March 2020	On demand	Less than 3 months	3 to 12 months	1 to 5 years	> 5 years	Total
Borrowings (Other than preference shares)#

* Including future interest payments.

The Group has estimated its ability to service the debt repayment obligations and maintain adequate liquidity for its operations by considering the estimates around expected future cash flows, realization of existing and future receivables, forecasted results and its operational performance. Further, Group is actively engaged in discussions with various lenders for securing funds for its projects in pipeline and refinancing of its existing debt obligations on maturity. Group basis its assessment is confident of generating adequate inflows for meeting its liabilities maturing over next 12 months.

46 Capital management

For the purpose of the capital management, capital includes issued equity capital, compulsorily convertible debentures, compulsorily convertible preference shares, Securities premium and all other equity reserves attributable to the equity holders of the Group. The primary objective of the Group's management is to maximise the shareholder value.

The Group manage their capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants.

To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Group monitor capital using a gearing ratio, which is net debt divided by total capital plus net debt. The Group includes within net debt, interest bearing loans and borrowings and other payables, less cash and short-term deposits. Group systematically evaluates opportunities for managing its assets including that of buying new assets, partially or entirely sell existing assets and potential new joint ventures. Crystallization of any such opportunity shall help the Group in improving the overall portfolio of assets, cash flow management and shareholder returns.

The policy of the Group is to keep the gearing ratio of the power project to 3:1 during the construction phase and aim to enhance it to 4:1 post the construction phase. This is in line with the industry standard ratio. The current gearing ratios of the various projects in the Group is between 3:1 to 4:1.

In order to achieve this overall objective, the capital management of the Group, amongst other things, aims to ensure that they meet financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements.

No changes were made in the objectives, policies or processes for managing capital during the year ended 31 March 2020.

47 Commitments Liabilities and Contingencies
(to the extent not provided for)

(i) Contingent liabilities

Description	As at 31 March 2020	As at 31 March 2019
Contingent liabilities on account of liquidated damages for delay in project commissioning. The management believes that any amount of liquidated damages to be levied by customer shall be entirely reimbursable from capital vendors of respective projects and from purchase consideration pending to be paid as per the contract clauses, accordingly no amount is provided in consolidated financial statements as of 31 March 2020.	242	-
Contingent liabilities on account of demand received of safeguard duty under custom act for 31 March 2019.	-	327

(ii) Commitments:

Estimated amount of contracts remaining to be executed on capital account and not provided for

At 31 March 2020, the group has capital commitment (net of advances) pertaining to commissioning of wind & solar energy projects of INR 11,955 (31 March 2019: 29,072).

48 Details of dues to Micro, Small and Medium Enterprises as defined under the MSMED Act, 2006

Under the Micro, Small and Medium Enterprises Development Act, 2006, (MSMED) which came into force from 2 October 2006, certain disclosure are required to be made relating to Micro, Small and Medium Enterprises. On the basis of the information and records available with the management, there are no outstanding dues to the Micro, Small and Medium Enterprises development Act, 2006.

Particulars	As at 31 March 2020	As at 31 March 2019
The principal amount and the interest due thereon (to be shown separately) remaining unpaid to any supplier as at the end of each accounting year	52	4
The amount of interest paid by the buyer in terms of section 16, of the Micro Small and Medium Enterprise Development Act, 2006 along with the amounts of the payment made to the supplier beyond the appointed day during each accounting year	Nil	Nil
The amount of interest due and payable for the year of delay in making payment (which have been paid but beyond the appointed day during the year) but without adding the interest specified under Micro Small and Medium Enterprise Development Act, 2006.	Nil	Nil
The amount of interest accrued and remaining unpaid at the end of each accounting year; and	2	0
The amount of further interest remaining due and payable even in the succeeding years, until such date when the interest dues as above are actually paid to the small enterprise for the purpose of disallowance as a deductible expenditure under section 23 of the Micro Small and Medium Enterprise Development Act, 2006	Nil	Nil

49 Corporate social responsibility expenditure

As per Section 135 of the Companies Act, 2013, a company, meeting the applicability threshold, needs to spend at least 2% of its average net profit for the immediately preceding three financial years on corporate social responsibility (CSR) activities. The areas for CSR activities as follows :-

1) Sanitation & making available safe drinking water- Construction of toilets, Bore-well, well, Tube-well etc.
2) Empowering women through SHGs (self-help group) and creating income generation activities for the women like stitching and tailoring, goatery, backyard poultry etc.)
3) Ensuring environmental sustainability- animal welfare Plantation, environment awareness,
4) Animal Welfare-Animal health camp, Para -vet training
5) Education awareness, Remedial classes for weak students etc.
6) Health and Hygiene- Health camps in the community, cleanliness drive to create awareness.
7) Sports Training- Sports training camps in community
8) Education facility improvement- Construction of solar power plant in schools

A CSR committee has been formed by the respective Company as per the Act. The funds were utilised on above mentioned activities which are specified in Schedule VII of the Companies Act, 2013.

(a) Gross amount required to be spent by the group during the year is INR 64 (31 March 2019: INR 46).

(b) Amount spent during the year on:

List of CSR activities	In Cash	Yet to be paid	Total
Current year			
Construction / Acquisition of any asset	-	-	-
Other activities	26	47	73
Total	**26**	**47**	**73**
Previous year*			
Construction / Acquisition of any asset	3	3	6
Other activities	31	16	47
Total	**34**	**19**	**53**

* The amount yet to be paid in previous year has been subsequently paid in current year.

50 Hedging activities and derivatives

Derivatives designated as hedging instruments

The Group uses certain types of derivative financial instruments (viz. forwards contracts, swaps) to manage/mitigate their exposure to foreign exchange and interest risk. Further, the group designates such derivative financial instruments (or its components) as hedging instruments for hedging the exchange rate fluctuation and interest risk attributable to either a recognised item or a highly probable forecast transaction ('Cash flow hedge'). The effective portion of changes in the fair value of derivative financial instruments (or its components) that are designated and qualify as cash flow hedges, are recognised in the other comprehensive income and held in Cash flow hedge reserve - a component of Equity. Any gains / (losses) relating to the ineffective portion, are recognised immediately in the statement of profit and loss within other income / other expenses. The amounts accumulated in Equity for highly probable forecast transaction are added to carrying value of non financial asset or non financial liability as basis adjustment, other amounts accumulated in Equity are re-classified to the statement of profit and loss in the years when the hedged item affects profit / (loss).

At any point of time, when a forecast transaction is no longer expected to occur, the cumulative gains / (losses) that were reported in equity is immediately transferred to the statement of profit and loss within other income / other expenses.

Cash flow hedges

Hedge has been taken against exposure to foreign currency risk and variable interest outflow on external commercial borrowings, buyer's credit and highly probable forecast transactions. Terms of the derivative contracts and their respective impact on OCI and statement of profit and loss is as below:-

-Buyers credit / Suppliers credit (included in long term/short term borrowings)
Pay fixed INR and receive USD and pay fixed interest at 2.27% to 2.51% p.a. and receive a variable interest at 12 month LIBOR plus 0.4% p.a. on the notional amount.

-Loan (included in long term borrowings)
Pay fixed INR and receive USD and pay fixed interest at 8.67% to 10.23% p.a. and receive a variable interest at 3 month LIBOR plus 2.25% to 6 months LIBOR plus 3.05% p.a. on the notional amount.

-Notes (included in long term borrowings)
Pay fixed INR and receive USD and pay fixed interest in INR at 6.06% to 10.74% p.a. and receive a fixed interest in USD at 5.58% p.a to 6.87% p.a on the notional amount.

The cash flow hedges through CCS of USD 301,029,136, COS 1,119,304,936 and Call Spread of USD 299,304,936, Call Option of USD 951,747,401 and forwards of USD 574,549,077 outstanding at the year ended 31 March 2020 were assessed to be highly effective and a mark to market loss of INR 516 (31 March 2019: INR 705) with a deferred tax liability of INR 1675 (31 March 2019: INR 181), is included in OCI.

Foreign currency and Interest rate risk

Forward contracts and swaps at fair value through OCI are designated as hedging instruments in cash flow hedges of interest and principal payments in USD/CNH.

	31 March 2020		31 March 2019	
	Assets	**Liabilities**	**Assets**	**Liabilities**
Derivative contracts designated as hedging instruments	8,718	-	774	895

Balance at the beginning (after non controlling interest)	(512)	(271)
Gain/(loss) recognised on cash flow hedges	373	(869)
Gain/(loss) reclassified to profit or loss	8	(5)
Gain/(loss) reclassified to non financial assets or liabilities as basis adjustment	559	230
Gain/(loss) reclassified to profit or loss as hedged future cash flows are no longer expected to occur	280	295
Income tax relating on cash flow hedges	(1,856)	91
Balance at the end	(1,148)	(529)
Less: Non controlling interest movement	62	17
Balance at the end (after non controlling interest)	(1,086)	(512)

51 Certain subsidiaries companies (the "AP entities") have entered into long-term Power Purchase Agreements ("PPAs") having a cumulative capacity of 777 MWs (wind and solar energy projects) with Southern Power Distribution Company of Andhra Pradesh Limited i.e. the distribution company of Andhra Pradesh ("APDISCOM"). These PPAs have a fixed rate per unit of electricity for the 25-year term. With regard to aforementioned PPAs, certain litigations as described below are currently underway:

1. In terms of the Generation Based Incentive ("GBI") scheme of the Ministry of Renewable Energy ("MNRE"), the AP entities accrue income based on units of power supplied under the aforementioned PPAs. Andhra Pradesh Electricity Regulatory Commission ("APERC") vide its order in July 2018 allowed APDISCOMS to interpret the Andhra Pradesh Electricity Regulatory Commission (Terms and Conditions for Tariff Determination for Wind Power Projects) Regulations, 2015 ("Regulations") in a manner to treat GBI as a pass through in the tariff.

The AP entities filed writ petition before the Andhra Pradesh High Court ("AP High Court") challenging the vires of the regulation and the order by APERC and were granted an interim stay order in August 2018. As at 31 March 2020 the cumulative amount recoverable from the APDISCOM pertaining to period from February 2017 till July 2018, included in trade receivables amounts to INR 1,004. The AP entities have filed an interim application in AP High Court seeking payment of amount wrongfully deducted by the APDISCOM.

The management basis legal opinion obtained by it, believes that the GBI benefit is over and above the applicable tariffs and the APERC does not have jurisdiction to interfere with the intent of GBI scheme and therefore the outstanding amount is recoverable and hence no adjustment has been made in the consolidated financial statements in this regard.

2. The Government of Andhra Pradesh (the "GoAP") issued an order (the "GO") dated 1 July 2019 constituting a High-Level Negotiation Committee (the "HLNC") for review and negotiation of tariff for wind and solar energy projects in the state of Andhra Pradesh. Pursuant to the GO, APDISCOM issued letters dated 11 July 2019 and 12 July 2019 to the AP entities, requesting for revision of tariffs entered into in PPAs. The AP entities filed a writ petition on 23 July 2019 before the AP High Court ("AP High Court) challenging the GO and the said letters issued by APDISCOM for renegotiation of tariffs. The AP High Court issued its order dated September 24, 2019 enumerating the following:
a) Writ petition is allowed, and both GO the subsequent letters are set aside.
b) Further, APDISCOM were instructed to honour pending and future bills and pay the same at the interim rate of Rs. 2.44/2.43 per unit.
c) Andhra Pradesh Electricity Regulatory Commission (the "APERC") to dispose off the case within a time frame of six months.

The AP Entities have filed a Writ Appeal before the division bench of the AP High Court challenging the jurisdiction of APERC in entertaining the said matter. Parallelly, the AP Entities have filed another Writ Appeal before the division bench of the AP High Court challenging AP High Court's direction to the APDISCOM to tariff at interim rate.

The AP entities have a net block of INR 49,617 as at March 31, 2020 and have recognised a revenue of INR 6,911 for the year ended 31 March 2020 and have a trade receivable balance of INR 8,945 as on 31 March 2020 from sale of electricity against such PPAs [including an amount of INR 1,004 for GBI receivable as explained in part (1) to the note].

The management basis legal opinion obtained by it, believes that it has strong merits in the case and the final order would be in its favour and hence no adjustment has been made in the consolidated financial statements including provision for expected credit loss and impairment.

52 Break up of investments in entities under joint control is as under -

Name of Companies	Investment as at 31 March 2019	Addition during the year	Share in loss of jointly controlled entity	Investment as at 31 March 2020
Abha Solarfarms Limited				
As at 31 March 2020	84	15	(10)	89
As at 31 March 2019	88	-	(4)	84
Heramba Renewables Limited				
As at 31 March 2020	157	29	(16)	170
As at 31 March 2019	161	-	(5)	157
Aalok Solarfarms Limited				
As at 31 March 2020	85	15	(9)	91
As at 31 March 2019	89	-	(3)	85
Shreyas Solarfarms Limited				
As at 31 March 2020	163	29	(18)	174
As at 31 March 2019	170	-	(7)	163

53 Business combinations

The group have acquired unlisted companies based in India and carrying out business activities relating to generation of power through non-conventional and renewable energy sources, in exchange for cash consideration. The group acquired these entities because management believes that the acquisition would enable the group to strengthen its position in renewable energy sector.

Assets acquired and liabilities assumed
The fair values of the identifiable assets and liabilities as at the date of acquisition were:

Particulars	**For the year ended 31 March 2019**
	Prathamesh Solarfarms Limited
Acquisition date	**30 January 2019**
Segment	**Solar**
Assets	**INR**
Property plant and equipment	3,199
Intangibles (customer contracts)	88
Loans	573
Prepayments - non current	0
Other non-current assets	102
Trade receivables	339
Prepayments - current	1
Cash and cash equivalents	7
Others current financial assets	11
Other current assets	10
Deferred tax assets (net)	51
	4,381
Liabilities	
Long-term borrowings	3,255
Trade payables	30
Other current financial liabilities	221
Other current liabilities	2
	3,508
Total identifiable net assets at fair value	**872**
Goodwill on acquisition	428
Purchase consideration transferred	1,301

Goodwill recognised represents the future economic and synergy benefits arising from assets acquired to strengthen it's position in renewable energy sector. Goodwill is allocated entirely to the solar power plant. None of the goodwill recognised is expected to be deductible for income tax purposes.

The acquisition date fair value of the equity interest held by the Group immediately before the acquisition date was INR 314. The group has recognised INR 77 gain as a result of remeasurment to fair value the equity interest in the entity. The fair value gain has been included in Other income of the group.

From the date of acquisition, acquired entity has contributed in revenue and profit/loss before tax follows:

Particulars	**From the date of acquisition till 31 March 2019**
	Prathamesh Solarfarms Limited
Revenue	168
Profit before tax	27

If the combination had taken place at the beginning of the year, revenue from operations and the loss before tax would have been:

Particulars	**For the year ended 31 March 2019**
	Prathamesh Solarfarms Limited
Revenue	607
Profit before tax	24

Transaction with non-controlling interests

(i) Acquisition of additional interest
On 19 June 2019, the Group acquired an additional 49% interest in the voting shares of ReNew Solar Energy (Karnataka) Private Limited, increasing its ownership interest to 100%. Cash consideration of INR 561 was paid to the non-controlling shareholders.

The carrying value of the net assets of ReNew Solar Energy (Karnataka) Private Limited (excluding goodwill on the original acquisition) was INR 687. The carrying value of the additional interest acquired at the date of acquisition was INR 337.
Following is a schedule of additional interest acquired in ReNew Solar Energy (Karnataka) Private Limited:

Particulars	**ReNew Solar Energy (Karnataka) Private Limited**
Date of transaction with non-controlling interests	**19 June 2019**
Segment	**Solar**
Change in interest (%)	**49.00%**
Assets	**INR**
Carrying value of the additional interest	337
Cash consideration paid to non-controlling shareholders	561
Difference recognised in capital reserve within equity	(224)

(ii) Change in interest without loss of control
On 28th March ,2020, the Group entered into an transaction with GS Engineering & Construction Corp to issue equity equivalent to 49% interest in the voting shares of ReNew Solar Energy (Jharkhand Three) Private Limited, decreasing its ownership interest to 51%. Cash consideration of INR 832 was received from the non-controlling shareholders.

The carrying value of the net assets of ReNew Solar Energy (Jharkhand Three) Private Limited was INR 601.

On 04th March, 2020, the Group entered into an transaction with investors to issue 98.61% interest in the voting shares of ReNew Surya Mitra Private Limited, decreasing its ownership interest to 1.39%. Cash consideration of INR 14 was received from the non-controlling shareholders.

The carrying value of the net assets of ReNew Surya Mitra Private Limited was INR (0).

Following is a schedule of change in interest without loss of control:

Particulars	**ReNew Solar Energy (Jharkhand Three) Private Limited**	**ReNew Surya Mitra Private Limited**
Date of transaction with non-controlling interests	**28 March 2020**	**04 March 2020**
Segment	**Solar**	**Solar**
Change in interest (%)	**(49.00%)**	**(98.61%)**
	INR	**INR**
Carrying value of the interest transferred	1	(0)
Cash consideration received from non-controlling shareholders	832	14
Recognised in non-controlling interests within equity	833	14

54 Additional disclosure as required under Schedule III of Companies Act, 2013:

55 Significant accounting judgments, estimates and assumptions

The preparation of consolidated financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the accompanying disclosures. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

In the process of applying the accounting policies management has made certain judgments, estimates and assumptions. The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Group based their assumptions and estimates on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Group. Such changes are reflected in the assumptions when they occur.

A) Accounting Judgements:

Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgment is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

The Group makes various assumptions and estimates while computing deferred taxes which include production related data (PLFs), projected operations and maintenance costs, projected finance costs, proposed availment of deduction under section 80IA of the Income Tax Act, 1961 and the period over which such deduction shall be availed, usage of brought forward losses etc. While these assumptions are based on best available facts in the knowledge of management as on the balance sheet date however, they are subject to change year on year depending on the actual tax laws and other variables in the respective year. Given that the actual assumptions which would be used to file the return of income shall depend upon the tax laws prevailing in respective year, management shall continue to reassess these assumptions while calculating the deferred taxes on each balance sheet date and the impact due to such change, if any, is considered in the respective year.

Depreciation on property, plant and equipment

Depreciation on property, plant and equipment is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management. Considering the applicability of Schedule II of Companies Act, 2013, the management has re-estimated useful lives and residual values of all its property, plant and equipment. The management believes that depreciation rates currently used fairly reflect its estimate of the useful lives and residual values of property, plant and equipment, though these rates in certain cases are different from lives prescribed under Schedule II of the Companies Act, 2013.

Basis legal opinion obtained, management is of the view that application of CERC and/or SERC rates for the purpose of accounting for depreciation expenses is not mandatory. Hence, Group is depreciating the assets bases on life as determined by an expert.

B) Estimates and assumptions:

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values.

Assumptions include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 44 and 45 for further disclosures.

Related party transactions

Employee benefit costs and other common expenses are incurred by the Group. These expenses are allocated to all the entities of the Group in the form of 'Management Shared Services'. Allocation of cost to the entities involves various estimates including retention, allocation of cost for projects under construction vis-a-vis operating projects, profit mark-up which are assessed through an external expert.

Inter-group unsecured loan

The Group uses unsecured loans to fund requirements of various entities. These loans carry interest rate higher than a return expected from 3-year government bond yield.

Impairment of goodwill - The key assumptions used to determine the recoverable amount for the different CGUs are disclosed and further explained in Note 6.

-----------------------------------This space has been left blank intentionally---------------------------------------

56 During the year ended 31 March 2019, distribution companies of the state of Karnataka issued demand notices to captive users (customers of certain Group's subsidiaries) and to the respective captive plants hereinafter refer to as the "SPVs". These notices were issued seeking recovery of cross subsidy surcharge and differential between rate of electricity tax applicable to captive users and non-captive users on the ground that these captive users have not consumed the energy in proportion to their respective shareholding in the SPV, thereby violating Rule 3 of the Electricity Rules, 2005. SPVs had deposited a sum of INR 114 under protest towards fulfilment of demand raised by one of the distribution companies. Thereafter, the SPVs had filed a petition before the Karnataka Electricity Regulatory Commission (the "KERC") contesting these demands. KERC had granted interim relief and stayed the demand notice and disconnection by the distribution companies, subject to the deposit of an amount equal to 25% of the total demand amount of INR 340. The aforesaid payment of INR 114 was considered fulfilment of the condition of deposit imposed by the KERC. The amount paid under protest has been accounted for as recoverable and disclosed under head “Other current assets” in these financial statements.

The Group, based on legal advice obtained, believes that there are merits in its position and that the demand raised by distribution companies would be rescinded by KERC and hence no adjustment has been made in the financial statements in this regard.

57 Due to outbreak of COVID-19 in India and globally, the Group has made initial assessment of likely adverse impact on economic environment in general and financial risks on account of COVID-19. Considering that the Group is in the business of generation of electricity which is having “Must Run” status by Ministry of New and Renewable Energy (MNRE), the management believes that the impact of outbreak on the business and financial position of the Group will not be significant. The management does not see any risks in the Group’s ability to continue as a going concern and meeting its liabilities as and when they fall due. For under construction projects, though the physical activities have been constrained and partially impacted, however management does not anticipate any delay in meeting the original timelines and expects that overall completion timelines for respective projects shall be achieved as set out in respective power purchase agreements with customers. Further, Ministry of New and Renewable Energy (MNRE) has issued office memorandum dated April 17, 2020 stating the Time-Extension in Scheduled Commissioning date of RE projects for lockdown time and additional thirty days (30 days) for normalization after the end of such lockdown due to COVID- 19 which further negates any potential risk of liquidated damages. The Group is closely monitoring developments, its operations, liquidity and capital resources and is actively working to minimize the impact of the unprecedented situation.

58 Absolute amounts less than INR 500,000 are appearing in the Consolidated Financial Statements as "0" due to presentation in millions.

1 Corporate Information

ReNew Power Limited (‘the Company’) is a public limited company domiciled in India. The Company was converted into a public company with effect from 17 April 2018 and consequently the name of the Company has changed from ReNew Power Private Limited to ReNew Power Limited.

The registered office of the Company is located at 138, Ansal Chamber - II Bikaji Cama Place, New Delhi-110066. The Parent and its subsidiaries (hereinafter collectively referred to as 'the Group') are carrying out business activities relating to generation of power through non-conventional and renewable energy sources.

The Consolidated Financial Statements of the Group have been authorised for issue by the Group's Board of Directors on 29 May 2019.

2 Basis of preparation

The Consolidated Financial Statements are prepared in accordance with Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 read with the Companies (Indian Accounting Standards) Rules, 2015 as amended. The Consolidated Financial Statements have been prepared on accrual basis and under the historical cost convention issued thereunder and other accounting principles generally accepted in India.

These Consolidated Financial Statements have been prepared using presentation and disclosure requirements of the Schedule III of the Companies Act 2013.

The financial statements have been prepared on a historical cost basis, except for the following assets and liabilities which have been measured at fair value:

- Derivative financial instruments

- Financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments)

3 Principles of consolidation

The Consolidated Financial Statements comprise the consolidated financial statements of the Group as at 31 March 2019. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee
- Rights arising from other contractual arrangements
- The Group's voting rights and potential voting rights
- The size of the Group's holding of voting rights relative to the size and dispersion of the holdings of the other voting rights holders.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the period are included in the Consolidated Financial Statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

The Consolidated Financial Statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. If a member of the Group uses accounting policies other than those adopted in the Consolidated Financial Statements for like transactions and events in similar circumstances, appropriate adjustments are made to that Group member’s financial statements in preparing the Consolidated Financial Statements to ensure conformity with the Group’s accounting policies.

The financial statements of all entities used for the purpose of consolidation are drawn up to same reporting date as that of the parent Company, i.e., year ended on 31 March 2019. When the end of the reporting period of the parent is different from that of a subsidiary, the subsidiary prepares, for consolidation purposes, additional financial information as of the same date as the financial statements of the parent to enable the parent to consolidate the financial information of the subsidiary, unless it is impracticable to do so.

Consolidation procedure:

- Combine like items of assets, liabilities, equity, income, expenses and cash flows of the parent on line by line basis with those of its subsidiaries. For this purpose, income and expenses of the subsidiary are based on the amounts of the assets and liabilities recognised in the Consolidated Financial Statements at the acquisition date.

- Offset (eliminate) the carrying amount of the parent’s investment in each subsidiary and the parent’s portion of equity of each subsidiary. Business combinations policy explains how to account for any related goodwill.

- Eliminate in full intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the Group (profits or losses resulting from intragroup transactions that are recognised in assets, such as inventory and fixed assets, are eliminated in full). Intragroup losses may indicate an impairment that requires recognition in the Consolidated Financial Statements. Ind AS 12 Income Taxes applies to temporary differences that arise from the elimination of profits and losses resulting from intragroup transactions.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.
If the Group loses control over a subsidiary, it:

- Derecognises the assets (including goodwill) and liabilities of the subsidiary
- Derecognises the carrying amount of any non-controlling interests
- Derecognises the cumulative translation differences recorded in equity
- Recognises the fair value of the consideration received
- Recognises the fair value of any investment retained
- Recognises any surplus or deficit in profit or loss
- Reclassifies the parent’s share of components previously recognised in OCI to profit or loss or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities.

4 Summary of Significant Accounting Policies

a) Business Combinations and goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred measured at acquisition date fair value and the amount of any non-controlling interests in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree’s identifiable net assets. Acquisition-related costs are expensed as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their acquisition date fair values. For this purpose, the liabilities assumed include contingent liabilities representing present obligation and they are measured at their acquisition fair values irrespective of the fact that outflow of resources embodying economic benefits is not probable. However, the following assets and liabilities acquired in a business combination are measured at the basis indicated below:

- Deferred tax assets or liabilities and the assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with Ind AS 12 Income Tax and Ind AS 19 Employee Benefits respectively.
- Liabilities or equity instruments related to share based payment arrangements of the acquiree or share – based payments arrangements of the Group entered into to replace share-based payment arrangements of the acquiree are measured in accordance with Ind AS 102 Share-based Payments at the acquisition date.
- Assets (or disposal groups) that are classified as held for sale in accordance with Ind AS 105 Non-current Assets Held for Sale and Discontinued Operations are measured in accordance with that standard.
- Reacquired rights are measured at a value determined on the basis of the remaining contractual term of the related contract. Such valuation does not consider potential renewal of the reacquired right.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

If the business combination is achieved in stages, any previously held equity interest is re-measured at its acquisition date fair value and any resulting gain or loss is recognised in profit or loss or OCI, as appropriate.

Any contingent consideration to be transferred by the acquirer is recognised at fair value at the acquisition date. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of Ind AS 109 Financial Instruments, is measured at fair value with changes in fair value recognised in profit or loss. If the contingent consideration is not within the scope of Ind AS 109, it is measured in accordance with the appropriate Ind AS. Contingent consideration that is classified as equity is not re-measured at subsequent reporting dates and subsequent its settlement is accounted for within equity.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests, and any previous interest held, over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in OCI and accumulated in equity as capital reserve. However, if there is no clear evidence of bargain purchase, the entity recognises the gain directly in equity as capital reserve, without routing the same through OCI.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group’s cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

A cash generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

Where goodwill has been allocated to a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted through goodwill during the measurement period, or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognized at that date. These adjustments are called as measurement period adjustments. The measurement period does not exceed one period from the acquisition date.

b) Investments accounted for using the equity method.

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

The considerations made in determining whether significant influence or joint control are similar to those necessary to determine control over the subsidiaries

The Group’s investments in its associate and joint venture are accounted for using the equity method. Under the equity method, the investment in an associate or a joint venture is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group’s share of net assets of the associate or joint venture since the acquisition date. Goodwill relating to the associate or joint venture is included in the carrying amount of the investment and is not tested for impairment individually.

The statement of profit and loss reflects the Group’s share of the results of operations of the associate or joint venture. Any change in OCI of those investees is presented as part of the Group’s OCI. In addition, when there has been a change recognised directly in the equity of the associate or joint venture, the Group recognises its share of any changes, when applicable, in the statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and the associate or joint venture are eliminated to the extent of the interest in the associate or joint venture.

If an entity’s share of losses of an associate or a joint venture equals or exceeds its interest in the associate or joint venture (which includes any long term interest that, in substance, form part of the Group’s net investment in the associate or joint venture), the entity discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate or joint venture. If the associate or joint venture subsequently reports profits, the entity resumes recognising its share of those profits only after its share of the profits equals the share of losses not recognised.

The aggregate of the Group’s share of profit or loss of an associate and a joint venture is shown on the face of the consolidated statement of profit and loss.
The financial statements of the associate or joint venture are prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

After application of the equity method, the Group determines whether it is necessary to recognise an impairment loss on its investment in its associate or joint venture. At each reporting date, the Group determines whether there is objective evidence that the investment in the associate or joint venture is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate or joint venture and its carrying value, and then recognises the loss as ‘Share of profit of an associate and a joint venture’ in the statement of profit or loss.
Upon loss of significant influence over the associate or joint control over the joint venture, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate or joint venture upon loss of significant influence or joint control and the fair value of the retained investment and proceeds from disposal is recognised in profit or loss.

c) Current versus non-current classification

The Group presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it is:
- Expected to be realised or intended to sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is treated as current when it is:
- Expected to be settled in normal operating cycle
- Held primarily for the purpose of trading
- Due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets/liabilities are classified as non-current assets/liabilities.
The operating cycle is the time between the acquisition of assets for processing and their realisation/settlement in cash and cash equivalents. The Group has identified twelve months as their operating cycle for classification of their current assets and liabilities.

d) Fair value measurement

The Group measures financial instruments, such as, derivatives at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured in the consolidated financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy. (Refer Note 43 and 44)

At each reporting date, the management of the Group analyses the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the accounting policies of the Group.

For assets and liabilities that are recognised in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

This note summarises the accounting policy for determination of fair value. Other fair value related disclosures are given in the relevant notes as following:

- · Disclosures for significant estimates and assumptions (Refer Note 56)
- · Quantitative disclosures of fair value measurement hierarchy (Refer Note 44)
- · Financial instruments (including those carried at amortised cost) (Refer Note 43 and 44)

e) Revenue recognition

Revenue from contracts with customers

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services. The Group has generally concluded that it is the principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer.

Sale of Power

Income from supply of power is recognized on the supply of units generated from the plant to the grid, as per the terms of the Power Purchase Agreements ("PPA") entered into with the customers.

The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of power, the Group considers the effects of variable consideration and consideration payable to the customer (if any).

Income from services (management consultancy)

Revenue from projects management/technical consultancy are recognised as per the terms of agreement on the basis of services rendered.

Sale of equipment

Revenue from sale of equipment is recognised at the point in time when control of the asset is transferred to the customer, generally on delivery of the equipment. The Group considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of equipment, the Group considers the effects of variable consideration, the existence of significant financing components, non-cash consideration, and consideration payable to the customer.

(i) Variable consideration

If the consideration in a contract includes a variable amount, the Group estimates the amount of consideration to which it will be entitled in exchange for transferring the goods or service to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

Rebates

In some PPAs, the Group provide rebates in invoice if payment is made before the due date. Rebates are offset against amounts payable by the customers. To estimate the variable consideration for the expected future rebate, the Group applies the most likely method.

(ii) Consideration payable to customers

In some PPAs, Group has to pay consideration to customers. Consideration payable to customers are offset against the revenue recognised as and when sale of power occurs.

Income from compensation for loss of revenue

Income from compensation for loss of revenue is recognised after certainty of receipt of the same is established.

Dividend

Dividend income is recognised when the right to receive dividend is established by the reporting date.

Contract balances:

(i) Contract assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Group performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

(ii) Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Group transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Group performs under the contract.

(iii) Trade receivables

A receivable represents the Group’s right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in section (s) Financial instruments – initial recognition and subsequent measurement.

f) Foreign currencies

The Financial Statements are presented in Indian rupees (INR), which is also the functional currency and the currency of the primary economic environment in which the Group operate.

Transactions and balances

Transactions in foreign currencies are initially recorded by the Group at their functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

Exchange differences arising on settlement or translation of monetary items are recognised in profit or loss with the exception of the following:
- Exchange differences arising on monetary items that are designated as part of the hedge of the Group’s net investment of a foreign operation. These are recognised in OCI until the net investment is disposed of, at which time, the cumulative amount is reclassified to profit or loss.
- Tax charges and credits attributable to exchange differences on those monetary items are also recorded in OCI.

g) Taxes

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in India. Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate. Current income tax assets and liabilities are offset if a legally enforceable right exists to set off these.

Deferred Tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date. Deferred tax liabilities are recognised for all taxable temporary differences.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised. The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

In situations where Group is entitled to a tax holiday under the Income-tax Act, 1961, enacted in India, no deferred tax (asset or liability) is recognized in respect of temporary differences which reverse during the tax holiday period. Deferred taxes in respect of temporary differences which reverse after the tax holiday period are recognized in the period in which the temporary differences originate. However, the Group restrict the recognition of deferred tax assets to the extent that it has become reasonably certain that sufficient future taxable income will be available against which such deferred tax assets can be realized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in OCI or equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Minimum Alternate Tax

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Group will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Group.

h) Government grants

Government grants are recognized where there is reasonable assurance that the grant will be received and all attached conditions will be compiled with. When the grant related to an expense item, it is recognized as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant related to an asset, it is recognized as income in equal amounts over the expected useful life of the related asset.

When the Group receive grants of non-monetary assets, the asset and the grant are recorded at fair value amounts and released to profit or loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset i.e. by equal annual instalments.

The Group presents grants related to an expense item as other income in the Statement of Profit and Loss. Thus, Generation based incentive and Sale of emission reduction certificates have been recognised as other income.

Generation based Incentive:

Generation based incentive is recognized on the basis of supply of units generated by the Group to the state electricity board from the eligible project in accordance with the scheme of the "Generation Based Incentive (GBI) for Grid interactive Wind Power Projects".

Subsidy (Viability Gap Funding)

The Group receives Viability Gap Funding (VGF) for setting up of certain solar power projects. The Group records the VGF proceeds on fulfilment of the underlying conditions as deferred government grant. Such deferred grant is recognized over the period of useful life of underlying asset.

i) Property, plant and equipment

Capital work in progress is stated at cost, net of accumulated impairment loss, if any. Plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Group depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred.

Subsequent Costs

The cost of replacing a part of an item of property, plant and equipment is recognised in the carrying amount of the item of property, plant and equipment, if it is probable that the future economic benefits embodied within the part will flow to the Group and its cost can be measured reliably with the carrying amount of the replaced part getting derecognised. The cost for day-to-day servicing of property, plant and equipment are recognised in Statement of Profit and Loss as and when incurred.

Derecognition

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

Gains or losses arising from de-recognition of fixed assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the Statement of Profit and Loss when the asset is derecognized.

j) Intangible assets

Intangible assets acquired separately are measured in initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses.

The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with finite life are reviewed at least at the end of each reporting period.

Customer related intangibles are capitalized if they meet the definitions of an intangible asset and the recognition criteria are satisfied. Customer-related intangibles acquired as part of a business combination are valued at fair value and those acquired separately are measured at cost. Such intangibles are amortized over the remaining useful life of the customer relationships or the period of the contractual arrangements.

k) Depreciation/amortization of PPE and intangibles

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets as follows:

Category	Life
Plant and equipment (solar rooftop projects)*	25 years or terms of power purchase agreement, whichever is less (15-25 years)
Plant and equipment (wind & solar power projects)*	18-25
Plant and equipment (others)	5-18
Office equipment	5
Furniture and fixture	10
Computers	3
Computer servers	6
Computer softwares	3-6
Customer contracts	25
Leasehold improvements	Over the period of lease (5 years)

* Based on an external technical assessment, the management believes that the useful lives as given above and residual value of 0%-5%, best represents the period over which management expects to use its assets and its residual value. The useful life of plant and equipment is different from the useful life as prescribed under Part C of Schedule II of Companies Act, 2013.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial period end and adjusted prospectively, if appropriate.

l) Inventories

Inventories are valued at the lower of cost and net realisable value.
Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on first in, first out basis.
Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

m) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale. Borrowing costs consist of interest, discount on issue, premium payable on redemption and other costs that an entity incurs in connection with the borrowing of funds (this cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs). The borrowing costs are amortised basis the Effective Interest Rate (EIR) method over the term of the loan. The EIR amortisation is recognised under finance costs in the Statement of Profit or Loss. The amount amortized for the period from disbursement of borrowed funds upto the date of capitalization of the qualifying assets is added to cost of the qualifying assets.

To the extent, group borrows funds for general purpose and uses them for the purpose of obtaining a qualifying asset, the group determine the amount of borrowing costs eligible for capitalisation by applying a capitalisation rate to the expenditures on that asset. The capitalisation rate used is weighted average of the borrowing costs applicable to the borrowings of the group that are outstanding during the period, other than borrowings made specifically for the purpose of obtaining a qualifying asset.

n) Leases

As a lessee

Operating lease payments are recognised as an expense in the Statement of Profit and Loss on a straight-line basis over the lease term.

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

As a lessor

Leases in which the Group does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

o) Impairment of non-financial assets

The Group assess, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimate the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating units (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre -tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Group bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Group's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Group extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the Statement of Profit and Loss.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Group estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Profit or Loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as an increase in revaluation.

p) Share based payments

Company provides additional benefits to certain members of senior management and employees of the Company and a subsidiary in the form of share-based payments, whereby employees render services as consideration for equity instruments (equity-settled transactions).

Equity-settled transactions

The cost of equity-settled transactions is determined by the fair value at the date when the grant is made using an appropriate valuation model.

The cost is recognized, together with a corresponding increase in share-based payment reserve in equity, over the period in which the performance and/or service conditions are fulfilled in employee benefit expenses. The cumulative expense recognized for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Group's best estimate of the numbers of equity instruments that will ultimately vest. The Statement of Profit and Loss expense or credit for a period represents the movement in cumulative expense recognized as at the beginning and end of that period and is recognized in employee benefit expense.

Service and non-market performance conditions are not taken into account when determining the grant date fair value of awards, but the likelihood of the conditions being met is assessed as part of the Group's best estimate of the number of equity instruments that will ultimately vest. Market performance conditions are reflected within the grant date fair value. Any other condition attached to an award, but without associated service requirement, are considered to be non-vesting conditions. Non-vesting conditions are reflected in the fair value of an award and lead to an immediate expensing of an award unless there are also service and/or performance conditions.

No expense is recognized for awards that do not ultimately vest because of non-market performance and/or service conditions have not been met. Where awards include a market or non-market condition, the transaction are treated as vested irrespective of whether the market or non-vesting condition is satisfied, provided that all other performance and/or service condition are satisfied.

Share based payment cost, to the extent pertaining to the employees of subsidiary, is reduced from employee benefit expenses of the Company and is considered as deemed investment in the form of capital contribution in the subsidiary.

q) Retirement and other employee benefits

Retirement benefit in the form of provident fund is a defined contribution scheme. The Group has no obligation, other than the contribution payable to the provident fund. The Group recognize contribution payable to the provident fund scheme as an expense, when an employee renders the related service.

The Group operates a defined benefit plan in India, viz., gratuity. The cost of providing benefit under this plan is determined on the basis of actuarial valuation at each period-end carried out using the projected unit cost method.

Remeasurements comprising of actuarial gain and losses, the effect of the asset ceiling, excluding amount recognized in the net interest on the defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognized in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods.

Accumulated leave, which is expected to be utilized within the next twelve months, is treated as short term employee benefit. The Group measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Group treats the accumulated leave expected to be carried forward beyond twelve months, as long term employee benefit for measurement purposes. Such long term compensated absences are determined on the basis of actuarial valuation at each period-end carried out using the projected unit cost method. Remeasurements comprising of actuarial gain and losses are recognized in the balance sheet with a corresponding debit or credit to profit or loss in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods. The Group presents the leave as current liability in the balance sheet, to the extent is does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where Group has unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

Past service costs are recognised in statement of profit or loss on the earlier of:
- The date of the plan amendment or curtailment, and
- The date that the Group recognises related restructuring costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Group recognises the following changes in the net defined benefit obligation as an expense in the Consolidated Statement of Profit and Loss:
- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- Net interest expense or income

r) Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Group expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the Statement of Profit and Loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

s) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

Debt instruments at amortised cost

A ‘debt instrument’ is measured at the amortised cost if both the following conditions are met:

a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and

b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in other income in the profit or loss. The losses arising from impairment are recognised in the statement of profit or loss.

Debt instruments at fair value through other comprehensive income (FVTOCI)

A ‘debt instrument’ is classified as at the FVTOCI if both of the following criteria are met:

a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and

b) The asset’s contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the Group recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the P&L. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to P&L. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

Debt instruments at fair value through profit or loss (FVTPL)

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the Group may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as ‘accounting mismatch’). The Group has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the statement of profit or loss.

Equity investments

All other equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS103 applies are classified as at FVTPL. For all other equity instruments, the Group may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Group makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Group decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Group may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised when:

- The rights to receive cash flows from the asset have expired, or
- The respective Group has transferred their rights to receive cash flows from the asset or have assumed the obligation to pay the received cash flows in full without material delay to a third party under a ‘pass-through’ arrangement; And
- Either the Group has transferred substantially all the risks and rewards of the asset, or has neither transferred nor retained substantially all the risks and rewards of the asset, but have transferred control of the asset.

When the companies under the Group have transferred their rights to receive cash flows from an asset or have entered into a pass-through arrangement, they evaluate if and to what extent they have retained the risks and rewards of ownership. When they have neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of the continuing involvement of Group. In that case, the Group also recognise an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Impairment of financial assets

In accordance with Ind AS 109, the Group applies expected credit loss (ECL) model for measurement and recognition of impairment loss on all the financial assets and credit risk exposure.

The Group follows 'simplified approach for recognition of impairment loss allowance on trade receivables or contract revenue receivables.

The application of simplified approach does not require the Group to track changes in credit risk. Rather it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the group determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/expense in the Statement of Profit and Loss (P&L).

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The financial liabilities of the Group include trade and other payables, derivative financial instruments, loans and borrowings including bank overdraft.

Subsequent measurement

The measurement of financial liabilities depends on their classification as discussed below:-

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss. This category generally applies to borrowings.

The Group recognise debt modifications agreed with lenders to restructure their existing debt obligations. Such modifications are done to take advantage of falling interest rates by cancelling the exposure to high interest fixed rate debt, pay a fee or penalty on cancellation and replace it with debt at a lower interest rate (exchange of old debt with new debt). The qualitative factors considered to be relevant for modified financial liabilities include, but are not limited to, the currency that the debt instrument is denominated in, the interest rate (that is fixed versus floating rate), conversion features attached to the instrument and changes in covenants. The accounting treatment is determined depending on whether modifications or exchange of debt instruments represent a settlement of the original debt or merely a renegotiation of that debt. The exchange of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability.

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Compound Instruments- Compulsorily Convertible Debentures (CCDs)

Compulsorily Convertible Debentures (CCDs) are separated into liability and equity components based on the terms of the contract

Basis the terms of these compound financial instruments the distributions to holders of an equity instrument are being recognised by the entity directly in equity. Transaction costs of an equity transaction are being accounted for as a reduction from equity.

The Group recognises interest, dividends, losses and gains relating to such financial instrument or a component that is a financial liability as income or expense in profit or loss.

The present value of the liability part of the compulsorily convertible debentures classified under financial liabilities and the equity component is calculated by subtracting the liability from the total proceeds of CCDs.

Transaction costs that relate to the issue of a compound financial instrument are allocated to the liability and equity components of the instrument in proportion to the allocation of proceeds. Transaction costs that relate jointly to more than one transaction (for example, cost of issue of debentures, listing fees) are allocated to those transactions using a basis of allocation that is rational and consistent with similar transactions.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged/ cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Reclassification of financial assets and liabilities

The Group determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the Combined balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

t) Derivative financial instruments and hedge accounting

Initial recognition and subsequent measurement

The Group uses derivative financial instruments, such as interest rate swaps and call options, to hedge its interest rate risks and foreign currency risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to profit or loss, except for the effective portion of cash flow hedges, which is recognised in OCI and later reclassified to profit or loss when the hedge item affects profit or loss or treated as basis adjustment if a hedged forecast transaction subsequently results in the recognition of a non-financial asset or non-financial liability.

For the purpose of hedge accounting, hedges are classified as:

- Fair value hedges when hedging the exposure to changes in the fair value of a recognised asset or liability or an unrecognised firm commitment

- Cash flow hedges when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment

- Hedges of a net investment in a foreign operation

At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to which the Group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes the Group’s risk management objective and strategy for undertaking hedge, the hedging/ economic relationship, the hedged item or transaction, the nature of the risk being hedged, hedge ratio and how the entity will assess the effectiveness of changes in the hedging instrument’s fair value in offsetting the exposure to changes in the hedged item’s fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

Hedges that meet the strict criteria for hedge accounting are accounted for, as described below:

(i) Cash flow hedges

The effective portion of the gain or loss on the hedging instrument is recognised in OCI in the cash flow hedge reserve, while any ineffective portion is recognised immediately in the Statement of Profit and Loss.

The Group uses interest rate swaps and call options as hedges of its exposure to interest rate risks and foreign currency risks in the foreign currency loan. The ineffective portion relating to foreign currency loan is recognised in other income or expenses.

Amounts recognised as OCI are transferred to profit or loss when the hedged transaction affects profit or loss, such as when the hedged item affects the Statement of Profit and Loss or treated as basis adjustment if a hedged item subsequently results in recognition of a non-financial asset or liability.

If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover (as part of the hedging strategy), or if its designation as a hedge is revoked, or when the hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss previously recognised in OCI remains separately in equity until the forecast transaction occurs or the foreign currency firm commitment is met.

u) Cash and cash-equivalents

Cash and short-term deposits in the balance sheet comprise cash at banks and cash in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short term deposits, as defined above, net off bank overdrafts as they considered an integral part of the Group's cash management.

v) Measurement of EBITDA

The Group has elected to present earnings before interest, tax, depreciation and amortization (EBITDA) as a separate line item on the face of the Statement of Profit and Loss. The Group measure EBITDA on the basis of profit/ (loss) from continuing operations. In their measurement, the companies include interest income but do not include depreciation and amortization expense, finance costs and tax expense.

w) Events occurring after the Balance Sheet date

Impact of events occurring after the balance sheet date that provide additional information materially effecting the determination of the amounts relating to conditions existing at the balance sheet date are adjusted to respective assets and liabilities.

The Group does not adjust the amounts recognised in its consolidated financial statements to reflect non-adjusting events after the reporting period.

The Group makes disclosures in the consolidated financial statements in cases of significant events.

x) Contingent liabilities

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

y) Earnings per equity share

Basic earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Group by the weighted average number of equity shares outstanding during the period. Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Group by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issue data later date. Dilutive potential equity shares are determined independently for each period presented.

The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented for any share splits and bonus shares issues including for changes effected prior to the approval of the consolidated financial statements by the Board of Directors.

'The dilutive effect of outstanding options is reflected as additional share dilution in the computation of diluted earnings per share.

5 Changes in accounting policy and disclosures- New and amended standards

The Group applied Ind AS 115 for the first time. The nature and effect of the changes as a result of adoption of the new accounting standard are described below.
Several other amendments and interpretations apply for the first time in March 2019, but do not have an impact on the consolidated financial statements of the Group. The Group has not early adopted any standards or amendments that have been issued but are not yet effective.

a) Ind AS 115 Revenue from Contracts with Customers

Ind AS 115 was issued on 28 March 2018 and supersedes Ind AS 11 Construction Contracts and Ind AS 18 Revenue and it applies, with limited exceptions, to all revenue arising from contracts with its customers. Ind AS 115 establishes a five-step model to account for revenue arising from contracts with customers and requires that revenue be recognised at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer.

Ind AS 115 requires entities to exercise judgement, taking into consideration all of the relevant facts and circumstances when applying each step of the model to contracts with their customers. The standard also specifies the accounting for the incremental costs of obtaining a contract and the costs directly related to fulfilling a contract. In addition, the standard requires extensive disclosures.

The Group adopted Ind AS 115 using the modified retrospective method of adoption with the date of initial application of 1 April 2018. Under this method, the standard can be applied either to all contracts at the date of initial application or only to contracts that are not completed at this date. The Group elected to apply the standard to all contracts that are not completed as at 1 April 2018.

The cumulative effect of initially applying Ind AS 115 is recognised at the date of initial application as an adjustment to the opening balance of retained earnings. Therefore, the comparative information was not restated and continues to be reported under Ind AS 11, Ind AS 18 and related Interpretations.

The effect of adopting Ind AS 115 as at 1 April 2018 was, as follows:

Particulars	Notes	Reference	(INR in Mn) Ind AS 115 impact as at 1 April 2018
Assets			
Non-current assets			
Property, plant and equipment	6	(a)	(118)
Other non-current assets	12	(a)	113
Current assets			
Other current assets	12	(a)	5
Equity			
Other equity			
Retained earnings	18H	(a)	-

Set out below, are the amounts by which each consolidated financial statements line item is affected as at and for the period ended 31 March 2019 as a result of the adoption of Ind AS 115. The adoption of Ind AS 115 did not have a material impact on OCI or the Company's operating, investing and financing cash flows. The first column shows amounts prepared under Ind AS 115 and the second column shows what the amounts would have been had Ind AS 115 not been adopted:

Statement of profit or loss
Consolidated Statement of Profit and Loss for the year ended 31 March 2019

(INR in Mn)

Particulars	Reference	Ind AS 115	Ind AS 18	Increase/ (decrease)
Revenue from contracts with customers	(a)	43,144	43,152	(8)

Trade receivables				
Trade receivables	15	19,276	15,787	3,489

(a) Ind AS 115 impact - Consideration payable to customer
As per Power Purchase Agreement, there was an amount which was required to be paid to the customer in case of delay in commercial operation date. Such amount paid was capitalised as part of project cost before the application of Ind AS 115.

Amount paid to customer is in preview of guidance given under Consideration payable to customer under Ind AS 115, accordingly any amount paid to customer is to be reduced from the transaction price and, therefore, of revenue. As the Power Purchase agreement is for 25 years the said amount paid to the customer is to be regarded as deferred expenditure and subsequently needs to be adjusted with revenue over the period of agreement.

b) Standards issued but not yet effective
Ind AS 116 Leases:

Ind AS 116 Leases was notified in March, 2019 and it replaces Ind AS 17 Leases, including appendices thereto. Ind AS 116 is effective for annual periods beginning on or after 1 April, 2019. Ind AS 116 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under Ind AS 17. The standard includes two recognition exemptions for lessees – leases of 'low-value' assets (e.g., personal computers) and short-term leases (i.e., leases with a lease term of 12 months or less). At the commencement date of a lease, a lessee will recognise a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use asset). Lessees will be required to separately recognise the interest expense on the lease liability and the depreciation expense on the right-of-use asset.

Lessees will be also required to remeasure the lease liability upon the occurrence of certain events (e.g., a change in the lease term, a change in future lease payments resulting from a change in an index or rate used to determine those payments). The lessee will generally recognise the amount of the remeasurement of the lease liability as an adjustment to the right-of-use asset.

Lessor accounting under Ind AS 116 is substantially unchanged from today's accounting under Ind AS 17. Lessors will continue to classify all leases using the same classification principle as in Ind AS 17 and distinguish between two types of leases: operating and finance leases.

The Company has identified amortisation of leasehold land, rent expense and employee car lease expense as the area having potential impact.

The Company is evaluating the requirements of the new standard and the effect on the financial statements is being evaluated, thus impact is not known.

#The title represented by sale deeds in respect of land amounting to INR 634 (31 March 2018 INR 1,401) is not yet in the name of the Group. Further, the title of land amounting to INR 571 (31 March 2018 INR 1,344) is held by way of General Power of Attorney (GPA) and the Group is in the process of getting title transferred in its name.

Mortgage and hypothecation on Property, plant & equipment:

Property, plant & equipment are subject to a pari passu first charge to respective lenders for project term loans, buyer's/suppliers credit, senior secured notes, working capital loan, debentures and acceptances as disclosed in note 19 and note 23.

^ Capitalised borrowing costs
The amount of borrowing costs capitalised in Property, plant and equipment and capital work in progress during the year ended 31 March 2019 was INR 1,433 (31 March 2018 INR 505). The rate used to determine the amount of borrowing costs eligible for capitalisation was the effective interest rate of the specific borrowing.

***Adjustments to Property, Plant & Equipments during the year are as follows**

Freehold land
Adjustment of INR 57 (31 March 2018: INR 51) pertains to actualisation of provisional capitalization.

Plant and equipments
Adjustment of INR Nil (31 March 2018: INR 45) pertains to revision of agreement and discount received from vendor.
Adjustment of INR 107 (31 March 2018: INR 121) pertains to actualisation of provisional capitalization of supply of goods and services and early closure of letter of credits.
Adjustment of INR 118 (31 March 2018: INR Nil) pertains to impact of first time adoption of Ind AS 115 - Revenue from contracts with customers, using modified retrospective approach. (refer note 5(a))

Capital work in progress
Capital work in progress amounting to INR Nil (31 March 2018: INR 83) has been written off to the extent of non-viability of recovery of cost in future.
Adjustment of INR 38 (31 March 2018: INR 14) during the year pertains to actualisation of provisional capitalization.

Depreciation
Adjustment of INR 2 (31 March 2018: INR Nil) pertains to impact taken due to first time adoption of Ind AS 115 - Revenue from contracts with customers.
Adjustment of INR 2 (31 March 2018: INR Nil) pertains to actualisation of provisional capitalization.

**** Disposals in Capital Work in Progress includes following**
Amounting to INR 152 (31 March 2018: INR Nil) has been written off to the extent of non-viability of recovery of cost in future.
During the year ended 31 March 2018 persuant to downsizing of the contract with vendor for Mandsaur project, Group has sold back project specific wind power plant related equipment lying in CWIP for INR 181 to the vendor.

Impairment of Goodwill:

The Group undertook the impairment testing of Goodwill assigned to each Cash Generating Unit (CGU) as at 31 March 2019 applying value in use approach across all the CGUs i.e. using cash flow projections based on financial budgets covering contracted power sale agreements with procurers (25 years) using a discount rate of 9.68 % per annum. The Group has used financial projections upto 25 years as the tariff rates are fixed as per PPA.

Based on the results of the Goodwill impairment test, the estimated value in use of CGU after adjusting the carrying values of property, plant and equipment's and intangible assets was more than carrying value of Goodwill by INR 6,992 and accordingly no impairment loss provision has been recognized in the Statement of Profit and Loss.

The Management believes that any reasonably possible change in the key assumptions on which value in use is based would not cause the aggregate carrying amount of Goodwill to exceed the aggregate value in use of CGU.

The key assumptions used in the value in use calculations for the power cash-generating unit are as follows:

(i) Discount Rate	9.68 % Post-Tax Discount rate has been derived based on current cost of borrowing and equity rate of return based on the current market expectations.
(ii) Plant load factor (PLF)	Plant load factor for future periods are estimated for each CGU based on report from expert.

(iii) GBI benefit in acquired projects located in Andhra Pradesh state will be realised as per the projections and would not be impacted by the ongoing legal proceedings as mentioned in Note 52.

Breakeven sensitivity:

Plant load factor (PLF)	If reduced by 6.987%
Weighted Average Cost of Capital (WACC):	10.64%

Effect of dilution		
Convertible equity for employee stock option plan	6,007,022	6,744,114
Weighted average number of equity shares in calculating diluted EPS	385,804,858	346,071,290

37 Gratuity and other post-employment benefit plans

Retirement benefit in the form of provident fund is a defined contribution scheme. The contributions to the provident fund are charged to the statement of profit and loss for the year when the contributions are due. The Group has no obligation, other than the contribution payable to the provident fund.

The Group has a defined benefit gratuity plan. Gratuity is computed as 15 days salary, for every completed year of service or part thereof in excess of 6 months and is payable on retirement/termination/resignation. The benefit vests on the employees after completion of 5 years of service. The Gratuity liability has not been externally funded. Group makes provision of such gratuity liability in the books of accounts on the basis of actuarial valuation as per the projected unit credit method.

The following tables summarize the components of net benefit expense recognized in the statement of profit and loss and the unfunded status and amounts recognized in the balance sheet for the Gratuity.

Statement of profit and loss

Net employees benefit expense recognised in employee cost	**31 March 2019**	**31 March 2018**
Current service cost	25	21
Interest cost on benefit obligation	5	2
Net benefit expense*	**30**	**23**
Net expense/(income) recognised in other comprehensive income	14	(1)

Balance sheet

Benefit liability	**31 March 2019**	**31 March 2018**
Present value of unfunded obligation	75	53
Net liability	75	53

	31 March 2019	**31 March 2018**
Changes in the present value of the defined benefit obligation		
Opening defined benefit obligation	53	26
Current service cost	25	21
Interest cost	5	2
Benefits paid	(0)	(1)
Remeasurements during the year due to:		
- Experience adjustments	(14)	2
- Change in financial assumptions	-	(2)
- Change in demographic assumptions	(0)	-
Liabilities net of planned assets assumed under business combination	-	5
Assets extinguished on curtailments/settlements	6	-
Closing defined benefit obligation	75	53

Since the entire amount of plan obligation is unfunded therefore changes in fair value of plan assets, categories of plan assets as a percentage of the fair value of total plan assets and Group's expected contribution to the plan assets for the next year is not given.

* This amount is inclusive of amount capitalised in different projects.

The principal assumptions used in determining gratuity obligations	**31 March 2019**	**31 March 2018**
Discount rate	7.75%	7.75%
Salary escalation	10.00%	10.00%

The estimates of future salary increases considered in actuarial valuation take account of inflation, total amount of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

The Group regularly assesses these assumptions with the projected long-term plans and prevalent industry standards. The impact of sensitivity due to changes in the significant actuarial assumptions on the defined benefit obligations is given in the table below:

Particulars	**Change in assumptions**	**31 March 2019**	**31 March 2018**
Discount rate	+ 0.5%	66	45
	- 0.5%	76	51
Salary escalation	+ 0.5%	74	50
	- 0.5%	67	46

The sensitivity analysis above has been determined based on a method that extrapolates the impact on defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting period.

Projected plan cash flow:

The table below shows the expected cash flow profile of the benefits to be paid to the current membership of the plan based on past service of the employees as at the valuation

Maturity Profile	**31 March 2019**	**31 March 2018**
Within next 12 months	2	2
From 2 to 5 years	20	14
From 6 to 9 years	84	34
10 years and beyond	181	128

The weighted average duration to the payment of these cash flows is 10.58 years (31 March 2018: 10.90 years).

Risk analysis
The Group is exposed to a number of risks in the defined benefit plans. Most significant risks pertaining to defined benefits plans and management estimation of the impact of these risks are as follows:

· Inflation risk: Currently the Group has not funded the defined benefit plans. Therefore, the Group will have to bear the entire increase in liability on account of inflation.

· Longevity risk/life expectancy: The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and at the end of the employment. An increase in the life expectancy of the plan participants will increase the plan liability.

· Salary growth risk: The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. An increase in the salary of the plan participants will increase the plan liability.

Defined contribution plan:	**31 March 2019**	**31 March 2018**
Contribution to provident fund & other fund charged to statement of profit & loss*	70	52

*This amount is inclusive of amount capitalized in different projects.

38 Operating lease commitments

The Group has entered into commercial property lease for its offices. The lease have non-cancellable commitment year which has remaining term of 5 years. The Company has the option, under some of its leases, to lease the assets for additional terms of upto three years.

Future minimum rentals payables under non- cancellable operating lease (excluding lease equalisation reserve) are as follows

Particulars	**For the year ended 31 March 2019**	**For the year ended 31 March 2018**
Within one year	110	110
After one year but not more than five years	330	441

------------------------------------This space has been left blank intentionally--

39 Share Based Payment

The Group has five share-based payment schemes for its employees:
2018 Stock Option Plan, 2017 Stock Option Plan, 2016 Stock Option Plan, 2014 Stock Option Plan and 2011 Stock Option Plan ('Group Stock Option Plans') approved by the board. According to the ESOP schemes, the employee selected by the compensation committee from time to time will be entitled to options as per grant letter issued by the committee, subject to satisfaction of prescribed vesting conditions.

The relevant terms of the ESOP schemes are as below:

Plans	**2018 Stock Option Plan**	**2017 Stock Option Plan**	**2016 Stock Option Plan**	**2014 Stock Option Plan**	**2011 Stock Option Plan**
Grant Date	Multiple	Multiple	Multiple	Multiple	Multiple
Vesting period	**Time Linked Vesting**: 50 % of grants will vest in 5 years as follows: i) One year from the date of grant, the Options for the first four quarters shall vest immediately. ii) Thereafter, vesting will continue on a quarterly basis for the unvested Options. Remaining 50% will vest at the end of 5 years from the date of grant.	**Time Linked Vesting:** 50 % of grants will vest in 5 years as follows: i) One year from the date of grant, the Options for the first four quarters shall vest immediately. ii) Thereafter, vesting will continue on a quarterly basis for the unvested Options. Remaining 50% will vest at the end of 5 years from the date of grant.	**Time Linked Vesting:** 5 years on quarterly basis effective from December 1, 2015 on completion of one year from the date of grant, the Options for the first seven quarters shall vest immediately. Thereafter, vesting will continue on quarterly basis for the unvested Options commencing from December 1, 2017. **Performance linked vesting:** The Options shall vest annually and shall be prorated over a period of 3 years from the date of grant and shall be subject to the EBITDA achieved by the Company for the last completed financial year. The vesting of the Options shall take place at the end of the first anniversary of the date of grant ("Vesting Date") and thereafter on March 31, 2018 and March 31, 2019 or at a later date when the audited financial statements of the Company are available.	**Time Linked Vesting:** 5 years on quarterly basis which shall commence one year after the date of grant of option	**Time Linked Vesting:** 5 years from the grant date
Exercise period	Within 10 years from date of grant upon vesting	Within 10 years from date of grant upon vesting	Within 10 years from date of grant upon vesting	Within 10 years from date of grant upon vesting	Within 10 years from date of grant upon vesting
Exercise price	INR 415	INR 340	INR 205	INR 100 or 131	INR 100
Settlement type	Equity Settled	Equity Settled	Equity Settled	Equity Settled	Equity Settled

The details of options outstanding under the ESOP schemes are summarized below:

Particulars	**Number of options (in million)**	
	2018-19	**2017-18**
Outstanding at the beginning of the year	21	11
Granted during the year*	1	10
Forfeited during the year	0	0
Repurchase during the year	-	0
Exercised during the year	3	0
Outstanding at the end of the year	19	21
Exercisable at the end of the year	9	18

- The weighted average exercise price of these options outstanding was INR 258 for the period ended 31 March 2019 (31 March 2018: INR 246).
- The weighted average exercise price of these options granted during the year was INR 415 for the period ended 31 March 2019 (31 March 2018: INR 340)
- The weighted average exercise price of these options exercised during the period was INR 205 for the period ended 31 March 2019 (31 March 2018: INR 100).
- The weighted average exercise price of these options forfeited/repurchased during the period was INR 290 for the period ended 31 March 2019 (31 March 2018 INR. 226).

Particulars	**2018-19**	**2017-18**
Dividend yield (%)	1.5%	1.5%
Expected volatility (%)	15%	15%
Risk–free interest rate (%)	7.70% - 8.12%	6.64% - 6.96%
Weighted average remaining contractual life	6.86 years	7.85 years

The fair value of share options granted is estimated at the date of grant using an appropriate valuation model, taking into account the terms and conditions upon which the share options were granted.

40 The Group, in addition to the Parent Company, comprises of the following entities:

The group has evaluated that it has ability to use its power over the entities which entitile group to exposure/rights to variable returns, hence these have been accounted as subsidiaries in these consolidated financial statements of the group.

# These entities are under joint control and have been accounted for as equity method .

41 Related party disclosure

Names of related parties and related party relationship:

The names of related parties where control exists and / or with whom transactions have taken place during the year and description of relationship as identified by the management are:-

I. Holding Company

GS Wyvern Holdings Limited (upto 22 March 2018)

II. Key management personnel or relatives of key management personnel:

Mr. Sumant Sinha, Chairman and Managing Director
Mr. Ravi Seth, Chief Financial Officer
Mr. Parag Sharma, Chief Operating Officer and head of solar business
Mr. Balram Mehta, President of wind business
Mr. Ravi Parmeshwar, Chief Human Resource Officer
Mr. Ashish Jain, Company Secretary and Compliance Officer
Mrs. Vaishali Nigam Sinha, CSR and Communication Officer

III. Enterprise owned or significantly influenced by key management personnel or their relatives:

Cognisa Investment
Wisemore Advisory Private Limited
ReNew Foundation

IV. Enterprise under joint control:

Prathamesh Solarfarms Limited (upto 30 January 2019)
Heramba Renewables Limited
Aalok Solarfarms Limited
Shreyas Solarfarms Limited
Abha Solarfarms Limited

V. Remuneration to key managerial personnel (KMP):

	For the year ended	
	31-Mar-19	**31-Mar-18**
Mr. Sumant Sinha	302	415
Mr. Ravi Seth (designated as KMP on 26 April 2018)	42	-
Mr. Parag Sharma (designated as KMP on 16 July 2018)	37	-
Mr. Balram Mehta (designated as KMP on 16 July 2018)	37	-
Mr. Ravi Parmeshwar (designated as KMP on 16 July 2018)	19	-
Mr. Ashish Jain (designated as KMP on 16 July 2018)	6	-

Above remuneration includes share based payment of INR 241 (31 March 2018: INR 403) and gratuity and leave encashment expense of INR 17 (31 March 2018: INR 16)

VI. Remuneration to the relatives of key managerial personnel (KMP):

	For the year ended	
	31-Mar-19	**31-Mar-18**
Mrs. Vaishali Nigam Sinha (designated as KMP on 24 April 2018)	13	-

Above remuneration includes share based payment of INR 2 (31 March 2018: INR Nil) and gratuity expense of INR 1 (31 March 2018: INR Nil)

VII. Transactions and balances with enterprises under joint control:

43 Fair values

Set out below, is a comparison by class of the carrying amounts and fair value of the financial instruments of the group, other than those with carrying amounts that are reasonable approximations of fair values:

	31 March 2019		31 March 2018	
	Carrying value	**Fair value**	**Carrying value**	**Fair value**
Financial assets				
Security deposits	92	92	96	96
Bank deposits with remaining maturity for more than twelve months	92	92	2,533	2,533
Investments-non current, unquoted debt securities	408	408	643	643
Investments-current, quoted mutual funds	-	-	9,269	9,269
Derivative instruments	774	774	75	75
Trade receivables	19,276	19,276	6,701	6,701
Cash and cash equivalent	10,115	10,115	13,914	13,914
Bank balances other than cash and cash equivalent	15,385	15,385	10,322	10,322
Advances recoverable	221	221	586	586
Unbilled revenue	-	-	2,950	2,950
Interest accrued on fixed deposits	396	396	248	248
Government grant receivable	1,428	1,428	940	940
Loans to related parties	5	5	(0)	(0)
Recoverable from related parties	14	14	0	0
Other current financial assets	92	92	31	31
Financial liabilities				
Non Convertible Debentures	63,194	63,194	63,186	63,186
Term loan from bank	84,739	84,739	45,514	45,514
Term loan from financial institutions	49,674	49,674	64,020	64,020
Compulsorily convertible debentures	692	692	638	638
Acceptances	4,904	4,904	-	-
Buyer's / Supplier's credit	4,269	4,269	13,961	13,961
Senior secured notes	61,855	61,855	31,766	31,766
Derivative instruments	895	895	931	931
Interest accrued but not due on borrowings	1,319	1,319	1,080	1,080
Interest accrued but not due on debentures	448	448	440	440
Capital creditors	13,109	13,109	15,616	15,616
Purchase consideration payable	1,019	1,019	1,877	1,877
Other payables	40	40	-	-
Short-term borrowings	20,657	20,657	19,365	19,365
Trade payables	3,029	3,029	2,735	2,735

The management of the group assessed that current investments, cash and cash equivalents, trade receivables, trade payables, short term borrowings, other current financials liabilities and other current financial assets approximate their carrying amounts largely due to the short-term maturities of these instruments.

The following methods and assumptions were used to estimate the fair

i The fair values of the group’s term loans from banks and financial institutions including current maturities are determined by using Discounted Cash Flow (DCF) method using discount rate that reflects the issuer’s borrowing rate as at the end of the reporting year. The own non-performance risk as at 31 March 2019 was assessed to be insignificant.

ii The fair value of unquoted instruments, such as liability component of compulsorily convertible debentures, senior secured notes and unlisted non convertible debentures are estimated by discounting future cash flows using effective interest rate, credit risk and remaining maturity.

iii The Group enter into derivative financial instruments with various counterparties, principally financial institutions with investment grade credit ratings. Cross currency interest rate swaps are valued using valuation techniques, which employs the use of market observable inputs. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates, yield curves of the currency, interest rate curves and forward rate curves of the underlying instrument. The changes in counterparty credit risk had no material effect on the hedge effectiveness assessment for derivatives designated in hedge relationships.

44 Fair value hierarchy

The Group categorizes assets and liabilities measured at fair value into one of three levels depending on the ability to observe inputs employed in their measurement which are described as follows:
i) Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
ii) Level 2 - Inputs are inputs that are observable, either directly or indirectly, other than quoted prices included within level 1 for the asset or liability.
iii) Level 3 - Inputs are unobservable inputs for the asset or liability reflecting significant modifications to observable related market data or Group’s assumptions about pricing by market participants.

The following table provides the fair value measurement hierarchy of the assets and liabilities of the group :-

Quantitative disclosures fair value measurement hierarchy for assets/liabilities as at year end:

		31 March 2019		31 March 2018	
	Level of fair value measurement	Carrying value	Fair value	Carrying value	Fair value
Financial assets measured at fair value through profit & loss					
Financial Assets (Current)					
Investments	Level 1	-	-	**9,269**	**9,269**
Financial assets measured at amortised cost

45 Financial Risk Management objectives and policies

The financial liabilities comprise loans and borrowings, derivative liabilities, trade payable and other financial liabilities.
The main purpose of these financial liabilities is to finance the Group's operations. The Group's principal financial assets include loans, derivative assets, trade receivables, cash and cash equivalents and other financial assets. The Group is exposed to market risk, credit risk and liquidity risk. The Group's senior management oversees the management of these risks. The Company's senior management is supported by a various sub committees that advises on financial risks and the appropriate financial risk governance framework for the Company. These committees provides assurance to the Company's senior management that the Company's financial risk activities are governed by appropriate policies and procedure and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below:

Market Risk

Market risk is the risk that the Group's assets and liabilities will be exposed to due to a change in market prices that determine the valuation of these financial instruments. Market risk comprises 3 types of risk: interest rate risk, currency risk and other price risk. Financial instruments affected by market risk include loans and borrowings, deposits and derivative financial instruments.

The sensitivity analyses in the following sections relate to the position as at 31 March 2019 and 31 March 2018. The sensitivity analyses have been prepared on the basis that the amount of net debt, the ratio of fixed to floating interest rates of the debt and derivatives and the proportion of financial instruments in foreign currencies are all constant and on the basis of hedge designations in place as at 31 March 2019.

Interest rate Risk:

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group is exposed to interest rate risk primarily from the external borrowings that are used to finance their operations. In case of external commercial borrowings ("ECB") and buyers credit the Group believes that the exposure of Group to changes in market interest rates is insignificant as the respective companies manage the risk by hedging the changes in the market interest rates through cross currency interest rate swaps. The Group also monitors the changes in interest rates and actively re finances its debt obligations to achieve an optimal interest rate exposure.

Interest Rate Sensitivity

The following table demonstrates the sensitivity to a reasonable possible change in interest rates on financial liabilities, i.e. floating interest rate borrowings in INR and USD. Interest rate sensitivity has been calculated for borrowings with floating rate of Interest. For borrowings with fixed rate of interest sensitivity disclosure has not been made. With all other variables held constant, the Group's profit before tax is affected through the impact on financial liabilities, as follows:

	31 March 2019		**31 March 2018**	
	Increase/decrease in basis points	**Effect on profit before tax**	**Increase/decrease in basis points**	**Effect on profit before tax**
INR	+/(-)50	(-)/+499	+/(-)50	(-)/+196.24
US dollar	+/(-)60	(-)/+3	+/(-)60	(-)/+2.00

	31 March 2019		**31 March 2018**	
	Increase/decrease in basis points	**Effect on equity**	**Increase/decrease in basis points**	**Effect on equity**
INR	+/(-)50	(-)/+228	+/(-)50	(-)/+156.37
US dollar	+/(-)60	(-)/+1	+/(-)60	(-)/+2.00

The assumed movement in basis points for the interest rate sensitivity analysis is based on the currently observable market environment. Though there is exposure on account of Interest rate movement as shown above but the Group minimises the foreign currency (US dollar) interest rate exposure through derivatives and INR interest rate exposure through re-financing.

Foreign Currency Risk:

Foreign Currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Group is exposed to foreign currency risk arising from imports of goods in US dollars. The Group hedges its exposure to fluctuations on the translation into INR of its buyer's/supplier's credit by using foreign currency swaps and forward contracts. The Group has followed a conservative approach for hedging the foreign currency risk so as to not use complex forex derivatives. The Group also monitors that the hedges do not exceed the underlying foreign currency exposure. The Group does not undertake any speculative transaction.

Foreign currency sensitivity

The following tables demonstrate the sensitivity to a reasonably possible change in USD and INR exchange rates, with all other variables held constant. The impact on the group’s profit before tax is due to changes in the fair value of monetary liabilities comprising of buyer's/supplier's credit in US dollars. The impact on the group's pre-tax equity is due to changes in the fair value of cross-currency interest-rate swaps (CCIRS) designated as cash flow hedges. The group’s exposure to foreign currency changes for all other currencies is not material.

		31 March 2019		**31 March 2018**
Change in USD rate	5%	-5%	5%	-5%
Effect on profit before tax	(23)	23	(22)	22

Credit Risk

Credit risk is the risk that the power procurer will not meet their obligations under a financial instrument or customer contract, leading to a financial loss. The Group is exposed to credit risk from their operating activities (primarily trade receivables) and from its financing activities but this credit risk exposure is insignificant given the fact that substantially whole of the revenues are from state utilities/government entities. The maximum credit exposure to credit risk for the components of the balance sheet at 31 March 2019, 31 March 2018 is the carrying amount of all the financial assets.

Further the group sought to reduce counterparty credit risk under long-term contracts in part by entering into power sales contracts with utilities or other customers of strong credit quality and we monitor their credit quality on an on going basis.
The maximum credit exposure to credit risk for the components of the balance sheet at 31 March 2019 and 31 March 2018 is the carrying amount of all the financial assets.

Trade Receivables

Customer credit risk is managed basis established policies of Group, procedures and controls relating to customer credit risk management. Outstanding customer receivables are regularly monitored. The Group does not hold collateral as security. The group has majorly state utilities/government entities as its customers with high credit worthiness and therefore the group does not see any significant risk related to credit.

The credit quality of the customers other than state utilities/government entities is evaluated based on their credit ratings and other publicly available data.

Financial instruments and credit risk

Credit risk from balances with banks is managed by Group's treasury department. Investments, in the form of fixed deposits, of surplus funds are made only with banks and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed on an annual basis by the Group, and may be updated throughout the year subject to approval of group's finance committee. The limits are set to minimize the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

Liquidity Risk

Liquidity risk is the risk that the Group will encounter in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The approach of the Group to manage liquidity is to ensure, as far as possible, that these will have sufficient liquidity to meet their respective liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risk damage to their reputation.

The Group assessed the concentration of risk with respect to refinancing its debt and concluded it to be low. The Group has access to a sufficient variety of sources of funding and debt maturing within 12 months can be rolled over with existing lenders.

The Group rely mainly on long-term debt obligations to fund their construction activities. To the extent available at acceptable terms, utilized non-recourse debt to fund a significant portion of the capital expenditures and investments required to construct and acquire our wind and solar power plants and related assets. The Group's non-recourse financing is designed to limit default risk and is a combination of fixed and variable interest rate instruments. In addition, the debt is typically denominated in the currency that matches the currency of the revenue expected to be generated from the benefiting project, thereby reducing currency risk. The majority of non-recourse debt is funded by banks and financial institutions, with debt capacity supplemented by unsecured loan from related party.

The table below summarizes the maturity profile of financial liabilities of group based on contractual undiscounted payments:

Year ended 31 March 2019	**On demand**	**Less than 3 months**	**3 to 12 months**	**1 to 5 years**	**> 5 years**	**Total**
Borrowings

46 Capital management

For the purpose of the capital management, capital includes issued equity capital, compulsorily convertible debentures, notes share premium and all other equity reserves attributable to the equity holders of the Group. The primary objective of the Group's management is to maximise the shareholder value.

The Group manage their capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants.

To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Group monitor capital using a gearing ratio, which is net debt divided by total capital plus net debt. The group includes within net debt, interest bearing loans and borrowings and other payables, less cash and short-term deposits.

The policy of the Group is to keep the gearing ratio of the power project to 3:1 during the construction phase and aim to enhance it to 4:1 post the construction phase. This is in line with the industry standard ratio. The current gearing ratios of the various projects in the Group is between 3:1 to 4:1.

In order to achieve this overall objective, the capital management of the Group, amongst other things, aims to ensure that they meet financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. There have been no breaches in the financial covenants of any interest-bearing loans and borrowing in the current period.

No changes were made in the objectives, policies or processes for managing capital during the period ended 31 March 2019.

47 Commitments Liabilities and Contingencies
(to the extent not provided for)

(i) Contingent liabilities

The Group has contingent liability of INR 327 (31 March 2018: 255) on account of demand received of safeguard duty under custom act (which is under litigalion).

(ii) Commitments:

Estimated amount of contracts remaining to be executed on capital account and not provided for

At 31 March 2019, the group has capital commitment (net of advances) pertaining to commissioning of wind & solar energy projects of INR 29,072 (31 March 2018: 26,112).

48 Details of dues to Micro, Small and Medium Enterprises as defined under the MSMED Act, 2006

Under the Micro, Small and Medium Enterprises Development Act, 2006, (MSMED) which came into force from 2 October 2006, certain disclosure are required to be made relating to Micro, Small and Medium Enterprises. On the basis of the information and records available with the management, there are no outstanding dues to the Micro, Small and Medium Enterprises development Act, 2006.

Particulars	As at 31 March 2019	As at 31 March 2018
The principal amount and the interest due thereon (to be shown separately) remaining unpaid to any supplier as at the end of each accounting year/period	4	Nil
The amount of interest paid by the buyer in terms of section 16, of the Micro Small and Medium Enterprise Development Act, 2006 along with the amounts of the payment made to the supplier beyond the appointed day during each accounting year/year	Nil	Nil
The amount of interest due and payable for the year of delay in making payment (which have been paid but beyond the appointed day during the year/year) but without adding the interest specified under Micro Small and Medium Enterprise Development Act, 2006.	Nil	Nil
The amount of interest accrued and remaining unpaid at the end of each accounting year/year; and	0	Nil
The amount of further interest remaining due and payable even in the succeeding years, until such date when the interest dues as above are actually paid to the small enterprise for the purpose of disallowance as a deductible expenditure under section 23 of the Micro Small and Medium Enterprise Development Act, 2006	Nil	Nil

49 Reconciling the amount of income recognised in the statement of profit and loss with the contracted price

Particulars	For the year ended 31 March 2019
Revenue as per contracted price	43,805
Adjustments	
Discounts and rebates	(323)
Operating charges	(330)
Consideration payable to customers	(8)
Revenue from contract with customers	**43,144**

50 Corporate social responsibility expenditure

As per Section 135 of the Companies Act, 2013, a company, meeting the applicability threshold, needs to spend at least 2% of its average net profit for the immediately preceding three financial years on corporate social responsibility (CSR) activities. The areas for CSR activities as follows :-

1) Sanitation & making available safe drinking water- Construction of toilets, Bore-well, well, Tube-well etc.
2) Empowering women through SHGs (self-help group) and creating income generation activities for the women like stitching and tailoring, goatery, backyard poultry etc.)
3) Ensuring environmental sustainability- animal welfare Plantation, environment awareness,
4) Animal Welfare-Animal health camp, Para -vet training
5) Education awareness, Remedial classes for weak students etc.
6) Health and Hygiene- Health camps in the community, cleanliness drive to create awareness.
7) Sports Training- Sports training camps in community
8) Education facility improvement- Construction of solar power plant in schools

A CSR committee has been formed by the respective Company as per the Act. The funds were utilised on above mentioned activities which are specified in Schedule VII of the Companies Act, 2013.

(a) Gross amount required to be spent by the group during the year is INR 46 (31 March 2018: INR 28).
(b) Amount spent during the year on:

List of CSR activities	In Cash	Yet to be paid	Total
Current year			
Construction / Acquisition of any asset	3	3	6
Other activities	31	16	47
Total	**34**	**19**	**53**
Previous year*			
Construction / Acquisition of any asset	-	-	-
Other activities	37	12	49
Total	**37**	**12**	**49**

* The amount yet to be paid in previous year has been subsequently paid in current year.

51 Hedging activities and derivatives

Derivatives designated as hedging instruments

The Group uses certain types of derivative financial instruments (viz. forwards contracts, swaps, call options, call spreads) to manage/mitigate their exposure to foreign exchange and interest risk. Further, the group designates such derivative financial instruments (or its components) as hedging instruments for hedging the exchange rate fluctuation and interest risk attributable to either a recognised item or a highly probable forecast transaction (‘Cash flow hedge’). The effective portion of changes in the fair value of derivative financial instruments (or its components) that are designated and qualify as cash flow hedges, are recognised in the other comprehensive income and held in Cash flow hedge reserve - a component of Equity. Any gains / (losses) relating to the ineffective portion, are recognised immediately in the statement of profit and loss within other income / other expenses. The amounts accumulated in Equity for highly probable forecast transaction are added to carrying value of non financial asset or non financial liability as basis adjustment, other amounts accumulated in Equity are re-classified to the statement of profit and loss in the periods when the hedged item affects profit / (loss).

At any point of time, when a forecast transaction is no longer expected to occur, the cumulative gains / (losses) that were reported in equity is immediately transferred to the statement of profit and loss within other income / other expenses.

Cash flow hedges

Hedge has been taken against exposure to foreign currency risk and variable interest outflow on external commercial borrowings, buyer’s credit, foreign letter of credits and highly probable forecast transactions. Terms of the derivative contracts and their respective impact on OCI and statement of profit and loss is as below:-

-Buyers credit
Pay fixed INR and receive USD and pay fixed interest at 6.55% to 7.85% p.a. and receive a variable interest at 1 month LIBOR plus 0.50% p.a. to 6 month LIBOR plus 1.11% p.a. on the notional amount.

-Loan
Pay fixed INR and receive USD and pay fixed interest at 8.67% to 10.23% p.a. and receive a variable interest at 3 month LIBOR plus 2.25% to 6 months LIBOR plus 3.05% p.a. on the notional amount.

-Notes
Pay fixed INR and receive USD and pay fixed interest in INR at 6.62% to 10.74% p.a. and receive a fixed interest in USD at 6.06% to 6.87% on the notional amount.

The cash flow hedges through CCS of USD 366,451,398, IRS of USD 17,830,203, Call Spread and COS of USD 299,304,936, Call Option of USD 96,496,003 and forwards of USD 500,769,043 and CNH 835,651,253 outstanding at the year ended 31 March 2019 were assessed to be highly effective and a mark to market loss of INR 705 (31 March 2018: INR 355) with a deferred tax asset of INR 181 (31 March 2018: INR 90), is included in OCI.

Foreign currency and Interest rate risk
Forward contracts, swaps, call option and call spread measured at fair value through OCI are designated as hedging instruments in cash flow hedges of interest and principal payments in USD/CNH.

	31 March 2019		31 March 2018	
	Assets	**Liabilities**	**Assets**	**Liabilities**
Derivative contracts designated as hedging instruments	774	895	75	931

Balance at the end (after non controlling interest)	(512)	(271)

52 Certain subsidiaries has entered into various Power Purchase Agreements (PPAs) with Southern Power Distribution Company of Andhra Pradesh Limited i.e. the distribution company of Andhra Pradesh (“APDISCOMS”). In terms of the Generation Based Incentive (“GBI”) scheme of the Ministry of Renewable Energy (“MNRE”), the Group accrues the income based on units of power supplied under the aforementioned PPAs. Andhra Pradesh Electricity Regulatory Commission (“APERC”) vide its order in July 2018 allowed APDISCOMS to interpret the Andhra Pradesh Electricity Regulatory Commission (Terms and Conditions for Tariff Determination for Wind Power Projects) Regulations, 2015 (“Regulations”) in a manner to treat GBI as a pass through in the tariff.

The respective Companies has filed a writ petition before the Andhra Pradesh High Court (“AP High Court”) challenging the vires of the regulation and the order passed by the APERC. Interim stay against the order of APERC has been granted by AP High Court in August 2018.

As at 31 March 2019 the cumulative amount on the above matter recoverable from the APDISCOMs against the said PPAs included in trade receivables amounts to INR 1,435. The management basis legal opinion obtained by it, believes that the GBI benefit is over and above the applicable tariffs and the APERC does not have jurisdiction to interfere with the intent of GBI scheme and therefore the outstanding amount is recoverable and hence no adjustment has been made in the financial statements in this regard.

53 Break up of investments in entities under control is as under -

Name of Companies	**Cost of acquisition**	**Fair value upliftment on account of business combination**	**Share in other comprehensive income of entities with joint control post acquisition**	**Carrying cost of investments**
Abha Solarfarms Limited				
As at 31 March 2019	89	64	(3)	85
As at 31 March 2018	*89*	*64*	*0*	*89*
Heramba Renewables Limited				
As at 31 March 2019	161	116	(4)	157
As at 31 March 2018	*161*	*116*	*0*	*161*
Aalok Solarfarms Limited				
As at 31 March 2019	88	64	(4)	84
As at 31 March 2018	*88*	*64*	*0*	*88*
Shreyas Solarfarms Limited				
As at 31 March 2019	170	123	(7)	163
As at 31 March 2018	*170*	*123*	*0*	*170*

54 Business combinations

The group have acquired unlisted companies based in India and carrying out business activities relating to generation of power through non-conventional and ReNewable energy sources, in exchange for cash consideration. The group acquired these entities because management believes that the acquisition would enable the group to strengthen its position in renewable energy sector.

Assets acquired and liabilities assumed
The fair values of the identifiable assets and liabilities as at the date of acquisition were:

Particulars	**For the year ended 31 March 2019**
	Prathamesh Solarfarms Limited
Acquisition date	**30 January 2019**
Segment	**Solar**
Assets	**INR**
Property plant and equipment	3,199
Intangibles (customer contracts)	88
Loans	573
Prepayments - non current	0
Other non-current assets	102
Trade receivables	339
Prepayments - current	1
Cash and cash equivalents	7
Others current financial assets	11
Other current assets	10
Deferred tax assets (net)	51
	4,382
Liabilities	
Long-term borrowings	3,255
Trade payables	30
Other current financial liabilities	221
Other current liabilities	2
	3,508
Total identifiable net assets at fair value	**873**
Goodwill on acquisition	428
Purchase consideration transferred	1,301

Goodwill recognised represents the future economic and synergy benefits arising from assets acquired to strengthen it's position in renewable energy sector. Goodwill is allocated entirely to the solar power plant. None of the goodwill recognised is expected to be deductible for income tax purposes.

The acquisition date fair value of the equity interest held by the Group immediately before the acquisition date was INR 314. The group has recognised INR 77 gain as a result of remeasurment to fair value the equity interest in the entity. The fair value gain has been included in Other income of the group. (refer note 30)

From the date of acquisition, acquired entity has contributed in revenue and profit/loss before tax follows:

Particulars	**From the date of acquisition till 31 March 2019**
	Prathamesh Solarfarms Limited
Revenue	168
Profit before tax	27

If the combination had taken place at the beginning of the year, revenue from operations and the loss before tax would have been:

Particulars	**For the year ended 31 March 2019**
	Prathamesh Solarfarms Limited
Revenue	607
Profit before tax	24

Particulars	**For the year ended 31 March 2018**		
	Zemira Renewable Private Limited	**Ostro Energy Private Limited**	**KCT Renewable Energy Private Limited**
Acquisition date	**31 March 2018**	**28 March 2018**	**15 November 2017**
Segment	**Wind**	**Wind & Solar**	**Wind**
Assets	**INR**	**INR**	**INR**
Property plant and equipment	3,562	45,796	7,018

Intangible assets under development	-	1,416	-
Capital work in progress	-	5,232	-
Loans	-	-	-
Deferred tax assets (net)	1	315	-
Prepayments - Non Current	-	696	-
Non-current investments	-	1,644	-
Other non-current financial assets	-	80	-
Other non-current assets	-	1,243	0
Current investments	-	4,332	193
Trade receivables	-	960	867
Prepayments - Current	-	204	10
Cash and cash equivalents	0	3,480	108
Bank balances other than cash and cash equivalent	-	970	-
Others current financial assets	4	416	19
Other current assets	-	209	29
	4,024	**88,522**	**10,357**
Liabilities			
Long-term borrowings	-	45,171	-
Short-term borrowings	2	480	-
Deferred tax liabilities (net)	-	4,997	478
Other non current liabilities	-	735	-
Trade payables	0	58	0
Other current financial liabilities	4,024	4,278	6,137
Other current liabilities	0	249	2
Short term Provisions	-	124	43
Long term Provisions	-	0	-
	4,025	**56,090**	**6,660**
Total identifiable net assets at fair value	**(2)**	**32,432**	**3,697**
Goodwill/(Bargain purchase) on acquisition	2	9,902	755
Purchase consideration transferred *	1	42,334	4,452

The deferred tax liability mainly comprises the tax effect of the accelerated depreciation for tax purposes of Property plant and equipment and Intangible Assets. Goodwill recognised represents the future economic and synergy benefits arising from assets acquired to strengthen it's position in renewable energy sector. Goodwill is allocated entirely to the wind and solar power plant. None of the goodwill recognised is expected to be deductible for income tax purposes.

* Purchase consideration related to Ostro Energy Private Limited acquisition includes contingent consideration amounting to INR 421, subject to realisation of outstanding trade receivables as on the date of acquisition and INR 1,300 subject to capitalisation of Kutch project. As on 31 March 2019, purchase consideration payable include INR 238 which are contingent on realisation of outstanding trade receivables. Management has estimated 100 % realisation of outstanding receivables. Hence, complete amount has been recognised as purchase consideration.

From the date of acquisition, acquired entitles have contributed in revenue and profit/loss before tax follows:

Particulars	**From the date of acquisition till 31 March 2018**		
	Zemira Renewable Private Limited	**Ostro Energy Private Limited**	**KCT Renewable Energy Private Limited**
Revenue	0	44	278
Profit/(loss) before tax	(0)	(7)	(106)

If the combination had taken place at the beginning of the year, revenue from operations and the loss before tax would have been:

Particulars	**For the year ended 31 March 2018**		
	Zemira Renewable Private Limited	**Ostro Energy Private Limited**	**KCT Renewable Energy Private Limited**
Revenue	5	6,358	1,228
Profit/(loss) before tax	(3)	29	339

55 Additional disclosure as required under Schedule III of Companies Act, 2013:

Name of the entity	As at 31 March 2019		For the year ended 31 March 2019

56 Significant accounting judgments, estimates and assumptions

The preparation of consolidated financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the accompanying disclosures. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

In the process of applying the accounting policies management has made certain judgments, estimates and assumptions. The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Group based their assumptions and estimates on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Group. Such changes are reflected in the assumptions when they occur.

A) Accounting Judgements:

Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgment is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

The Group makes various assumptions and estimates while computing deferred taxes which include production related data (PLFs), projected operations and maintenance costs, projected finance costs, proposed availment of deduction under section 80IA of the Income Tax Act, 1961 and the period over which such deduction shall be availed, usage of brought forward losses etc. While these assumptions are based on best available facts in the knowledge of management as on the balance sheet date however, they are subject to change year on year depending on the actual tax laws and other variables in the respective year. Given that the actual assumptions which would be used to file the return of income shall depend upon the tax laws prevailing in respective year, management shall continue to reassess these assumptions while calculating the deferred taxes on each balance sheet date and the impact due to such change, if any, is considered in the respective year.

Depreciation on property, plant and equipment

Depreciation on property, plant and equipment is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management. Considering the applicability of Schedule II of Companies Act, 2013, the management has re-estimated useful lives and residual values of all its property, plant and equipment. The management believes that depreciation rates currently used fairly reflect its estimate of the useful lives and residual values of property, plant and equipment, though these rates in certain cases are different from lives prescribed under Schedule II of the Companies Act, 2013.

Basis legal opinion obtained, management is of the view that application of CERC and/or SERC rates for the purpose of accounting for depreciation expenses is not mandatory. Hence, Group is depreciating the assets bases on life as determined by an expert.

B) Estimates and assumptions:

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values.

Assumptions include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 43 and 44 for further disclosures.

Related party transactions

Employee benefit costs and other common expenses are incurred by the Group. These expenses are allocated to all the entities of the Group in the form of 'Management Shared Services'. Allocation of cost to the entities involves various estimates including retention, allocation of cost for projects under construction vis-a-vis operating projects, profit mark-up which are assessed through an external expert.

Inter-group unsecured loan

The Group uses unsecured loans to fund requirements of various entities. These loans carry interest rate higher than a return expected from 3-year government bond yield.

Impairment of goodwill - The key assumptions used to determine the recoverable amount for the different CGUs are disclosed and further explained in Note 7.

57 The Company has received a show cause notice from Competition Commission of India (the “CCI”) dated 28 February 2019 under regulation 48 of the Competition Commission of India (General) Regulations, 2009 read with section 43A of the Competition Act, 2002 in relation to ReNew Power Group’s acquisition of Ostro Energy Private Limited in terms of regulation 8 of the Competition Commission of India (Procedure in regard to the transaction of business in relation to combinations) Regulations, 2011 (Combination Regulations).

The Company has filed a petition before CCI submitting that the acquisition was not required to be reported based on exemption available in act for “small target exemption”.

The Company believes that it has merits in its submission and impact if any, of the above mentioned show-cause notice is not likely to be material. Accordingly, no adjustment has been made to these Consolidated Financial Statements.

58 During the year, distribution companies of the state of Karnataka have issued demand notices to captive users (customers of the Group's subsidiaries) and to the respective captive plants hereinafter refer to as the "SPVs". These notice was issued seeking recovery of cross subsidy surcharge and differential between rate of electricity tax applicable to captive users and non-captive users on the ground that these captive users have not consumed the energy in proportion to their respective shareholding in the SPV, thereby violating Rule 3 of the Electricity Rules, 2005. The SPVs have filed a petition before the Karnataka Electricity Regulatory Commission (the "KERC") contesting these demands. KERC has granted interim relief and stayed the demand notice and disconnection by the distribution companies. The SPVSs have deposited a sum of INR 114, as per KERC order, against the total demand raised of INR 340 under protest on behalf of certain captive users. The amount thus paid under protest has been accounted for as recoverable and disclosed under head "Other current assets" in these financial statements.
The Group, based on legal advice obtained, believes that there are merits in its position and that the demand raised by distribution companies would be rescinded by KERC and hence no adjustment has been made in the financial statements in this regard.

59 During the year, certain subsidiaries reached settlement with some of their suppliers/contractors for compensation for loss of revenue on account of delay in commissioning of power projects. Resultantly, an amount of INR 379 (31 March 2018 : INR 338) towards Liquidated Damages ('LDs') has been recognized in the statement of profit and loss.

Since, the said LDs are directly linked to delay in creating profit making apparatus, the same has been considered as capital receipt and thus has not been included in Book Profit under section 115JB of the Income Tax Act, 1961. The same has also been supported by the opinion of the advisors of the group.

60 Absolute amounts less than INR 500,000 are appearing in the Consolidated Financial Statements as "0" due to presentation in millions.

Independent Auditor's Report

To the Members of ReNew Power Limited (formerly known as ReNew Power Ventures Limited and ReNew Power Ventures Private Limited)

Report on the Consolidated Ind AS Financial Statements

We have audited the accompanying consolidated Ind AS financial statements of ReNew Power Limited (hereinafter referred to as "the Holding Company"), its subsidiaries (the Holding Company and its subsidiaries together referred to as "the Group") and jointly controlled entities, comprising of the consolidated Balance Sheet as at 31 March 2018, the consolidated Statement of Profit and Loss including other comprehensive income, the consolidated Cash Flow Statement, the consolidated Statement of Changes in Equity for the year then ended, and a summary of significant accounting policies and other explanatory information (hereinafter referred to as "the consolidated Ind AS financial statements").

Management's responsibility for the Consolidated Ind AS Financial Statements

The Holding Company's Board of Directors is responsible for the preparation of these consolidated Ind AS financial statements in terms of the requirement of the Companies Act, 2013 ("the Act") that give a true and fair view of the consolidated financial position, consolidated financial performance including other comprehensive income, consolidated cash flows and consolidated statement of changes in equity of the Group including Jointly controlled entities in accordance with accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under Section 133 of the Act, read with the Companies (Indian Accounting Standard) Rules, 2015, as amended. The respective Board of Directors of the companies included in the Group and of its jointly controlled entities are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Group and of its jointly controlled entities and for preventing and detecting frauds and other irregularities; the selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated Ind AS financial statements by the Directors of the Holding Company, as aforesaid.

Auditor's responsibility

Our responsibility is to express an opinion on these consolidated Ind AS financial statements based on our audit. While conducting the audit, we have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder. We conducted our audit in accordance with the Standards on Auditing, issued by the Institute of Chartered Accountants of India, as specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Holding Company's preparation of the consolidated Ind AS financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by the Holding Company's Board of Directors, as well as evaluating the overall presentation of the consolidated financial statements. We believe that the audit evidence obtained by us and the audit evidence obtained by the other auditors in terms of their reports referred to in sub-paragraph (a) of the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the consolidated Ind AS financial statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us and based on the consideration of reports of other auditors on separate financial statements and on the other financial information of the subsidiaries, the aforesaid consolidated Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India of the consolidated state of affairs of the Group and jointly controlled entities as at 31 March 2018, their consolidated profit including other comprehensive income, their consolidated cash flows and consolidated statement of changes in equity for the year ended on that date.

Other Matter

We did not audit the financial statements and other financial information, in respect of 66 subsidiaries whose Ind AS financial statements include total assets of Rs 111,197 million and net assets of Rs 13,136 million as at 31 March 2018, and total revenues of Rs 19,396 million and net cash inflows of Rs 1,736 million for the year ended on that date. These financial statement and other financial information have been audited by other auditors, which financial statements, other financial information and auditor's reports have been furnished to us by the management. Our opinion on the consolidated Ind AS financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries and our report in terms of sub-sections (3) of Section 143 of the Act, in so far as it relates to the aforesaid subsidiaries is based solely on the reports of such other auditors.

Our opinion above on the consolidated Ind AS financial statements, and our report on other legal and regulatory requirements below, is not modified in respect of the above matter with respect to our reliance on the work done and the reports of the other auditors and the financial statements and other financial information certified by the Management.

Report on other legal and regulatory requirements

As required by section 143 (3) of the Act, based on our audit and on the consideration of report of the other auditors on separate financial statements and the other financial information of subsidiaries as noted in the 'other matter' paragraph, we report, to the extent applicable, that:

(a) We / the other auditors whose reports we have relied upon have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit of the aforesaid consolidated Ind AS financial statements;

(b) In our opinion proper books of account as required by law relating to preparation of the aforesaid consolidation of the financial statements have been kept so far as it appears from our examination of those books and reports of the other auditors;

(c) The consolidated Balance Sheet, consolidated Statement of Profit and Loss including the Statement of Other Comprehensive Income, the consolidated Cash Flow Statement and consolidated

Statement of Changes in Equity dealt with by this Report are in agreement with the books of account maintained for the purpose of preparation of the consolidated Ind AS financial statements;

(d) In our opinion, the aforesaid consolidated Ind AS financial statements comply with the Indian Accounting Standards specified under section 133 of the Act, read with Companies (Indian Accounting Standard) Rules, 2015, as amended;

(e) On the basis of the written representations received from the directors of the Holding Company as on 31 March 2018 taken on record by the Board of Directors of the Holding Company and the reports of the statutory auditors who are appointed under Section 139 of the Act, of its subsidiary companies and jointly controlled companies entities incorporated in India, none of the directors of the Group's companies and jointly controlled companies incorporated in India is disqualified as on 31 March 2018 from being appointed as a director in terms of Section 164 (2) of the Act;

(f) With respect to the adequacy and the operating effectiveness of the internal financial controls over financial reporting with reference to these consolidated Ind AS financial statements of the Holding Company, its subsidiary companies and jointly controlled entities incorporated in India, refer to our separate report in "Annexure 1" to this report;

(g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended, in our opinion and to the best of our information and according to the explanations given to us and based on the consideration of the report of the other auditors on separate financial statements as also the other financial information of the subsidiaries , as noted in the 'Other matter' paragraph:

i. The consolidated Ind AS financial statements disclose the impact of pending litigations on its consolidated financial position of the Group and jointly controlled entities – Refer Note 46 to the consolidated Ind AS financial statements;

ii. Provision has been made in the consolidated Ind AS financial statements, as required under the applicable law or accounting standards, for material foreseeable losses, if any, on long-term contracts including derivative contracts – Refer Note 50 to the consolidated Ind AS financial statements in respect of such items as it relates to the Group and jointly controlled entities;

iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Holding Company, its subsidiaries and jointly controlled entities incorporated in India during the year ended 31 March 2018.

Annexure to the Independent Auditor's Report of even date on the Consolidated Ind AS Financial Statements of ReNew Power Limited

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

In conjunction with our audit of the consolidated Ind AS financial statements of ReNew Power Limited as of and for the year ended 31 March 2018, we have audited the internal financial controls over financial reporting of ReNew Power Limited (hereinafter referred to as the "Holding Company"), its subsidiary companies and jointly controlled entities, which are companies incorporated in India, as of that date.

Management's responsibility for Internal Financial Controls

The respective Board of Directors of the Holding Company, its subsidiary companies and jointly controlled entities, which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Holding Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's responsibility

Our responsibility is to express an opinion on the company's internal financial controls over financial reporting with reference to these consolidated Ind AS financial statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, both, issued by Institute of Chartered Accountants of India, and deemed to be prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting with reference to these consolidated Ind AS financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls over financial reporting with reference to these consolidated Ind AS financial statements and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting with reference to these consolidated Ind AS financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditors in terms of their reports referred to in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls over financial reporting with reference to these consolidated Ind AS financial statements.

Meaning of Internal Financial Controls over Financial Reporting with reference to these Consolidated Ind AS Financial Statements

A company's internal financial control over financial reporting with reference to these consolidated Ind AS financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting with reference to these consolidated Ind AS financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent limitations of Internal Financial Controls over Financial Reporting with Reference to these Consolidated Ind AS Financial Statements

Because of the inherent limitations of internal financial controls over financial reporting with reference to these consolidated Ind AS financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting with reference to these consolidated Ind AS financial statements to future periods are subject to the risk that the internal financial control over financial reporting with reference to these consolidated Ind AS financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Holding Company, its subsidiary companies and jointly controlled entities, which are companies incorporated in India, have, maintained in all material respects, adequate internal financial controls over financial reporting with reference to these consolidated Ind AS financial statements and such internal financial controls over financial reporting with reference to these consolidated Ind AS financial statements were operating effectively as at 31 March 2018, based on the internal control over financial reporting criteria established by the Holding Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Other Matters

Our report under Section 143(3)(i) of the Act on the adequacy and operating effectiveness of the internal financial controls over financial reporting with reference to these consolidated Ind AS financial statements of the Holding Company, insofar as it relates to these 65 subsidiary companies, which are companies incorporated in India, is based on the corresponding reports of the auditors of such subsidiary incorporated in India.

1 General information

ReNew Power Limited (‘the Company’) (Formerly known as 'ReNew Power Private Limited' and 'ReNew Power Ventures Private Limited') is a public limited company domiciled in India. The Company was converted into a public company with effect from 17 April 2018 and consequently the name of the Company has changed from ReNew Power Private Limited to ReNew Power Limited.

The registered office of the Company is located at 138, Ansal Chamber - II Bikaji Cama Place, New Delhi-110066. The Parent and its subsidiaries (hereinafter collectively referred to as 'the Group') are carrying out business activities relating to generation of power through non-conventional and renewable energy sources.

The Consolidated Financial Statements of the Group were authorised for issue by the Group's Board of Directors on 16 July 2018.

2 Basis of preparation

The Consolidated Financial Statements are prepared in accordance with Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 read with the Companies (Indian Accounting Standards) Rules, 2015 as amended. The Consolidated Financial Statements have been prepared on accrual basis and under the historical cost convention issued thereunder and other accounting principles generally accepted in India.

These Consolidated Financial Statements have been prepared using presentation and disclosure requirements of the Schedule III of the Companies Act 2013.

The financial statements have been prepared on a historical cost basis, except for the following assets and liabilities which have been measured at fair value:

- Derivative financial instruments
- Financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments)

3 Principles of consolidation

The Consolidated Financial Statements comprise the financial statements of the Group as at 31 March 2018. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee
- Rights arising from other contractual arrangements
- The Group's voting rights and potential voting rights
- The size of the Group's holding of voting rights relative to the size and dispersion of the holdings of the other voting rights holders.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the Consolidated Financial Statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

Consolidated Financial Statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. If a member of the Group uses accounting policies other than those adopted in the Consolidated Financial Statements for like transactions and events in similar circumstances, appropriate adjustments are made to that Group member’s financial statements in preparing the Consolidated Financial Statements to ensure conformity with the Group’s accounting policies.

The financial statements of all entities used for the purpose of consolidation are drawn up to same reporting date as that of the parent Company, i.e., year ended on 31st March 2018. When the end of the reporting period of the parent is different from that of a subsidiary, the subsidiary prepares, for consolidation purposes, additional financial information as of the same date as the financial statements of the parent to enable the parent to consolidate the financial information of the subsidiary, unless it is impracticable to do so.

Consolidation procedure:

- Combine like items of assets, liabilities, equity, income, expenses and cash flows of the parent on line by line basis with those of its subsidiaries. For this purpose, income and expenses of the subsidiary are based on the amounts of the assets and liabilities recognised in the Consolidated Financial Statements at the acquisition date.

- Offset (eliminate) the carrying amount of the parent’s investment in each subsidiary and the parent’s portion of equity of each subsidiary. Business combinations policy explains how to account for any related goodwill.

- Eliminate in full intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the Group (profits or losses resulting from intragroup transactions that are recognised in assets, such as inventory and fixed assets, are eliminated in full). Intragroup losses may indicate an impairment that requires recognition in the Consolidated Financial Statements. Ind AS 12 Income Taxes applies to temporary differences that arise from the elimination of profits and losses resulting from intragroup transactions.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.
If the Group loses control over a subsidiary, it:

- Derecognises the assets (including goodwill) and liabilities of the subsidiary
- Derecognises the carrying amount of any non-controlling interests
- Derecognises the cumulative translation differences recorded in equity
- Recognises the fair value of the consideration received
- Recognises the fair value of any investment retained
- Recognises any surplus or deficit in profit or loss
- Reclassifies the parent's share of components previously recognised in OCI to profit or loss or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities.

Investments accounted for using the equity method.
An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

The considerations made in determining whether significant influence or joint control are similar to those necessary to determine control over the subsidiaries

The Group's investments in its associate and joint venture are accounted for using the equity method. Under the equity method, the investment in an associate or a joint venture is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets of the associate or joint venture since the acquisition date. Goodwill relating to the associate or joint venture is included in the carrying amount of the investment and is not tested for impairment individually.

The statement of profit and loss reflects the Group's share of the results of operations of the associate or joint venture. Any change in OCI of those investees is presented as part of the Group's OCI. In addition, when there has been a change recognised directly in the equity of the associate or joint venture, the Group recognises its share of any changes, when applicable, in the statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and the associate or joint venture are eliminated to the extent of the interest in the associate or joint venture.

If an entity's share of losses of an associate or a joint venture equals or exceeds its interest in the associate or joint venture (which includes any long term interest that, in substance, form part of the Group's net investment in the associate or joint venture), the entity discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate or joint venture. If the associate or joint venture subsequently reports profits, the entity resumes recognising its share of those profits only after its share of the profits equals the share of losses not recognised.

The aggregate of the Group's share of profit or loss of an associate and a joint venture is shown on the face of the statement of profit and loss.
The financial statements of the associate or joint venture are prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

After application of the equity method, the Group determines whether it is necessary to recognise an impairment loss on its investment in its associate or joint venture. At each reporting date, the Group determines whether there is objective evidence that the investment in the associate or joint venture is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate or joint venture and its carrying value, and then recognises the loss as 'Share of profit of an associate and a joint venture' in the statement of profit or loss.
Upon loss of significant influence over the associate or joint control over the joint venture, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate or joint venture upon loss of significant influence or joint control and the fair value of the retained investment and proceeds from disposal is recognised in profit or loss

4 Summary of Significant Accounting Policies

a) Business Combinations and goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred measured at acquisition date fair value and the amount of any non-controlling interests in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their acquisition date fair values. For this purpose, the liabilities assumed include contingent liabilities representing present obligation and they are measured at their acquisition fair values irrespective of the fact that outflow of resources embodying economic benefits is not probable. However, the following assets and liabilities acquired in a business combination are measured at the basis indicated below:

- Deferred tax assets or liabilities and the assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with Ind AS 12 Income Tax and Ind AS 19 Employee Benefits respectively.
- Liabilities or equity instruments related to share based payment arrangements of the acquiree or share – based payments arrangements of the Group entered into to replace share-based payment arrangements of the acquiree are measured in accordance with Ind AS 102 Share-based Payments at the acquisition date.
- Assets (or disposal groups) that are classified as held for sale in accordance with Ind AS 105 Non-current Assets Held for Sale and Discontinued Operations are measured in accordance with that standard.
- Reacquired rights are measured at a value determined on the basis of the remaining contractual term of the related contract. Such valuation does not consider potential renewal of the reacquired right.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

If the business combination is achieved in stages, any previously held equity interest is re-measured at its acquisition date fair value and any resulting gain or loss is recognised in profit or loss or OCI, as appropriate.

Any contingent consideration to be transferred by the acquirer is recognised at fair value at the acquisition date. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of Ind AS 109 Financial Instruments, is measured at fair value with changes in fair value recognised in profit or loss. If the contingent consideration is not within the scope of Ind AS 109, it is measured in accordance with the appropriate Ind AS. Contingent consideration that is classified as equity is not re-measured at subsequent reporting dates and subsequent its settlement is accounted for within equity.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests, and any previous interest held, over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in OCI and accumulated in equity as capital reserve. However, if there is no clear evidence of bargain purchase, the entity recognises the gain directly in equity as capital reserve, without routing the same through OCI.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group’s cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

A cash generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

Where goodwill has been allocated to a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted through goodwill during the measurement period, or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognized at that date. These adjustments are called as measurement period adjustments. The measurement period does not exceed one year from the acquisition date.

b) Current versus non-current classification

The Group presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it is:

- Expected to be realised or intended to sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is treated as current when it is:

- Expected to be settled in normal operating cycle
- Held primarily for the purpose of trading
- Due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets/liabilities are classified as non-current assets/liabilities.
The operating cycle is the time between the acquisition of assets for processing and their realisation/settlement in cash and cash equivalents. The Group has identified twelve months as their operating cycle for classification of their current assets and liabilities.

c) Customer contracts

Customer related intangibles are capitalized if they meet the definitions of an intangible asset and the recognition criteria are satisfied. Customer-related intangibles acquired as part of a business combination are valued at fair value and those acquired separately are measured at cost. Such intangibles are amortized over the remaining useful life of the customer relationships or the period of the contractual arrangements.

d) Fair value measurement

The Group measures financial instruments, such as, derivatives at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The fair value measurement of a non-financial asset takes into account a market participant’s ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy. (Refer Note 42 and 43)

At each reporting date, the management of the Group analyses the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the accounting policies of the Group.

For assets and liabilities that are recognised in the Financial Statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

This note summarises the accounting policy for determination of fair value. Other fair value related disclosures are given in the relevant notes as
· Disclosures for significant estimates and assumptions (Refer Note 54)
· Quantitative disclosures of fair value measurement hierarchy (Refer Note 42)
· Financial instruments (including those carried at amortised cost) (Refer Note 42 and 43)

e) Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured, regardless of when the payment is being made. The following specific recognition criteria must also be met before revenue is recognised:-

Sale of Power

Income from supply of power is recognized on the supply of units generated from the plant to the grid, as per the terms of the PPA entered into with the state electricity board/ private customers.

Income from Engineering Procurement and Construction ("EPC") Contracts
Revenue from provision of supply under EPC contracts is recognised when all significant risks and rewards of ownership of the EPC contract have been passed to the buyer.

Revenue from provision of service is recognized on the percentage of completion method. Percentage of completion is determined as a proportion of cost incurred to date to the total estimated contract cost. Profit on contracts is recognized on percentage of completion method and losses are accounted as soon as these are anticipated. However, profit is not recognized unless there is reasonable progress on the contract. In case the total cost of a contract based on technical and other estimates is expected to exceed the corresponding contract value such expected loss is provided for. The revenue on account of extra claims on construction contracts are accounted for at the time of acceptance in principle by the customers due to uncertainties attached.

Contract revenue earned in excess of billing has been reflected under other current assets and billing in excess of contract revenue has been reflected under current liabilities in the balance sheet.

Liquidated damages / penalties are provided for based on management's assessment of the estimated liability as per contractual terms and / or acceptances. Possible liquidated damages which can be levied by customers for delay in execution of project are accounted for as and when they are levied by the customer.

Sale of Reduction Emission Certificates (RECs)
Income from sale of RECs is recognised on sale of these certificates.

Income from liquidated damages, compensation for loss of revenue and interest on advances
Income from liquidated damages, compensation for loss of revenue and interest on advance is recognised after certainty of receipt of the same is established.

Dividend
Dividend income is recognised when the right to receive dividend is established by the reporting date.

Interest income
For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Group estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in finance income in the Statement of Profit and Loss.

Income from government grants
Refer note (h) for accounting policy.

f) Foreign currencies

The Consolidated Financial Statements are presented in Indian rupees (INR), which is also the functional currency and the currency of the primary economic environment in which the Group operate.

Transactions and balances
Transactions in foreign currencies are initially recorded by the Group at their functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

Exchange differences arising on settlement or translation of monetary items are recognised in profit or loss with the exception of the following:
- Exchange differences arising on monetary items that are designated as part of the hedge of the Group's net investment of a foreign operation. These are recognised in OCI until the net investment is disposed of, at which time, the cumulative amount is reclassified to profit or loss.
- Tax charges and credits attributable to exchange differences on those monetary items are also recorded in OCI.

g) Taxes

Current income tax
Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in India. Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate. Current income tax assets and liabilities are offset if a legally enforceable right exists to set off these.

Deferred Tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date. Deferred tax liabilities are recognised for all taxable temporary differences.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised. The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

In situations where Group is entitled to a tax holiday under the Income-tax Act, 1961, enacted in India, no deferred tax (asset or liability) is recognized in respect of temporary differences which reverse during the tax holiday period. Deferred taxes in respect of temporary differences which reverse after the tax holiday period are recognized in the year in which the temporary differences originate. However, the Group restrict the recognition of deferred tax assets to the extent that it has become reasonably certain that sufficient future taxable income will be available against which such deferred tax assets can be realized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in OCI or equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Minimum Alternate Tax
Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Group will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Group.

h) Government grants

Government grants are recognized where there is reasonable assurance that the grant will be received and all attached conditions will be compiled with. When the grant related to an expense item, it is recognized as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant related to an asset, it is recognized as income in equal amounts over the expected useful life of the related asset.

When the Group receive grants of non-monetary assets, the asset and the grant are recorded at fair value amounts and released to profit or loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset i.e. by equal annual instalments.

The Group presents grants related to an expense item as other income in the Statement of Profit and Loss. Thus, Generation based incentive and Sale of emission reduction certificates have been recognised as other income.

Generation based Incentive:
Generation based incentive is recognized on the basis of supply of units generated by the Group to the state electricity board from the eligible project in accordance with the scheme of the "Generation Based Incentive (GBI) for Grid interactive Wind Power Projects".

Sale of Emission Reduction Certificates
Income from sale of Emission Reduction Certificates are recognised on actual sale due to uncertainty of market.

Subsidy (Viability Gap Funding)
The Group receives Viability Gap Funding (VGF) for setting up of certain solar power projects. The Group records the VGF proceeds on fulfilment of the underlying conditions as deferred government grant. Such deferred grant is recognized over the period of useful life of underlying asset.

i) Property, plant and equipment

Capital work-in-progress, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Group depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred.

Subsequent Costs
The cost of replacing a part of an item of property, plant and equipment is recognised in the carrying amount of the item of property, plant and equipment, if it is probable that the future economic benefits embodied within the part will flow to the Group and its cost can be measured reliably with the carrying amount of the replaced part getting derecognised. The cost for day-to-day servicing of property, plant and equipment are recognised in Special Purpose Interim Statement of Profit and Loss as and when incurred.

As permitted by Ind AS 101 First-time Adoption of Indian Accounting Standards, the Group has continued to apply paragraph 46A of AS 11. The Effects of changes in Foreign Exchange Rates under Indian GAAP.

Accordingly, the Group adjusts exchange differences arising on translation/settlement of long-term foreign currency monetary items recognised in the financial statements for the period ending immediately before the beginning of the first Ind AS financial reporting period pertaining to the acquisition of a depreciable asset to the cost of the asset and depreciates the same over the remaining life of the asset. In accordance with MCA circular dated August 09, 2012, exchange differences adjusted to the cost of fixed assets are total differences, arising on long-term foreign currency monetary items pertaining to the acquisition of a depreciable asset, for the period. In other words, the Group do not differentiate between exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost and other exchange difference.

Gains or losses arising from de-recognition of PPE are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the Special Purpose Interim Statement of Profit and Loss when the asset is derecognized.

Derecognition
An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised. The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if

j) Intangible assets

Intangible assets acquired separately are measured in initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses.

The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with finite life are reviewed at least at the end of each reporting period.

k) Depreciation/amortization of PPE
Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets as follows:

Category	Years
Plant and equipment (solar rooftop projects)*	25 years or terms of power purchase agreement, whichever is less (15-25 years)
Plant and equipment (wind & solar power projects)*	18-25
Plant and equipment (others)	5-18
Office equipment	5
Furniture and fixture	10
Computers	3
Computer servers	6
Computer softwares	3-6
Leasehold improvements	Over the period of lease

* Based on an external technical assessment, the management believes that the useful lives as given above and residual value of 0%-5%, best represents the period over which management expects to use its assets and its residual value. The useful life of plant and equipment is different from the useful life as prescribed under Part C of Schedule II of Companies Act, 2013.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

l) Exceptional items
Exceptional items refer to items of income or expense within the income statement from ordinary activities which are non-recurring and are of such size, nature or incidence that their separate disclosure is considered necessary to explain the performance of the Group.

m) Borrowing costs
Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale. Borrowing costs consist of interest, discount on issue, premium payable on redemption and other costs that an entity incurs in connection with the borrowing of funds (this cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs). The borrowing costs are amortised basis the Effective Interest Rate (EIR) method over the term of the loan. The EIR amortisation is recognised under finance costs in the Statement of Profit or Loss. The amount amortized for the period from disbursement of borrowed funds upto the date of capitalization of the qualifying assets is added to cost of the qualifying assets.

n) Leases

As a leasee

Operating lease payments are recognised as an expense in the Statement of Profit and Loss on a straight-line basis over the lease term.

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

o) Impairment of non-financial assets

The Group assess, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimate the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating units (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre -tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Group bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Group's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Group extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the Statement of Profit and Loss.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Group estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Profit or Loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as an increase in revaluation.

p) Share based payments

Company provides additional benefits to certain members of senior management and employees of the Company and a subsidiary in the form of share based payments, whereby employees render services as consideration for equity instruments (equity-settled transactions).

Equity-settled transactions

The cost of equity-settled transactions is determined by the fair value at the date when the grant is made using an appropriate valuation model.

The cost is recognized, together with a corresponding increase in share-based payment reserve in equity, over the period in which the performance and/or service conditions are fulfilled in employee benefit expenses. The cumulative expense recognized for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Group's best estimate of the numbers of equity instruments that will ultimately vest. The Statement of Profit and Loss expense or credit for a period represents the movement in cumulative expense recognized as at the beginning and end of that period and is recognized in employee benefit expense.

Service and non-market performance conditions are not taken into account when determining the grant date fair value of awards, but the likelihood of the conditions being met is assessed as part of the Group's best estimate of the number of equity instruments that will ultimately vest. Market performance conditions are reflected within the grant date fair value. Any other condition attached to an award, but without associated service requirement, are considered to be non-vesting conditions. Non-vesting conditions are reflected in the fair value of an award and lead to an immediate expensing of an award unless there are also service and/or performance conditions.

No expense is recognized for awards that do not ultimately vest because of non-market performance and/or service conditions have not been met. Where awards include a market or non-market condition, the transaction are treated as vested irrespective of whether the market or non-vesting condition is satisfied, provided that all other performance and/or service condition are satisfied.

Share based payment cost, to the extent pertaining to the employees of subsidiary, is reduced from employee benefit expenses of the Company and is considered as deemed investment in the form of capital contribution in the subsidiary.

q) Retirement and other employee benefits

Retirement benefit in the form of provident fund is a defined contribution scheme. The Group has no obligation, other than the contribution payable to the provident fund. The Group recognize contribution payable to the provident fund scheme as an expense, when an employee renders the related service.

The Group operates a defined benefit plan in India, viz., gratuity. The cost of providing benefit under this plan is determined on the basis of actuarial valuation at each year-end carried out using the projected unit cost method.

Remeasurements comprising of actuarial gain and losses, the effect of the asset ceiling, excluding amount recognized in the net interest on the defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognized in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods.
Accumulated leave, which is expected to be utilized within the next twelve months, is treated as short term employee benefit. The Group measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Group treats the accumulated leave expected to be carried forward beyond twelve months, as long term employee benefit for measurement purposes. Such long term compensated absences are determined on the basis of actuarial valuation at each year-end carried out using the projected unit cost method. Remeasurements comprising of actuarial gain and losses are recognized in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods. The Group presents the leave as current liability in the balance sheet, to the extent is does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where Group has unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

Past service costs are recognised in statement of profit or loss on the earlier of:
- The date of the plan amendment or curtailment, and
- The date that the Group recognises related restructuring costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Group recognises the following changes in the net defined benefit obligation as an expense in the consolidated Statement of Profit and Loss:
- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- Net interest expense or income

r) Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Group expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the Statement of Profit and Loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

s) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

Debt instruments at amortised cost

A ‘debt instrument’ is measured at the amortised cost if both the following conditions are met:
a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the statement of profit or loss.

Debt instruments at fair value through other comprehensive income (FVTOCI)

A ‘debt instrument’ is classified as at the FVTOCI if both of the following criteria are met:
a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
b) The asset’s contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the Group recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the P&L. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to P&L. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

Debt instruments at fair value through profit or loss (FVTPL)
FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the Group may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Group has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the statement of profit or loss.

Equity investments
All other equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS103 applies are classified as at FVTPL. For all other equity instruments, the Group may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Group makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Group decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Group may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

Derecognition
A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised when:
- The rights to receive cash flows from the asset have expired, or
- The respective Group has transferred their rights to receive cash flows from the asset or have assumed the obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; And
- Either the Group has transferred substantially all the risks and rewards of the asset, or has neither transferred nor retained substantially all the risks and rewards of the asset, but have transferred control of the asset.

When the companies under the Group have transferred their rights to receive cash flows from an asset or have entered into a pass-through arrangement, they evaluate if and to what extent they have retained the risks and rewards of ownership. When they have neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of the continuing involvement of Group. In that case, the Group also recognise an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Impairment of financial assets
In accordance with Ind AS 109, the Group applies expected credit loss (ECL) model for measurement and recognition of impairment loss on all the financial assets and credit risk exposure.

The Group follows 'simplified approach for recognition of impairment loss allowance on trade receivables or contract revenue receivables.

The application of simplified approach does not require the Group to track changes in credit risk. Rather it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the group determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/expense in the Statement of Profit and Loss (P&L).

Financial liabilities

Initial recognition and measurement
Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The financial liabilities of the Group include trade and other payables, derivative financial instruments, loans and borrowings including bank overdraft.

Subsequent measurement
The measurement of financial liabilities depends on their classification as discussed below:-

Loans and borrowings
After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss. This category generally applies to borrowings.

The Group recognise debt modifications agreed with lenders to restructure their existing debt obligations. Such modifications are done to take advantage of falling interest rates by cancelling the exposure to high interest fixed rate debt, pay a fee or penalty on cancellation and replace it with debt at a lower interest rate (exchange of old debt with new debt). The qualitative factors considered to be relevant for modified financial liabilities include, but are not limited to, the currency that the debt instrument is denominated in, the interest rate (that is fixed versus floating rate), conversion features attached to the instrument and changes in covenants. The accounting treatment is determined depending on whether modifications or exchange of debt instruments represent a settlement of the original debt or merely a renegotiation of that debt. The exchange of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability.

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Compound Instruments- Compulsory Convertible Debentures (CCDs)
Compulsory Convertible Debentures (CCDs) are separated into liability and equity components based on the terms of the contract

Basis the terms of these compound financial instruments the distributions to holders of an equity instrument are being recognised by the entity directly in equity. Transaction costs of an equity transaction are being accounted for as a reduction from equity.

The Group recognises interest, dividends, losses and gains relating to such financial instrument or a component that is a financial liability as income or expense in profit or loss.

The present value of the liability part of the compulsory convertible debentures classified under financial liabilities and the equity component is calculated by subtracting the liability from the total proceeds of CCDs.

Transaction costs that relate to the issue of a compound financial instrument are allocated to the liability and equity components of the instrument in proportion to the allocation of proceeds. Transaction costs that relate jointly to more than one transaction (for example, cost of issue of debentures, listing fees) are allocated to those transactions using a basis of allocation that is rational and consistent with similar transactions.

Derecognition
A financial liability is derecognised when the obligation under the liability is discharged/ cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Reclassification of financial assets and liabilities
The Group determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent.

Offsetting of financial instruments
Financial assets and financial liabilities are offset and the net amount is reported in the Combined balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

t) Derivative financial instruments and hedge accounting

Initial recognition and subsequent measurement
The Group uses derivative financial instruments, such as interest rate swaps and call options, to hedge its interest rate risks and foreign currency risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to profit or loss, except for the effective portion of cash flow hedges, which is recognised in OCI and later reclassified to profit or loss when the hedge item affects profit or loss or treated as basis adjustment if a hedged forecast transaction subsequently results in the recognition of a non-financial asset or non-financial liability.

For the purpose of hedge accounting, hedges are classified as:
- Fair value hedges when hedging the exposure to changes in the fair value of a recognised asset or liability or an unrecognised firm commitment
- Cash flow hedges when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment
- Hedges of a net investment in a foreign operation

At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to which the Group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes the Group's risk management objective and strategy for undertaking hedge, the hedging/ economic relationship, the hedged item or transaction, the nature of the risk being hedged, hedge ratio and how the entity will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

Hedges that meet the strict criteria for hedge accounting are accounted for, as described below:

(i) Cash flow hedges

The effective portion of the gain or loss on the hedging instrument is recognised in OCI in the cash flow hedge reserve, while any ineffective portion is recognised immediately in the Special Purpose Interim Statement of Profit and Loss.

The Group uses interest rate swaps and call options as hedges of its exposure to interest rate risks and foreign currency risks in the foreign currency loan. The ineffective portion relating to foreign currency loan is recognised in other income or expenses.

Amounts recognised as OCI are transferred to profit or loss when the hedged transaction affects profit or loss, such as when the hedged item affects the Special Purpose Interim Statement of Profit and Loss or treated as basis adjustment if a hedged item subsequently results in recognition of a non-financial asset or liability.

If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover (as part of the hedging strategy), or if its designation as a hedge is revoked, or when the hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss previously recognised in OCI remains separately in equity until the forecast transaction occurs or the foreign currency firm commitment is met.

u) Inventories

Inventories are valued at the lower of cost and net realisable value. Cost includes cost of purchases. Cost is determind on weighted averages basis. Net realisable value is the estimated selling price in the ordinary course of business, less estimated selling costs.

v) Cash and cash-equivalents

Cash and short-term deposits in the balance sheet comprise cash at banks and cash in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short term deposits, as defined above, net off bank overdrafts as they considered an integral part of the Group's cash management.

w) Measurement of EBITDA

The Group has elected to present earnings before interest, tax, depreciation and amortization (EBITDA) as a separate line item on the face of the Statement of Profit and Loss. The Group measure EBITDA on the basis of profit/ (loss) from continuing operations. In their measurement, the companies include interest income but do not include depreciation and amortization expense, finance costs and tax expense.

x) Events occurring after the Balance Sheet date

Impact of events occurring after the balance sheet date that provide additional information materially effecting the determination of the amounts relating to conditions existing at the balance sheet date are adjusted to respective assets and liabilities.

The Group does not adjust the amounts recognised in its financial statements to reflect non-adjusting events after the reporting period.

The Group makes disclosures in the financial statement in cases of significant events.

y) Contingent liabilities

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

z) Earnings per equity share

Basic earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Group by the weighted average number of equity shares outstanding during the period. Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Group by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issue data later date. Dilutive potential equity shares are determined independently for each period presented.

The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented for any share splits and bonus shares issues including for changes effected prior to the approval of the financial statements by the Board of Directors.

'The dilutive effect of outstanding options is reflected as additional share dilution in the computation of diluted earnings per share'

aa) Standards issued but not yet effective

In March 2018, the Ministry of Corporate Affairs issued the Companies (Indian Accounting Standards) Amendments Rules, 2018, notifying new accounting standard Ind AS 115, ‘Revenue from Contracts with Customers’ and certain amendments to existing standards. The new standard and amendments are applicable to the Group from 1 April 2018.

Ind AS 115 Revenue from Contracts with Customers

Revenue from contracts with Customers outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. The standard replaces most current revenue recognition guidance. The core principle of the new standard is for companies to recognize revenue to depict the transfer of goods or services to customers in amounts that reflect the consideration to which the company expects to be entitled in exchange for those goods or services. The new standard also will result in enhanced disclosures about revenue, provide guidance for transactions that were not previously addressed comprehensively including service revenues and contract modifications and improve guidance for multiple-element arrangements. The new Standard will come into effect for the annual reporting periods beginning on or after 1 April 2018.

The Group is evaluating the requirements of the new standard and the effect on the financial statements is being evaluated, thus impact is not known.

Ind AS 12 Recognition of Deferred Tax Assets for Unrealised Losses

The amendments clarify that an entity needs to consider whether tax law restricts the sources of taxable profits against which it may make deductions on the reversal of that deductible temporary difference. Furthermore, the amendments provide guidance on how an entity should determine future taxable profits and explain the circumstances in which taxable profit may include the recovery of some assets for more than their carrying amount.
Entities are required to apply the amendments retrospectively. However, on initial application of the amendments, the change in the opening equity of the earliest comparative period may be recognised in opening retained earnings (or in another component of equity, as appropriate), without allocating the change between opening retained earnings and other components of equity. Entities applying this relief must disclose that fact.
These amendments are effective for annual periods beginning on or after 1 April 2018. However, since the Group’s current practice is in line with the amendment, the Group does not expect any effect on its consolidated financial statements.

Ind AS 21 Foreign Currency Transactions and Advance Consideration

The Appendix clarifies that, in determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration, the date of the transaction is the date on which an entity initially recognises the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, then the entity must determine the transaction date for each payment or receipt of advance consideration.
Entities may apply the Appendix requirements on a fully retrospective basis. Alternatively, an entity may apply these requirements prospectively to all assets, expenses and income in its scope that are initially recognised on or after:
(i) The beginning of the reporting period in which the entity first applies the Appendix, or
(ii) The beginning of a prior reporting period presented as comparative information in the financial statements of the reporting period in which the entity first applies the Appendix.
The Appendix is effective for annual periods beginning on or after 1 April 2018. The Group is evaluating the requirements of the new standard and the effect on the financial statements is being evaluated, thus impact is not known.

The Group has disclosed only those new standards or amendments that are expected to have an impact on its financial position, performance and disclosures.

#The title represented by sale deeds in respect of land amounting to INR 1,400.60 (31 March 2017 INR 515.13) is not yet in the name of the Group. Further, the title of land amounting to INR 1,344.09 (31 March 2017 INR 884.10) is held by way of General Power of Attorney (GPA) and the Group is in the process of getting title transferred in its name.

Mortgage and hypothecation on Property, plant & equipment:

Property, plant & equipment are subject to a pari passu first charge to respective lenders for senior secured bonds, project term loans, buyer's/supplier's credit, working capital loan, debentures and acceptances as disclosed in note 18 and note 22.

^ Capitalised borrowing costs
The amount of borrowing costs capitalised in Property, plant and equipment during the year was INR 504.58 (31 March 2017 INR 1076.23). The rate used to determine the amount of borrowing costs eligible for capitalisation was the effective interest rate of the specific borrowing.

***Adjustment to Property, Plant & Equipments during the year are as follows**

Freehold Land
Adjustment of INR 51.22 (31 March 2017: Nil) during the year pertains to actualisation of provisional capitalization.

Plant and equipment
Adjustment of INR 45.00 (31 March 2017: INR 20.46) pertains to revision of agreement and discount received from vendor.
Adjustment of INR 121.17 (31 March 2017: INR 20.77) pertains to actualisation of provisional capitalization of supply of goods and services and early closure of letter of credits.

Capital work in progress
Capital work in progress amounting to INR 82.78 (31 March 2017: INR 46.16) has been written off to the extent of non-viability of recovery of cost in future.
Adjustment of INR 14.24 (31 March 2017: INR 131.41) during the year pertains to actualisation of provisional capitalization.

**** Disposals in Capital Work in Progress includes following**
During the year, persuant to downsizing of the contract with vendor for Mandsaur project, Group has sold back project specific wind power plant related equipment lying in CWIP for INR 181 to the vendor.

Mortgage and hypothecation on Intangible assets:

Intangible assets are subject to a pari passu first charge to respective lenders for senior secured bonds, project term loans, buyer's/supplier's credit, working capital loan, debentures and acceptances as disclosed in note 18 and note 22.

Impairment of Goodwill:

The Company acquired Ostro Energy Private Limited and KCT Renewable Energy Private Limited in FY 2017-18. The exercise of measurement of identifiable assets acquired, liabilities assumed and resultant goodwill has been completed. However, given that the acquisition happened close to the reporting date and measurement of identifiable assets acquired, liabilities assumed and resultant goodwill got completed near the date of finalization of accounts, the allocation of the goodwill to a Cash Generating Unit (CGU) or to group of CGU's could not be completed. Therefore, the goodwill has been left unallocated as at the reporting date.

There are no indicators for the impairment of goodwill on overall level and accordingly, the disclosure required by Ind AS 36 paragraph 96 has not been given.

7 Investment in jointly controlled entities	**As at 31 March 2018**	**As at 31 March 2017**
Investment in unquoted equity shares of entities under joint control at equity method (Refer note 51)

36 Gratuity and other post-employment benefit plans

Retirement benefit in the form of provident fund is a defined contribution scheme. The contributions to the provident fund are charged to the statement of profit and loss for the year when the contributions are due. The Group has no obligation, other than the contribution payable to the provident fund.

The Group has a defined benefit gratuity plan. Gratuity is computed as 15 days salary, for every completed year of service or part thereof in excess of 6 months and is payable on retirement/termination/resignation. The benefit vests on the employees after completion of 5 years of service. The Gratuity liability has not been externally funded. Group makes provision of such gratuity liability in the books of accounts on the basis of actuarial valuation as per the projected unit credit method.

The following tables summarize the components of net benefit expense recognized in the statement of profit and loss and the unfunded status and amounts recognized in the balance sheet for the Gratuity.

Statement of profit and loss

Net employees benefit expense recognised in employee cost	**31 March 2018**	**31 March 2017**
Current service cost	21.25	6.30
Interest cost on benefit obligation	1.86	1.49
Net benefit expense*	**23.11**	**7.79**

Balance Sheet

Benefit liability	**31 March 2018**	**31 March 2017**
Present value of unfunded obligation	53.12	25.57
Net liability	53.12	25.57

	31 March 2018	**31 March 2017**
Changes in the present value of the defined benefit obligation		
Opening defined benefit obligation	25.57	12.80
Current service cost	21.25	6.30
Interest cost	1.86	0.98
Benefits paid	(0.68)	-
Remeasurements during the year due to:		
- Experience adjustments	2.22	4.09
- Change in financial assumptions	(2.11)	1.40
Liabilities net of planned assets assumed under business combination	5.01	-
Closing defined benefit obligation	53.12	25.57

Since the entire amount of plan obligation is unfunded therefore changes in fair value of plan assets, categories of plan assets as a percentage of the fair value of total plan assets and Group’s expected contribution to the plan assets for the next year is not given.

* This amount is inclusive of amount capitalised in different projects.

The principal assumptions used in determining gratuity obligations	**31 March 2018**	**31 March 2017**
Discount rate	7.75%	7.40%
Salary Escalation	10.00%	10.00%

The estimates of future salary increases considered in actuarial valuation take account of inflation, total amount of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

The Group regularly assesses these assumptions with the projected long-term plans and prevalent industry standards. The impact of sensitivity due to changes in the significant actuarial assumptions on the defined benefit obligations is given in the table below:

Particulars	**Change in assumptions**	**31 March 2018**	**31 March 2017**
Discount rate	+ 0.5%	45.24	24.06
	- 0.5%	51.18	27.23
Salary escalation	+ 0.5%	50.34	26.64
	- 0.5%	45.90	24.52

The sensitivity analysis above has been determined based on a method that extrapolates the impact on defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting period.

Gratuity amounts for current year and previous years	**31 March 2018**	**31 March 2017**	**31 March 2016**	**31 March 2015**	**31 March 2014**
Defined benefit obligation	(53.12)	25.57	12.80	6.95	3.59
Surplus/(Deficit)	53.12	(25.57)	(12.80)	(6.95)	(3.59)
Experience adjustment on plan (gain)/loss	3.22	(4.00)	(0.33)	(0.66)	0.53

Projected plan cash flow:

The table below shows the expected cash flow profile of the benefits to be paid to the current membership of the plan based on past service of the employees as at the valuation date:

Maturity Profile	**31 March 2018**	**31 March 2017**
Within next 12 months	1.61	0.89
Between 2 and 5 years	14.21	6.51
Between 5 and 10 years	33.98	8.49
Beyond 10 years	127.59	63.81

The weighted average duration to the payment of these cash flows is 10.90 years (31 March 2017: 12.39 years).

Risk analysis
The Group is exposed to a number of risks in the defined benefit plans. Most significant risks pertaining to defined benefits plans and management estimation of the impact of these risks are as follows:

· Inflation risk: Currently the Group has not funded the defined benefit plans. Therefore, the Group will have to bear the entire increase in liability on account of inflation.

· Longevity risk/life expectancy: The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and at the end of the employment. An increase in the life expectancy of the plan participants will increase the plan liability.

· Salary growth risk: The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. An increase in the salary of the plan participants will increase the plan liability.

Defined contribution plan:	**31 March 2018**	**31 March 2017**
Contribution to provident fund & other fund charged to statement of profit & loss*	52.14	36.87

*This amount is inclusive of amount capitalized in different projects.

37 Operating lease commitments

The Group has entered into commercial property lease for its offices. The lease have non-cancellable commitment period which has remaining term of 5 years. The Company has the option, under some of its leases, to lease the assets for additional terms of upto three years.

Future minimum rentals payables under non- cancellable operating lease (excluding lease equalisation reserve) are as follows

Particulars	**For the year ended 31 March 2018**	**For the year ended 31 March 2017**
Within one year	110.02	44.68
After one year but not more than five years	441.48	29.56

38 Share Based Payment

The Group has four share-based payment schemes for its employees:
2017 Stock Option Plan, 2016 Stock Option Plan, 2014 Stock Option Plan and 2011 Stock Option Plan ('Group Stock Option Plans') approved by the board. According to the ESOP schemes, the employee selected by the compensation committee from time to time will be entitled to options as per grant letter issued by the committee, subject to satisfaction of prescribed vesting conditions.

The relevant terms of the ESOP schemes are as below:

Plans	Group Stock Option Plans
Grant Date	Multiple
Vesting period	**2017 Stock Option Plan** **Time linked vesting:** i) 50 % of grants will vest in 5 years on quarterly basis which shall commence one year after the date of grant of options ii) Remaining 50% will vest at the end of 5 years from the date of grant. **2016 Stock Option Plan** **Time linked vesting:** 5 years on quarterly basis which shall commence one year after the date of grant of option **Performance linked vesting:** The Options shall vest annually and shall be prorated over a period of 3 years from the date of Grant and shall be subject to the threshold EBIDTA achieved by the Company for the last completed financial year. **2014 Stock Option Plan** **Time linked vesting:** 5 years on quarterly basis which shall commence one year after the date of grant of option **2011 Stock Option Plan** **Time linked vesting:** 5 years from the grant date
Exercise period	Within 10 years from date of grant upon vesting
Exercise price	Rs. 100 to Rs 340
Settlement type	Equity settled

Capital creditors	15,615.87	15,615.87	15,226.55	15,226.55
Purchase consideration payable	1,877.09	1,877.09	162.38	162.38
Share application money received and due for refund	-	-	2.20	2.20
Other payables	-	-	-	-
Short-term borrowings	19,365.19	19,365.19	16,575.83	16,575.83
Trade payables	2,734.82	2,734.82	2,396.20	2,396.20

The management of the group assessed that current investments, cash and cash equivalents, trade receivables, trade payables, short term borrowings, other current financials liabilities and other current financial assets approximate their carrying amounts largely due to the short-term maturities of these instruments.

The following methods and assumptions were used to estimate the fair values:

i The fair values of the group’s term loans from banks and financial institutions including current maturities are determined by using Discounted Cash Flow (DCF) method using discount rate that reflects the issuer’s borrowing rate as at the end of the reporting year. The own non-performance risk as at 31 March 2018 was assessed to be insignificant.

ii The fair value of unquoted instruments, such as liability component of compulsory convertible debentures, senior secured bonds and unlisted non convertible debentures are estimated by discounting future cash flows using effective interest rate, credit risk and remaining maturity.

iii The Group enter into derivative financial instruments with various counterparties, principally financial institutions with investment grade credit ratings. Cross currency interest rate swaps are valued using valuation techniques, which employs the use of market observable inputs. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates, yield curves of the currency, interest rate curves and forward rate curves of the underlying instrument. The changes in counterparty credit risk had no material effect on the hedge effectiveness assessment for derivatives designated in hedge relationships.

43 Fair value hierarchy

The Group categorizes assets and liabilities measured at fair value into one of three levels depending on the ability to observe inputs employed in their measurement which are described as follows:
i) Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
ii) Level 2 - Inputs are inputs that are observable, either directly or indirectly, other than quoted prices included within level 1 for the asset or liability.
iii) Level 3 - Inputs are unobservable inputs for the asset or liability reflecting significant modifications to observable related market data or Group’s assumptions about pricing by market participants.

The following table provides the fair value measurement hierarchy of the assets and liabilities of the group :-

Quantitative disclosures fair value measurement hierarchy for assets/liabilities as at year end:

		31 March 2018		31 March 2017	
	Level of fair value measurement	**Carrying value**	**Fair value**	**Carrying value**	**Fair value**

44 Financial Risk Management objectives and policies

The financial liabilities comprise loans and borrowings, derivative liabilities, trade payable and other financial liabilities.
The main purpose of these financial liabilities is to finance the Group's operations. The Group's principal financial assets include loans, derivative assets, trade receivables, cash & cash equivalents and other financial assets. The Group is exposed to market risk, credit risk and liquidity risk. The Group's senior management oversees the management of these risks. The Company's senior management is supported by a various sub committees that advises on financial risks and the appropriate financial risk governance framework for the Company. These committees provides assurance to the Company's senior management that the Company's financial risk activities are governed by appropriate policies and procedure and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below:

Market Risk

Market risk is the risk that the Group's assets and liabilities will be exposed to due to a change in market prices that determine the valuation of these financial instruments. Market risk comprises 3 types of risk: interest rate risk, currency risk and other price risk. Financial instruments affected by market risk include loans and borrowings, deposits and derivative financial instruments.

The sensitivity analyses in the following sections relate to the position as at 31 March 2018 and 31 March 2017. The sensitivity analyses have been prepared on the basis that the amount of net debt, the ratio of fixed to floating interest rates of the debt and derivatives and the proportion of financial instruments in foreign currencies are all constant and on the basis of hedge designations in place as at 31 March 2018.

Interest rate Risk:

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group is exposed to interest rate risk primarily from the external borrowings that are used to finance their operations. In case of external commercial borrowings ("ECB") and buyers credit the Group believes that the exposure of Group to changes in market interest rates is insignificant as the respective companies manage the risk by hedging the changes in the market interest rates through cross currency interest rate swaps. The Group also monitors the changes in interest rates and actively re finances its debt obligations to achieve an optimal interest rate exposure.

Interest Rate Sensitivity

The following table demonstrates the sensitivity to a reasonable possible change in interest rates on financial liabilities, i.e. floating interest rate borrowings in INR and USD. Interest rate sensitivity has been calculated for borrowings with floating rate of Interest. For borrowings with fixed rate of interest sensitivity disclosure has not been made. With all other variables held constant, the Group's profit before tax is affected through the impact on financial liabilities, as follows:

	31 March 2018		**31 March 2017**	
	Increase/decrease in basis points	**Effect on profit before tax**	**Increase/decrease in basis points**	**Effect on profit before tax**
INR	+/(-)50	(-)/+196.24	+/(-)50	(-)/+146.00
US dollar	+/(-)60	(-)/+2.00	+/(-)60	(-)/+3.00

	31 March 2018		**31 March 2017**	
	Increase/decrease in basis points	**Effect on equity**	**Increase/decrease in basis points**	**Effect on equity**
INR	+/(-)50	(-)/+156.37	+/(-)50	(-)/+100.89
US dollar	+/(-)60	(-)/+2.00	+/(-)60	(-)/+3.00

The assumed movement in basis points for the interest rate sensitivity analysis is based on the currently observable market environment. Though there is exposure on account of Interest rate movement as shown above but the Group minimises the foreign currency (US dollar) interest rate exposure through derivatives and INR interest rate exposure through re-financing.

Foreign Currency Risk:

Foreign Currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Group is exposed to foreign currency risk arising from imports of goods in US dollars. The Group hedges its exposure to fluctuations on the translation into INR of its buyer's/supplier's credit by using foreign currency swaps and forward contracts. The Group has followed a conservative approach for hedging the foreign currency risk so as to not use complex forex derivatives. The Group also monitors that the hedges do not exceed the underlying foreign currency exposure. The Group does not undertake any speculative transaction.

Foreign currency sensitivity

The following tables demonstrate the sensitivity to a reasonably possible change in USD and INR exchange rates, with all other variables held constant. The impact on the group’s profit before tax is due to changes in the fair value of monetary liabilities comprising of buyer's/supplier's credit in US dollars. The impact on the group's pre-tax equity is due to changes in the fair value of cross-currency interest-rate swaps (CCIRS) designated as cash flow hedges. The group’s exposure to foreign currency changes for all other currencies is not material.

	31 March 2018		**31 March 2017**	
Change in USD rate	5%	-5%	5%	-5%
Effect on profit before tax	(21.84)	21.84	(23.96)	23.96

Credit Risk

Credit risk is the risk that the power procurer will not meet their obligations under a financial instrument or customer contract, leading to a financial loss. The Group is exposed to credit risk from their operating activities (primarily trade receivables) and from its financing activities but this credit risk exposure is insignificant given the fact that substantially whole of the revenues are from state utilities/government entities. The maximum credit exposure to credit risk for the components of the balance sheet at 31 March 2018, 31 March 2017 is the carrying amount of all the financial assets.

Further the group sought to reduce counterparty credit risk under long-term contracts in part by entering into power sales contracts with utilities or other customers of strong credit quality and we monitor their credit quality on an on going basis.
The maximum credit exposure to credit risk for the components of the balance sheet at 31 March 2018 and 31 March 2017 is the carrying amount of all the financial assets.

Trade Receivables

Customer credit risk is managed basis established policies of Group, procedures and controls relating to customer credit risk management. Outstanding customer receivables are regularly monitored. The Group does not hold collateral as security. The group has majorly state utilities/government entities as its customers with high credit worthiness and therefore the group does not see any significant risk related to credit.

The credit quality of the customers other than state utilities/government entities is evaluated based on their credit ratings and other publicly available data.

Financial instruments and credit risk

Credit risk from balances with banks is managed by Group's treasury department. Investments, in the form of fixed deposits, of surplus funds are made only with banks and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed on an annual basis by the Group, and may be updated throughout the year subject to approval of group's finance committee. The limits are set to minimize the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

Liquidity Risk

Liquidity risk is the risk that the Group will encounter in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The approach of the Group to manage liquidity is to ensure , as far as possible, that these will have sufficient liquidity to meet their respective liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risk damage to their reputation.

The Group assessed the concentration of risk with respect to refinancing its debt and concluded it to be low. The Group has access to a sufficient variety of sources of funding and debt maturing within 12 months can be rolled over with existing lenders.

The Group rely mainly on long-term debt obligations to fund their construction activities. To the extent available at acceptable terms, utilized non-recourse debt to fund a significant portion of the capital expenditures and investments required to construct and acquire our wind and solar power plants and related assets. The Group's non-recourse financing is designed to limit default risk and is a combination of fixed and variable interest rate instruments. In addition, the debt is typically denominated in the currency that matches the currency of the revenue expected to be generated from the benefiting project, thereby reducing currency risk. The majority of non-recourse debt is funded by banks and financial institutions, with debt capacity supplemented by unsecured loan from related party.

The table below summarizes the maturity profile of financial liabilities of group based on contractual undiscounted payments:

Year ended 31 March 2018	On demand	Less than 3 months	3 to 12 months	1 to 5 years	> 5 years	Total

45 Capital management

For the purpose of the capital management, capital includes issued equity capital, compulsory convertible debentures, share premium and all other equity reserves attributable to the equity holders of the Group. The primary objective of the Group's management is to maximise the shareholder value.

The Group manage their capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants.

To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Group monitor capital using a gearing ratio, which is net debt divided by total capital plus net debt. The group includes within net debt, interest bearing loans and borrowings and other payables, less cash and short-term deposits.

The policy of the Group is to keep the gearing ratio of the power project to 3:1 during the construction phase and aim to enhance it to 4:1 post the construction phase. This is in line with the industry standard ratio. The current gearing ratios of the various projects in the Group is between 3:1 to 4:1.

In order to achieve this overall objective, the capital management of the Group, amongst other things, aims to ensure that they meet financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. There have been no breaches in the financial covenants of any interest-bearing loans and borrowing in the current period.

No changes were made in the objectives, policies or processes for managing capital during the period ended 31 March 2018.

46 Commitments Liabilities and Contingencies
(to the extent not provided for)

(i) Contingent liabilities

The Group has contingent liability of INR 255.28 on account of liquidity damages claim (which is under litigation) (31 March 2017: Nil).

(ii) Commitments:

Estimated amount of contracts remaining to be executed on capital account and not provided for

At 31 March 2018, the group has capital commitment (net of advances) pertaining to commissioning of wind & solar energy projects of INR 26,112.01 (31 March 2017: 11,657.11).

47 Details of dues to Micro, Small and Medium Enterprises as defined under the MSMED Act, 2006

Under the Micro, Small and Medium Enterprises Development Act, 2006, (MSMED) which came into force from 2 October 2006, certain disclosure are required to be made relating to Micro, Small and Medium Enterprises. On the basis of the information and records available with the management, there are no outstanding dues to the Micro, Small and Medium Enterprises development Act, 2006.

Particulars	As at 31 March 2018	As at 31 March 2017
The principal amount and the interest due thereon (to be shown separately) remaining unpaid to any supplier as at the end of each accounting year/period	Nil	Nil
The amount of interest paid by the buyer in terms of section 16, of the Micro Small and Medium Enterprise Development Act, 2006 along with the amounts of the payment made to the supplier beyond the appointed day during each accounting year/period	Nil	Nil
The amount of interest due and payable for the period of delay in making payment (which have been paid but beyond the appointed day during the year/period) but without adding the interest specified under Micro Small and Medium Enterprise Development Act, 2006.	Nil	Nil
The amount of interest accrued and remaining unpaid at the end of each accounting year/period; and	Nil	Nil
The amount of further interest remaining due and payable even in the succeeding years, until such date when the interest dues as above are actually paid to the small enterprise for the purpose of disallowance as a deductible expenditure under section 23 of the Micro Small and Medium Enterprise Development Act, 2006	Nil	Nil

48 Corporate social responsibility expenditure

(a) Gross amount required to be spent by the Company during the year is INR 27.87 (31March 2017: INR 20.00).
(b) Amount spent during the year on:

List of CSR activities	In Cash	Yet to be paid	Total
Construction / Acquisition of any asset	nil	nil	nil
Activities relating to:			
Current year	37.07	11.78	48.85
Previous year	(13.16)	(9.58)	(22.74)

1) Sanitation & making available safe drinking water- Construction of toilets, Bore-well, well, Tube-well etc.
2) Empowering women through SHGs (self-help group) and creating income generation activities for the women like stitching and tailoring, goatery, backyard poultry etc.)
3) Ensuring environmental sustainability- animal welfare Plantation, environment awareness,
4) Animal Welfare-Animal health camp, Para –vet training
5) Education awareness, Remedial classes for weak students etc.
6) Health and Hygiene- Health camps in the community, cleanliness drive to create awareness.

49 During the year, the Group reached settlement with certain suppliers/contractors for compensation for loss of revenue due on account of delay in commissioning of power projects. Resultantly, an amount of INR 337.74 (31 March 2017 : 407.01) towards Liquidated Damages ('LDs') has been recognized in the statement of profit and loss.

Since, the said LDs are directly linked to delay in creating profit making apparatus, the same has been considered as capital receipt and thus has not been included in Book Profit under section 115JB of the Income Tax Act, 1961. The same has also been supported by the opinion of the advisors of the company.

50 Hedging activities and derivatives

Derivatives designated as hedging instruments

The Group uses certain types of derivative financial instruments (viz. foreign currency forwards, Cross-currency interest rate swap) to manage/mitigate their exposure to foreign exchange and interest risk. Further, the entity designates such derivative financial instruments (or its components) as hedging instruments for hedging the exchange rate fluctuation and interest risk attributable to either a recognised item or a highly probable forecast transaction (‘Cash flow hedge’). The effective portion of changes in the fair value of Derivative financial instruments (or its components) that are designated and qualify as Cash flow hedges, are recognised in the Other comprehensive income and held in Cash flow hedge reserve - a component of Equity. Any gains / (losses) relating to the ineffective portion, are recognised immediately in the statement of profit and loss within finance income / finance costs. The amounts accumulated in Equity for highly probable forecast transaction are added to carrying value of non financial asset or non financial liability as basis adjustment, other amounts accumulated in Equity are re-classified to the statement of profit and loss in the periods when the hedged item affects profit / (loss).

At any point of time, when a forecast transaction is no longer expected to occur, the cumulative gains / (losses) that were reported in equity is immediately transferred to the statement of profit and loss within finance income / finance costs.

Cash flow hedges

Hedge has been taken against exposure to foreign currency risk and variable interest outflow on External commercial borrowings and Buyer’s Credit. Terms of the swaps and their respective impact on OCI and statement of profit and loss is as below:-

- Buyers credit

Pay fixed INR and receive USD and pay fixed interest at 2.02% to 7.85% p.a. and receive a variable interest at 1 month LIBOR plus 0.50% p.a. to 6 month LIBOR plus 1.25% p.a. on the notional amount.

-Loan

Pay fixed INR and receive USD and pay fixed interest at 7.31% to 13.01% p.a. and receive a variable interest at 1 month LIBOR plus 0.50% to 6 months LIBOR plus 3.85% p.a. on the notional amount.

The cash flow hedges through CCS of USD 133,921,267.00, IRS of USD 352,715,932.00 and forward of USD 199,316,488.00 outstanding at the year ended 31 March 2018 were assessed to be highly effective and a mark to market loss of INR 355.83 (31 March 2017: INR 1,500.10) with a deferred tax asset of INR 90.99 (31 March 2017: INR 463.37), is included in OCI.

Foreign currency and Interest rate risk

Forward contracts and swaps measured at fair value through OCI are designated as hedging instruments in cash flow hedges of interest and principal payments in USD.

Purchase consideration transferred	0.50	42,333.88	4,451.97	23.09	980.42	0.32	249.62	196.96

The deferred tax liability mainly comprises the tax effect of the accelerated depreciation for tax purposes of Property plant and equipment and Intangible Assets.

*Due to the group's long term contractual relationship with the respective seller and its leadership position in the wind energy sector, the group was in favourable position to negotiate a bargain purchase and accordingly this resulted in a bargain purchase of INR 114.40.

** Goodwill recognised represents the future economic and synergy benefits arising from assets acquired to strengthen it's position in renewable energy sector. Goodwill is allocated entirely to the wind and solar power plant. None of the goodwill recognised is expected to be deductible for income tax purposes.

From the date of acquisition, acquired entitles have contributed in revenue and profit/loss before tax follows:

Particulars	From the date of acquisition till 31 March 2018			From the respective date of acquisition till 31 March 2017

54 Significant accounting judgments, estimates and assumptions

The preparation of consolidated financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the accompanying disclosures. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

In the process of applying the accounting policies management has made certain judgments, estimates and assumptions. The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Group based their assumptions and estimates on parameters available when the Consolidated financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Group. Such changes are reflected in the assumptions when they occur.

A) Accounting judgements:

Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgment is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

The Group makes various assumptions and estimates while computing deferred taxes which include production related data (PLFs), projected operations and maintenance costs, projected finance costs, proposed availment of deduction under section 80IA of the Income Tax Act, 1961 and the period over which such deduction shall be availed, usage of brought forward losses etc. While these assumptions are based on best available facts in the knowledge of management as on the balance sheet date however, they are subject to change year on year depending on the actual tax laws and other variables in the respective year. Given that the actual assumptions which would be used to file the return of income shall depend upon the tax laws prevailing in respective year, management shall continue to reassess these assumptions while calculating the deferred taxes on each balance sheet date and the impact due to such change, if any, is considered in the respective year.

Depreciation on property, plant and equipment

Depreciation on property, plant and equipment is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management. Considering the applicability of Schedule II of Companies Act, 2013, the management has re-estimated useful lives and residual values of all its property, plant and equipment. The management believes that depreciation rates currently used fairly reflect its estimate of the useful lives and residual values of property, plant and equipment, though these rates in certain cases are different from lives prescribed under Schedule II of the Companies Act, 2013.

Basis legal opinion obtained, management is of the view that application of CERC and/or SERC rates for the purpose of accounting for depreciation expenses is not mandatory. Hence, Company is depreciating the assets bases on life as determined by an expert.

B) Estimates and assumptions:

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values.

Assumptions include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 42 and 44 for further disclosures.

55 Absolute amounts less than INR 5,000 are appearing in the financial statements as "0.00" due to presentation in millions.

Limited Review Report

Review Report to
The Board of Directors
ReNew Power Private Limited ("RPPL")

Introduction

We have reviewed the accompanying Unaudited Special Purpose Interim Combined Financial Statements of Restricted Group (consisting of certain specific subsidiaries of RPPL as listed in note 1 of these financial statements, collectively known as the "Restricted Group"), which comprise the combined Balance Sheet as at 30 June 2020 and the related Statement of Profit and Loss including other comprehensive income, the combined Cash Flow Statement and the combined Statement of Changes in Equity for the three months period then ended and the related notes, comprising a summary of the significant accounting policies and other explanatory information (the "Unaudited Special Purpose Interim Combined Financial Statements"). Management of RPPL is responsible for the preparation and presentation of this combined financial statements in accordance with the basis of preparation of Unaudited Special Purpose Interim Combined Financial Statements set out in in Note 3. Our responsibility is to express a conclusion on these Unaudited Special Purpose Interim Combined Financial Statements based on our review.

Scope of Review

We conducted our review in accordance with the Standard on Review Engagements (SRE) 2410, Review of Interim Financial Information Performed by the Independent Auditor of the Entity issued by the Institute of Chartered Accountants of India. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying Unaudited Special Purpose Interim Combined Financial Statements are not prepared, in all material respects, in accordance with the basis for preparation as set out in Note 3 to the Unaudited Special Purpose Interim Combined Financial Statements.

Emphasis of Matter

1. We draw attention to note 2 and 3 to the Unaudited Special Purpose Interim Combined Financial Statements, which describes that the Restricted Group has not formed a separate legal group of entities during the period ended 30 June 2020, which also describes the basis of preparation, including the approach to and the purpose for preparing them. Consequently, the Restricted Group's Unaudited Special Purpose Interim Combined Financial Statements may not necessarily be indicative of the financial performances and financial position of the Restricted Group that would have occurred if it had operated as a separate standalone group of entities during the periods presented.

2. We draw attention to note 44 to the Unaudited Special Purpose Interim Combined Financial Statements, related to the recoverability of dues under litigation amounting to Rs. 611 million from Southern Power Distribution Company of A.P. Limited by Zemira Renewable Energy Limited (which is forming part of the Restricted Group). Zemira Renewable Energy Limited has filed Writ Petition/appeal before the Hon'ble High Court of Andhra Pradesh related to these matters. Pending the outcome of the cases, which is not presently determinable, no adjustment has been made to the Unaudited Special Purpose Interim Combined Financial Statements.

   Our conclusion is not modified in respect of the above matters.

Other matter

The Unaudited Special Purpose Combined Financial Statements have been prepared by the management of RPPL solely in connection with the proposed issuance of INR denominated Non-Convertible Debentures (referred to as "INR NCDs") to a Mauritian Foreign Portfolio Investor under Voluntary Retention Route as prescribed by the Reserve Bank of India which in turn will issue USD denominated bonds (referred to as "FPI Bonds") to be listed on Singapore Exchange Securities Trading Limited (SGX-ST) for which RPPL is the guarantor and its inclusion in the Offering Memorandum. As a result, the Unaudited Special Purpose Interim Combined Financial Statements may not be suitable for another purpose.

1 Corporate information

ReNew Power Private Limited (the "Company" or "Parent" or "RPPL") is a private limited company domiciled in India. The Company was converted into a private limited company with effect from 8 November 2019 and consequently the name of the Company has changed from ReNew Power Limited to ReNew Power Private Limited.

Certain subsidiary companies of the Parent and ReNew Solar Power Private Limited (wholly owned subsidiary of RPPL) which are collectively referred to as the 'Restricted Group' (as more clearly explained in the note below) intends to issue INR denominated Non-Convertible Debentures (referred to as "INR NCDs") to a Mauritian Foreign Portfolio Investor namely India Green Energy Holdings under Voluntary Retention Route as prescribed by the Reserve Bank of India, which in turn will issue USD denominated bonds (referred to as "FPI Bonds"). The FPI Bonds will be listed on Singapore Exchange Securities Trading Limited (SGX-ST).

Name of entity	Holding Company	Holding percentage
ReNew Wind Energy (AP) Private Limited	ReNew Power Private Limited	66%
ReNew Wind Energy (AP 3) Private Limited	ReNew Power Private Limited	100%
Shruti Power Projects Private Limited (acquired on 16 September 16)	ReNew Power Private Limited	100%
Pugalur ReNewable Private Limited	ReNew Power Private Limited	100%
Bidwal ReNewable Private Limited	ReNew Power Private Limited	100%
Zemira ReNewable Energy Limited (acquired on 31 March 18)	ReNew Power Private Limited	100%
ReNew Wind Energy (Rajasthan Four) Private Limited	ReNew Solar Power Private Limited*	100%
ReNew Wind Energy (Maharashtra) Private Limited	ReNew Solar Power Private Limited*	100%
Bhumi Prakash Private Limited	ReNew Solar Power Private Limited*	100%
Tarun Kiran Bhoomi Private Limited	ReNew Solar Power Private Limited*	100%
ReNew Wind Energy (MP Three) Private Limited	ReNew Solar Power Private Limited*	100%

* ReNew Solar Power Private Limited is a wholly owned subsidiary of ReNew Power Private Limited

Entities forming part of the restricted group listed above are incorporated in India and are engaged in generation of power through non-conventional and renewable energy sources.

The Unaudited Special Purpose Interim Combined Financial Statements were approved for issue in accordance with a resolution of the directors on 10th October 2020.

2 Purpose of Unaudited Special Purpose Interim Combined Financial Statements

The Interim Combined Financial Statements are Unaudited Special Purpose Financial Statements which have been prepared for the purpose of the proposed issue of INR denominated Non-Convertible Debentures (referred to as "INR NCDs") to a Mauritian Foreign Portfolio Investor namely India Green Energy Holdings under Voluntary Retention Route as prescribed by the Reserve Bank of India, which in turn will issue USD denominated bonds (referred to as "FPI Bonds"). The FPI Bonds will be listed on Singapore Exchange Securities Trading Limited (SGX-ST). The Unaudited Special Purpose Interim Combined Financial Statements presented herein reflect the Restricted Group's results of operations, assets and liabilities and cash flows for the periods presented. The basis of preparation and significant accounting policies used in preparation of these Unaudited Special Purpose Interim Combined Financial Statements are set out in Note 3 below.

3 Significant accounting policies

3.1 Basis of preparation

The Unaudited Special Purpose Interim Combined Financial Statements have been prepared in accordance with the recognition and measurement principles of Ind AS 34 "Interim Financial Reporting" notified under Section 133 of the Companies Act, 2013 as amended from time to time, (except Ind AS 33, Earnings per Share), read with rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 (as amended) issued there under, presentation requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III), as applicable and the Guidance Note on Combined and Carve-out Financial Statements issued by the Institute of Chartered Accounts of India (the "Guidance Note") and other accounting principles generally accepted in India.

Management of the Parent company has prepared the Unaudited Special Purpose Interim Combined Financial Statements which comprise the Unaudited Interim Combined Balance Sheet as at 30 June 2020, the Unaudited Interim Combined Statement of Profit and Loss including other comprehensive income, Unaudited Interim Combined Statement of Cash Flows and Unaudited Interim Combined Statement of Changes in Equity for the period ended 30 June 2020, a summary of the significant accounting policies and other explanatory Information.

Management has prepared these Unaudited Special Purpose Interim Combined Financial Statements to depict the historical cost of the Restricted Group except for the following assets and liabilities which have been measured at fair value:

- Derivative financial instruments,
- Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments)

All intercompany transactions and balances within the Restricted Group have been eliminated in full. The transactions that have taken place with other related parties of entities forming part of the Restricted Group but not forming part of the Restricted Group have been disclosed in accordance with Ind AS 24 Related Party Disclosures.

The Unaudited Special Purpose Interim Combined Financial Statements are not necessarily indicative of the financial performance, financial position and cash flows of the Restricted Group that would have occurred if it had operated as a separate stand-alone Group of entities during the period presented nor of the Restricted Group’s future performance. The items in the Unaudited Special Purpose Interim Combined Financial Statements have been classified considering the principles under Ind AS 1, Presentation of Financial Statements and Division II of Schedule III of Companies Act 2013.

3.2 Basis of combination

The Unaudited Special Purpose Interim Combined Financial Statements have been prepared by combining like items of assets, liabilities. equity, income, expenses and cash flows of the entities forming part of Restricted Group. All the intragroup assets and liabilities, equity, income, expenses and cash flows relating to entities forming part of Restricted Group have been eliminated and profits or losses arising from intragroup transactions that are recognised in assets, such as inventory and fixed assets have been eliminated in full. All the inter-group transactions are undertaken on Arms Lengths basis. The resulting financial position may not be that which might have existed if the combining businesses had been a stand-alone business.

The carrying values pertaining to an entity, as reflected in the consolidated financial statements of the Parent, are used for the purpose of preparing Unaudited Special Purpose Interim Combined Financial Statements including fair value adjustment to assets and liabilities on acquisition along with corresponding impact on deferred taxes.

The non-controlling interest held by outsiders amount to INR 139 and INR 123 as of 30 June 2020 and 31 March 2020 respectively.

Share capital and reserves disclosed in the Unaudited Special Purpose Interim combined financial statements is not the legal capital and reserves of the Restricted Group and is the aggregation of the share capital and reserves of the individual combining entities.

Income taxes are arrived at by aggregation of the tax expenses actually incurred by the combining businesses, after considering the tax effects of any adjustments which is in accordance with the Guidance Note.

The accounting policies and estimates adopted in the preparation of the Unaudited Special Purpose Interim Combined Financial Statements are consistent with those used in the Special Purpose Combined Financial Statements for the year ended 31 March 2020.

Business Combination and Goodwill

Business combinations are accounted for using the acquisition method in the consolidated financial statements of the Parent

At the acquisition date of an entity being part of the Restricted Group by the Parent, the identifiable assets acquired and the liabilities assumed are recognised at their acquisition date fair values. For this purpose, the liabilities assumed include contingent liabilities representing present obligation and they are measured at their acquisition fair values irrespective of the fact that outflow of resources embodying economic benefits is not probable. However, the following assets and liabilities acquired are measured at the basis indicated below:

- Deferred tax assets or liabilities are recognised and measured in accordance with Ind AS 12 Income Tax.
- Reacquired rights are measured at a value determined on the basis of the remaining contractual term of the related contract. Such valuation does not consider potential renewal of the reacquired right.
- Potential tax effects of temporary differences and carry forwards of an acquiree that exist at the acquisition date or arise as a result of the acquisition are accounted in accordance with Ind AS 12

At the acquisition date of an entity being part of the Restricted Group by the Parent, the Parent assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred by the Parent over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Parent re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised as Parent's contribution in Other Equity.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Restricted Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

A cash generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

Where goodwill has been allocated to a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

There are no business combinations made by any of the entities forming part of Restricted Group.

3.3 Summary of significant accounting policies

a) Current versus non-current classification

The Restricted Group presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it is:

- Expected to be realised or intended to sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is treated as current when it is:

- Expected to be settled in normal operating cycle
- Held primarily for the purpose of trading
- Due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets/liabilities are classified as non-current assets/liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation/settlement in cash and cash equivalents. The entities forming part of the Restricted Group have identified twelve months as their operating cycle for classification of their current assets and liabilities.

b) Fair value measurement

The entities forming part of the Restricted Group measure financial instruments, such as, derivatives at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the entities forming part of the Restricted Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The entities forming part of the Restricted Group use valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For the purpose of fair value disclosures, the entities forming part of the Restricted Group have determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy.

At each reporting date, the management of the entities forming part of the Restricted Group analyse the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the accounting policies of the Restricted Group.

For assets and liabilities that are recognised in the Financial Statements on a recurring basis, the entities forming part of the Restricted Group determine whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

This note summarises the accounting policy for determination of fair value. Other fair value related disclosures are given in the relevant notes as following:

· Disclosures for significant estimates and assumptions (Refer Note 40)
· Quantitative disclosures of fair value measurement hierarchy (Refer Note 35)
· Financial instruments (including those carried at amortised cost) (Refer Note 34 and 35)

c) Revenue recognition

Revenue from contracts with customers

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services. The Group has generally concluded that it is the principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer.

Sale of power

Income from supply of power is recognised over time on the supply of units generated from plant to the grid as per terms of the Power Purchase Agreement (PPA) entered into with the customers.

The entities forming part of Restricted Group considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of power, the Group considers the effects of variable consideration and consideration payable to the customer (if any).

Transaction price - remaining performance obligation

The remaining performance obligation disclosure provides the aggregate amount of the transaction price yet to be recognised as at the end of the reporting period and an explanation as to when the Group expects to recognise these amounts in revenue. Applying the practical expedient as given in Ind AS 115, the Group has not disclosed the remaining performance obligation related disclosures for contracts as the revenue recognized corresponds directly with the value to the customer of the entity's performance completed to date.

(i) Variable consideration

If the consideration in a contract includes a variable amount, the Group estimates the amount of consideration to which it will be entitled in exchange for transferring the goods or service to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

Rebates

In some PPAs, the Group provide rebates in invoice if payment is made before the due date. Rebates are offset against amounts payable by the customers. To estimate the variable consideration for the expected future rebate, the Group applies the most likely method.

(ii) Consideration payable to customers

In some PPAs, Group has to pay consideration to customers. Consideration payable to customers are offset against the revenue recognised as and when sale of power occurs.

Income from liquidated damages and interest on advances

Income from liquidated damages and interest on advance is recognised after certainty of receipt of the same is established.

Dividend

Dividend income is recognised when the right of the entities forming part of the Restricted Group to receive dividend is established by the reporting date.

Interest income

For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset. When calculating the effective interest rate, the entities forming part of the Restricted Group estimate the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in other income in the Unaudited Special Purpose Interim Combined Statement of Profit and Loss.

Income from government grants

Refer note (f) for accounting policy.

Contract balances :

(i) Contract assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the entities forming part of Restricted Group perform by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

(ii) Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the entities forming part of Restricted Group have received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the entities forming part of Restricted Group transfer goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the entities forming part of Restricted Group perform under the contract.

(iii) Trade receivables

A receivable represents the right of entities forming part of Restricted Group to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in section (n) Financial instruments – initial recognition and subsequent measurement.

d) Foreign currencies

The Restricted Group Financial Statements are presented in Indian rupees (INR), which is also the functional currency of all entities forming part of Restricted Group. Functional currency is the currency of the primary economic environment in which the entities forming part of Restricted Group operates and is normally the currency in which the entities forming part of Restricted Group primarily generates and expends cash.

Transactions and balances

Transactions in foreign currencies are initially recorded by the Restricted Group at their functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

Exchange differences arising on settlement or translation of monetary items are recognised in profit and loss.

e) Income taxes

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in India. Current income tax relating to items recognised outside profit and loss is recognised outside profit and loss (either in other comprehensive income or in equity). Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate. Current income tax assets and liabilities are offset if a legally enforceable right exists to set off these and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss

- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

In situations where the entities forming part of the Restricted Group are entitled to a tax holiday under the Income-tax Act, 1961, enacted in India, no deferred tax (asset or liability) is recognized in respect of temporary differences which reverse during the tax holiday period. Deferred taxes in respect of temporary differences which reverse after the tax holiday period are recognized in the year in which the temporary differences originate. However, the entities forming part of the Restricted Group restrict the recognition of deferred tax assets to the extent that it has become reasonably certain that sufficient future taxable income will be available against which such deferred tax assets can be realized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit and loss is recognised outside profit and loss (either in OCI or equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Minimum Alternate Tax

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the entities forming part of the Restricted Group will pay normal income tax. Accordingly, MAT is recognised as deferred tax asset in the Unaudited Special Purpose Interim Combined Balance Sheet when it is probable that future economic benefit associated with it will flow to the entities forming part of the Restricted Group.

f) Government grants

Government grants are recognized where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant is related to an expense item, it is recognized as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant is related to an asset, it is recognized as income in equal amounts over the expected useful life of the related asset.

When the entities forming part of the Restricted Group receive grants of non-monetary assets, the asset and the grant are recorded at fair value amounts and released to Statement of Profit and Loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset i.e. by equal annual instalments.

The entities forming part of the Restricted Group presents grants related to an expense item as other income in the Statement of Profit and Loss. Thus, Generation based incentive and Sale of emission renewable certificates have been recognised as other income.

Generation based incentive

Generation based incentive is recognized on the basis of supply of units generated by the entities forming part of the Restricted Group to the state electricity board from the eligible project in accordance with the scheme of the "Generation Based Incentive (GBI) for Grid interactive Wind Power Projects"

g) Property, plant and equipment

On transition date to Ind AS, the entities forming part of the restricted group have elected to continue with the carrying value of all of its property, plant and equipment recognised as at 1 April 2015 measured as per previous GAAP and use that carrying value as the deemed cost of the property, plant and equipment.

Capital work in progress and freehold land are stated at cost, net of accumulated impairment loss, if any. Property, plant and equipment except freehold land is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Restricted group depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred.

Subsequent costs

The cost of replacing a part of an item of property, plant and equipment is recognised in the carrying amount of the item of property, plant and equipment, if it is probable that the future economic benefits embodied within the part will flow to the entities forming part of the Restricted Group and its cost can be measured reliably with the carrying amount of the replaced part getting derecognised. The cost for day-to-day servicing of property, plant and equipment are recognised in Statement of Profit and Loss as and when incurred.

Derecognition

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the Unaudited Special Purpose Interim Combined Statement of Profit and Loss when the asset is derecognised.

Gains or losses arising from de-recognition of fixed assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the Statement of Profit and Loss when the asset is derecognized.

h) Depreciation / amortisation of property, plant and equipment and intangibles

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets as follows:

Category	Useful life (in years)
Plant and equipment (wind and solar power projects)*	18-25
Furniture & fixture	10
Office equipment	5
Computers	3
Customer contracts	Life of respective power purchase agreements

* Based on an external technical assessment, the management believes that the useful lives as given above and residual value of 0%-5%, best represents the period over which management expects to use its assets and its residual value. The useful life of plant and equipment is different from the useful life as prescribed under Part C of Schedule II of Companies Act, 2013.

The residual values, useful lives and methods of depreciation of property, plant and equipment and other intangible assets are reviewed at each financial year end and adjusted prospectively, if appropriate.

i) Leases

The Restricted Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

As a lessee

Entities forming part of Restricted Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. Entities forming part of Restricted Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

Entities forming part of Restricted Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over shorter of the lease term and the estimated useful lives of the assets.

If ownership of the leased asset transfers to the respective entities at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.
The right-of-use assets are also subject to impairment. Refer to the accounting policies in section (l) Impairment of non-financial assets.

ii) Lease liabilities

At the commencement date of the lease, the entities forming part of Restricted Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including insubstance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the respective entities and payments of penalties for terminating the lease, if the lease term reflects the respective entities exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the entities forming part of Restricted Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

iii) Short-term leases and leases of low-value assets

The entities forming part of Restricted Group applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short-term leases and leases of low value assets are recognised as expense on a straight-line basis over the lease term.

As a lessor

Leases in which the entities forming part of Restricted Group does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

j) Inventories

Inventories are valued at the lower of cost and net realisable value.
Costs incurred in bringing each product to its present location and condition are accounted for as follows:
Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on first in, first out basis.
Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

k) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale. Borrowing costs consist of interest, discount on issue, premium payable on redemption and other costs that an entity incurs in connection with the borrowing of funds (this cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs). The borrowing costs are amortised basis the Effective Interest Rate (EIR) method over the term of the loan. The EIR amortisation is recognised under finance costs in the Statement of Profit and Loss. The amount amortized for the period from disbursement of borrowed funds upto the date of capitalization of the qualifying assets is added to cost of the qualifying assets.

l) Impairment of non-financial assets

The entities forming part of the Restricted Group assess, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the entities forming part of the Restricted Group estimate the asset’s recoverable amount. An asset’s recoverable amount is the higher of an asset’s or cash-generating units (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre -tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The entities forming part of the Restricted Group bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Restricted Group’s CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the entities forming part of the Restricted Group extrapolate cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the Statement of Profit and Loss.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the entities forming part of the Restricted Group estimate the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying value of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Profit and Loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as an increase in revaluation.

Goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group’s cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

A cash generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

Where goodwill has been allocated to a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

m) Provisions

Provisions are recognised when the entities forming part of the Restricted Group have a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the entities forming part of the Restricted Group expect some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the Statement of Profit and Loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

n) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit and loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the entities forming part of the Restricted Group commit to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and

b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance expense in the Statement of Profit and Loss. The losses arising from impairment are recognised in the Statement of Profit and Loss.

Debt instruments at fair value through other comprehensive income (FVTOCI)

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and

b) The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the entities forming part of the Restricted Group recognize interest income, impairment losses and reversals and foreign exchange gain or loss in the Statement of Profit and Loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to Statement of Profit and Loss. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

Debt instruments at fair value through profit and loss (FVTPL)

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the entities forming part of the Restricted Group may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The entities forming part of the Restricted Group have not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

Equity investments

All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS 103 applies are classified as at FVTPL. For all other equity instruments, the entities forming part of the Restricted Group may make an irrevocable election to present the subsequent changes in the fair value in OCI. The entities forming part of the Restricted Group make such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the entities forming part of the Restricted Group decide to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to Statement of Profit and Loss, even on sale of investment. However, the entities forming part of the Restricted Group may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised when:

- The rights to receive cash flows from the asset have expired, or
- The entities forming part of the respective Restricted Group have transferred their rights to receive cash flows from the asset or have assumed the obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and

Either the entities forming part of the Restricted Group have transferred substantially all the risks and rewards of the asset, or has neither transferred nor retained substantially all the risks and rewards of the asset, but have transferred control of the asset.

When the entities forming part of the Restricted Group have transferred their rights to receive cash flows from an asset or have entered into a pass-through arrangement, they evaluate if and to what extent they have retained the risks and rewards of ownership. When they have neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the entities forming part of the Restricted Group continue to recognise the transferred asset to the extent of the continuing involvement of the entities forming part of the Restricted Group. In that case, the entities forming part of the Restricted Group also recognise an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the entities forming part of the Restricted Group have retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the entities forming part of the Restricted Group could be required to repay.

Impairment of financial assets

In accordance with Ind AS 109, the Restricted Group applies expected credit loss (ECL) model for measurement and recognition of impairment loss on all the financial assets and credit risk exposure.

The entities forming part of the Restricted Group follows 'simplified approach for recognition of impairment loss allowance on trade receivables or contract revenue receivables.

The application of simplified approach does not require the entities forming part of the Restricted Group to track changes in credit risk. Rather it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the entities forming part of the Restricted Group determine that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/expense in the Unaudited Special Purpose Interim Combined Statement of Profit and Loss.

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit and loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and in the case of loans and borrowings and payables, net of directly attributable transaction costs. The financial liabilities of the entities forming part of the Restricted Group include trade and other payables, derivative financial instruments, loans and borrowings including bank overdraft.

Subsequent measurement

The measurement of financial liabilities depends on their classification as discussed below:-

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in Statement of Profit and Loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss. This category generally applies to borrowings.

The entities forming part of the Restricted Group recognise debt modifications agreed with lenders to restructure their existing debt obligations. Such modifications are done to take advantage of falling interest rates by cancelling the exposure to high interest fixed rate debt, pay a fee or penalty on cancellation and replace it with debt at a lower interest rate (exchange of old debt with new debt). The qualitative factors considered to be relevant for modified financial liabilities include, but are not limited to, the currency that the debt instrument is denominated in, the interest rate (that is fixed versus floating rate), conversion features attached to the instrument and changes in covenants. The accounting treatment is determined depending on whether modifications or exchange of debt instruments represent a settlement of the original debt or merely a renegotiation of that debt. The exchange of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability.

Redeemable non convertible preference shares

Redeemable non convertible preference shares are separated into liability and equity components based on the terms of the contract. On issuance of the redeemable non convertible preference shares, the fair value of the liability component is determined using a market interest rate for an equivalent non-convertible instrument. This amount is classified as a financial liability measured at amortised cost (net of transaction costs) until it is extinguished on conversion. The remainder of the proceeds is allocated to the conversion option that is recognised and included in equity. Transaction costs are deducted from equity, net of associated income tax.

Compulsorily Convertible Preference shares (CCPS)

Compulsorily Convertible Preference shares are accounted for as Instruments entirely equity in nature since conversion option meets Ind AS 32 criteria for fixed to fixed classification and the dividend distribution is discretionary in nature.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged/ cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

o) Derivative financial instruments and hedge accounting

Initial recognition and subsequent measurement

Entities forming part of restricted group uses derivative financial instruments, such as interest rate swaps and call/put options etc., to hedge its interest rate risks and foreign currency risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to profit or loss, except for the effective portion of cash flow hedges, which is recognised in OCI and later reclassified to profit or loss when the hedge item affects profit or loss or treated as basis adjustment if a hedged forecast transaction subsequently results in the recognition of a non-financial asset or non-financial liability.

For the purpose of hedge accounting, hedges are classified as:
- Fair value hedges when hedging the exposure to changes in the fair value of a recognised asset or liability or an unrecognised firm commitment
- Cash flow hedges when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment
- Hedges of a net investment in a foreign operation

At the inception of a hedge relationship, the entities forming part of restricted group formally designates and documents the hedge relationship to which the restricted group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes the restricted group’s risk management objective and strategy for undertaking hedge, the hedging/ economic relationship, the hedged item or transaction, the nature of the risk being hedged, hedge ratio and how the entity will assess the effectiveness of changes in the hedging instrument’s fair value in offsetting the exposure to changes in the hedged item’s fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.
Hedges that meet the strict criteria for hedge accounting are accounted for, as described below:

(i) Cash flow hedges

The effective portion of the gain or loss on the hedging instrument is recognised in OCI in the cash flow hedge reserve, while any ineffective portion is recognised immediately in the Unaudited Special Purpose Interim Combined Statement of Profit and Loss.
The entities forming part of restricted group uses interest rate swaps and call/put options etc. as hedges of its exposure to interest rate risks and foreign currency risks in the foreign currency loan. The ineffective portion relating to foreign currency loan is recognised in other income or expenses.

Amounts recognised as OCI are transferred to profit or loss when the hedged transaction affects profit or loss, such as when the hedged item affects the Unaudited Special Purpose Interim Combined Statement of Profit and Loss or treated as basis adjustment if a hedged item subsequently results in recognition of a non-financial asset or liability.
If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover (as part of the hedging strategy), or if its designation as a hedge is revoked, or when the hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss previously recognised in OCI remains separately in equity until the forecast transaction occurs or the foreign currency firm commitment is met.

p) Cash and cash equivalents

Cash and short-term deposits in the balance sheet comprise cash at banks and cash in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the Statement of cash flows, cash and cash equivalents consist of cash and short term deposits, as defined above, net off bank overdrafts as they considered an integral part of the entities forming part of the Restricted Group's cash management.

q) Measurement of EBITDA

The Restricted Group has elected to present earnings before interest, tax, depreciation and amortization (EBITDA) as a separate line item on the face of the Statement of Profit and Loss. The Restricted Group measure EBITDA on the basis of profit/ (loss) from continuing operations. In their measurement, the companies include interest income but do not include depreciation and amortization expense, finance costs and tax expense.

r) Events occurring after the Balance Sheet date

Impact of events occurring after the balance sheet date that provide additional information materially effecting the determination of the amounts relating to conditions existing at the balance sheet date upto the date of the approval for issue of these Spcecial Purpose Combined Financial Statements by the Board of Directors of the respective entities are adjusted to respective assets and liabilities.

The entities forming part of the Restricted Group do not adjust the amounts recognised in its Special Puporse Combined Financial Statements to reflect non-adjusting events after the reporting period.

The entities forming part of the Restricted Group make disclosures in the financial statement in cases of significant events.

s) Contingent liabilities

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entities forming part of the Restricted Group or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

Movement in hedge reserve, net of taxes (refer note 32)	(13)
At 30 June 2020	**-**

Nature and purpose

The Restricted Group uses hedging instruments as part of its management of foreign currency risk and interest rate risk associated on borrowings. For hedging foreign currency and interest rate risk, the entities forming part of Restricted Group uses foreign currency forward contracts, cross currency swaps, foreign currency option contracts and interest rate swaps. To the extent these hedges are effective, the change in fair value of the hedging instrument is recognised in the cash flow hedging reserve. Amounts recognised in the cash flow hedging reserve is reclassified to the Statement of Profit and Loss when the hedged item affects profit and loss (example: principal and interest payments).

Notes:

(i) **Term loan from bank (secured)**
Term loan from banks are secured by pari passu first charge by way of mortgage of all the present and future immovable properties, hypothecation of movable assets, book debt, operating cash flows, receivables, commissions, revenue of whatsoever nature, all bank accounts and all intangibles assets, assignment of all rights, title, interests, benefits, claims etc. of project documents and insurance contracts of the entities forming part of the Restricted Group.

(ii) **Term loan from financial institutions (secured)**
Secured by a first pari passu charge by way of mortgage on immovable properties, first pari passu charge by way of hypothecation of tangible moveable assets, first charge on all the current assets, other intangible assets and accounts. Further secured by way of assignment of all the rights, title, interest, benefit, claims and demands under all the project agreements, letter of credit, insurance contracts and proceeds, guarantees, performance bond etc. of the respective company.

(iii) All the loans are covered by corporate guarantee of ReNew Power Private Limited.

(iv) Zemira Renewables Private Limited (referred to as “Zemira”) has an outstanding term loan balance of INR 3,081 from Piramal Capital & Housing Finance Limited and PHL FINVEST Private Limited (collectively referred to as “Piramal”) as at 30 June 2020. As per terms of agreement with Piramal, principal instalment of INR 29 and interest of INR 33 was due on 30 June 2020 against which Zemira has availed moratorium from the Piramal till 30 September 2020 through approval letters dated 28 July 2020 under “Reserve Bank of India’s COVID 19 - Regulatory Package dated 27 March 2020”. Subsequently on 23 September 2020, Zemira issued 14.45% redeemable Non-Convertible debentures (referred to as “NCDs”) amounting to INR 3,075 to India Investment Opportunities Fund. On 24 September 2020, the outstanding balance for existing term loan increased to INR 3,181 (with accrual of interest till such date) and the proceeds from NCDs have been utilised to partially repay the term loan balance to an extent of INR 3,075. Zemira plans to issue further NCDs to repay the remaining unpaid balance of existing term loan i.e. INR 106 and repay such balance by 31 March 2021. The NCDs issued, are repayable in quarterly instalments starting from September 2020 to March 2036.

(v) Entities forming part of the Restricted Group have not created charge on security against outstanding loan balances given below mainly on account of pending approvals from government agencies with respect to land mortgages. The charge will be created as and when the respective entities get the necessary approvals from these agencies. None of the entities listed below have received any approval till date.

The managing director of ReNew Power Private Limited takes decisions in respect of allocation of resources and assesses the performance basis the reports/ information provided by functional heads and is thus considered to be the Chief Operating Decision Maker (CODM).

The Restrcited Group discloses segment information in a manner consistent with internal reporting to group's Managing Director. The entities forming part of the Restricted Group have segments based on type of business operations. The reportable segments of Restricted Group under Ind AS are Wind Power and Solar Power which predominantly relate to generation and sale of electricity and construction activities. The entities forming part of the Restricted Group does not operate in more than one geographical segment. The Restricted Group discloses in the segment information operating profit, comparable operating profit and comparable EBITDA.

No operating segment has been aggregated to form the above reportable operating segments. Further, total assets and liabilities balances for each reportable segment are not reviewed by or provided to CODM.

	For the period ended 30 June 2020			**For the period ended 30 June 2019**		
	Wind Power	**Solar Power**	**Total**	**Wind Power**	**Solar Power**	**Total**
Sale of power and sale of renewable energy certificates	775	231	1,006	877	235	1,112
Revenues from operations	**775**	**231**	**1,006**	**877**	**235**	**1,112**
Less: Inter-segment	-	-	-	-	-	-
Revenues from external customers	**775**	**231**	**1,006**	**877**	**235**	**1,112**
Interest income	29	12	41	28	10	38
Other income (other than interest income)	18	-	18	18	0	18
Total income	**822**	**243**	**1,065**	**923**	**245**	**1,168**
Less: Other expenses	90	41	131	86	31	117

Depreciation and amortization expense (net)			293			292
Finance costs			592			558
Profit before tax			**49**			**201**

The Revenues from three major customers amounts to INR 581 (30 June 2019 INR 659) each of which contributes more than 10% of the total revenue of the Group.

32 Hedging activities and derivatives

Derivatives designated as hedging instruments

The entities forming part of the Restricted Group use certain types of derivative financial instruments (viz. foreign currency forwards, cross-currency interest rate swap) to manage/mitigate their exposure to foreign exchange and interest risk. Further, the entities forming part of the Restricted Group designates such derivative financial instruments (or its components) as hedging instruments for hedging the exchange rate fluctuation and interest risk attributable to either a recognised item or a highly probable forecast transaction ('cash flow hedge'). The effective portion of changes in the fair value of derivative financial instruments (or its components) that are designated and qualify as cash flow hedges, are recognised in the other comprehensive income and held in cash flow hedge reserve - a component of equity. Any gains / (losses) relating to the ineffective portion, are recognised immediately in the Statement of Profit and Loss within other expenses/ other income. The amounts accumulated in equity for highly probable forecast transaction are added to carrying value of non financial asset or non financial liability as basis adjustment, other amounts accumulated in equity are re-classified to the Statement of Profit and Loss in the year when the hedged item affects profit / (loss).

At any point of time, when a forecast transaction is no longer expected to occur, the cumulative gains / (losses) that were reported in equity is immediately transferred to the Statement of Profit and Loss within other expenses / other income.

Cash flow hedges

Hedge has been taken against exposure to foreign currency risk and variable interest outflow on external commercial borrowings and buyer's credit. Terms of the swaps and their respective impact on OCI and Statement of Profit and Loss is as below:-

- Buyers credit (included in short term borrowings)

Pay fixed INR and receive USD and pay fixed interest at 7.37% to 7.80% p.a. and receive a variable interest at 6 month LIBOR plus 0.45% p.a. to 6 month LIBOR plus 1.10% p.a. on the notional amount.

'The cash flow hedges through forward is USD Nil (31 March 2020 : 7,729,200) outstanding at the period ended 30 June 2020 were assessed to be highly effective and cumulative impact of mark to market gain and restatement of hedged item is INR Nil (31 March 2020: (INR 6)) with a deferred tax asset of INR Nil (31 March 2020: deferred tax asset of INR 19), is included in OCI.

Foreign currency and Interest rate risk

Forward contracts and swaps measured at fair value through OCI are designated as hedging instruments in cash flow hedges of interest and principal payments in USD.

	30 June 2020		31 March 2020	
	Assets	**Liabilities**	**Assets**	**Liabilities**
Forward contracts designated as hedging instruments	-	-	34	-

Hedging reserve movement

	As at 30 June 2020	As at 31 March 2020
Balance at the beginning of the period	**13**	**5**
Gain/(loss) recognised on cash flow hedges	6	(23)
Income tax relating to gain/loss recognized on cash flow hedges	(19)	24
Gain/(loss) reclassified to profit and loss as hedged future cash flows are no longer expected to occur	-	9
Income tax relating to gain/loss reclassified to profit and loss as hedged future cash flows are no longer expected to occur	-	(2)
Balance at the end of the period	**-**	**13**

33 Commitments, liabilities and contingencies (to the extent not provided for)

(i) Contingent liabilities

The entities forming part of the Restricted Group have no contingent liability as on 30 June 2020. (31 March 2020: INR Nil).

(ii) Commitments

Estimated amount of contracts remaining to be executed on capital account and not provided for

There are no capital commitments outstanding as on 30 June 2020 (31 March 2020: INR Nil).

34 Fair values

Set out below, is a comparison by class of the carrying amounts and fair value of the financial instruments of the entities forming part of the Restricted Group:

	30 June 2020		31 March 2020	
	Carrying value	Fair value	Carrying value	Fair value
Financial assets				
Measured at amortised cost				
Loans-non current	87	87	87	87
Bank deposits with remaining maturity for more than twelve months	0	0	0	0
Trade receivables	1,847	1,847	1,740	1,740
Cash and cash equivalent	594	594	224	224
Bank balances other than cash and cash equivalent	1,772	1,772	2,007	2,007
Loans-current	935	935	935	935
Other current financial assets	330	330	295	295
Measured at FVOCI				
Derivative instruments	-	-	34	34
Financial liabilities				
Measured at amortised cost				
Long term borrowings	15,080	15,080	14,767	14,767
Short-term borrowings	5,007	5,007	5,588	5,588
Trade payables	773	773	730	730
Other current financial liabilities	2,540	2,540	2,439	2,439

The management of the entities forming part of the Restricted Group assessed that cash and cash equivalents, bank balances other than cash and cash equivalent, loans-current, trade receivables, interest accrued on unsecured loan, trade payables, other current financial liabilities and other current financial assets approximate their carrying amounts largely due to the short-term maturities of these instruments.

The following methods and assumptions were used to estimate the fair values:

i The fair values of the entities forming part of the Restricted Group's term loans from banks and financial institutions including current maturities are determined by using Discounted Cash Flow (DCF) method using discount rate that reflects the issuer's borrowing rate as at the end of the reporting period. They are classified as level 3 fair values in the fair value hierarchy due to the inclusion of unobservable inputs including own credit risk. The own non-performance risk as at 30 June 2020 was assessed to be insignificant.

ii The fair values of the security deposits given are determined by using Discounted Cash Flow (DCF) method using discount rate that reflects the lending rate as at the end of the reporting period. They are classified as level 3 fair values in the fair value hierarchy due to the inclusion of unobservable inputs including counterparty credit risk.

iii The entities forming part of the Restricted Group enter into derivative financial instruments with various counter parties, principally financial institutions with investment grade credit ratings. Cross currency interest rate swaps are valued using valuation techniques, which employs the use of market observable inputs. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates, yield curves of the currency, interest rate curves and forward rate curves of the underlying instrument. The changes in counterparty credit risk had no material effect on the hedge effectiveness assessment for derivatives designated in hedge relationships.

35 Fair value hierarchy

The entities forming part of the Restricted Group categorize assets and liabilities measured at fair value into one of three levels depending on the ability to observe inputs employed in their measurement which are described as follows:
i) Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
ii) Level 2 - Inputs are inputs that are observable, either directly or indirectly, other than quoted prices included within level 1 for the asset or liability.
iii) Level 3 - Inputs are unobservable inputs for the asset or liability reflecting significant modifications to observable related market data or assumptions about pricing by market participants.

The following table provides the fair value measurement hierarchy of the assets and liabilities of the entities forming part of the Restricted Group :-

Quantitative disclosures fair value measurement hierarchy for assets/liabilities as at period/year end:

	Level of fair value measurement	30 June 2020		31 March 2020	
		Carrying value	Fair value	Carrying value	Fair value
Financial assets measured at FVOCI					
Derivative instruments	Level 2	-	-	34	34
		-	**-**	**34**	**34**
Financial assets measured at amortised cost

Security deposits	Level 3	-	-	0	0
Total		**87**	**87**	**87**	**87**
Financial assets (Non current): Others					
Bank deposits with remaining maturity for more than twelve months	Level 3	0	0	0	0
Total		**0**	**0**	**0**	**0**

Financial liabilities measured at amortised cost					
Liability component of preference shares	Level 3	201	201	196	196
Term loan from banks	Level 3	5,320	5,320	5,020	5,020
Term loan from financial institution	Level 3	9,559	9,559	9,551	9,551
Total		**15,080**	**15,080**	**14,767**	**14,767**

Particulars	**Fair value hierarchy**	**Valuation technique**	**Inputs used**
Financial assets measured at amortised cost			
Security deposits	Level 3	Discounted cash flow	Prevailing interest rates in the market, Future cash flows
Bank deposits with remaining maturity for more than twelve months	Level 3	Discounted cash flow	Prevailing interest rates in the market, Future cash flows
Interest accrued on loans to related parties	Level 3	Discounted cash flow	Prevailing interest rates in the market, Future cash flows
Financial liabilities measured at amortised cost			
Term loan from financial institution	Level 3	Discounted cash flow	Prevailing interest rates in the market, Future cash flows
Term loan from banks	Level 3	Discounted cash flow	Prevailing interest rates in the market, Future cash flows
Financial liabilities measured at fair value through other comprehensive income			
Derivative instruments	Level 2	Market value techniques	Forward foreign currency exchange rates, interest rates to discount future cash flows

-----------------------------------This space has been left blank intentionally---------------------------------------

36 Financial risk management objectives and policies

The Restricted Group's principal financial liabilities comprise loans and borrowings, trade payables and other financial liabilities.
The main purpose of these financial liabilities is to finance the Restricted Group's operations and to support its operations. The Restricted Group's financial assets include loans, trade and other receivables, and cash and cash equivalents and other financial assets.

The Restricted Group is exposed to market risk, credit risk and liquidity risk. The Restricted Group's senior management oversees the management of these risks. The Restricted Group's senior management is supported by a various sub committees that advises on financial risks and the appropriate financial risk governance framework for the Restricted Group. These committees provides assurance to the Restricted Group's senior management that the Restricted Group's financial risk activities are governed by appropriate policies and procedure and that financial risks are identified, measured and managed in accordance with the Restricted Group's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each risk, which are summarised as below.

Market risk

Market risk is the risk that the Restricted Group's assets and liabilities will be exposed to due to a change in market prices that determine the valuation of these financial instruments. Market risk comprises 3 types of risk: interest rate risk, currency risk and other price risk such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits and derivative financial instruments.
The sensitivity analyses in the following sections relate to the position as at 30 June 2020. The sensitivity analyses have been prepared on the basis that the amount of net debt, the ratio of fixed to floating interest rates of the debt and derivatives and the proportion of financial instruments in foreign currencies are all constant and on the basis of hedge designations in place as at 30 June 2020.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Restricted Group is exposed to interest rate risk primarily from the external borrowings that are used to finance their operations. In case of external commercial borrowings ("ECB") and buyers credit the Restricted Group believes that the exposure of the Restricted Group to changes in market interest rates is insignificant as the respective companies manage the risk by hedging the changes in the market interest rates through cross currency interest rate swaps. The Restricted Group also monitors the changes in interest rates and actively re-finances its debt obligations to achieve an optimal interest rate exposure.

Interest rate sensitivity

The following table demonstrates the sensitivity to a reasonable possible change in interest rates on financial liabilities, i.e. borrowings in INR and USD. With all other variables held constant, the entities forming part of the Restricted Group's profit before tax is affected through the impact on financial assets, as follows:

	30 June 2020		**30 June 2019**	
	Increase/decrease in basis points	**Effect on profit before tax**	**Increase/decrease in basis points**	**Effect on profit before tax**
INR	+/(-)50	(-)/+ 22	+/(-)50	(-)/+ 21
	Increase/decrease in basis points	**Effect on equity**	**Increase/decrease in basis points**	**Effect on equity**
INR	+/(-)50	(-)/+ 16	+/(-)50	(-)/+ 15

Foreign currency risk

Foreign Currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Restricted Group is exposed to foreign currency risk arising from imports of goods in US dollars and external commercial borrowings. The Restricted Group hedges its exposure to fluctuations on the translation into INR of its buyer's/supplier's credit and ECB by using foreign currency swaps and forward contracts. The entities forming part of the Restricted Group have followed a conservative approach for hedging the foreign currency risk so as to not use complex forex derivatives. The Restricted Group also monitors that the hedges do not exceed the underlying foreign currency exposure. The Restricted Group does not undertake any speculative transaction.

Foreign currency sensitivity

The Restricted Group has hedged its exposure to fluctuations on its buyer's/supplier's credit and ECB through forward contracts and cross currency swaps and thus foreign currency sensitivity has not been disclosed.

Credit risk

Credit risk from balances with banks is managed by treasury department of the entities forming part of the Restricted Group. Investments, in the form of fixed deposits, loans and other investments, of surplus funds are made only with banks and group companies and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed on an annual basis by the entities forming part of the Restricted Group, and may be updated throughout the year subject to approval of respective entities finance committee. The limits are set to minimize the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

Further the entities forming part of the Restricted Group sought to reduce counterparty credit risk under our long-term contracts in part by entering into power sales contracts with utilities or other customers of strong credit quality and we monitor their credit quality on an on going basis.
The maximum credit exposure to credit risk for the components of the balance sheet at 30 June 2020 and 31 March 2020 is the carrying amount of all the financial assets.

Trade receivables

Customer credit risk is managed basis established policies of the entities forming part of the Restricted Group, procedures and controls relating to customer credit risk management. Outstanding customer receivables are regularly monitored. The entities forming part of the Restricted Group do not hold collateral as security.

The entities forming part of the Restricted Group have state utilities/government entities as it's customers with high credit worthiness, therefore, the entities forming part of the Restricted Group do not see any risk related to credit. The credit quality of the customers other than state utilities/government entities is evaluated based on their credit ratings and other publicly available data.

Financial instruments and credit risk

Credit risk from balances with banks is managed by group's treasury department. Investments, in the form of fixed deposits, of surplus funds are made only with banks and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed on an annual basis by the respective entity forming part of the Restricted Group, and may be updated throughout the year subject to approval of group's finance committee. The limits are set to minimize the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

Liquidity risk

Liquidity risk is the risk that the entities forming part of the Restricted Group will encounter in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The approach of the entities forming part of the Restricted Group to manage liquidity is to ensure , as far as possible, that these will have sufficient liquidity to meet their respective liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risk damage to their reputation.
The entities forming part of the Restricted Group assessed the concentration of risk with respect to refinancing its debt and concluded it to be low. The entities forming part of the Restricted Group have access to a sufficient variety of sources of funding and debt maturing within 12 months can be rolled over with existing lenders.

The entities forming part of the Restricted Group rely mainly on long-term debt obligations to fund their construction activities. To the extent available at acceptable terms, utilized non-recourse debt to fund a significant portion of the capital expenditures and investments required to construct and acquire our wind power plants and related assets. Our non-recourse financing is designed to limit cross default risk to the Parent Company or other subsidiaries and affiliates. Our non-recourse long-term debt is a combination of fixed and variable interest rate instruments. External commercial borrowings which are at variable rate is fixed through the use of cross currency interest rate swaps. In addition, the debt is typically denominated in the currency that matches the currency of the revenue expected to be generated from the benefiting project, thereby reducing currency risk. In certain cases, the currency is matched through the use of derivative instruments. The majority of non-recourse debt is funded by banks and financial institutions, with debt capacity supplemented by unsecured loan from related party.

The table below summarizes the maturity profile of financial liabilities of Restricted Group based on contractual undiscounted payments:

Year ended 30 June 2020	**On demand**	**Less than 3 months**	**3 to 12 months**	**1 to 5 years**	**> 5 years**	**Total**
Borrowings						
Term loan from Banks*	-	-	-	3,552	5,966	9,518
Loans from Financial Institutions*	-	-	-	6,221	12,326	18,547
Liability component of preference shares	-	-	-	-	1,147	1,147
Short term borrowings						
Working capital term loan (secured)	-	-	1,230	-	-	1,230
Loan from related party	3,777	-	-	-	-	3,777
Lease liability	-	-	1	3	4	8
Other financial liabilities						
Current maturities of long term borrowings*	-	707	1,913	-	-	2,620
Interest accrued but not due on borrowings	923	24	-	-	-	947
Capital creditors	402	365	-	-	-	767
Trades payable	651	122	-	-	-	773

* Including future interest payments.

The entities forming part of the Restricted Group expect liabilities with current maturities to be repaid from net cash provided by operating activities of the entity to which the debt relates or through opportunistic refinancing activity or some combination thereof.

Year ended 31 March 2020	**On demand**	**Less than 3 months**	**3 to 12 months**	**1 to 5 years**	**> 5 years**	**Total**
Borrowings						
Term loan from banks*	-	-	-	3,305	5,705	9,010
Term loan from financial institutions*	-	-	-	6,169	12,425	18,594
Liability component of preference shares	-	-	-	-	1,147	1,147
Short term borrowings						
Working capital term loan (secured)	-	-	1,229	-	-	1,229
Loans from related party	3,777	-	-	-	-	3,777
Loan from body corporate	42	-	-	-	-	42
Buyer's / Supplier's credit	-	582	-	-	-	582
Lease liability	-	-	1	3	4	8
Other financial liabilities						
Current maturities of long term borrowings*	-	646	1,903	-	-	2,549
Interest accrued but not due on borrowings	857	21	-	-	-	878
Capital creditors	413	371	-	-	-	784
Trade payable	649	52	-	-	-	701

* Including future interest payments.

37 Capital management

For the purpose of the capital management by the respective entities forming part of the Restricted Group, capital includes issued equity capital, compulsory convertible preference shares, share premium and all other equity reserves attributable to the equity holders of the respective entities forming part of the Restricted Group. The primary objective of the respective entities forming part of the Restricted Group's capital management is to maximise the shareholder value.

The entities forming part of the Restricted Group manage their capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants.

To maintain or adjust the capital structure, respective entities forming part of the Restricted Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The respective entities forming part of the Restricted Group monitor capital using a gearing ratio, which is net debt divided by total capital plus net debt. The respective entities forming part of the Restricted Group includes within net debt, interest bearing loans and borrowings, trade and other payables, less cash and short-term deposits.

The policy of the respective entities forming part of the Restricted Group is to keep the gearing ratio to 3:1 during the construction phase and aim to enhance it to 4:1 post the construction phase. This is in line with industry rate. In the construction phase the entities forming part of Restricted Group manages the ratio at 3:1 through internal funding.

In order to achieve this overall objective, the capital management by the respective entities forming part of the Restricted Group, amongst other things, aims to ensure that they meet financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. There have been no breaches in the financial covenants of any interest-bearing loans and borrowing in the current year.

No changes were made in the objectives, policies or processes for managing capital during the period ended 30 June 2020.

38 Details of dues to Micro, Small and Medium Enterprises as defined under the MSMED Act, 2006

Since, these are interim financial statements, disclosure of details of dues to Micro, Small and Medium Enterprises as defined under the MSMED Act, 2006 has not been made. The entities forming part of the Restriced Group will report the same in the year end statutory financial statements.

39 Corporate social responsibility expenditure

Since these are interim financial statements, disclosure of expenditure on corporate social responsibility has not been made. The same shall be reported by the entities forming part of the Restricted Group in the year end statutory financial audit.

------------------------------------This space has been left blank intentionally--

40 Significant accounting judgments, estimates and assumptions

The preparation of Unaudited Special Purpose Interim Combined Financial Statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the accompanying disclosures. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

In the process of applying the accounting policies management has made certain judgements, estimates and assumptions. The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The entities forming part of the Restricted Group based their assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the entities forming part of the Restricted Group. Such changes are reflected in the assumptions when they occur.

A) Accounting judgements:

Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgment is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

The entities forming part of the Restricted Group makes various assumptions and estimates while computing deferred taxes which include production related data (PLFs), projected operations and maintenance costs, projected finance costs, proposed availment of deduction under section 80IA of the Income Tax Act, 1961 and the period over which such deduction shall be availed, accelerated depreciation, other applicable allowances, usage of brought forward losses etc. While these assumptions are based on best available facts in the knowledge of management as on the balance sheet date however, they are subject to change year on year depending on the actual tax laws and other variables in the respective year. Given that the actual assumptions which would be used to file the return of income shall depend upon the tax laws prevailing in respective year, management shall continue to reassess these assumptions while calculating the deferred taxes on each balance sheet date and the impact due to such change, if any, is considered in the respective year.

Depreciation on property, plant and equipment

Depreciation on property, plant and equipment is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management. Considering the applicability of Schedule II of Companies Act, 2013, the management has re-estimated useful lives and residual values of all its property, plant and equipment. The management believes that depreciation rates currently used fairly reflect its estimate of the useful lives and residual values of property, plant and equipment, though these rates in certain cases are different from lives prescribed under Schedule II of the Companies Act, 2013.

Basis legal opinion obtained, management is of the view that application of CERC and/or SERC rates for the purpose of accounting for depreciation expenses is not mandatory. Hence, the entities forming part of the Restricted Group are depreciating the assets bases on life as determined by an expert.

B) Estimates and assumptions:

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values.

Assumptions include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 34 and 35 for further disclosures.

Related party transactions

ReNew Power Private Limited along with all its subsidiaries collectively referred as "the Group" have entered into inter-company transactions as explained

Management shared services

Employee benefit costs and other common expenses are incurred by the Ultimate Holding Company and Holding Company. These expenses are allocated to all the entities of the Group in the form of 'Management Shared Services'. Allocation of cost to the entities involves various estimates including retention, allocation of cost for projects under construction vis-a-vis operating projects, profit mark-up which are assessed through an external expert.

Inter-group unsecured loan

The Group uses unsecured loans to fund requirements of various entities. These loans carry interest rate of 8% (approximates 3-year government bond yield).

Financial instrument

The Group makes inter-group investments in the form of RNCPS. These investment carries interest at a nominal rate and are accounted for as compound financial instruments under Ind AS 32. The rate used for discounting the future cash flows approximate the average market interest rate of borrowings availed by Group.

41 Parent's support

i) **For Restricted Group**

The combined current liabilities of the Restricted Group as on 30 June 2020 exceed the combined current assets with the combined current ratio being 0.67:1. The primary reason for this is due to unsecured loans provided by RPPL and ReNew Solar Power Private Limited (wholly owned subsidiary of RPPL) to certain entities forming part of the Restricted Group which are repayable on demand and hence these are classified as a current liability in these financial statements. The management of RPPL as well as the project lenders consider these unsecured loans as equity contribution for the purposes of project financing.

Further, RPPL and ReNew Solar Power Private Limited would consider the financial position and liquidity of the respective entities forming part of the Restricted Group prior to making any demand for repayment of such unsecured loans and interest accrued thereon. This shall be done to ensure support by RPPL and ReNew Solar Power Private Limited towards the entities in meeting their operating requirements and liabilities as and when they fall due. Further RPPL has issued an unconditional letter of support for continued operational and financial support in favour of entities forming part of Restricted Group.

ii) **For ReNew Wind Energy (AP) Private Limited**

As at 30 June 2020, ReNew Wind Energy (AP) Private Limited has borrowing obligations due for repayment to IFCI Limited in financial year 2020-21 amounting to INR 1,230. The entity does not have sufficient funds available to make full repayments of this balance and intends to re-finance the borrowing. Management of ReNew Wind Energy (AP) Private Limited believes that the entity would be able to re-finance the borrowing obligation in order to make repayments on the due date. However, in the circumstance the entity is unable to do so, RPPL, the holding company, would provide financial support to the entity in order to ensure timely repayment of these borrowings. Further RPPL has issued an unconditional letter of support for continued operational and financial support in favour of ReNew Wind Energy (AP) Private Limited.

iii) **For Zemira Renewable Energy Limited**

There has been delays in revenue collection from Southern Power Distribution Company of Andhra Pradesh due to ongoing litigations with the customer (refer note 44 for details of the litigations). Management of Zemira Renewable Energy Limited believes that the delays are temporary in nature and the entity will be able to meet its future obligations as and when they fall due. However, in the circumstance the entity is unable to do so, RPPL, the holding company, would provide support to the entity in meeting their operating and capital funding requirements and liabilities.Further RPPL has issued an unconditional letter of support for continued operational and financial support in favour of Zemira Renewable Energy Limited.

42 There are no employees on the rolls of the entities forming part of the Restricted Group and therefore there are no employee benefit expenses accrued in the Unaudited Special Purpose Interim Combined Financial Statements. ReNew Power Private Limited and ReNew Power Services Private Limited have charged certain common expenses to its subsidiary companies and fellow subsidiaries respectively on the basis of its best estimate of expenses incurred. ReNew Power Private Limited and ReNew Power Services Private Limited have recovered the said expenses in the form of 'Management Shared Services'. The management believes that the method adopted by the these companies is most appropriate basis for recovering of such common expenses.

43 Distribution companies of the state of Karnataka issued demand notices to captive users being the customers of ReNew Wind Energy (AP) Private Limited (“ReNew AP”) which is a part of the Restricted Group. These notices were issued seeking recovery of cross subsidy surcharge and differential between rate of electricity tax applicable to captive users and non-captive users on the ground that these captive users have not consumed the energy in proportion to their respective shareholding in ReNew AP, thereby allegedly violating Rule 3 of the Electricity Rules, 2005. ReNew AP had deposited a sum of INR 31 (31 March 2020: INR 31) under protest against the demand raised by distribution companies amounting INR 147 (31 March 2020: INR 147). Thereafter, ReNew AP had filed a petition before the Karnataka Electricity Regulatory Commission (the "KERC") contesting these demands. KERC had granted interim relief and stayed the demand notice and disconnection by the distribution companies. The amount paid under protest has been accounted for as recoverable and disclosed under head “Other current assets” in these financial statements.

Apart from above, on 20 May 2020, demand notices were issued by distribution companies to one of the captive users of ReNew AP towards energy supplied in financial year ended 31 March 2019 for a sum of INR 97, alleging that the captive user had not consumed energy in proportion to its respective shareholding in ReNew AP. ReNew AP has filed a writ petition on 26 August 2020 before the High Court of Karnataka challenging the issuance of demand notices and seeking their quashing.

ReNew AP, based on legal advice obtained, believes that there are merits in its position and that the demand raised by distribution companies would be rescinded by relevant legal authorities and hence no adjustment has been made in the financial statements in this regard.

44 Zemira Renewable Energy Limited has entered into a long-term Power Purchase Agreement ("PPA") having a capacity of 50.40 MWs (wind energy projects) with Southern Power Distribution Company of Andhra Pradesh Limited i.e. the distribution company of Andhra Pradesh ("APDISCOM"). The PPA has a fixed rate per unit of electricity for the 25-year term. With regard to aforementioned PPA, certain litigations as described below are currently underway:

The Government of Andhra Pradesh (the "GoAP") issued an order (the "GO") dated 1 July 2019 constituting a High-Level Negotiation Committee (the "HLNC") for review and negotiation of tariff for wind energy projects in the state of Andhra Pradesh. Pursuant to the GO, APDISCOM issued letters dated 11 July 2019 to Zemira Renewable Energy Limited, requesting for revision of tariffs entered into in PPAs. Zemira Renewable Energy Limited filed a writ petition on 23 July 2019 before the AP High Court ("AP High Court) challenging the GO and the said letters issued by APDISCOM for renegotiation of tariffs. The AP High Court issued its order dated September 24, 2019 enumerating the following:
i. Writ petition is allowed, and both GO the subsequent letters are set aside.
ii. Further, APDISCOM were instructed to honour pending and future bills and pay the same at the interim rate of Rs. 2.43 per unit till determination of O.P. No. 17 of 2018 pending before APERC
iii. Andhra Pradesh Electricity Regulatory Commission (the "APERC") to dispose of the case within a time frame of six months.

Zemira Renewable Energy Limited along with other certain subsidiaries of the ReNew Power Private Limted having similar PPAs with the APDISCOM ("AP Entities") have filed a Writ Petition before the Division Bench of the AP High Court challenging the jurisdiction of APERC in entertaining O.P. No. 17 of 2018. Parallelly, AP Entities have filed another Writ Appeal before the division bench of the AP High Court challenging AP High Court's direction to the APDISCOM to pay tariff at interim rate till determination of OP No. 17 of 2018 by APERC.

Zemira Renewable Energy Limited has a net block of INR 3,661 as at 30 June 2020 (INR 3,700 as at 31 March 2020) and has recognised a revenue of INR 119 for the period ended 30 June 2020 (INR 463 for the year ended 31 March 2020) and has a trade receivable balance of INR 611 as on 30 June 2020 (INR 498 as at 31 March 2020) from sale of electricity against such PPA.

The management basis legal opinion obtained by it, believes that it has strong merits in the case and the final order would be in its favour and hence no adjustment has been made in the Unaudited Special Purpose Interim Combined Fnancial Statements including provision for expected credit loss and impairment.

45 Due to outbreak of COVID-19 in India and globally, the entities forming part of Restricted Group has made initial assessment of likely adverse impact on economic environment in general and financial risks on account of COVID-19. Considering that the Restricted Group is in the business of generation of electricity which is having "Must Run" status by Ministry of New and Renewable Energy (MNRE), the management believes that the impact of outbreak on the business and financial position of the entities forming part of the Restricted Group will not be significant. The management does not see any risks in the Restricted Group's ability to continue as a going concern and meeting its liabilities as and when they fall due. The entities forming part of the Restricted Group is closely monitoring developments, its operations, liquidity and capital resources and is actively working to minimize the impact of the unprecedented situation.

46 Absolute amounts less than INR 500,000 are appearing in the financial statements as "0" due to presentation in millions.

Limited Review Report

Review Report to
The Board of Directors
ReNew Power Private Limited ("RPPL")

Introduction

We have reviewed the accompanying Unaudited Special Purpose Interim Combined Financial Statements of Restricted Group (consisting of certain specific subsidiaries of RPRL as listed in note 1 of these financial statements, collectively known as the "Restricted Group"), which comprise the combined Balance Sheet as at 30 June 2019 and the related Statement of Profit and Loss including other comprehensive income, the combined Cash Flow Statement and the combined Statement of Changes in Equity for the three months period then ended and the related notes, comprising a summary of the significant accounting policies and other explanatory information (the "Unaudited Special Purpose Interim Combined Financial Statements"). Management of RPPL is responsible for the preparation and presentation of this combined financial statements in accordance with the basis of preparation of Unaudited Special Purpose Interim Combined Financial Statements set out in in Note 3. Our responsibility is to express a conclusion on these Unaudited Special Purpose Interim Combined Financial Statements based on our review.

Scope of Review

We conducted our review in accordance with the Standard on Review Engagements (SRE) 2410, Review of Interim Financial Information Performed by the Independent Auditor of the Entity issued by the Institute of Chartered Accountants of India. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying Unaudited Special Purpose Interim Combined Financial Statements are not prepared, in all material respects, in accordance with the basis for preparation as set out in Note 3 to the Unaudited Special Purpose Interim Combined Financial Statements.

Emphasis of Matter

1. We draw attention to note 2 and 3 to the Unaudited Special Purpose Interim Combined Financial Statements, which describes that the Restricted Group has not formed a separate legal group of entities during the period ended 30 June 2019, which also describes the basis of preparation, including the approach to and the purpose for preparing them. Consequently, the Restricted Group's Unaudited Special Purpose Interim Combined Financial Statements may not necessarily be indicative of the financial performances and financial position of the Restricted Group that would have occurred if it had operated as a separate standalone group of entities during the periods presented.

2. We draw attention to note 44 to the Unaudited Special Purpose Interim Combined Financial Statements, related to the recoverability of dues under litigation amounting to Rs. 493 million from Southern Power Distribution Company of A.P. Limited by Zemira Renewable Energy Limited (which is forming part of the Restricted Group). Zemira Renewable Energy Limited has filed Writ Petition/appeal before the Hon'ble High Court of Andhra Pradesh related to these matters. Pending the outcome of the cases, which is not presently determinable, no adjustment has been made to the Special Purpose Combined Financial Statements.

   Our conclusion is not modified in respect of the above matters.

Other matter

The Unaudited Special Purpose Combined Financial Statements have been prepared by the management of RPPL solely in connection with the proposed issuance of INR denominated Non-Convertible Debentures (referred to as "INR NCDs") to a Mauritian Foreign Portfolio Investor under Voluntary Retention Route as prescribed by the Reserve Bank of India which in turn will issue USD denominated bonds (referred to as "FPI Bonds") to be listed on Singapore Exchange Securities Trading Limited (SGX-ST) for which RPPL is the guarantor and its inclusion in the Offering Memorandum. As a result, the Unaudited Special Purpose Interim Combined Financial Statements may not be suitable for another purpose.

Further, the comparative financial information of the Restricted Group for the corresponding six months period ended 30 June 2018 included in these Unaudited Special Purpose Interim Combined Financial Statements were reviewed by another auditor, who expressed an unmodified conclusion on those financial information. Our conclusion is not modified in respect of this matter.

1 Corporate information

ReNew Power Private Limited (the "Company" or "Parent" or "RPPL") is a private limited company domiciled in India. The Company was converted into a private limited company with effect from 8 November 2019 and consequently the name of the Company has changed from ReNew Power Limited to ReNew Power Private Limited.

Certain subsidiary companies of the Parent and ReNew Solar Power Private Limited (wholly owned subsidiary of RPPL) which are collectively referred to as the 'Restricted Group' (as more clearly explained in the note below) intends to issue INR denominated Non-Convertible Debentures (referred to as "INR NCDs") to a Mauritian Foreign Portfolio Investor namely India Green Energy Holdings under Voluntary Retention Route as prescribed by the Reserve Bank of India, which in turn will issue USD denominated bonds (referred to as "FPI Bonds"). The FPI Bonds will be listed on Singapore Exchange Securities Trading Limited (SGX-ST).

Name of entity	Holding Company	Holding percentage
ReNew Wind Energy (AP) Private Limited	ReNew Power Private Limited	66%
ReNew Wind Energy (AP 3) Private Limited	ReNew Power Private Limited	100%
Shruti Power Projects Private Limited (acquired on 16 September 16)	ReNew Power Private Limited	100%
Pugalur ReNewable Private Limited	ReNew Power Private Limited	100%
Bidwal ReNewable Private Limited	ReNew Power Private Limited	100%
Zemira ReNewable Energy Limited (acquired on 31 March 18)	ReNew Power Private Limited	100%
ReNew Wind Energy (Rajasthan Four) Private Limited	ReNew Solar Power Private Limited*	100%
ReNew Wind Energy (Maharashtra) Private Limited	ReNew Solar Power Private Limited*	100%
Bhumi Prakash Private Limited	ReNew Solar Power Private Limited*	100%
Tarun Kiran Bhoomi Private Limited	ReNew Solar Power Private Limited*	100%
ReNew Wind Energy (MP Three) Private Limited	ReNew Solar Power Private Limited*	100%

* ReNew Solar Power Private Limited is a wholly owned subsidiary of ReNew Power Private Limited

Entities forming part of the Restricted Group listed above are incorporated in India and are engaged in generation of power through non-conventional and renewable energy sources.
The Unaudited Special Purpose Interim Combined Financial Statements were approved for issue in accordance with a resolution of the directors of Renew Power Private Limited on 10 October 2020.

2 Purpose of Unaudited Special Purpose Interim Combined Financial Statements

The Combined Financial Statements are special purpose financial statements which have been prepared for the purpose of the proposed issue of INR denominated Non-Convertible Debentures (referred to as "INR NCDs") to a Mauritian Foreign Portfolio Investor namely India Green Energy Holdings under Voluntary Retention Route as prescribed by the Reserve Bank of India, which in turn will issue USD denominated bonds (referred to as "FPI Bonds"). The FPI Bonds will be listed on Singapore Exchange Securities Trading Limited (SGX-ST).. The Unaudited Special Purpose Interim Combined Financial Statements presented herein reflect the Restricted Group's results of operations, assets and liabilities and cash flows for the periods presented. The basis of preparation and significant accounting policies used in preparation of these Unaudited Special Purpose Interim Combined Financial Statements are set out in Note 3 below.

3 Significant accounting policies

3.1 Basis of preparation

The Unaudited Special Purpose Interim Combined Financial Statements have been prepared in accordance with the recognition and measurement principles of Ind AS 34 "Interim Financial Reporting" notified under Section 133 of the Companies Act, 2013 as amended from time to time, (except Ind AS 33, Earnings per Share), read with rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 (as amended) issued there under, presentation requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III), as applicable and the Guidance Note on Combined and Carve-out Financial Statements issued by the Institute of Chartered Accounts of India (the "Guidance Note") and other accounting principles generally accepted in India..

Management of the Parent company has prepared the Unaudited Special Purpose Interim Combined Financial Statements which comprise the Combined Balance Sheet as at 30 June 2019, the Combined Statement of Profit and Loss including other comprehensive income, Combined Statement of Cash Flows and Combined Statement of Changes in Equity for the period ended 30 June 2019, a summary of the significant accounting policies and other explanatory Information.

Management has prepared these Unaudited Special Purpose Interim Combined Financial Statements to depict the historical cost of the Restricted Group except for the following assets and liabilities which have been measured at fair value:

- Derivative financial instruments,
- Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments)

All intercompany transactions and balances within the Restricted Group have been eliminated in full. The transactions that have taken place with other related parties of entities forming part of the Restricted Group but not forming part of the Restricted Group have been disclosed in accordance with Ind AS 24 Related Party Disclosures.

The Unaudited Special Purpose Interim Combined Financial Statements are not necessarily indicative of the financial performance, financial position and cash flows of the Restricted Group that would have occurred if it had operated as a separate stand-alone Group of entities during the period presented nor of the Restricted Group's future performance. The items in the Unaudited Special Purpose Interim Combined Financial Statements have been classified considering the principles under Ind AS 1, Presentation of Financial Statements and Division II of Schedule III of Companies Act 2013.

3.2 Basis of combination

The Unaudited Special Purpose Interim Combined Financial Statements have been prepared by combining like items of assets, liabilities. equity, income, expenses and cash flows of the entities forming part of Restricted Group. All the intragroup assets and liabilities, equity, income, expenses and cash flows relating to entities forming part of restricted group have been eliminated and profits or losses arising from intragroup transactions that are recognised in assets, such as inventory and fixed assets have been eliminated in full. All the inter-group transactions are undertaken on Arms Lengths basis. The resulting financial position may not be that which might have existed if the combining businesses had been a stand-alone business.

The carrying values pertaining to an entity, as reflected in the consolidated financial statements of the Parent, are used for the purpose of preparing Unaudited Special Purpose Interim Combined Financial Statements including fair value adjustment to assets and liabilities on acquisition along with corresponding impact on deferred taxes.

The non-controlling interest held by outsiders amount to INR 136 and INR 110 as of 30 June 2019 and 31 March 2019 respectively.

Share capital and reserves disclosed in the Unaudited Special Purpose Interim Combined financial statements is not the legal capital and reserves of the Restricted Group and is the aggregation of the share capital and reserves of the individual combining entities.

Income taxes are arrived at by aggregation of the tax expenses actually incurred by the combining businesses, after considering the tax effects of any adjustments which is in accordance with the Guidance Note.

The accounting policies and estimates adopted in the preparation of the Unaudited Special Purpose Interim Combined Financial Statements are consistent with those used in the Special Purpose Combined Financial Statements for the year ended 31 March 2019.

- Deferred tax assets or liabilities and the assets or liabilities are recognised and measured in accordance with Ind AS 12 Income Tax
- Reacquired rights are measured at a value determined on the basis of the remaining contractual term of the related contract. Such valuation does not consider potential renewal of the reacquired right.
- Potential tax effects of temporary differences and carry forwards of an acquiree that exist at the acquisition date or arise as a result of the acquisition are accounted in accordance with Ind AS 12.

Business Combination and Goodwill

Business combinations are accounted for using the acquisition method in the consolidated financial statements of the Parent

At the acquisition date of an entity being part of the Restricted Group by the Parent, the identifiable assets acquired and the liabilities assumed are recognised at their acquisition date fair values. For this purpose, the liabilities assumed include contingent liabilities representing present obligation and they are measured at their acquisition fair values irrespective of the fact that outflow of resources embodying economic benefits is not probable. However, the following assets and liabilities acquired are measured at the basis indicated below:

- Deferred tax assets or liabilities are recognised and measured in accordance with Ind AS 12 Income Tax.
- Reacquired rights are measured at a value determined on the basis of the remaining contractual term of the related contract. Such valuation does not consider potential renewal of the reacquired right.
- Potential tax effects of temporary differences and carry forwards of an acquiree that exist at the acquisition date or arise as a result of the acquisition are accounted in accordance with Ind AS 12

At the acquisition date of an entity being part of the Restricted Group by the Parent, the Parent assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred by the Parent over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Parent re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised as Parent's contribution in Other Equity.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Restricted Group’s cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

A cash generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

Where goodwill has been allocated to a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

There are no business combinations made by any of the entities forming part of Restricted Group.

3.3 Summary of significant accounting policies

a) Current versus non-current classification

The Restricted Group presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it is:
- Expected to be realised or intended to sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is treated as current when it is:
- Expected to be settled in normal operating cycle
- Held primarily for the purpose of trading
- Due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets/liabilities are classified as non-current assets/liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation/settlement in cash and cash equivalents. The entities forming part of the Restricted Group have identified twelve months as their operating cycle for classification of their current assets and liabilities.

b) Fair value measurement

The entities forming part of the Restricted Group measure financial instruments, such as, derivatives at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the entities forming part of the Restricted Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The fair value measurement of a non-financial asset takes into account a market participant’s ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The entities forming part of the Restricted Group use valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:
- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities

- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For the purpose of fair value disclosures, the entities forming part of the Restricted Group have determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy.

At each reporting date, the management of the entities forming part of the Restricted Group analyse the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the accounting policies of the Restricted Group.

For assets and liabilities that are recognised in the Financial Statements on a recurring basis, the entities forming part of the Restricted Group determine whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

This note summarises the accounting policy for determination of fair value. Other fair value related disclosures are given in the relevant notes as following:

· Disclosures for significant estimates and assumptions (Refer Note 41)
· Quantitative disclosures of fair value measurement hierarchy (Refer Note 36)
· Financial instruments (including those carried at amortised cost) (Refer Note 35 and 36)

c) Revenue recognition

Revenue from contracts with customers

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the entities forming part of Restricted Group expects to be entitled in exchange for those goods or services. The entities forming part of Restricted Group has generally concluded that it is the principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer.

Sale of power

Income from supply of power is recognised over time on the supply of units generated from plant to the grid as per terms of the Power Purchase Agreement (PPA) entered into with the customers.

The entities forming part of Restricted Group considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of power, the entities forming part of Restricted Group considers the effects of variable consideration and consideration payable to the customer (if any).

Transaction price - remaining performance obligation

The remaining performance obligation disclosure provides the aggregate amount of the transaction price yet to be recognised as at the end of the reporting period and an explanation as to when the Group expects to recognise these amounts in revenue. Applying the practical expedient as given in Ind AS 115, the Group has not disclosed the remaining performance obligation related disclosures for contracts as the revenue recognized corresponds directly with the value to the customer of the entity’s performance completed to date.

(i) Variable consideration

If the consideration in a contract includes a variable amount, the Group estimates the amount of consideration to which it will be entitled in exchange for transferring the goods or service to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

Rebates

In some PPAs, the Restricted Group provide rebates in invoice if payment is made before the due date. Rebates are offset against amounts payable by the customers. To estimate the variable consideration for the expected future rebate, the Restricted Group applies the most likely method.

(ii) Consideration payable to customers

In some PPAs, Group has to pay consideration to customers. Consideration payable to customers are offset against the revenue recognised as and when sale of power occurs.

Income from liquidated damages and interest on advances

Income from liquidated damages and interest on advance is recognised after certainty of receipt of the same is established.

Dividend

Dividend income is recognised when the right of the entities forming part of the Restricted Group to receive dividend is established by the reporting date.

Interest income

For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset. When calculating the effective interest rate, the entities forming part of the Restricted Group estimate the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in other income in the Unaudited Special Purpose Interim Combined Statement of Profit and Loss.

Income from government grants

Refer note (f) for accounting policy.

Contract balances :

(i) Contract assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the entities forming part of Restricted Group perform by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

(ii) Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the entities forming part of Restricted Group have received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the entities forming part of Restricted Group transfer goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the entities forming part of Restricted Group perform under the contract.

(iii) Trade receivables

A receivable represents the right of entities forming part of Restricted Group to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in section (n) Financial instruments – initial recognition and subsequent measurement.

d) Foreign currencies

The Restricted Group Financial Statements are presented in Indian rupees (INR), which is also the functional currency of all entities forming part of Restricted Group. Functional currency is the currency of the primary economic environment in which the entities forming part of Restricted Group operates and is normally the currency in which the entities forming part of Restricted Group primarily generates and expends cash.

Transactions and balances

Transactions in foreign currencies are initially recorded by the Restricted Group at their functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

Exchange differences arising on settlement or translation of monetary items are recognised in profit and loss.

e) Income taxes

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in India. Current income tax relating to items recognised outside profit and loss is recognised outside profit and loss (either in other comprehensive income or in equity). Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate. Current income tax assets and liabilities are offset if a legally enforceable right exists to set off these and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss

- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

In situations where the entities forming part of the Restricted Group are entitled to a tax holiday under the Income-tax Act, 1961, enacted in India, no deferred tax (asset or liability) is recognized in respect of temporary differences which reverse during the tax holiday period. Deferred taxes in respect of temporary differences which reverse after the tax holiday period are recognized in the year in which the temporary differences originate. However, the entities forming part of the Restricted Group restrict the recognition of deferred tax assets to the extent that it has become reasonably certain that sufficient future taxable income will be available against which such deferred tax assets can be realized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit and loss is recognised outside profit and loss (either in OCI or equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Minimum Alternate Tax

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the entities forming part of the Restricted Group will pay normal income tax. Accordingly, MAT is recognised as deferred tax asset in the Unaudited Special Purpose Interim Combined Balance Sheet when it is probable that future economic benefit associated with it will flow to the entities forming part of the Restricted Group.

f) Government grants

Government grants are recognized where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant is related to an expense item, it is recognized as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant is related to an asset, it is recognized as income in equal amounts over the expected useful life of the related asset.

When the entities forming part of the Restricted Group receive grants of non-monetary assets, the asset and the grant are recorded at fair value amounts and released to Statement of Profit and Loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset i.e. by equal annual instalments.

The entities forming part of the Restricted Group presents grants related to an expense item as other income in the Statement of Profit and Loss. Thus, Generation based incentive and Sale of emission renewable certificates have been recognised as other income.

Generation based incentive

Generation based incentive is recognized on the basis of supply of units generated by the entities forming part of the Restricted Group to the state electricity board from the eligible project in accordance with the scheme of the "Generation Based Incentive (GBI) for Grid interactive Wind Power Projects"

g) Property, plant and equipment

Capital work in progress and freehold land are is stated at cost, net of accumulated impairment loss, if any. Property, plant and equipment except freehold land is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Restricted Group depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred.

On transition date to Ind AS, the entities forming part of the restricted group have elected to continue with the carrying value of all of its property, plant and equipment recognised as at 1 April 2015 measured as per previous GAAP and use that carrying value as the deemed cost of the property, plant and equipment.

Subsequent costs

The cost of replacing a part of an item of property, plant and equipment is recognised in the carrying amount of the item of property, plant and equipment, if it is probable that the future economic benefits embodied within the part will flow to the entities forming part of the Restricted Group and its cost can be measured reliably with the carrying amount of the replaced part getting derecognised. The cost for day-to-day servicing of property, plant and equipment are recognised in Statement of Profit and Loss as and when incurred.

Derecognition

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the Unaudited Special Purpose Interim Combined Statement of Profit and Loss when the asset is derecognised.

h) Depreciation / amortisation of property, plant and equipment and intangibles

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets as follows:

Category	**Useful life (in years)**
Plant and equipment (wind and solar power projects)*	18-25
Furniture & fixture	10
Office equipment	5
Computers	3
Customer contracts	Life of respective power purchase agreements

* Based on an external technical assessment, the management believes that the useful lives as given above and residual value of 0%-5%, best represents the period over which management expects to use its assets and its residual value. The useful life of plant and equipment is different from the useful life as prescribed under Part C of Schedule II of Companies Act, 2013.

The residual values, useful lives and methods of depreciation of property, plant and equipment and intangible assets are reviewed at each financial year end and adjusted prospectively, if appropriate.

i) Leases

As per Ind AS 17 applicable till period ended 31 March 2019

As a lessee

Operating lease payments are recognised as an expense in the Unaudited Special Purpose Interim Combined Statement of Profit and Loss on a straight-line basis over the lease term.

A lease is classified at the inception date as a finance lease or an operating lease. A lease that transfers substantially all the risks and rewards incidental to ownership to the Group is classified as a finance lease. An operating lease is a lease other than a finance lease

As a lessor

Leases in which the entities forming part of Restricted Group does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

As per Ind AS 116 applicable from 1 April 2019

The Restricted Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

As a lessee

The entities forming part of the Restricted Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

Entities forming part of the Restricted Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over shorter of the lease term and the estimated useful lives of the assets.

If ownership of the leased asset transfers to the entities forming part of Restricted Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.
The right-of-use assets are also subject to impairment. Refer to the accounting policies in section (l) Impairment of non-financial assets.

ii) Lease liabilities

At the commencement date of the lease, the rntities forming part of the Restricted Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including insubstance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the entities forming part of the Restricted Group and payments of penalties for terminating the lease, if the lease term reflects the entities forming part of the Restricted Group exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the entities forming part of the Restricted Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

iii) Short-term leases and leases of low-value assets

The entities forming part of the Restricted Group applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short-term leases and leases of low value assets are recognised as expense on a straight-line basis over the lease term.

As a lessor

Leases in which the entities forming part of the Restricted Group does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

j) Inventories

Inventories are valued at the lower of cost and net realisable value.
Costs incurred in bringing each product to its present location and condition are accounted for as follows:
Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on first in, first out basis.
Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

k) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale. Borrowing costs consist of interest, discount on issue, premium payable on redemption and other costs that an entity incurs in connection with the borrowing of funds (this cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs). The borrowing costs are amortised basis the Effective Interest Rate (EIR) method over the term of the loan. The EIR amortisation is recognised under finance costs in the Statement of Profit and Loss. The amount amortized for the period from disbursement of borrowed funds upto the date of capitalization of the qualifying assets is added to cost of the qualifying assets.

l) Impairment of non-financial assets

The entities forming part of the Restricted Group assess, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the entities forming part of the Restricted Group estimate the asset’s recoverable amount. An asset’s recoverable amount is the higher of an asset’s or cash-generating units (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.
In assessing value in use, the estimated future cash flows are discounted to their present value using a pre -tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The entities forming part of the Restricted Group bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Restricted Group’s CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the entities forming part of the Restricted Group extrapolate cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the Statement of Profit and Loss.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the entities forming part of the Restricted Group estimate the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying value of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Profit and Loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as an increase in revaluation.

m) Provisions

Provisions are recognised when the entities forming part of the Restricted Group have a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the entities forming part of the Restricted Group expect some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the Statement of Profit and Loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

n) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit and loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the entities forming part of the Restricted Group commit to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

Debt instruments at amortised cost

A ‘debt instrument’ is measured at the amortised cost if both the following conditions are met:
a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance expense in the Unaudited Special Purpose Interim Combined Statement of Profit and Loss. The losses arising from impairment are recognised in the Unaudited Special Purpose Interim Combined Statement of Profit and Loss.

Debt instruments at fair value through other comprehensive income (FVTOCI)

A ‘debt instrument’ is classified as at the FVTOCI if both of the following criteria are met:
a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
b) The asset’s contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the entities forming part of the Restricted Group recognize interest income, impairment losses and reversals and foreign exchange gain or loss in the Statement of Profit and Loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to Statement of Profit and Loss. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

Debt instruments at fair value through profit and loss (FVTPL)

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the entities forming part of the Restricted Group may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as ‘accounting mismatch’). The entities forming part of the Restricted Group have not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

Equity investments

All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS 103 applies are classified as at FVTPL. For all other equity instruments, the entities forming part of the Restricted Group may make an irrevocable election to present the subsequent changes in the fair value in OCI. The entities forming part of the Restricted Group make such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the entities forming part of the Restricted Group decide to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to Statement of Profit and Loss, even on sale of investment. However, the entities forming part of the Restricted Group may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised when:

- The rights to receive cash flows from the asset have expired, or
- The entities forming part of the respective Restricted Group have transferred their rights to receive cash flows from the asset or have assumed the obligation to pay the received cash flows in full without material delay to a third party under a ‘pass-through’ arrangement; and

Either the entities forming part of the Restricted Group have transferred substantially all the risks and rewards of the asset, or has neither transferred nor retained substantially all the risks and rewards of the asset, but have transferred control of the asset.

When the entities forming part of the Restricted Group have transferred their rights to receive cash flows from an asset or have entered into a pass-through arrangement, they evaluate if and to what extent they have retained the risks and rewards of ownership. When they have neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the entities forming part of the Restricted Group continue to recognise the transferred asset to the extent of the continuing involvement of the entities forming part of the Restricted Group. In that case, the entities forming part of the Restricted Group also recognise an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the entities forming part of the Restricted Group have retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the entities forming part of the Restricted Group could be required to repay.

Impairment of financial assets

In accordance with Ind AS 109, the Restricted Group applies expected credit loss (ECL) model for measurement and recognition of impairment loss on all the financial assets and credit risk exposure.
The entities forming part of the Restricted Group follows 'simplified approach for recognition of impairment loss allowance on trade receivables or contract revenue receivables.

The application of simplified approach does not require the entities forming part of the Restricted Group to track changes in credit risk. Rather it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the entities forming part of the Restricted Group determine that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/expense in the Unaudited Special Purpose Interim Combined Statement of Profit and Loss.

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit and loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and in the case of loans and borrowings and payables, net of directly attributable transaction costs. The financial liabilities of the entities forming part of the Restricted Group include trade and other payables, derivative financial instruments, loans and borrowings including bank overdraft.

Subsequent measurement

The measurement of financial liabilities depends on their classification as discussed below:-

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in Statement of Profit and Loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss. This category generally applies to borrowings.

The entities forming part of the Restricted Group recognise debt modifications agreed with lenders to restructure their existing debt obligations. Such modifications are done to take advantage of falling interest rates by cancelling the exposure to high interest fixed rate debt, pay a fee or penalty on cancellation and replace it with debt at a lower interest rate (exchange of old debt with new debt). The qualitative factors considered to be relevant for modified financial liabilities include, but are not limited to, the currency that the debt instrument is denominated in, the interest rate (that is fixed versus floating rate), conversion features attached to the instrument and changes in covenants. The accounting treatment is determined depending on whether modifications or exchange of debt instruments represent a settlement of the original debt or merely a renegotiation of that debt. The exchange of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability.

Redeemable non convertible preference shares
Redeemable non convertible preference shares are separated into liability and equity components based on the terms of the contract. On issuance of the redeemable non convertible preference shares, the fair value of the liability component is determined using a market interest rate for an equivalent non-convertible instrument. This amount is classified as a financial liability measured at amortised cost (net of transaction costs) until it is extinguished on conversion. The remainder of the proceeds is allocated to the conversion option that is recognised and included in equity. Transaction costs are deducted from equity, net of associated income tax.

Compulsorily Convertible Preference shares (CCPS)
Compulsorily Convertible Preference shares are accounted for as Instruments entirely equity in nature since conversion option meets Ind AS 32 criteria for fixed to fixed classification and the dividend distribution is discretionary in nature.

Derecognition
A financial liability is derecognised when the obligation under the liability is discharged/ cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

Reclassification of financial assets and liabilities
The Restricted Group determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent.

Offsetting of financial instruments
Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

o) Derivative financial instruments and hedge accounting

Initial recognition and subsequent measurement
Entities forming part of Restricted Group uses derivative financial instruments, such as interest rate swaps and call/put options etc., to hedge its interest rate risks and foreign currency risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to profit or loss, except for the effective portion of cash flow hedges, which is recognised in OCI and later reclassified to profit or loss when the hedge item affects profit or loss or treated as basis adjustment if a hedged forecast transaction subsequently results in the recognition of a non-financial asset or non-financial liability.

For the purpose of hedge accounting, hedges are classified as:
- Fair value hedges when hedging the exposure to changes in the fair value of a recognised asset or liability or an unrecognised firm commitment
- Cash flow hedges when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment
- Hedges of a net investment in a foreign operation

At the inception of a hedge relationship, the entities forming part of Restricted Group formally designates and documents the hedge relationship to which the Restricted Group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes the Restricted Group's risk management objective and strategy for undertaking hedge, the hedging/ economic relationship, the hedged item or transaction, the nature of the risk being hedged, hedge ratio and how the entity will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.
Hedges that meet the strict criteria for hedge accounting are accounted for, as described below:

(i) Cash flow hedges

The effective portion of the gain or loss on the hedging instrument is recognised in OCI in the cash flow hedge reserve, while any ineffective portion is recognised immediately in the Unaudited Special Purpose Interim Combined Statement of Profit and Loss.
The entities forming part of Restricted Group uses interest rate swaps and call/put options etc. as hedges of its exposure to interest rate risks and foreign currency risks in the foreign currency loan. The ineffective portion relating to foreign currency loan is recognised in other income or expenses.

Amounts recognised as OCI are transferred to profit or loss when the hedged transaction affects profit or loss, such as when the hedged item affects the Unaudited Special Purpose Interim Combined Statement of Profit and Loss or treated as basis adjustment if a hedged item subsequently results in recognition of a non-financial asset or liability.
If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover (as part of the hedging strategy), or if its designation as a hedge is revoked, or when the hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss previously recognised in OCI remains separately in equity until the forecast transaction occurs or the foreign currency firm commitment is met.

p) Cash and cash equivalents

Cash and short-term deposits in the balance sheet comprise cash at banks and cash in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the Statement of cash flows, cash and cash equivalents consist of cash and short term deposits, as defined above, net off bank overdrafts as they considered an integral part of the entities forming part of the Restricted Group's cash management.

q) Measurement of EBITDA

The Restricted Group has elected to present earnings before interest, tax, depreciation and amortization (EBITDA) as a separate line item on the face of the Statement of Profit and Loss. The Restricted Group measure EBITDA on the basis of profit/ (loss) from continuing operations. In their measurement, the companies include interest income but do not include depreciation and amortization expense, finance costs and tax expense.

r) Events occurring after the Balance Sheet date

Impact of events occurring after the balance sheet date that provide additional information materially effecting the determination of the amounts relating to conditions existing at the balance sheet date upto the date of the approval for issue of these Unaudited Special Purpose Interim Combined Financial Statements by the Board of Directors of the entities forming part of the Restricted Group are adjusted to respective assets and liabilities.

The entities forming part of the Restricted Group do not adjust the amounts recognised in its Unaudited Special Purpose Interim Combined Financial Statements to reflect non-adjusting events after the reporting period.

The entities forming part of the Restricted Group make disclosures in the financial statement in cases of significant events.

s) Contingent liabilities

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entities forming part of the Restricted Group or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

3.4 Changes in accounting policy and disclosures - new and amended standards

The entities forming part of the restricted group applied Ind AS 116 for the first time. The nature and effect of the changes as a result of adoption of the new accounting standard are described below.

Several other amendments and interpretations apply for the first time for the period ended 30 June 2019, but do not have an impact on the Unaudited Special Purpose Interim Combined Financial Statements of the Restricted Group. The Restricted Group has not early adopted any standards or amendments that have been issued but are not yet effective.

a) Ind AS 116 Leases:

Ind AS 116 supersedes Ind AS 17 Leases. The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessee's to recognise most leases on the balance sheet. Lessor accounting under Ind AS 116 is substantially unchanged from Ind AS 17. Lessors will continue to classify leases as either operating or finance leases using similar principles as in Ind AS 17. Therefore, Ind AS 116 does not have an impact for leases where the Restricted Group is the lessor.

The Entities forming part of Restricted Group adopted Ind AS 116 using the modified retrospective method of adoption, with the date of initial application of 1 April 2019, the right-of-use assets were recognised based on the amount equal to the lease liabilities, adjusted for any related prepaid and accrued lease payments previously recognised. Lease liabilities were recognised based on the present value of the remaining lease payments, discounted using the incremental borrowing rate at the date of initial application. There is no impact on equity on transition to Ind AS 116 as on 1 April 2019.

The Entities forming part of Restricted Group elected to use the transition practical expedient to not reassess whether a contract is or contains a lease at 1 April 2019. Instead, the entities forming part of Restricted Group applied the standard only to contracts that were previously identified as leases applying Ind AS 17 and Appendix C to Ind AS 17 at the date of initial application. Therefore, the comparative information was not restated and continues to be reported under Ind AS 17. The Entities forming part of Restrcicted Group also applied the available practical expedients wherein it:

- Used a single discount rate to a portfolio of leases with reasonably similar characteristics
- Relied on its assessment of whether leases are onerous immediately before the date of initial application
- Applied the short-term leases exemptions to leases with lease term that ends within 12 months of the date of initial application
- Excluded the initial direct costs from the measurement of the right-of-use asset at the date of initial application
- Used hindsight in determining the lease term where the contract contained options to extend or terminate the lease

The effect of adopting Ind AS 116 as at 1 April 2019 was, as follows:

Particulars	**Notes**	**(INR in Mn) Ind AS 116 impact as at 1 April 2019**
Assets		
Non-current assets		
Right of use assets	6	16
Prepayments	9	(11)

Lease liabilities (refer note 31)	17	(1)

b) Other regulatory changes

Pursuant to The Taxation Laws (Amendment) Ordinance, 2019 (Ordinance) issued subsequent to the balance sheet date, the tax rates have changed with effect from 1 Apr 2019. Certain entities forming part of the Restricted Group plan to pay tax at revised rate from next year. If those changes were announced on or before reporting date, it would have resulted in write-off of MAT credit amounting to INR 134 and recognition of Deferred Tax Liability (DTL) amounting to INR 49 on account of re-measurement of deferred tax as at 31 March 2019. The tax charge for the year would have been increased by INR 183

*Including provision amounts to INR 6 (31 March 2019: 6)

f) Compensation of key management personnel

Remuneration to the key managerial personnel is paid by The Holding Company of the companies in the group and is allocated between the subsidiary companies as management shared services and is not separately identifiable.

g) The facility is covered by corporate guarantee of ReNew Power Private Limited, the holding company. The guarantee shall remain valid and in force till all security is created and perfected to the satisfaction of lenders.

h) ReNew Solar Power Private Limited has pledged 25,500 (31 March 2019: 25,500) equity shares of the entities forming part of the Restricted Group in favour of security trustee on behalf of lenders.

i) ReNew Power Private Limited has pledged 22,236,902 (31 March 2019: 22,236,902) equity shares and 7,323,158 (31 March 2019: 7,323,158) preference shares of the entities forming part of the Restricted Group in favour of security trustee on behalf of lenders.

-----------------------------------This space has been left blank intentionally---------------------------------------

31 Leases

Entities forming part of restricted group have entered into leases for leasehold lands generally have lease term of 12.5 years.

The weighted average incremental borrowing rate applied to lease liabilities recognised in the balance sheet at the date of initial application is 10.40%.

Set out below are the carrying amounts of lease liabilities and the movements during the period:

Particulars	**As at 30 June 2019**
As at 1 April 2019 on account of adoption of Ind AS 116	5
Accretion of interest	0
Balance as on 30 June 2019	**5**

Refer note 3.4(a) for approach followed by the Group for transition to Ind AS 116.

The lease liabilities as at 1 April 2019 can be reconciled to the operating lease commitments as of 31 March 2019, as follows:

Operating lease commitments as at 31 March 2019	-
Weighted average incremental borrowing rate as at 1 April 2019	10.40%
Discounted operating lease commitments as at 1 April 2019	-
Add: Lease liabilities of lease hold land not considered in operating lease commitment	5
Lease liabilities as at 1 April 2019	**5**
Non Current Lease liabilities	4
Current Lease liabilities	1
Lease liabilities as at 1 April 2019	**5**

a) There are no restrictions or covenants imposed by leases.
b) Refer note 26 for rental expense recorded for short-term leases and low value leases for the period ended 30 June 2019.
c) There are no amounts payable toward variable lease expense recognised for the period ended 30 June 2019.
d) The maturity analysis of lease liabilities are disclosed in note 37.
e) There are no leases which have not yet commenced to which the lessee is committed (if any).

32 Segment information

The managing director of ReNew Power Private Limited takes decisions in respect of allocation of resources and assesses the performance basis the reports/ information provided by functional heads and is thus considered to be the Chief Operating Decision Maker (CODM).

The Restricted Group discloses segment information in a manner consistent with internal reporting to group's Managing Director. The entities forming part of Restricted Group have segments based on type of business operations. The reportable segments of Restricted Group under Ind AS are Wind Power and Solar Power which predominantly relate to generation and sale of electricity and construction activities. The entities forming part of Restricted Group does not operate in more than one geographical segment. The Restricted Group discloses in the segment information operating profit, comparable operating profit and comparable EBITDA.

No operating segment has been aggregated to form the above reportable operating segments. Further, total assets and liabilities balances for each reportable segment are not reviewed by or provided to CODM.

	For the period ended 30 June 2019			**For the period ended 30 June 2018**		
	Wind Power	**Solar Power**	**Total**	**Wind Power**	**Solar Power**	**Total**

The Revenues from three major customers amounts to INR 659 (30 June 2018: three customers INR 516) each of which contributes more than 10% of the total revenue of the Group.

33 Hedging activities and derivatives

Derivatives designated as hedging instruments

The entities forming part of the Restricted Group use certain types of derivative financial instruments (viz. foreign currency forwards, cross-currency interest rate swap) to manage/mitigate their exposure to foreign exchange and interest risk. Further, the entities forming part of the Restricted Group designates such derivative financial instruments (or its components) as hedging instruments for hedging the exchange rate fluctuation and interest risk attributable to either a recognised item or a highly probable forecast transaction ('cash flow hedge'). The effective portion of changes in the fair value of derivative financial instruments (or its components) that are designated and qualify as cash flow hedges, are recognised in the other comprehensive income and held in cash flow hedge reserve - a component of equity. Any gains / (losses) relating to the ineffective portion, are recognised immediately in the Statement of Profit and Loss within other expenses/ other income. The amounts accumulated in equity for highly probable forecast transaction are added to carrying value of non financial asset or non financial liability as basis adjustment, other amounts accumulated in equity are re-classified to the Statement of Profit and Loss in the year when the hedged item affects profit / (loss).

At any point of time, when a forecast transaction is no longer expected to occur, the cumulative gains / (losses) that were reported in equity is immediately transferred to the Statement of Profit and Loss within other expenses / other income.

Cash flow hedges

Hedge has been taken against exposure to foreign currency risk and variable interest outflow on external commercial borrowings and buyer's credit. Terms of the swaps and their respective impact on OCI and Statement of Profit and Loss is as below:-

- Buyers credit (included in short term borrowing)

Pay fixed INR and receive USD and pay fixed interest at 6.81% to 7.80% p.a. and receive a variable interest at 6 month LIBOR plus 0.90% p.a. to 6 month LIBOR plus 1.10% p.a. on the notional amount.

The cash flow hedges through forward is USD 5,754,960 and CCS is USD 11,041,904 outstanding at the period ended 30 June 2019 were assessed to be highly effective and cumulative impact of mark to market gain and restatement of hedged item is INR 1 (31 March 2019: INR 7) with a deferred tax liability of INR 0 (31 March 2019: INR 2), is included in OCI.

Foreign currency and Interest rate risk

Forward contracts and swaps measured at fair value through OCI are designated as hedging instruments in cash flow hedges of interest and principal payments in USD.

	30 June 2019		**31 March 2019**	
	Assets	**Liabilities**	**Assets**	**Liabilities**
Forward contracts designated as hedging instruments	32	9	40	-

Hedging reserve movement

	As at 30 June 2019	**As at 31 March 2019**

Gain/(loss) reclassified to non financial assets or liabilities as basis adjustment	-	35
Income tax relating to gain/loss reclassified to non financial assets or liabilities as basis adjustment	-	(9)
Gain/(loss) reclassified to profit and loss as hedged future cash flows are no longer expected to occur	-	2
Income tax relating to gain/loss reclassified to profit and loss as hedged future cash flows are no longer expected to occur	-	(1)
Balance at the end of the period	**1**	**5**

34 Commitments, liabilities and contingencies
(to the extent not provided for)

(i) Contingent liabilities

The entities forming part of the Restricted Group have no contingent liability as on 30 June 2019 (on account of delay in project commissioning as on 31 March 2019: INR 5).

(ii) Commitments

Estimated amount of contracts remaining to be executed on capital account and not provided for

There are no capital commitments outstanding as on 30 June 2019 (31 March 2019: Nil).

35 Fair values

Set out below, is a comparison by class of the carrying amounts and fair value of the financial instruments of the entities forming part of the Restricted Group:

	30 June 2019		31 March 2019	
	Carrying value	**Fair value**	**Carrying value**	**Fair value**
Financial assets				
Measured at amortised cost				
Loans-non-current	87	87	87	87
Interest Accrued on USL given	-	-	0	0
Loans-current	935	935	887	887
Trade receivables	1,531	1,531	1,396	1,396
Cash and cash equivalent	207	207	379	379
Bank balances other than cash and cash equivalent	2,020	2,020	1,645	1,645
Other current financial assets	306	306	285	285
Measured at FVOCI				
Derivative instruments	32	32	40	40
Financial liabilities				
Measured at amortised cost				
Long term borrowings	14,810	14,810	15,001	15,001
Short-term borrowings	4,945	4,945	4,819	4,819
Trade payables	672	672	627	627
Other current financial liabilities	3,546	3,546	3,578	3,578
Measured at FVOCI				
Derivative instruments	9	9	-	-

The management of the entities forming part of the Restricted Group assessed that cash and cash equivalents, trade receivables, trade payables, other current financial liabilities and other current financial assets approximate their carrying amounts largely due to the short-term maturities of these instruments.

For financial assets and liabilities that are measured at fair value, the carrying amounts are equal to the fair values.
The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The following methods and assumptions were used to estimate the fair values:

i The fair values of the entities forming part of the Restricted Group's term loans from financial institutions including current maturities are determined by using Discounted Cash Flow (DCF) method using discount rate that reflects the issuer's borrowing rate as at the end of the reporting period. They are classified as level 3 fair values in the fair value hierarchy due to the inclusion of unobservable inputs including own credit risk. The own non-performance risk as at 30 June 2019 was assessed to be insignificant.

ii The fair values of the security deposits given are determined by using Discounted Cash Flow (DCF) method using discount rate that reflects the lending rate as at the end of the reporting period. They are classified as level 3 fair values in the fair value hierarchy due to the inclusion of unobservable inputs including counterparty credit risk.

iii The entities forming part of the Restricted Group enter into derivative financial instruments with various counter parties, principally financial institutions with investment grade credit ratings. Cross currency interest rate swaps are valued using valuation techniques, which employs the use of market observable inputs. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates, yield curves of the currency, interest rate curves and forward rate curves of the underlying instrument. The changes in counterparty credit risk had no material effect on the hedge effectiveness assessment for derivatives designated in hedge relationships.

36 Fair value hierarchy

The entities forming part of the Restricted Group categorize assets and liabilities measured at fair value into one of three levels depending on the ability to observe inputs employed in their measurement which are described as follows:
i) Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
ii) Level 2 - Inputs are inputs that are observable, either directly or indirectly, other than quoted prices included within level 1 for the asset or liability.
iii) Level 3 - Inputs are unobservable inputs for the asset or liability reflecting significant modifications to observable related market data or Company's assumptions about pricing by market participants.

The following table provides the fair value measurement hierarchy of the assets and liabilities of the entities forming part of the Restricted Group :-

Quantitative disclosures fair value measurement hierarchy for assets/liabilities as at year end:

	Level of fair value measurement	**30 June 2019**		**31 March 2019**

Buyer's / Supplier's credit (secured)	Level 3	Discounted cash flow	Prevailing interest rates in the market, Future cash flows
Financial liabilities measured at fair value through other comprehensive income			
Derivative instruments	Level 2	Market value techniques	Forward foreign currency exchange rates, interest rates to discount future cash flows

37 Financial risk management objectives and policies

The Restricted Group's principal financial liabilities comprise loans and borrowings, trade payables and other financial liabilities.
The main purpose of these financial liabilities is to finance the Restricted Group's operations and to support its operations. The Restricted Group's financial assets include loans, trade and other receivables, and cash and cash equivalents and other financial assets.

The Restricted Group is exposed to market risk, credit risk and liquidity risk. The Restricted Group's senior management oversees the management of these risks. The Restricted Group's senior management is supported by a various sub committees that advises on financial risks and the appropriate financial risk governance framework for the Restricted Group. These committees provides assurance to the Restricted Group's senior management that the Restricted Group's financial risk activities are governed by appropriate policies and procedure and that financial risks are identified, measured and managed in accordance with the Restricted Group's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each risk, which are summarised as below.

Market risk

Market risk is the risk that the Restricted Group's assets and liabilities will be exposed to due to a change in market prices that determine the valuation of these financial instruments. Market risk comprises 3 types of risk: interest rate risk, currency risk and other price risk such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits and derivative financial instruments. The sensitivity analyses in the following sections relate to the position as at 30 June 2019. The sensitivity analyses have been prepared on the basis that the amount of net debt, the ratio of fixed to floating interest rates of the debt and derivatives and the proportion of financial instruments in foreign currencies are all constant and on the basis of hedge designations in place as at 30 June 2019.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Restricted Group is exposed to interest rate risk primarily from the external borrowings that are used to finance their operations. In case of external commercial borrowings ("ECB") and buyers credit the Restricted Group believes that the exposure of the Restricted Group to changes in market interest rates is insignificant as the respective companies manage the risk by hedging the changes in the market interest rates through cross currency interest rate swaps. The Restricted Group also monitors the changes in interest rates and actively re-finances its debt obligations to achieve an optimal interest rate exposure.

Interest rate sensitivity

The following table demonstrates the sensitivity to a reasonable possible change in interest rates on financial liabilities, i.e. borrowings in INR and USD. With all other variables held constant, the entities forming part of the Restricted Group's profit before tax is affected through the impact on financial assets, as follows:

	30 June 2019		**30 June 2018**	
	Increase/decrease in basis points	**Effect on profit before tax**	**Increase/decrease in basis points**	**Effect on profit before tax**
INR	+/(-)50	(-)/+ 21	+/(-)50	(-)/+ 31
	Increase/decrease in basis points	**Effect on equity**	**Increase/decrease in basis points**	**Effect on equity**
INR	+/(-)50	(-)/+ 15	+/(-)50	(-)/+ 24

Foreign currency risk

Foreign Currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Restricted Group is exposed to foreign currency risk arising from imports of goods in US dollars and external commercial borrowings. The Restricted Group hedges its exposure to fluctuations on the translation into INR of its buyer's/supplier's credit and ECB by using foreign currency swaps and forward contracts. The Company has followed a conservative approach for hedging the foreign currency risk so as to not use complex forex derivatives. The Restricted Group also monitors that the hedges do not exceed the underlying foreign currency exposure. The Restricted Group does not undertake any speculative transaction.

Foreign currency sensitivity

The Restricted Group has hedged its exposure to fluctuations on its buyer's/supplier's credit and ECB through forward contracts and cross currency swaps and thus foreign currency sensitivity has not been disclosed.

Credit risk

Credit risk from balances with banks is managed by treasury department of the entities forming part of the Restricted Group. Investments, in the form of fixed deposits, loans and other investments, of surplus funds are made only with banks and group companies and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed on an annual basis by the entities forming part of the Restricted Group, and may be updated throughout the year subject to approval of company's finance committee. The limits are set to minimize the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

Further the entities forming part of the Restricted Group sought to reduce counterparty credit risk under our long-term contracts in part by entering into power sales contracts with utilities or other customers of strong credit quality and we monitor their credit quality on an on going basis.
The maximum credit exposure to credit risk for the components of the balance sheet at 30 June 2019 and 31 March 2019 is the carrying amount of all the financial assets.

Trade receivables

Customer credit risk is managed basis established policies of the entities forming part of the Restricted Group, procedures and controls relating to customer credit risk management. Outstanding customer receivables are regularly monitored. The entities forming part of the Restricted Group do not hold collateral as security.

The entities forming part of the Restricted Group have state utilities/government entities as it's customers with high credit worthiness, therefore, the entities forming part of the Restricted Group do not see any risk related to credit. The credit quality of the customers other than state utilities/government entities is evaluated based on their credit ratings and other publicly available data.

Financial instruments and credit risk

Credit risk from balances with banks is managed by company's treasury department. Investments, in the form of fixed deposits, loans and other investments, of surplus funds are made only with banks & group companies and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed on an annual basis by the respective entity forming part of the Restricted Group, and and may be updated throughout the year subject to approval of company's finance committee. The limits are set to minimize the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

Liquidity risk

Liquidity risk is the risk that the entities forming part of the Restricted Group will encounter in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The approach of the entities forming part of the Restricted Group to manage liquidity is to ensure , as far as possible, that these will have sufficient liquidity to meet their respective liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risk damage to their reputation.
The entities forming part of the Restricted Group assessed the concentration of risk with respect to refinancing its debt and concluded it to be low. The entities forming part of the Restricted Group have access to a sufficient variety of sources of funding and debt maturing within 12 months can be rolled over with existing lenders.

The entities forming part of the Restricted Group rely mainly on long-term debt obligations to fund their construction activities. To the extent available at acceptable terms, utilized non-recourse debt to fund a significant portion of the capital expenditures and investments required to construct and acquire our wind power plants and related assets. Our non-recourse financing is designed to limit cross default risk to the Parent Company or other subsidiaries and affiliates. Our non-recourse long-term debt is a combination of fixed and variable interest rate instruments. External commercial borrowings which are at variable rate is fixed through the use of cross currency interest rate swaps. In addition, the debt is typically denominated in the currency that matches the currency of the revenue expected to be generated from the benefiting project, thereby reducing currency risk. In certain cases, the currency is matched through the use of derivative instruments. The majority of non-recourse debt is funded by banks and financial institutions, with debt capacity supplemented by unsecured loan from related party.

The table below summarizes the maturity profile of financial liabilities of Restricted Group based on contractual undiscounted payments:

Period ended 30 June 2019	**On demand**	**Less than 3 months**	**3 to 12 months**	**1 to 5 years**	**> 5 years**	**Total**
Long term Borrowings						
Term loan from Banks*	-	-	-	5,445	11,497	16,942
Term loan from Financial Institutions*	-	-	-	3,611	7,460	11,071
Liability component of preference shares*	-	-	-	-	1,147	1,147
Short term Borrowings						
Loans from related party	3,158	-	-	-	-	3,158
Buyer's / Supplier's credit (secured)	-	-	395	-	-	395
Working capital term loan (secured)	-	-	1,392	-	-	1,392
Lease liabilities	-	-	1	3	5	9
Other financial liabilities						
Current maturities of long term borrowings*	-	622	1,814	-	-	2,436
Interest accrued but not due on borrowings	719	37	-	-	-	756
Buyer's / Supplier's credit (secured)	-	532	228	-	-	760
Capital creditors	768	520	-	-	-	1,288
Trade payable						
Trades payable	387	285	-	-	-	672

* Including future interest payments.

The entities forming part of the Restricted Group expect liabilities with current maturities to be repaid from net cash provided by operating activities of the entity to which the debt relates or through opportunistic refinancing activity or some combination thereof.

Year ended 31 March 2019	**On demand**	**Less than 3 months**	**3 to 12 months**	**1 to 5 years**	**> 5 years**	**Total**
Borrowings						
Term loan from banks*	-	-	-	5,410	11,762	17,172
Term loan from financial institutions*	-	-	-	3,429	7,408	10,837
Liability component of preference shares*	-	-	-	-	1,147	1,147
Short term borrowings						
Loans from related party	4,507	-	-	-	-	4,507
Buyer's / Supplier's credit (secured)	-	-	312	-	-	312
Other financial liabilities

Interest accrued but not due on borrowings	587	73	-	-	-	660
Capital creditors	768	555	-	-	-	1,323
Trade payable						
Trade payable	565	62	-	-	-	627

* Including future interest payments.

38 Capital management

For the purpose of the capital management by the respective entities forming part of the Restricted Group, capital includes issued equity capital, compulsory convertible preference shares, share premium and all other equity reserves attributable to the equity holders of the respective entities forming part of the Restricted Group. The primary objective of the respective entities forming part of the Restricted Group's capital management is to maximise the shareholder value.

The entities forming part of the Restricted Group manage their capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants.

To maintain or adjust the capital structure, respective entities forming part of the Restricted Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The respective entities forming part of the Restricted Group monitor capital using a gearing ratio, which is net debt divided by total capital plus net debt. The respective entities forming part of the Restricted Group includes within net debt, interest bearing loans and borrowings, trade and other payables, less cash and short-term deposits.

The policy of the respective entities forming part of the Restricted Group is to keep the gearing ratio to 3:1 during the construction phase and aim to enhance it to 4:1 post the construction phase. This is in line with industry rate. In the construction phase the entities forming part of Restricted Group manages the ratio at 3:1 through internal funding.

In order to achieve this overall objective, the capital management by the respective entities forming part of the Restricted Group, amongst other things, aims to ensure that they meet financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. There have been no breaches in the financial covenants of any interest-bearing loans and borrowing in the current year.

No changes were made in the objectives, policies or processes for managing capital during the period ended 30 June 2019.

39 Details of dues to Micro, Small and Medium Enterprises as defined under the MSMED Act, 2006

Since, these are interim financial statements, disclosure of details of dues to Micro, Small and Medium Enterprises as defined under the MSMED Act, 2006 has not been made. The entities forming part of the Restriced Group will report the same in the year end statutory financial statements.

40 Corporate social responsibility expenditure

Since these are interim financial statements, disclosure of expenditure on corporate social responsibility has not been made. The same shall be reported by entities forming part of the Restricted Group in the year end statutory financial audit.

-----------------------------------This space has been left blank intentionally---------------------------------------

41 Significant accounting judgments, estimates and assumptions

The preparation of Unaudited Special Purpose Interim Combined financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the accompanying disclosures. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

In the process of applying the accounting policies management has made certain judgements, estimates and assumptions. The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The entities forming part of the Restricted Group based their assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the entities forming part of the Restricted Group. Such changes are reflected in the assumptions when they occur.

A) Accounting judgements:

Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgment is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

The entities forming part of the Restricted Group makes various assumptions and estimates while computing deferred taxes which include production related data (PLFs), projected operations and maintenance costs, projected finance costs, proposed availment of deduction under section 80IA of the Income Tax Act, 1961 and the period over which such deduction shall be availed, accelerated depreciation, other applicable allowances, usage of brought forward losses etc. While these assumptions are based on best available facts in the knowledge of management as on the balance sheet date however, they are subject to change year on year depending on the actual tax laws and other variables in the respective year. Given that the actual assumptions which would be used to file the return of income shall depend upon the tax laws prevailing in respective year, management shall continue to reassess these assumptions while calculating the deferred taxes on each balance sheet date and the impact due to such change, if any, is considered in the respective year.

Depreciation on property, plant and equipment

Depreciation on property, plant and equipment is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management. Considering the applicability of Schedule II of Companies Act, 2013, the management has re-estimated useful lives and residual values of all its property, plant and equipment. The management believes that depreciation rates currently used fairly reflect its estimate of the useful lives and residual values of property, plant and equipment, though these rates in certain cases are different from lives prescribed under Schedule II of the Companies Act, 2013.

Basis legal opinion obtained, management is of the view that application of CERC and/or SERC rates for the purpose of accounting for depreciation expenses is not mandatory. Hence, the entities forming part of the Restricted Group are depreciating the assets bases on life as determined by an expert.

B) Estimates and assumptions:

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values.

Assumptions include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 and 36 for further disclosures.

Related party transactions

Working Capital

ReNew Power Private Limited along with all its subsidiaries hereinafter collectively referred to as 'the Group' have entered into inter-company transactions as explained below :

Management shared services

Employee benefit costs and other common expenses are incurred by the Ultimate Holding Company and Holding Company. These expenses are allocated to all the entities of the Group in the form of 'Management Shared Services'. Allocation of cost to the entities involves various estimates including retention, allocation of cost for projects under construction vis-a-vis operating projects, profit mark-up which are assessed through an external expert.

Inter-group unsecured loan

The Restricted Group uses unsecured loans to fund requirements of various entities. These loans carry interest rate of 8% (approximates 3-year government bond yield).

42 There are no employees on the rolls of the entities forming part of the Restricted Group and therefore there are no employee benefit expenses accrued in the Unaudited Special Purpose Interim Combined Financial Statements. ReNew Power Private Limited and ReNew Power Services Private Limited have charged certain common expenses to its subsidiary companies and fellow subsidiaries respectively on the basis of its best estimate of expenses incurred. ReNew Power Private Limited and ReNew Power Services Private Limited have recovered the said expenses in the form of 'Management Shared Services'. The management believes that the method adopted by the these companies is most appropriate basis for recovering of such common expenses.

43 Distribution companies of the state of Karnataka issued demand notices to captive users being the customers of ReNew Wind Energy (AP) Private Limited (“ReNew AP”) which is a part of the Restricted Group. These notices were issued seeking recovery of cross subsidy surcharge and differential between rate of electricity tax applicable to captive users and non-captive users on the ground that these captive users have not consumed the energy in proportion to their respective shareholding in ReNew AP, thereby allegedly violating Rule 3 of the Electricity Rules, 2005. ReNew AP had deposited a sum of INR 31 (31 March 2019: INR 31) under protest against the demand raised by distribution companies amounting INR 147 (31 March 2019: INR 147). Thereafter, ReNew AP had filed a petition before the Karnataka Electricity Regulatory Commission (the "KERC") contesting these demands. KERC had granted interim relief and stayed the demand notice and disconnection by the distribution companies. The amount paid under protest has been accounted for as recoverable and disclosed under head “Other current assets” in these financial statements..

Apart from above, on 20 May 2020, demand notices were issued by distribution companies to one of the captive users of ReNew AP towards energy supplied in financial year ended 31 March 2019 for a sum of INR 97, alleging that the captive user had not consumed energy in proportion to its respective shareholding in ReNew AP. ReNew AP has filed a writ petition on 26 August 2020 before the High Court of Karnataka challenging the issuance of demand notices and seeking their quashing.

ReNew AP, based on legal advice obtained, believes that there are merits in its position and that the demand raised by distribution companies would be rescinded by relevant legal authorities and hence no adjustment has been made in the financial statements in this regard.

44 Zemira Renewable Energy Limited has entered into a long-term Power Purchase Agreement ("PPA") having a capacity of 50.40 MWs (wind energy projects) with Southern Power Distribution Company of Andhra Pradesh Limited i.e. the distribution company of Andhra Pradesh ("APDISCOM"). The PPA has a fixed rate per unit of electricity for the 25-year term. With regard to aforementioned PPA, certain litigations as described below are currently underway:

The Government of Andhra Pradesh (the "GoAP") issued an order (the "GO") dated 1 July 2019 constituting a High-Level Negotiation Committee (the "HLNC") for review and negotiation of tariff for wind energy projects in the state of Andhra Pradesh. Pursuant to the GO, APDISCOM issued letters dated 11 July 2019 to Zemira Renewable Energy Limited, requesting for revision of tariffs entered into in PPAs. Zemira Renewable Energy Limited filed a writ petition on 23 July 2019 before the AP High Court ("AP High Court) challenging the GO and the said letters issued by APDISCOM for renegotiation of tariffs. The AP High Court issued its order dated September 24, 2019 enumerating the following:
i. Writ petition is allowed, and both GO the subsequent letters are set aside.
ii. Further, APDISCOM were instructed to honour pending and future bills and pay the same at the interim rate of Rs. 2.43 per unit till determination of O.P. No. 17 of 2018 pending before APERC
iii. Andhra Pradesh Electricity Regulatory Commission (the "APERC") to dispose of the case within a time frame of six months.

Zemira Renewable Energy Limited along with other certain subsidiaries of the ReNew Power Private Limted having similar PPAs with the APDISCOM ("AP Entities") have filed a Writ Petition before the Division Bench of the AP High Court challenging the jurisdiction of APERC in entertaining O.P. No. 17 of 2018. Parallelly, AP Entities have filed another Writ Appeal before the division bench of the AP High Court challenging AP High Court's direction to the APDISCOM to pay tariff at interim rate till determination of OP No. 17 of 2018 by APERC.

Zemira Renewable Energy Limited has a net block of INR 3,819 as at 30 June 2019 (INR 3,858 as at 31 March 2019) and has recognised a revenue of INR 155 for the period ended 30 June 2019 (INR 128 for the period ended 30 June 2018) and has a trade receivable balance of INR 493 as on 30 June 2019 (INR 451 as at 31 March 2019) from sale of electricity against such PPA.

The management basis legal opinion obtained by it, believes that it has strong merits in the case and the final order would be in its favour and hence no adjustment has been made in the Unaudited Special Purpose Interim Combined financial statements including provision for expected credit loss and impairment.

45 The combined current liabilities of the Restricted Group as on 30 June 2019 exceed the combined current assets with the combined current ratio being 0.56:1. The primary reason for this is due to unsecured loans provided by RPPL and ReNew Solar Power Private Limited (wholly owned subsidiary of RPPL) to certain entities forming part of the Restricted Group which are repayable on demand and hence these are classified as a current liability in these financial statements. The management of RPPL as well as the project lenders considers these unsecured loans as equity contribution for the purposes of project financing.

Further, RPPL and ReNew Solar Power Private Limited would consider the financial position and liquidity of the respective entities forming part of the Restricted Group prior to making any demand for repayment of such unsecured loans and interest accrued thereon. This shall be done to ensure support by RPPL and ReNew Solar Power Private Limited towards the entities in meeting their operating requirements and liabilities as and when they fall due. Further RPPL has issued an unconditional letter of support for continued operational and financial support in favour of entities forming part of Restricted Group.

46 Due to outbreak of COVID-19 in India and globally, the Restricted Group has made initial assessment of likely adverse impact on economic environment in general and financial risks on account of COVID-19. Considering that the Restricted Group is in the business of generation of electricity which is having "Must Run" status by Ministry of New and Renewable Energy (MNRE), the management believes that the impact of outbreak on the business and financial position of the entities forming part of the Restricted Group will not be significant. The management does not see any risks in the Restricted Group's ability to continue as a going concern and meeting its liabilities as and when they fall due. The Restricted Group is closely monitoring developments, its operations, liquidity and capital resources and is actively working to minimize the impact of the unprecedented situation.

47 Absolute amounts less than INR 500,000 are appearing in the financial statements as "0" due to presentation in millions.

INDEPENDENT AUDITOR'S REPORT

To the Board of Directors of ReNew Power Private Limited ("RPPL")

Report on the Audit of the Special Purpose Combined Financial Statements

Opinion

We have audited the accompanying Special Purpose Combined Financial Statements of Restricted Group (consisting of certain specific subsidiaries of RPPL as listed in note 1 of these financial statements, collectively known as the "Restricted Group"), which comprise the combined Balance Sheet as at 31 March 2020, the combined Statement of Profit and Loss, including the statement of Other Comprehensive Income, the combined Cash Flow Statement and the combined Statement of Changes in Equity for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information (collectively known as the "Special Purpose Combined Financial Statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Special Purpose Combined Financial Statements have been prepared, in all material respects, in accordance with the basis of preparation set out in note 3 of the accompanying Special Purpose Combined Financial Statements.

Basis for Opinion

We conducted our audit of the Special Purpose Combined Financial Statements in accordance with the Standards on Auditing (SAs). Our responsibilities under those Standards are further described in the 'Auditor's Responsibilities for the Audit of the Special Purpose Combined Financial Statements' section of our report. We are independent of RPPL and the Restricted Group in accordance with the 'Code of Ethics' issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Special Purpose Combined Financial Statements.

Emphasis of matter

1. Without modifying our opinion, we draw attention to note 2 and 3 to the Special Purpose Combined Financial Statements, which describes that the Restricted Group has not formed a separate legal group of entities during the year ended 31 March 2020, which also describes the basis of preparation, including the approach to and the purpose for preparing them. Consequently, the Restricted Group's Special Purpose Combined Financial Statements may not necessarily be indicative of the financial performances and financial position of the Restricted Group that would have occurred if it had operated as a separate standalone group of entities during the periods presented.

2. We draw attention to note 45 to the Special Purpose Combined Financial Statements, related to the recoverability of dues under litigation amounting to Rs. 498 million from Southern Power Distribution Company of A.P. Limited by Zemira Renewable Energy Limited (which is forming part of the Restricted Group). Zemira Renewable Energy Limited has filed Writ Petition/appeal before the Hon'ble High Court of Andhra Pradesh related to these matters. Pending the outcome of the cases,

which is not presently determinable, no adjustment has been made to the Special Purpose Combined Financial Statements Our opinion is not qualified in respect of this matter

Responsibilities of Management for the Special Purpose Combined Financial Statements

RPPL's Board of Directors (referred to as the "Management") is responsible for the preparation of these Special Purpose Combined Financial Statements in accordance with basis of preparation set out in note 3 of the accompanying notes to these Special Purpose Combined Financial Statements. This responsibility also includes the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Special Purpose Combined Financial Statements that are free from material misstatement, whether due to fraud or error.

In preparing the Special Purpose Combined Financial Statements, the Management is responsible for assessing the entities forming part of the Restricted Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate any entity forming part of the Restricted Group or to cease operations, or has no realistic alternative but to do so.

The Management is also responsible for overseeing the entities forming part of the Restricted Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Special Purpose Combined Financial Statements

Our objectives are to obtain reasonable assurance about whether the Special Purpose Combined Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Special Purpose Combined Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Special Purpose Combined Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Restricted Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the entities forming part of Restricted Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Special Purpose Combined Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions

are based on the audit evidence obtained up to the date of our auditor’s report. However, future events or conditions may cause the entities forming part of Restricted Group to cease to continue as a going concern.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Other matters

The Special Purpose Combined Financial Statements have been prepared by the management of RPPL solely in connection with the proposed issuance of the Non-Convertible bonds by each member of the Restricted Group for which RPPL is the guarantor and for inclusion in the Offering Memorandum. As a result, the Special Purpose Combined Financial Statements may not be suitable for another purpose.

1 Corporate information

ReNew Power Private Limited (the "Company" or "Parent" or "RPPL") is a private limited company domiciled in India. The Company was converted into a private limited company with effect from 8 November 2019 and consequently the name of the Company has changed from ReNew Power Limited to ReNew Power Private Limited.

Certain subsidiary companies of the Parent and ReNew Solar Power Private Limited (wholly owned subsidiary of RPPL) which are collectively referred to as the 'Restricted Group' (as more clearly explained in the note below) intends to issue INR denominated Non-Convertible Debentures (referred to as "INR NCDs") to a Mauritian Foreign Portfolio Investor namely India Green Energy Holdings under Voluntary Retention Route as prescribed by the Reserve Bank of India, which in turn will issue USD denominated bonds (referred to as "FPI Bonds"). The FPI Bonds will be listed on Singapore Exchange Securities Trading Limited (SGX-ST).

Name of entity	Holding Company	Holding percentage
ReNew Wind Energy (AP) Private Limited	ReNew Power Private Limited	66%
ReNew Wind Energy (AP 3) Private Limited	ReNew Power Private Limited	100%
Shruti Power Projects Private Limited (acquired on 16 September 16)	ReNew Power Private Limited	100%
Pugalur ReNewable Private Limited	ReNew Power Private Limited	100%
Bidwal ReNewable Private Limited	ReNew Power Private Limited	100%
Zemira ReNewable Energy Limited (acquired on 31 March 18)	ReNew Power Private Limited	100%
ReNew Wind Energy (Rajasthan Four) Private Limited	ReNew Solar Power Private Limited*	100%
ReNew Wind Energy (Maharashtra) Private Limited	ReNew Solar Power Private Limited*	100%
Bhumi Prakash Private Limited	ReNew Solar Power Private Limited*	100%
Tarun Kiran Bhoomi Private Limited	ReNew Solar Power Private Limited*	100%
ReNew Wind Energy (MP Three) Private Limited	ReNew Solar Power Private Limited*	100%

* ReNew Solar Power Private Limited is a wholly owned subsidiary of ReNew Power Private Limited

Entities forming part of the Restricted Group listed above are incorporated in India and are engaged in generation of power through non-conventional and renewable energy sources.

The Special Purpose Combined Financial Statements were approved for issue in accordance with a resolution of the directors of ReNew Power Private Limited on 10th October 2020.

2 Purpose of Special Purpose Combined Financial Statements

The Combined Financial Statements are special purpose financial statements which have been prepared for the purpose of the proposed issue of INR denominated Non-Convertible Debentures (referred to as "INR NCDs") to a Mauritian Foreign Portfolio Investor namely India Green Energy Holdings under Voluntary Retention Route as prescribed by the Reserve Bank of India, which in turn will issue USD denominated bonds (referred to as "FPI Bonds"). The FPI Bonds will be listed on Singapore Exchange Securities Trading Limited (SGX-ST).. The Special Purpose Combined Financial Statements presented herein reflect the Restricted Group's results of operations, assets and liabilities and cash flows for the periods presented. The basis of preparation and significant accounting policies used in preparation of these Special Purpose Combined Financial Statements are set out in Note 3 below. These Special Purpose Combined Financial Statements presented herein reflect the Restricted Group's results of operations, assets and liabilities and cash flows for the period presented. The basis of preparation and significant accounting policies used in preparation of these Special Purpose Combined Financial Statements are set out in Note 3 below.

3 Significant accounting policies

3.1 Basis of preparation

The Special Purpose Combined Financial Statements have been prepared in accordance with the recognition, measurement, presentation and disclosure principles specified in the Indian Accounting Standard (Ind AS) notified under Section 133 of the Companies Act, 2013 as amended from time to time, (except Ind AS 33, Earnings per Share), read with rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 (as amended) issued there under, presentation requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III), as applicable and the Guidance Note on Combined and Carve-out Financial Statements issued by the Institute of Chartered Accounts of India (the "Guidance Note") and other accounting principles generally accepted in India.

Management of the Parent company has prepared the Special Purpose Combined Financial Statements which comprise the Combined Balance Sheet as at 31 March 2020, the Combined Statement of Profit and Loss including other comprehensive income, Combined Statement of Cash Flows and Combined Statement of Changes in Equity for the year ended 31 March 2020, a summary of the significant accounting policies and other explanatory Information.

Management has prepared these Special Purpose Combined Financial Statements to depict the historical cost of the Restricted Group except for the following assets and liabilities which have been measured at fair value:

- Derivative financial instruments,
- Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments)

All intercompany transactions and balances within the Restricted Group have been eliminated in full. The transactions that have taken place with other related parties of entities forming part of the Restricted Group but not forming part of the Restricted Group have been disclosed in accordance with Ind AS 24 Related Party Disclosures.

The Special Purpose Combined Financial Statements are not necessarily indicative of the financial performance, financial position and cash flows of the Restricted Group that would have occurred if it had operated as a separate stand-alone Group of entities during the period presented nor of the Restricted Group's future performance. The items in the Special Purpose Combined Financial Statements have been classified considering the principles under Ind AS 1, Presentation of Financial Statements and Division II of Schedule III of Companies Act 2013.

3.2 Basis of combination

The Special Purpose Combined Financial Statements have been prepared by combining like items of assets, liabilities. equity, income, expenses and cash flows of the entities forming part of Restricted Group. All the intragroup assets and liabilities, equity, income, expenses and cash flows relating to entities forming part of Restricted Group have been eliminated and profits or losses arising from intragroup transactions that are recognised in assets, such as inventory and fixed assets have been eliminated in full. All the inter-group transactions are undertaken on Arms Lengths basis. The resulting financial position may not be that which might have existed if the combining businesses had been a stand-alone business.

The carrying values pertaining to an entity, as reflected in the consolidated financial statements of the Parent, are used for the purpose of preparing Special Purpose Combined Financial Statements including fair value adjustment to assets and liabilities on acquisition along with corresponding impact on deferred taxes.

The non-controlling interest held by outsiders amount to INR 123 and INR 110 as of 31 March 2020 and 31 March 2019 respectively.

Share capital and reserves disclosed in the Special Purpose combined financial statements is not the legal capital and reserves of the Restricted Group and is the aggregation of the share capital and reserves of the individual combining entities.

Income taxes are arrived at by aggregation of the tax expenses actually incurred by the combining businesses, after considering the tax effects of any adjustments which is in accordance with the Guidance Note.

The accounting policies and estimates adopted in the preparation of the Special Purpose Combined Financial Statements are consistent with those used in the Special Purpose Combined Financial Statements for the year ended 31 March 2019 except for changes in accounting policy and disclosures as details in note 3.4

Business Combination and Goodwill

Business combinations are accounted for using the acquisition method in the consolidated financial statements of the Parent

At the acquisition date of an entity being part of the Restricted Group by the Parent, the identifiable assets acquired and the liabilities assumed are recognised at their acquisition date fair values. For this purpose, the liabilities assumed include contingent liabilities representing present obligation and they are measured at their acquisition fair values irrespective of the fact that outflow of resources embodying economic benefits is not probable. However, the following assets and liabilities acquired are measured at the basis indicated below:

- Deferred tax assets or liabilities are recognised and measured in accordance with Ind AS 12 Income Tax.
- Reacquired rights are measured at a value determined on the basis of the remaining contractual term of the related contract. Such valuation does not consider potential renewal of the reacquired right.
- Potential tax effects of temporary differences and carry forwards of an acquiree that exist at the acquisition date or arise as a result of the acquisition are accounted in accordance with Ind AS 12

At the acquisition date of an entity being part of the Restricted Group by the Parent, the Parent assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred by the Parent over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Parent re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised as Parent's contribution in Other Equity.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Restricted Group’s cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

A cash generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

Where goodwill has been allocated to a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

There are no business combinations made by any of the entities forming part of Restricted Group.

3.3 Summary of significant accounting policies

a) Current versus non-current classification

The Restricted Group presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it is:

- Expected to be realised or intended to sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is treated as current when it is:

- Expected to be settled in normal operating cycle
- Held primarily for the purpose of trading
- Due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets/liabilities are classified as non-current assets/liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation/settlement in cash and cash equivalents. The entities forming part of the Restricted Group have identified twelve months as their operating cycle for classification of their current assets and liabilities.

b) Fair value measurement

The entities forming part of the Restricted Group measure financial instruments, such as, derivatives at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the entities forming part of the Restricted Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The entities forming part of the Restricted Group use valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:
- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For the purpose of fair value disclosures, the entities forming part of the Restricted Group have determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy. (Refer Note 33 and 34).

At each reporting date, the management of the entities forming part of the Restricted Group analyse the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the accounting policies of the Restricted Group.

For assets and liabilities that are recognised in the Financial Statements on a recurring basis, the entities forming part of the Restricted Group determine whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

This note summarises the accounting policy for determination of fair value. Other fair value related disclosures are given in the relevant notes as following:
· Disclosures for significant estimates and assumptions (Refer Note 40)
· Quantitative disclosures of fair value measurement hierarchy (Refer Note 35)
· Financial instruments (including those carried at amortised cost) (Refer Note 34 and 35)

c) Revenue recognition

Revenue from contracts with customers

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services. The Group has generally concluded that it is the principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer.

Sale of power

Income from supply of power is recognised over time on the supply of units generated from plant to the grid as per terms of the Power Purchase Agreement (PPA) entered into with the customers.

The entities forming part of Restricted Group considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of power, the Group considers the effects of variable consideration and consideration payable to the customer (if any).

Transaction price - remaining performance obligation

The remaining performance obligation disclosure provides the aggregate amount of the transaction price yet to be recognised as at the end of the reporting period and an explanation as to when the Group expects to recognise these amounts in revenue. Applying the practical expedient as given in Ind AS 115, the Group has not disclosed the remaining performance obligation related disclosures for contracts as the revenue recognized corresponds directly with the value to the customer of the entity's performance completed to date.

(i) Variable consideration

If the consideration in a contract includes a variable amount, the Group estimates the amount of consideration to which it will be entitled in exchange for transferring the goods or service to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

Rebates

In some PPAs, the Group provide rebates in invoice if payment is made before the due date. Rebates are offset against amounts payable by the customers. To estimate the variable consideration for the expected future rebate, the Group applies the most likely method.

(ii) Consideration payable to customers

In some PPAs, Group has to pay consideration to customers. Consideration payable to customers are offset against the revenue recognised as and when sale of power occurs.

Income from liquidated damages and interest on advances

Income from liquidated damages and interest on advance is recognised after certainty of receipt of the same is established.

Dividend

Dividend income is recognised when the right of the entities forming part of the Restricted Group to receive dividend is established by the reporting date.

Interest income

For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset. When calculating the effective interest rate, the entities forming part of the Restricted Group estimate the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in other income in the Special Purpose Combined Statement of Profit and Loss.

Income from government grants

Refer note (f) for accounting policy.

Contract balances :

(i) Contract assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the entities forming part of Restricted Group perform by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

(ii) Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the entities forming part of Restricted Group have received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the entities forming part of Restricted Group transfer goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the entities forming part of Restricted Group perform under the contract.

(iii) Trade receivables

A receivable represents the right of entities forming part of Restricted Group to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in section (n) Financial instruments – initial recognition and subsequent measurement.

d) Foreign currencies

The Restricted Group Financial Statements are presented in Indian rupees (INR), which is also the functional currency of all entities forming part of Restricted Group. Functional currency is the currency of the primary economic environment in which the entities forming part of Restricted Group operates and is normally the currency in which the entities forming part of Restricted Group primarily generates and expends cash.

Transactions and balances

Transactions in foreign currencies are initially recorded by the Restricted Group at their functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

Exchange differences arising on settlement or translation of monetary items are recognised in profit and loss.

e) Income taxes

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in India. Current income tax relating to items recognised outside profit and loss is recognised outside profit and loss (either in other comprehensive income or in equity). Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate. Current income tax assets and liabilities are offset if a legally enforceable right exists to set off these and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Deferred tax
Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss

- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

In situations where the entities forming part of the Restricted Group are entitled to a tax holiday under the Income-tax Act, 1961, enacted in India, no deferred tax (asset or liability) is recognized in respect of temporary differences which reverse during the tax holiday period. Deferred taxes in respect of temporary differences which reverse after the tax holiday period are recognized in the year in which the temporary differences originate. However, the entities forming part of the Restricted Group restrict the recognition of deferred tax assets to the extent that it has become reasonably certain that sufficient future taxable income will be available against which such deferred tax assets can be realized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit and loss is recognised outside profit and loss (either in OCI or equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Minimum Alternate Tax
Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the entities forming part of the Restricted Group will pay normal income tax. Accordingly, MAT is recognised as deferred tax asset in the Special Purpose Combined Balance Sheet when it is probable that future economic benefit associated with it will flow to the entities forming part of the Restricted Group.

f) Government grants
Government grants are recognized where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant is related to an expense item, it is recognized as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant is related to an asset, it is recognized as income in equal amounts over the expected useful life of the related asset.

When the entities forming part of the Restricted Group receive grants of non-monetary assets, the asset and the grant are recorded at fair value amounts and released to Statement of Profit and Loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset i.e. by equal annual instalments.

The entities forming part of the Restricted Group presents grants related to an expense item as other income in the Statement of Profit and Loss. Thus, Generation based incentive and Sale of emission renewable certificates have been recognised as other income.

Generation based incentive
Generation based incentive is recognized on the basis of supply of units generated by the entities forming part of the Restricted Group to the state electricity board from the eligible project in accordance with the scheme of the "Generation Based Incentive (GBI) for Grid interactive Wind Power Projects"

g) Property, plant and equipment

On transition date to Ind AS, the entities forming part of the Restricted Group have elected to continue with the carrying value of all of its property, plant and equipment recognised as at 1 April 2015 measured as per previous GAAP and use that carrying value as the deemed cost of the property, plant and equipment.

Capital work in progress and freehold land are stated at cost, net of accumulated impairment loss, if any. Property, plant and equipment except freehold land is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Restricted Group depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred.

Subsequent costs
The cost of replacing a part of an item of property, plant and equipment is recognised in the carrying amount of the item of property, plant and equipment, if it is probable that the future economic benefits embodied within the part will flow to the entities forming part of the Restricted Group and its cost can be measured reliably with the carrying amount of the replaced part getting derecognised. The cost for day-to-day servicing of property, plant and equipment are recognised in Statement of Profit and Loss as and when incurred.

Derecognition
An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the Special Purpose Combined Statement of Profit and Loss when the asset is derecognised.

h) Depreciation / amortisation of property, plant and equipment and intangibles

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets as follows:

Category	**Useful life (in years)**
Plant and equipment (wind and solar power projects)*	18-25
Furniture & fixture	10
Office equipment	5
Computers	3
Customer contracts	Life of respective power purchase agreements

* Based on an external technical assessment, the management believes that the useful lives as given above and residual value of 0%-5%, best represents the period over which management expects to use its assets and its residual value. The useful life of plant and equipment is different from the useful life as prescribed under Part C of Schedule II of Companies Act, 2013.

The residual values, useful lives and methods of depreciation of property, plant and equipment and other intangible assets are reviewed at each financial year end and adjusted prospectively, if appropriate.

i) Leases

As per Ind AS 17 applicable till period ended 31 March 2019

As a lessee
Operating lease payments are recognised as an expense in the Special Purpose Combined Statement of Profit and Loss on a straight-line basis over the lease term.

A lease is classified at the inception date as a finance lease or an operating lease. A lease that transfers substantially all the risks and rewards incidental to ownership to the Group is classified as a finance lease. An operating lease is a lease other than a finance lease

As a lessor
Leases in which the entities forming part of Restricted Group does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

As per Ind AS 116 applicable from 1 April 2019
The Restricted Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

As a lessee
Entities forming part of the Restricted Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The entities forming part of the Restricted Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets
Entities forming part of the Restricted Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over shorter of the lease term and the estimated useful lives of the assets.

If ownership of the leased asset transfers to the entities forming part of Restricted Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.
The right-of-use assets are also subject to impairment. Refer to the accounting policies in section (l) Impairment of non-financial assets.

ii) Lease liabilities
At the commencement date of the lease, the rntities forming part of the Restricted Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including insubstance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the entities forming part of the Restricted Group and payments of penalties for terminating the lease, if the lease term reflects the entities forming part of the Restricted Group exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the entities forming part of the Restricted Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

iii) Short-term leases and leases of low-value assets
The entities forming part of the Restricted Group applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short-term leases and leases of low value assets are recognised as expense on a straight-line basis over the lease term.

As a lessor
Leases in which the entities forming part of the Restricted Group does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

j) Inventories
Inventories are valued at the lower of cost and net realisable value.
Costs incurred in bringing each product to its present location and condition are accounted for as follows:
Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on first in, first out basis.
Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

k) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale. Borrowing costs consist of interest, discount on issue, premium payable on redemption and other costs that an entity incurs in connection with the borrowing of funds (this cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs). The borrowing costs are amortised basis the Effective Interest Rate (EIR) method over the term of the loan. The EIR amortisation is recognised under finance costs in the Statement of Profit and Loss. The amount amortized for the period from disbursement of borrowed funds upto the date of capitalization of the qualifying assets is added to cost of the qualifying assets.

l) Impairment of non-financial assets

The entities forming part of the Restricted Group assess, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the entities forming part of the Restricted Group estimate the asset’s recoverable amount. An asset’s recoverable amount is the higher of an asset’s or cash-generating units (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre -tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The entities forming part of the Restricted Group bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Restricted Group’s CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the entities forming part of the Restricted Group extrapolate cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the Statement of Profit and Loss.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the entities forming part of the Restricted Group estimate the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying value of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Profit and Loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as an increase in revaluation.

m) Provisions

Provisions are recognised when the entities forming part of the Restricted Group have a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the entities forming part of the Restricted Group expect some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the Statement of Profit and Loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

n) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit and loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the entities forming part of the Restricted Group commit to purchase or sell the asset.

Subsequent measurement
For purposes of subsequent measurement, financial assets are classified in four categories:

Debt instruments at amortised cost
A ‘debt instrument’ is measured at the amortised cost if both the following conditions are met:
a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance expense in the Special Purpose Combined Statement of Profit and Loss. The losses arising from impairment are recognised in the Special Purpose Combined Statement of Profit and Loss.

Debt instruments at fair value through other comprehensive income (FVTOCI)
A ‘debt instrument’ is classified as at the FVTOCI if both of the following criteria are met:
a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
b) The asset’s contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the entities forming part of the Restricted Group recognize interest income, impairment losses and reversals and foreign exchange gain or loss in the Statement of Profit and Loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to Statement of Profit and Loss. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

Debt instruments at fair value through profit and loss (FVTPL)
FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the entities forming part of the Restricted Group may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as ‘accounting mismatch’). The entities forming part of the Restricted Group have not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

Equity investments
All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS 103 applies are classified as at FVTPL. For all other equity instruments, the entities forming part of the Restricted Group may make an irrevocable election to present the subsequent changes in the fair value in OCI. The entities forming part of the Restricted Group make such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the entities forming part of the Restricted Group decide to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to Statement of Profit and Loss, even on sale of investment. However, the entities forming part of the Restricted Group may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

Derecognition
A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised when:
- The rights to receive cash flows from the asset have expired, or
- The entities forming part of the respective Restricted Group have transferred their rights to receive cash flows from the asset or have assumed the obligation to pay the received cash flows in full without material delay to a third party under a ‘pass-through’ arrangement; and

Either the entities forming part of the Restricted Group have transferred substantially all the risks and rewards of the asset, or has neither transferred nor retained substantially all the risks and rewards of the asset, but have transferred control of the asset.

When the entities forming part of the Restricted Group have transferred their rights to receive cash flows from an asset or have entered into a pass-through arrangement, they evaluate if and to what extent they have retained the risks and rewards of ownership. When they have neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the entities forming part of the Restricted Group continue to recognise the transferred asset to the extent of the continuing involvement of the entities forming part of the Restricted Group. In that case, the entities forming part of the Restricted Group also recognise an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the entities forming part of the Restricted Group have retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the entities forming part of the Restricted Group could be required to repay.

Impairment of financial assets
In accordance with Ind AS 109, the Restricted Group applies expected credit loss (ECL) model for measurement and recognition of impairment loss on all the financial assets and credit risk exposure.
The entities forming part of the Restricted Group follows 'simplified approach for recognition of impairment loss allowance on trade receivables or contract revenue receivables.

The application of simplified approach does not require the entities forming part of the Restricted Group to track changes in credit risk. Rather it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the entities forming part of the Restricted Group determine that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/expense in the Special Purpose Combined Statement of Profit and Loss.

Financial liabilities

Initial recognition and measurement
Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit and loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and in the case of loans and borrowings and payables, net of directly attributable transaction costs. The financial liabilities of the entities forming part of the Restricted Group include trade and other payables, derivative financial instruments, loans and borrowings including bank overdraft.

Subsequent measurement
The measurement of financial liabilities depends on their classification as discussed below:-

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in Statement of Profit and Loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss. This category generally applies to borrowings.

The entities forming part of the Restricted Group recognise debt modifications agreed with lenders to restructure their existing debt obligations. Such modifications are done to take advantage of falling interest rates by cancelling the exposure to high interest fixed rate debt, pay a fee or penalty on cancellation and replace it with debt at a lower interest rate (exchange of old debt with new debt). The qualitative factors considered to be relevant for modified financial liabilities include, but are not limited to, the currency that the debt instrument is denominated in, the interest rate (that is fixed versus floating rate), conversion features attached to the instrument and changes in covenants. The accounting treatment is determined depending on whether modifications or exchange of debt instruments represent a settlement of the original debt or merely a renegotiation of that debt. The exchange of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability.

Redeemable non convertible preference shares
Redeemable non convertible preference shares are separated into liability and equity components based on the terms of the contract. On issuance of the redeemable non convertible preference shares, the fair value of the liability component is determined using a market interest rate for an equivalent non-convertible instrument. This amount is classified as a financial liability measured at amortised cost (net of transaction costs) until it is extinguished on conversion. The remainder of the proceeds is allocated to the conversion option that is recognised and included in equity. Transaction costs are deducted from equity, net of associated income tax.

Compulsorily Convertible Preference shares (CCPS)
Compulsorily Convertible Preference shares are accounted for as Instruments entirely equity in nature since conversion option meets Ind AS 32 criteria for fixed to fixed classification and the dividend distribution is discretionary in nature.

Derecognition
A financial liability is derecognised when the obligation under the liability is discharged/ cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

Reclassification of financial assets and liabilities
The Restricted Group determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent.

Offsetting of financial instruments
Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

o) Derivative financial instruments and hedge accounting

Initial recognition and subsequent measurement
Entities forming part of Restricted Group uses derivative financial instruments, such as interest rate swaps and call/put options etc., to hedge its interest rate risks and foreign currency risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to profit or loss, except for the effective portion of cash flow hedges, which is recognised in OCI and later reclassified to profit or loss when the hedge item affects profit or loss or treated as basis adjustment if a hedged forecast transaction subsequently results in the recognition of a non-financial asset or non-financial liability.

For the purpose of hedge accounting, hedges are classified as:
- Fair value hedges when hedging the exposure to changes in the fair value of a recognised asset or liability or an unrecognised firm commitment
- Cash flow hedges when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment
- Hedges of a net investment in a foreign operation

At the inception of a hedge relationship, the entities forming part of Restricted Group formally designates and documents the hedge relationship to which the Restricted Group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes the Restricted Group’s risk management objective and strategy for undertaking hedge, the hedging/ economic relationship, the hedged item or transaction, the nature of the risk being hedged, hedge ratio and how the entity will assess the effectiveness of changes in the hedging instrument’s fair value in offsetting the exposure to changes in the hedged item’s fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.
Hedges that meet the strict criteria for hedge accounting are accounted for, as described below:

(i) Cash flow hedges

The effective portion of the gain or loss on the hedging instrument is recognised in OCI in the cash flow hedge reserve, while any ineffective portion is recognised immediately in the Special Purpose Combined Statement of Profit and Loss.
The entities forming part of Restricted Group uses interest rate swaps and call/put options etc. as hedges of its exposure to interest rate risks and foreign currency risks in the foreign currency loan. The ineffective portion relating to foreign currency loan is recognised in other income or expenses.

Amounts recognised as OCI are transferred to profit or loss when the hedged transaction affects profit or loss, such as when the hedged item affects the Special Purpose Combined Statement of Profit and Loss or treated as basis adjustment if a hedged item subsequently results in recognition of a non-financial asset or liability.
If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover (as part of the hedging strategy), or if its designation as a hedge is revoked, or when the hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss previously recognised in OCI remains separately in equity until the forecast transaction occurs or the foreign currency firm commitment is met.

p) Cash and cash equivalents

Cash and short-term deposits in the balance sheet comprise cash at banks and cash in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the Statement of cash flows, cash and cash equivalents consist of cash and short term deposits, as defined above, net off bank overdrafts as they considered an integral part of the entities forming part of the Restricted Group's cash management.

q) Measurement of EBITDA

The Restricted Group has elected to present earnings before interest, tax, depreciation and amortization (EBITDA) as a separate line item on the face of the Statement of Profit and Loss. The Restricted Group measure EBITDA on the basis of profit/ (loss) from continuing operations. In their measurement, the companies include interest income but do not include depreciation and amortization expense, finance costs and tax expense.

r) Events occurring after the Balance Sheet date

Impact of events occurring after the balance sheet date that provide additional information materially effecting the determination of the amounts relating to conditions existing at the balance sheet date upto the date of the approval for issue of these Special Purpose Combined Financial Statements by the Board of Directors of the Restricted Group are adjusted to respective assets and liabilities.

The entities forming part of the Restricted Group do not adjust the amounts recognised in its Special Purpose Combined Financial Statements to reflect non-adjusting events after the reporting period.

The entities forming part of the Restricted Group make disclosures in the financial statement in cases of significant events.

s) Contingent liabilities

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entities forming part of the Restricted Group or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

3.4 Changes in accounting policy and disclosures - new and amended standards

The entities forming part of the Restricted Group applied Ind AS 116 for the first time. The nature and effect of the changes as a result of adoption of the new accounting standard are described below.

Several other amendments and interpretations apply for the first time for the year ended 31 March 2020, but do not have an impact on the Special Purpose Combined Financial Statements of the Restricted Group. The Entities forming part of Restricted Group has not early adopted any standards or amendments that have been issued but are not yet effective.

a) Ind AS 116 Leases:

Ind AS 116 supersedes Ind AS 17 Leases. The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessee's to recognise most leases on the balance sheet. Lessor accounting under Ind AS 116 is substantially unchanged from Ind AS 17. Lessors will continue to classify leases as either operating or finance leases using similar principles as in Ind AS 17. Therefore, Ind AS 116 does not have an impact for leases where the Restricted Group is the lessor.

The Entities forming part of Restricted Group adopted Ind AS 116 using the modified retrospective method of adoption, with the date of initial application of 1 April 2019, the right-of-use assets were recognised based on the amount equal to the lease liabilities, adjusted for any related prepaid and accrued lease payments previously recognised. Lease liabilities were recognised based on the present value of the remaining lease payments, discounted using the incremental borrowing rate at the date of initial application. There is no impact on equity on transition to Ind AS 116 as on 1 April 2019.

The Entities forming part of Restricted Group elected to use the transition practical expedient to not reassess whether a contract is or contains a lease at 1 April 2019. Instead, the entities forming part of Restricted Group applied the standard only to contracts that were previously identified as leases applying Ind AS 17 and Appendix C to Ind AS 17 at the date of initial application. Therefore, the comparative information was not restated and continues to be reported under Ind AS 17. The Entities forming part of Restrcicted Group also applied the available practical expedients wherein it:

- Used a single discount rate to a portfolio of leases with reasonably similar characteristics
- Relied on its assessment of whether leases are onerous immediately before the date of initial application
- Applied the short-term leases exemptions to leases with lease term that ends within 12 months of the date of initial application
- Excluded the initial direct costs from the measurement of the right-of-use asset at the date of initial application
- Used hindsight in determining the lease term where the contract contained options to extend or terminate the lease

The effect of adopting Ind AS 116 as at 1 April 2019 was, as follows:

Particulars	Notes	(INR in Mn) Ind AS 116 impact as at 1 April 2019
Assets		
Non-current assets		
Right of use assets	6	16
Prepayments	9	(10)

b) Other regulatory changes

On 20th September 2019, vide the Taxation Laws (Amendment) Ordinance, 2019 (the "Ordinance"), the Government of India inserted 115BAA in the Income Tax Act, 1961 which provides domestic companies a non-reversible option to pay corporate tax at reduced rates effective 1st April, 2019, subject to certain conditions. Some of the entities forming part of the Restricted Group have decided to opt for reduced corporate tax rates and accordingly, has recognized current tax and re-measured its deferred taxes as per the provisions of the Ordinance. This has resulted in write-off of MAT credit amounting to INR 134 and recognition of Deferred Tax Liability (DTL) amounting to INR 49 on account of re-measurement of deferred tax as at 31 March 2019. The tax charge for the year has been increased by INR 183.

Notes:

(i) Term loan from bank (secured)

Term loan from banks are secured by pari passu first charge by way of mortgage of all the present and future immovable properties, hypothecation of movable assets, book debt, operating cash flows, receivables, commissions, revenue of whatsoever nature, all bank accounts and all intangibles assets, assignment of all rights, title, interests, benefits, claims etc. of project documents and insurance contracts of the entities forming part of the Restricted Group.

(ii) Term loan from financial institutions (secured)

Secured by a first pari passu charge by way of mortgage on immovable properties, first pari passu charge by way of hypothecation of tangible moveable assets, first charge on all the current assets, other intangible assets and accounts. Further secured by way of assignment of all the rights, title, interest, benefit, claims and demands under all the project agreements, letter of credit, insurance contracts and proceeds, guarantees, performance bond etc. of the respective entities.

(iii) Buyer's / Supplier's credit (secured)

Buyer's/ Supplier's credit are secured by first pari passu first charge by way of mortgage of all the present and future immovable properties, hypothecation of movable assets, book debt, operating cash flows, receivables, commissions, revenue of whatsoever nature, all bank accounts and all intangibles assets, assignment of all rights, title, interests, benefits, claims etc. of project documents, PPA, and insurance contracts of the entities forming part of the Restricted Group. Creation of charge by way of mortgage and assignment is under process.

(iv) All the loans are covered by corporate guarantee of ReNew Power Private Limited.

(v) Zemira Renewables Private Limited (referred to as “Zemira”) has an outstanding term loan balance of INR 3,048 from Piramal Capital & Housing Finance Limited and PHL FINVEST Private Limited (collectively referred to as “Piramal”) as at 31 March 2020. As per terms of agreement with Piramal, principal instalment of INR 29 and interest of INR 33 was due on 30 June 2020 against which Zemira has availed moratorium from the Piramal till 30 September 2020 through approval letters dated 28 July 2020 under “Reserve Bank of India’s COVID 19 - Regulatory Package dated 27 March 2020”. Subsequently on 23 September 2020, Zemira issued 14.45% redeemable Non-Convertible debentures (referred to as “NCDs”) amounting to INR 3,075 to India Investment Opportunities Fund. Further, on 24 September 2020, the outstanding balance for existing term loan increased to INR 3,181 (with accrual of interest till such date) and the proceeds from NCDs have been utilised to partially repay the term loan balance to an extent of INR 3,075. Zemira plans to issue further NCDs to repay the remaining unpaid balance of existing term loan i.e. INR 106 and repay such balance by 31 March 2021. The NCDs issued, are repayable in quarterly instalments starting from September 2020 to March 2036.

(vi) Entities forming part of the Restricted Group have not created charge on security against outstanding loan balances given below mainly on account of pending approvals from government agencies with respect to land mortgages. The charge will be created as and when the respective entities get the necessary approvals from these agencies. None of the entities listed below have received any approval till date.

30 Leases

As per Ind AS 17 applicable till period ended 31 March 2019

Entities forming part of the group have entered into lease for its leasehold land. The Leasehold lease has non cancellable period which has remaining term of 10.5 years.

Future minimum rentals payables under non- cancellable operating lease (excluding lease equalisation reserve) are as follows:

Particulars	**For the year ended 31 March 2019**
Within one year	1
After one year but not more than five years	3
More than 5 years	5

As per Ind AS 116 applicable from 1 April 2019

Entities forming part of restricted group have entered into leases for its leasehold lands. The lease terms is 12.5 years.

The weighted average incremental borrowing rate applied to lease liabilities recognised in the balance sheet at the date of initial application is 10.40%.

Set out below are the carrying amounts of lease liabilities and the movements during the period:

Particulars	**As at 31 March 2020**
As at 1 April 2019 on account of adoption of Ind AS 116	5
Accretion of interest	0
Payments	(0)
Balance as on 31 March 2020	**5**

Refer note 3.4(a) for approach followed by the Group for transition to Ind AS 116.

The lease liabilities as at 1 April 2019 can be reconciled to the operating lease commitments as of 31 March 2019, as follows:

Operating lease commitments as at 31 March 2019	8
Weighted average incremental borrowing rate as at 1 April 2019	10.40%
Discounted operating lease commitments as at 1 April 2019	5
Add: Lease liabilities of lease hold land not considered in operating lease commitment	-
Lease liabilities as at 1 April 2019	**5**

a) There are no restrictions or covenants imposed by leases.
b) Refer note 25 for rental expense recorded for short-term leases and low value leases for the year ended 31 March 2020.
c) There are no amounts payable toward variable lease expense recognised for the year ended 31 March 2020.
d) The maturity analysis of lease liabilities are disclosed in note 36.
e) There are no leases which have not yet commenced to which the lessee is committed (if any).

31 Segment information

The managing director of ReNew Power Private Limited takes decisions in respect of allocation of resources and assesses the performance basis the reports/ information provided by functional heads and is thus considered to be the Chief Operating Decision Maker (CODM).

The Restrcited Group discloses segment information in a manner consistent with internal reporting to group's Managing Director. The entities forming part of the Restricted Group have segments based on type of business operations. The reportable segments of Restricted Group under Ind AS are Wind Power and Solar Power which predominantly relate to generation and sale of electricity and construction activities. The entities forming part of the Restricted Group does not operate in more than one geographical segment. The Restricted Group discloses in the segment information operating profit, comparable operating profit and comparable EBITDA.

No operating segment has been aggregated to form the above reportable operating segments. Further, total assets and liabilities balances for each reportable segment are not reviewed by or provided to CODM.

	For the year ended 31 March 2020			For the year ended 31 March 2019		
	Wind Power	**Solar Power**	**Total**	**Wind Power**	**Solar Power**	**Total**
Sale of power and sale of renewable energy certificates	2,856	842	3,698	2,952	823	3,775
Revenues from operations	**2,856**	**842**	**3,698**	**2,952**	**823**	**3,775**
Less: Inter-segment	-	-	-	-	-	-

The Revenues from three major customers amounts to INR 2,233 (31 March 2019: Three major customers : INR 2,312) each of which contributes more than 10% of the total revenue of the Group.

32 Hedging activities and derivatives

Derivatives designated as hedging instruments

The entities forming part of the Restricted Group use certain types of derivative financial instruments (viz. foreign currency forwards, cross-currency interest rate swap) to manage/mitigate their exposure to foreign exchange and interest risk. Further, the entities forming part of the Restricted Group designates such derivative financial instruments (or its components) as hedging instruments for hedging the exchange rate fluctuation and interest risk attributable to either a recognised item or a highly probable forecast transaction ('cash flow hedge'). The effective portion of changes in the fair value of derivative financial instruments (or its components) that are designated and qualify as cash flow hedges, are recognised in the other comprehensive income and held in cash flow hedge reserve - a component of equity. Any gains / (losses) relating to the ineffective portion, are recognised immediately in the Statement of Profit and Loss within other expenses/ other income. The amounts accumulated in equity for highly probable forecast transaction are added to carrying value of non financial asset or non financial liability as basis adjustment, other amounts accumulated in equity are re-classified to the Statement of Profit and Loss in the year when the hedged item affects profit / (loss).

At any point of time, when a forecast transaction is no longer expected to occur, the cumulative gains / (losses) that were reported in equity is immediately transferred to the Statement of Profit and Loss within other expenses / other income.

Cash flow hedges

Hedge has been taken against exposure to foreign currency risk and variable interest outflow on external commercial borrowings and buyer's credit. Terms of the swaps and their respective impact on OCI and Statement of Profit and Loss is as below:-

- Buyers credit (included in short term borrowings)
Pay fixed INR and receive USD and pay fixed interest at 7.37% to 7.80% p.a. and receive a variable interest at 6 month LIBOR plus 0.45% p.a. to 6 month LIBOR plus 1.10% p.a. on the notional amount.

'The cash flow hedges through forward is USD 7,729,200 (31 March 2019 : 4,529,962) and CCS is USD NIL (31 March 2019 : 12,266,902) outstanding at the year ended 31 March 2020 were assessed to be highly effective and cumulative impact of mark to market gain and restatement of hedged item is (INR 6) (31 March 2019: INR 7) with a deferred tax asset of INR 19 (31 March 2019: Deferred Tax Liability of INR 2), is included in OCI.

Foreign currency and Interest rate risk

Forward contracts and swaps measured at fair value through OCI are designated as hedging instruments in cash flow hedges of interest and principal payments in USD.

	31 March 2020		31 March 2019	
	Assets	**Liabilities**	**Assets**	**Liabilities**

Balance at the beginning of the year	**5**	**(24)**
Gain/(loss) recognised on cash flow hedges	(23)	2
Income tax relating to gain/loss recognized on cash flow hedges	24	(0)
Gain/(loss) reclassified to non financial assets or liabilities as basis adjustment	-	35
Income tax relating to gain/loss reclassified to non financial assets or liabilities as basis adjustment	-	(9)
Gain/(loss) reclassified to profit and loss as hedged future cash flows are no longer expected to occur	9	2
Income tax relating to gain/loss reclassified to profit and loss as hedged future cash flows are no longer expected to occur	(2)	(1)
Balance at the end of the year	**13**	**5**

33 Commitments, liabilities and contingencies
(to the extent not provided for)

(i) Contingent liabilities
The entities forming part of the Restricted Group have no contingent liability as on 31 March 2020. (31 March 2019: INR 5 on account of dealy in project commissioning).

(ii) Commitments
Estimated amount of contracts remaining to be executed on capital account and not provided for
There are no capital commitments outstanding as on 31 March 2020 (31 March 2019: INR Nil).

34 Fair values

Set out below, is a comparison by class of the carrying amounts and fair value of the financial instruments of the entities forming part of the Restricted Group:

	31 March 2020		31 March 2019	
	Carrying value	Fair value	Carrying value	Fair value
Financial assets				
Measured at amortised cost				
Loans-non current	87	87	87	87
Bank deposits with remaining maturity for more than twelve months	0	0	-	-
Trade receivables	1,740	1,740	1,396	1,396
Cash and cash equivalent	224	224	379	379
Bank balances other than cash and cash equivalent	2,007	2,007	1,645	1,645
Loans-current	935	935	887	887
Other current financial assets	295	295	285	285
Measured at FVOCI				
Derivative instruments	34	34	40	40
Financial liabilities				
Measured at amortised cost				
Long term borrowings	14,767	14,767	15,001	15,001
Short-term borrowings	5,588	5,588	4,819	4,819
Trade payables	730	730	626	626
Other current financial liabilities	2,439	2,439	3,578	3,578

The management of the entities forming part of the Restricted Group assessed that cash and cash equivalents, bank balances other than cash and cash equivalent, loans-current, trade receivables, interest accrued on unsecured loan, trade payables, other current financial liabilities and other current financial assets approximate their carrying amounts largely due to the short-term maturities of these instruments.

The following methods and assumptions were used to estimate the fair values:

i The fair values of the entities forming part of the Restricted Group's term loans from banks and financial institutions including current maturities are determined by using Discounted Cash Flow (DCF) method using discount rate that reflects the issuer's borrowing rate as at the end of the reporting period. They are classified as level 3 fair values in the fair value hierarchy due to the inclusion of unobservable inputs including own credit risk. The own non-performance risk as at 31 March 2020 was assessed to be insignificant.

ii The fair values of the security deposits given are determined by using Discounted Cash Flow (DCF) method using discount rate that reflects the lending rate as at the end of the reporting period. They are classified as level 3 fair values in the fair value hierarchy due to the inclusion of unobservable inputs including counterparty credit risk.

iii The entities forming part of the Restricted Group enter into derivative financial instruments with various counter parties, principally financial institutions with investment grade credit ratings. Cross currency interest rate swaps are valued using valuation techniques, which employs the use of market observable inputs. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates, yield curves of the currency, interest rate curves and forward rate curves of the underlying instrument. The changes in counterparty credit risk had no material effect on the hedge effectiveness assessment for derivatives designated in hedge relationships.

35 Fair value hierarchy

The entities forming part of the Restricted Group categorize assets and liabilities measured at fair value into one of three levels depending on the ability to observe inputs employed in their measurement which are described as follows:
i) Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
ii) Level 2 - Inputs are inputs that are observable, either directly or indirectly, other than quoted prices included within level 1 for the asset or liability.
iii) Level 3 - Inputs are unobservable inputs for the asset or liability reflecting significant modifications to observable related market data or assumptions about pricing by market participants.

The following table provides the fair value measurement hierarchy of the assets and liabilities of the entities forming part of the Restricted Group :-

Quantitative disclosures fair value measurement hierarchy for assets/liabilities as at year end:

	Level of fair value measurement	31 March 2020		31 March 2019	
		Carrying value	Fair value	Carrying value	Fair value
Financial assets measured at FVOCI					
Derivative instruments	Level 2	34	34	40	40
		34	**34**	**40**	**40**

Term loan from financial institution	Level 3	Discounted cash flow	Prevailing interest rates in the market, Future cash flows
Term loan from banks	Level 3	Discounted cash flow	Prevailing interest rates in the market, Future cash flows
Liability component of preference shares (secured)	Level 3	Discounted cash flow	Prevailing interest rates in the market, Future cash flows
Financial liabilities measured at fair value through other comprehensive income			
Derivative instruments	Level 2	Market value techniques	Forward foreign currency exchange rates, interest rates to discount future cash flows

-----------------------------------This space has been left blank intentionally---------------------------------------

36 Financial risk management objectives and policies

The Restricted Group's principal financial liabilities comprise loans and borrowings, trade payables and other financial liabilities.
The main purpose of these financial liabilities is to finance the Restricted Group's operations and to support its operations. The Restricted Group's financial assets include loans, trade and other receivables, and cash and cash equivalents and other financial assets.

The Restricted Group is exposed to market risk, credit risk and liquidity risk. The Restricted Group's senior management oversees the management of these risks. The Restricted Group's senior management is supported by a various sub committees that advises on financial risks and the appropriate financial risk governance framework for the Restricted Group. These committees provides assurance to the Restricted Group's senior management that the Restricted Group's financial risk activities are governed by appropriate policies and procedure and that financial risks are identified, measured and managed in accordance with the Restricted Group's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each risk, which are summarised as below.

Market risk

Market risk is the risk that the Restricted Group's assets and liabilities will be exposed to due to a change in market prices that determine the valuation of these financial instruments. Market risk comprises 3 types of risk: interest rate risk, currency risk and other price risk such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits and derivative financial instruments.
The sensitivity analyses in the following sections relate to the position as at 31 March 2020. The sensitivity analyses have been prepared on the basis that the amount of net debt, the ratio of fixed to floating interest rates of the debt and derivatives and the proportion of financial instruments in foreign currencies are all constant and on the basis of hedge designations in place as at 31 March 2020.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Restricted Group is exposed to interest rate risk primarily from the external borrowings that are used to finance their operations. In case of external commercial borrowings ("ECB") and buyers credit the Restricted Group believes that the exposure of the Restricted Group to changes in market interest rates is insignificant as the respective companies manage the risk by hedging the changes in the market interest rates through cross currency interest rate swaps. The Restricted Group also monitors the changes in interest rates and actively re-finances its debt obligations to achieve an optimal interest rate exposure.

Interest rate sensitivity

The following table demonstrates the sensitivity to a reasonable possible change in interest rates on financial liabilities, i.e. borrowings in INR and USD. With all other variables held constant, the entities forming part of the Restricted Group's profit before tax is affected through the impact on financial assets, as follows:

	31 March 2020		31 March 2019	
	Increase/decrease in basis points	**Effect on profit before tax**	**Increase/decrease in basis points**	**Effect on profit before tax**
INR	+/(-)50	(-)/+ 84	+/(-)50	(-)/+ 55
	Increase/decrease in basis points	**Effect on equity**	**Increase/decrease in basis points**	**Effect on equity**
INR	+/(-)50	(-)/+ 63	+/(-)50	(-)/+ 41

Foreign currency risk

Foreign Currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Restricted Group is exposed to foreign currency risk arising from imports of goods in US dollars and external commercial borrowings. The Restricted Group hedges its exposure to fluctuations on the translation into INR of its buyer's/supplier's credit and ECB by using foreign currency swaps and forward contracts. The entities forming part of the Restricted Group have followed a conservative approach for hedging the foreign currency risk so as to not use complex forex derivatives. The Restricted Group also monitors that the hedges do not exceed the underlying foreign currency exposure. The Restricted Group does not undertake any speculative transaction.

Foreign currency sensitivity

The Restricted Group has hedged its exposure to fluctuations on its buyer's/supplier's credit and ECB through forward contracts and cross currency swaps and thus foreign currency sensitivity has not been disclosed.

Credit risk

Credit risk from balances with banks is managed by treasury department of the entities forming part of the Restricted Group. Investments, in the form of fixed deposits, loans and other investments, of surplus funds are made only with banks and group companies and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed on an annual basis by the entities forming part of the Restricted Group, and may be updated throughout the year subject to approval of respective entities finance committee. The limits are set to minimize the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

Further the entities forming part of the Restricted Group sought to reduce counterparty credit risk under our long-term contracts in part by entering into power sales contracts with utilities or other customers of strong credit quality and we monitor their credit quality on an on going basis.
The maximum credit exposure to credit risk for the components of the balance sheet at 31 March 2020 and 31 March 2019 is the carrying amount of all the financial assets.

Trade receivables

Customer credit risk is managed basis established policies of the entities forming part of the Restricted Group, procedures and controls relating to customer credit risk management. Outstanding customer receivables are regularly monitored. The entities forming part of the Restricted Group do not hold collateral as security.

The entities forming part of the Restricted Group have state utilities/government entities as it's customers with high credit worthiness, therefore, the entities forming part of the Restricted Group do not see any risk related to credit. The credit quality of the customers other than state utilities/government entities is evaluated based on their credit ratings and other publicly available data.

Financial instruments and credit risk

Credit risk from balances with banks is managed by group's treasury department. Investments, in the form of fixed deposits, of surplus funds are made only with banks and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed on an annual basis by the respective entity forming part of the Restricted Group, and may be updated throughout the year subject to approval of group's finance committee. The limits are set to minimize the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

Liquidity risk

Liquidity risk is the risk that the entities forming part of the Restricted Group will encounter in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The approach of the entities forming part of the Restricted Group to manage liquidity is to ensure , as far as possible, that these will have sufficient liquidity to meet their respective liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risk damage to their reputation.

The entities forming part of the Restricted Group assessed the concentration of risk with respect to refinancing its debt and concluded it to be low. The entities forming part of the Restricted Group have access to a sufficient variety of sources of funding and debt maturing within 12 months can be rolled over with existing lenders.

The entities forming part of the Restricted Group rely mainly on long-term debt obligations to fund their construction activities. To the extent available at acceptable terms, utilized non-recourse debt to fund a significant portion of the capital expenditures and investments required to construct and acquire our wind power plants and related assets. Our non-recourse financing is designed to limit cross default risk to the Parent Company or other subsidiaries and affiliates. Our non-recourse long-term debt is a combination of fixed and variable interest rate instruments. External commercial borrowings which are at variable rate is fixed through the use of cross currency interest rate swaps. In addition, the debt is typically denominated in the currency that matches the currency of the revenue expected to be generated from the benefiting project, thereby reducing currency risk. In certain cases, the currency is matched through the use of derivative instruments. The majority of non-recourse debt is funded by banks and financial institutions, with debt capacity supplemented by unsecured loan from related party.

The table below summarizes the maturity profile of financial liabilities of Restricted Group based on contractual undiscounted payments:

Year ended 31 March 2020	**On demand**	**Less than 3 months**	**3 to 12 months**	**1 to 5 years**	**> 5 years**	**Total**
Borrowings						
Term loan from Banks*	-	-	-	3,305	5,705	9,010
Loans from Financial Institutions*	-	-	-	6,169	12,425	18,594
Liability component of preference shares	-	-	-	-	1,147	1,147
Short term borrowings						
Working capital term loan (secured)	-	-	1,229	-	-	1,229
Loan from related party	3,777	-	-	-	-	3,777
Buyer's / Supplier's credit (secured)	-	582	-	-	-	582
Lease liability	-	-	1	3	4	8
Other financial liabilities						
Current maturities of long term borrowings*	-	646	1,903	-	-	2,549
Interest accrued but not due on borrowings	857	21	-	-	-	878
Capital creditors	413	354	-	-	-	767
Trades payable	632	98	-	-	-	730

* Including future interest payments.

The entities forming part of the Restricted Group expect liabilities with current maturities to be repaid from net cash provided by operating activities of the entity to which the debt relates or through opportunistic refinancing activity or some combination thereof.

Year ended 31 March 2019	**On demand**	**Less than 3 months**	**3 to 12 months**	**1 to 5 years**	**> 5 years**	**Total**
Borrowings						
Term loan from banks*	-	-	-	5,410	11,762	17,172
Term loan from financial institutions*	-	-	-	3,429	7,408	10,837

Trade payable	565	62	-	-	-	627

* Including future interest payments.

-----------------------------------This space has been left blank intentionally---------------------------------------

37 Capital management

For the purpose of the capital management by the respective entities forming part of the Restricted Group, capital includes issued equity capital, compulsory convertible preference shares, share premium and all other equity reserves attributable to the equity holders of the respective entities forming part of the Restricted Group. The primary objective of the respective entities forming part of the Restricted Group's capital management is to maximise the shareholder value.

The entities forming part of the Restricted Group manage their capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants.

To maintain or adjust the capital structure, respective entities forming part of the Restricted Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The respective entities forming part of the Restricted Group monitor capital using a gearing ratio, which is net debt divided by total capital plus net debt. The respective entities forming part of the Restricted Group includes within net debt, interest bearing loans and borrowings, trade and other payables, less cash and short-term deposits.

The policy of the respective entities forming part of the Restricted Group is to keep the gearing ratio to 3:1 during the construction phase and aim to enhance it to 4:1 post the construction phase. This is in line with industry rate. In the construction phase the entities forming part of Restricted Group manages the ratio at 3:1 through internal funding.

In order to achieve this overall objective, the capital management by the respective entities forming part of the Restricted Group, amongst other things, aims to ensure that they meet financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. There have been no breaches in the financial covenants of any interest-bearing loans and borrowing in the current year.

No changes were made in the objectives, policies or processes for managing capital during the year ended 31 March 2020.

38 Details of dues to Micro, Small and Medium Enterprises as defined under the MSMED Act, 2006

Under the Micro, Small and Medium Enterprises Development Act, 2006, (MSMED) which came into force from 2 October 2006, certain disclosure are required to be made relating to Micro, Small and Medium Enterprises. On the basis of the information and records available with the management, there are no outstanding dues to the Micro, Small and Medium Enterprises development Act, 2006.

Particulars	As at 31 March 2020	As at 31 March 2019
The principal amount and the interest due thereon (to be shown separately) remaining unpaid to any supplier as at the end of each accounting year/period	Nil	1
The amount of interest paid by the buyer in terms of section 16, of the Micro Small and Medium Enterprise Development Act, 2006 along with the amounts of the payment made to the supplier beyond the appointed day during each accounting year/period	Nil	Nil
The amount of interest due and payable for the period of delay in making payment (which have been paid but beyond the appointed day during the year/period) but without adding the interest specified under Micro Small and Medium Enterprise Development Act, 2006.	Nil	Nil
The amount of interest accrued and remaining unpaid at the end of each accounting year/period; and	Nil	Nil
The amount of further interest remaining due and payable even in the succeeding years, until such date when the interest dues as above are actually paid to the small enterprise for the purpose of disallowance as a deductible expenditure under section 23 of the Micro Small and Medium Enterprise Development Act, 2006	Nil	Nil

39 Corporate social responsibility expenditure

A CSR committee has been formed by the respective entity forming part of the Restricted Group as per the Act. The funds were utilised on above mentioned activities which are specified in Schedule VII of the Companies Act, 2013.

(a) Gross amount required to be spent by the entities forming part of the Restricted Group during the year is INR 6 (31 March 2019: INR 2).
(b) Amount spent during the year on:

List of CSR activities	In Cash	Yet to be paid	Total
Current year			
Construction / acquisition of any asset	Nil	Nil	Nil
Other activities	0	4	4
Total	**0**	**4**	**4**
Previous year*			
Construction / acquisition of any asset	Nil	Nil	Nil
Other activities	2	1	3
Total	**2**	**1**	**3**

* The amount yet to be paid in previous year has been subsequently paid in current year.

40 Significant accounting judgments, estimates and assumptions

The preparation of special purpose combined financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the accompanying disclosures. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

In the process of applying the accounting policies management has made certain judgements, estimates and assumptions. The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The entities forming part of the Restricted Group based their assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the entities forming part of the Restricted Group. Such changes are reflected in the assumptions when they occur.

A) Accounting judgements:

Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgment is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

The entities forming part of the Restricted Group makes various assumptions and estimates while computing deferred taxes which include production related data (PLFs), projected operations and maintenance costs, projected finance costs, proposed availment of deduction under section 80IA of the Income Tax Act, 1961 and the period over which such deduction shall be availed, accelerated depreciation, other applicable allowances, usage of brought forward losses etc. While these assumptions are based on best available facts in the knowledge of management as on the balance sheet date however, they are subject to change year on year depending on the actual tax laws and other variables in the respective year. Given that the actual assumptions which would be used to file the return of income shall depend upon the tax laws prevailing in respective year, management shall continue to reassess these assumptions while calculating the deferred taxes on each balance sheet date and the impact due to such change, if any, is considered in the respective year.

Depreciation on property, plant and equipment

Depreciation on property, plant and equipment is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management. Considering the applicability of Schedule II of Companies Act, 2013, the management has re-estimated useful lives and residual values of all its property, plant and equipment. The management believes that depreciation rates currently used fairly reflect its estimate of the useful lives and residual values of property, plant and equipment, though these rates in certain cases are different from lives prescribed under Schedule II of the Companies Act, 2013.

Basis legal opinion obtained, management is of the view that application of CERC and/or SERC rates for the purpose of accounting for depreciation expenses is not mandatory. Hence, the entities forming part of the Restricted Group are depreciating the assets bases on life as determined by an expert.

B) Estimates and assumptions:

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values.

Assumptions include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 34 and 35 for further disclosures.

Related party transactions

ReNew Power Private Limited along with all its subsidiaries collectively referred as "the Group" have entered into inter-company transactions as explained

Management shared services

Employee benefit costs and other common expenses are incurred by the Ultimate Holding Company and Holding Company. These expenses are allocated to all the entities of the Group in the form of 'Management Shared Services'. Allocation of cost to the entities involves various estimates including retention, allocation of cost for projects under construction vis-a-vis operating projects, profit mark-up which are assessed through an external expert.

Inter-group unsecured loan

The Group uses unsecured loans to fund requirements of various entities. These loans carry interest rate of 8% (approximates 3-year government bond yield).

Financial instrument

The Group makes inter-group investments in the form of RNCPS. These investment carries interest at a nominal rate and are accounted for as compound financial instruments under Ind AS 32. The rate used for discounting the future cash flows approximate the average market interest rate of borrowings availed by Group.

41 Parent's support:

i) **For Restricted Group**

The combined current liabilities of the Restricted Group as on 31 March 2020 exceed the combined current assets with the combined current ratio being 0.61:1. The primary reason for this is due to unsecured loans provided by RPPL and ReNew Solar Power Private Limited (wholly owned subsidiary of RPPL) to certain entities forming part of the Restricted Group which are repayable on demand and hence these are classified as a current liability in these financial statements. The management of RPPL as well as the project lenders considers these unsecured loans as equity contribution for the purposes of project financing.

Further, RPPL and ReNew Solar Power Private Limited would consider the financial position and liquidity of the respective entities forming part of the Restricted Group prior to making any demand for repayment of such unsecured loans and interest accrued thereon. This shall be done to ensure support by RPPL and ReNew Solar Power Private Limited towards the entities in meeting their operating requirements and liabilities as and when they fall due. Further RPPL has issued an unconditional letter of support for continued operational and financial support in favour of entities forming part of Restricted Group.

ii) **For ReNew Wind Energy (AP) Private Limited**

As at 31 March 2020, ReNew Wind Energy (AP) Private Limited has borrowing obligations due for repayment to IFCI Limited in financial year 2020-21 amounting to INR 1,230. The entity does not have sufficient funds available to make full repayments of this balance and intends to re-finance the borrowing. Management of ReNew Wind Energy (AP) Private Limited believes that the entity would be able to re-finance the borrowing obligation in order to make repayments on the due date. However, in the circumstance the entity is unable to do so, RPPL, the holding company, would provide financial support to the entity in order to ensure timely repayment of these borrowings. Further RPPL has issued an unconditional letter of support for continued operational and financial support in favour of ReNew Wind Energy (AP) Private Limited.

iii) **For Zemira Renewable Energy Limited**

There has been delays in revenue collection from Southern Power Distribution Company of Andhra Pradesh due to ongoing litigations with the customer (refer note 45 for details of the litigations). Management of Zemira Renewable Energy Limited believes that the delays are temporary in nature and the entity will be able to meet its future obligations as and when they fall due. However, in the circumstance the entity is unable to do so, RPPL, the holding company, would provide support to the entity in meeting their operating and capital funding requirements and liabilities.Further RPPL has issued an unconditional letter of support for continued operational and financial support in favour of Zemira Renewable Energy Limited.

42 There are no employees on the rolls of the entities forming part of the Restricted Group and therefore there are no employee benefit expenses accrued in the Unaudited Special Purpose Interim Combined Financial Statements. ReNew Power Private Limited and ReNew Power Services Private Limited have charged certain common expenses to its subsidiary companies and fellow subsidiaries respectively on the basis of its best estimate of expenses incurred. ReNew Power Private Limited and ReNew Power Services Private Limited have recovered the said expenses in the form of 'Management Shared Services'. The management believes that the method adopted by the these companies is most appropriate basis for recovering of such common expenses.

43 During the year ended March 2019, certain entities forming part of the Restricted Group reached settlement with some of their suppliers/contractors for compensation for loss of revenue on account of delay in commissioning of power projects. Resultantly, an amount of INR 76 towards Liquidated Damages ('LDs') has been recognized in the Special Purpose Combined Statement of profit and loss.

Since, the said LDs are directly linked to delay in creating profit making apparatus, the same has been considered as capital receipt and thus has not been included in Book Profit under section 115JB of the Income Tax Act, 1961. The same has also been supported by the opinion of the advisors of the entities forming part of Restricted Group.

44 Distribution companies of the state of Karnataka issued demand notices to captive users being the customers of ReNew Wind Energy (AP) Private Limited (“ReNew AP”) which is a part of the Restricted Group. These notices were issued seeking recovery of cross subsidy surcharge and differential between rate of electricity tax applicable to captive users and non-captive users on the ground that these captive users have not consumed the energy in proportion to their respective shareholding in ReNew AP, thereby allegedly violating Rule 3 of the Electricity Rules, 2005. ReNew AP had deposited a sum of INR 31 (31 March 2019: INR 31) under protest against the demand raised by distribution companies amounting INR 147 (31 March 2019: INR 147). Thereafter, ReNew AP had filed a petition before the Karnataka Electricity Regulatory Commission (the "KERC") contesting these demands. KERC had granted interim relief and stayed the demand notice and disconnection by the distribution companies. The amount paid under protest has been accounted for as recoverable and disclosed under head “Other current assets” in these financial statements.

Apart from above, subsequent to year end, on 20 May 2020, demand notices were issued by distribution companies to one of the captive users of ReNew AP towards energy supplied in financial year ended 31 March 2019 for a sum of INR 97, alleging that the captive user had not consumed energy in proportion to its respective shareholding in ReNew AP. ReNew AP has filed a writ petition on 26 August 2020 before the High Court of Karnataka challenging the issuance of demand notices and seeking their quashing.

ReNew AP, based on legal advice obtained, believes that there are merits in its position and that the demand raised by distribution companies would be rescinded by relevant legal authorities and hence no adjustment has been made in the financial statements in this regard.

45 Zemira Renewable Energy Limited has entered into a long-term Power Purchase Agreement ("PPA") having a capacity of 50.40 MWs (wind energy projects) with Southern Power Distribution Company of Andhra Pradesh Limited i.e. the distribution company of Andhra Pradesh ("APDISCOM"). The PPA has a fixed rate per unit of electricity for the 25-year term. With regard to aforementioned PPA, certain litigations as described below are currently underway:

The Government of Andhra Pradesh (the "GoAP") issued an order (the "GO") dated 1 July 2019 constituting a High-Level Negotiation Committee (the "HLNC") for review and negotiation of tariff for wind energy projects in the state of Andhra Pradesh. Pursuant to the GO, APDISCOM issued letters dated 11 July 2019 to Zemira Renewable Energy Limited, requesting for revision of tariffs entered into in PPAs. Zemira Renewable Energy Limited filed a writ petition on 23 July 2019 before the AP High Court ("AP High Court) challenging the GO and the said letters issued by APDISCOM for renegotiation of tariffs. The AP High Court issued its order dated September 24, 2019 enumerating the following:
i. Writ petition is allowed, and both GO the subsequent letters are set aside.
ii. Further, APDISCOM were instructed to honour pending and future bills and pay the same at the interim rate of Rs. 2.43 per unit till determination of O.P. No. 17 of 2018 pending before APERC
iii. Andhra Pradesh Electricity Regulatory Commission (the "APERC") to dispose of the case within a time frame of six months.

Zemira Renewable Energy Limited along with other certain subsidiaries of the ReNew Power Private Limted having similar PPAs with the APDISCOM ("AP Entities") have filed a Writ Petition before the Division Bench of the AP High Court challenging the jurisdiction of APERC in entertaining O.P. No. 17 of 2018. Parallelly, AP Entities have filed another Writ Appeal before the division bench of the AP High Court challenging AP High Court's direction to the APDISCOM to pay tariff at interim rate till determination of OP No. 17 of 2018 by APERC.

Zemira Renewable Energy Limited has a net block of INR 3,700 as at 31 March 2020 (INR 3,858 as at 31 March 2019) and has recognised a revenue of INR 463 for the year ended 31 March 2020 (INR 584 for the year ended 31 March 2019) and has a trade receivable balance of INR 498 as on 31 March 2020 (INR 451 as at 31 March 2019) from sale of electricity against such PPA.

The management basis legal opinion obtained by it, believes that it has strong merits in the case and the final order would be in its favour and hence no adjustment has been made in the special purpose combined financial statements including provision for expected credit loss and impairment.

46 Due to outbreak of COVID-19 in India and globally, the entities forming part of Restricted Group has made initial assessment of likely adverse impact on economic environment in general and financial risks on account of COVID-19. Considering that the Restricted Group is in the business of generation of electricity which is having "Must Run" status by Ministry of New and Renewable Energy (MNRE), the management believes that the impact of outbreak on the business and financial position of the entities forming part of the Restricted Group will not be significant. The management does not see any risks in the Restricted Group's ability to continue as a going concern and meeting its liabilities as and when they fall due. The entities forming part of the Restricted Group is closely monitoring developments, its operations, liquidity and capital resources and is actively working to minimize the impact of the unprecedented situation.

47 Absolute amounts less than INR 500,000 are appearing in the financial statements as "0" due to presentation in millions.

INDEPENDENT AUDITOR'S REPORT

To the Board of Directors of ReNew Power Private Limited ("RPPL")

Report on the Audit of the Special Purpose Combined Financial Statements

Opinion

We have audited the accompanying Special Purpose Combined Financial Statements of Restricted Group (consisting of certain specific subsidiaries of RPPL as listed in note 1 of these financial statements, collectively known as the "Restricted Group"), which comprise the combined Balance Sheet as at 31 March 2019, the combined Statement of Profit and Loss, including the statement of Other Comprehensive Income, the combined Cash Flow Statement and the combined Statement of Changes in Equity for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information (collectively known as the "Special Purpose Combined Financial Statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Special Purpose Combined Financial Statements have been prepared, in all material respects, in accordance with the basis of preparation set out in note 3 of the accompanying Special Purpose Combined Financial Statements.

Basis for Opinion

We conducted our audit of the Special Purpose Combined Financial Statements in accordance with the Standards on Auditing (SAs). Our responsibilities under those Standards are further described in the 'Auditor's Responsibilities for the Audit of the Special Purpose Combined Financial Statements' section of our report. We are independent of RPPL and the Restricted Group in accordance with the 'Code of Ethics' issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Special Purpose Combined Financial Statements.

Emphasis of matter

1. Without modifying our opinion, we draw attention to note 2 and 3 to the Special Purpose Combined Financial Statements, which describes that the Restricted Group has not formed a separate legal group of entities during the year ended 31 March 2019, which also describes the basis of preparation, including the approach to and the purpose for preparing them. Consequently, the Restricted Group's Special Purpose Combined Financial Statements may not necessarily be indicative of the financial performances and financial position of the Restricted Group that would have occurred if it had operated as a separate standalone group of entities during the periods presented.

2. We draw attention to note 43 to the Special Purpose Combined Financial Statements, related to the recoverability of dues under litigation amounting to Rs. 451 million from Southern Power Distribution Company of A.P. Limited by Zemira Renewable Energy Limited (forming part of the Restricted Group). Zemira Renewable Energy Limited has filed Writ Petition/appeal before the Hon'ble High Court of Andhra Pradesh related to these matters. Pending the outcome of the cases,

which is not presently determinable, no adjustment has been made to the Special Purpose Combined Financial Statements.

Our opinion is not qualified in respect of the above matter.

Responsibilities of Management for the Special Purpose Combined Financial Statements

RPPL's Board of Directors (referred to as the "Management") is responsible for the preparation of these Special Purpose Combined Financial Statements in accordance with basis of preparation set out in note 3 of the accompanying notes to these Special Purpose Combined Financial Statements. This responsibility also includes the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Special Purpose Combined Financial Statements that are free from material misstatement, whether due to fraud or error.

In preparing the Special Purpose Combined Financial Statements, the Management is responsible for assessing the entities forming part of the Restricted Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate any entity forming part of the Restricted Group or to cease operations, or has no realistic alternative but to do so.

The Management is also responsible for overseeing the entities forming part of the Restricted Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Special Purpose Combined Financial Statements

Our objectives are to obtain reasonable assurance about whether the Special Purpose Combined Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Special Purpose Combined Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Special Purpose Combined Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Restricted Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the entities forming part of Restricted Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to

draw attention in our auditor's report to the related disclosures in the Special Purpose Combined Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the entities forming part of Restricted Group to cease to continue as a going concern.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Other matters

1. The accompanying Special Purpose Combined Financial Statements include total assets of Rs. 7,188 million as at 31 March 2019, total revenues of Rs. 860 million and net cash inflows of Rs. 113 million for the year ended on that date. in respect of 5 entities forming part of the Restricted Group, which has been audited by other auditors, for which financial statements, other financial information and auditors report have been furnished to us by the management. Our opinion on the Special Purpose Combined Financial Statements, in so far as it relates to the amounts and disclosures included in respect of these entities. and our report as aforesaid in so far as it relates to the aforesaid entity, is based solely on the reports of such other auditors.

2. These Special Purpose Combined Financial Statements have been prepared by the management of RPPL solely in connection with the proposed issuance of Non-Convertible bonds by each member of the Restricted Group for which RPPL is a guarantor and for inclusion in the Offering Memorandum. As a result, the Combined Financial Statement may not be suitable for another purpose.

1 Corporate information

ReNew Power Private Limited (the "Company" or "Parent" or "RPPL") is a private limited company domiciled in India. The Company was converted into a private limited company with effect from 8 November 2019 and consequently the name of the Company has changed from ReNew Power Limited to ReNew Power Private Limited.

Certain subsidiary companies of the Parent and ReNew Solar Power Private Limited (wholly owned subsidiary of RPPL) which are collectively referred to as the 'Restricted Group' (as more clearly explained in the note below) intends to issue INR denominated Non-Convertible Debentures (referred to as "INR NCDs") to a Mauritian Foreign Portfolio Investor namely India Green Energy Holdings under Voluntary Retention Route as prescribed by the Reserve Bank of India, which in turn will issue USD denominated bonds (referred to as "FPI Bonds"). The FPI Bonds will be listed on Singapore Exchange Securities Trading Limited (SGX-ST).

Name of entity	Holding Company	Holding percentage
ReNew Wind Energy (AP) Private Limited	ReNew Power Private Limited (formerly known as ReNew Power Limited)	67%
ReNew Wind Energy (AP 3) Private Limited	ReNew Power Private Limited (formerly known as ReNew Power Limited)	100%
Shruti Power Projects Private Limited (acquired on 16 September 16)	ReNew Power Private Limited (formerly known as ReNew Power Limited)	100%
Pugalur ReNewable Private Limited	ReNew Power Private Limited (formerly known as ReNew Power Limited)	100%
Bidwal ReNewable Private Limited	ReNew Power Private Limited (formerly known as ReNew Power Limited)	100%
Zemira ReNewable Energy Limited (acquired on 31 March 18)	ReNew Power Private Limited (formerly known as ReNew Power Limited)	100%
ReNew Wind Energy (Rajasthan Four) Private Limited	ReNew Solar Power Private Limited*	100%
ReNew Wind Energy (Maharashtra) Private Limited	ReNew Solar Power Private Limited*	100%
Bhumi Prakash Private Limited	ReNew Solar Power Private Limited*	100%
Tarun Kiran Bhoomi Private Limited	ReNew Solar Power Private Limited*	100%
ReNew Wind Energy (MP Three) Private Limited	ReNew Solar Power Private Limited*	100%

* ReNew Solar Power Private Limited is a wholly owned subsidiary of ReNew Power Private Limited

Entities forming part of the Restricted Group listed above are incorporated in India and are engaged in generation of power through non-conventional and renewable energy sources.

The Special Purpose Combined Financial Statements were approved for issue in accordance with a resolution of the directors of the ReNew Power Private Limited on 10 October 2020.

2 Purpose of Special Purpose Combined Financial Statements

The Combined Financial Statements are special purpose financial statements which have been prepared for the purpose of the proposed issue of INR denominated Non-Convertible Debentures (referred to as "INR NCDs") to a Mauritian Foreign Portfolio Investor namely India Green Energy Holdings under Voluntary Retention Route as prescribed by the Reserve Bank of India, which in turn will issue USD denominated bonds (referred to as "FPI Bonds"). The FPI Bonds will be listed on Singapore Exchange Securities Trading Limited (SGX-ST).. The Special Purpose Combined Financial Statements presented herein reflect the Restricted Group 's results of operations, assets and liabilities and cash flows for the periods presented. The basis of preparation and significant accounting policies used in preparation of these Special Purpose Combined Financial Statements are set out in Note 3 below. These Special Purpose Combined Financial Statements presented herein reflect the Restricted Group 's results of operations, assets and liabilities and cash flows for the period presented. The basis of preparation and significant accounting policies used in preparation of these Special Purpose Combined Financial Statements are set out in Note 3 below.

3 Significant accounting policies

3.1 Basis of preparation

The Special Purpose Combined Financial Statements have been prepared in accordance with the recognition and measurement principles specified in the Indian Accounting Standard (Ind AS) notified under Section 133 of the Companies Act, 2013 as amended from time to time, (except Ind AS 33, Earnings per Share), read with rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 (as amended) issued there under, presentation requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III), as applicable and the Guidance Note on Combined and Carve-out Financial Statements issued by the Institute of Chartered Accounts of India (the "Guidance Note") and other accounting principles generally accepted in India.

Management of the Parent company has prepared the Special Purpose Combined Financial Statements which comprise the Combined Balance Sheet as at 31 March 2019, the Combined Statement of Profit and Loss including other comprehensive income, Combined Statement of Cash Flows and Combined Statement of Changes in Equity for the year ended 31 March 2019, a summary of the significant accounting policies and other explanatory Information.

Management has prepared these Special Purpose Combined Financial Statements to depict the historical cost of the Restricted Group except for the following assets and liabilities which have been measured at fair value:

- Derivative financial instruments,
- Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments)

All intercompany transactions and balances within the Restricted Group have been eliminated in full. The transactions that have taken place with other related parties of entities forming part of the Restricted Group but not forming part of the Restricted Group have been disclosed in accordance with Ind AS 24 Related Party Disclosures.

The Special Purpose Combined Financial Statements are not necessarily indicative of the financial performance, financial position and cash flows of the Restricted Group that would have occurred if it had operated as a separate stand-alone Group of entities during the period presented nor of the Restricted Group's future performance. The items in the Special Purpose Combined Financial Statements have been classified considering the principles under Ind AS 1, Presentation of Financial Statements and Division II of Schedule III of Companies Act 2013.

3.2 Basis of combination

The Special Purpose Combined Financial Statements have been prepared by combining like items of assets, liabilities. equity, income, expenses and cash flows of the entities forming part of Restricted Group. All the intragroup assets and liabilities, equity, income, expenses and cash flows relating to entities forming part of Restricted Group have been eliminated and profits or losses arising from intragroup transactions that are recognised in assets, such as inventory and fixed assets have been eliminated in full. All the inter-group transactions are undertaken on Arms Lengths basis. The resulting financial position may not be that which might have existed if the combining businesses had been a stand-alone business.

The carrying values pertaining to an entity, as reflected in the consolidated financial statements of the Parent, are used for the purpose of preparing Special Purpose Combined Financial Statements including fair value adjustment to assets and liabilities on acquisition along with corresponding impact on deferred taxes.

The non-controlling interest held by outsiders amount to INR 110 and INR 51 as of 31 March 2019 and 31 March 2018 respectively.

Share capital and reserves disclosed in the Special Purpose combined financial statements is not the legal capital and reserves of the Restricted Group and is the aggregation of the share capital and reserves of the individual combining entities.

Income taxes are arrived at by aggregation of the tax expenses actually incurred by the combining businesses, after considering the tax effects of any adjustments which is in accordance with the Guidance Note.

The accounting policies and estimates adopted in the preparation of the Special Purpose Combined Financial Statements are consistent with those used in the Special Purpose Combined Financial Statements for the year ended 31 March 2018.

Business Combination and Goodwill
Business combinations are accounted for using the acquisition method in the consolidated financial statements of the Parent

At the acquisition date of an entity being part of the Restricted Group by the Parent, the identifiable assets acquired and the liabilities assumed are recognised at their acquisition date fair values. For this purpose, the liabilities assumed include contingent liabilities representing present obligation and they are measured at their acquisition fair values irrespective of the fact that outflow of resources embodying economic benefits is not probable. However, the following assets and liabilities acquired are measured at the basis indicated below:

- Deferred tax assets or liabilities are recognised and measured in accordance with Ind AS 12 Income Tax.
- Reacquired rights are measured at a value determined on the basis of the remaining contractual term of the related contract. Such valuation does not consider potential renewal of the reacquired right.
- Potential tax effects of temporary differences and carry forwards of an acquiree that exist at the acquisition date or arise as a result of the acquisition are accounted in accordance with Ind AS 12

At the acquisition date of an entity being part of the Restricted Group by the Parent, the Parent assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred by the Parent over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Parent re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised as Parent's contribution in Other Equity.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Restricted Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

A cash generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

Where goodwill has been allocated to a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

There are no business combinations made by any of the entities forming part of Restricted Group.

3.3 Summary of significant accounting policies

a) Current versus non-current classification

The Restricted Group presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it is:
- Expected to be realised or intended to sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is treated as current when it is:
- Expected to be settled in normal operating cycle
- Held primarily for the purpose of trading
- Due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets/liabilities are classified as non-current assets/liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation/settlement in cash and cash equivalents. The entities forming part of the Restricted Group have identified twelve months as their operating cycle for classification of their current assets and liabilities.

b) Fair value measurement

The entities forming part of the Restricted Group measure financial instruments, such as, derivatives at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the entities forming part of the Restricted Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The entities forming part of the Restricted Group use valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:
- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For the purpose of fair value disclosures, the entities forming part of the Restricted Group have determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy. (Refer Note 33 and 34).

At each reporting date, the management of the entities forming part of the Restricted Group analyse the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the accounting policies of the Restricted Group.

For assets and liabilities that are recognised in the Financial Statements on a recurring basis, the entities forming part of the Restricted Group determine whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

This note summarises the accounting policy for determination of fair value. Other fair value related disclosures are given in the relevant notes as following:

· Disclosures for significant estimates and assumptions (Refer Note 40)

· Quantitative disclosures of fair value measurement hierarchy (Refer Note 34)
· Financial instruments (including those carried at amortised cost) (Refer Note 33 and 34)

c) Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the entities forming part of the Restricted Group and the revenue can be reliably measured, regardless of when the payment is being made. The following specific recognition criteria must also be met before revenue is recognised:-

Sale of power

Income from supply of power is recognized on the supply of units generated from the plant to the grid, as per the terms of the PPA entered into with the state electricity board/ private customers.

As per Ind AS 115 applicable from 1 April 2018

Revenue from contracts with customers

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services. The Group has generally concluded that it is the principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer.

Sale of power

Income from supply of power is recognised over time on the supply of units generated from plant to the grid as per terms of the Power Purchase Agreement (PPA) entered into with the customers.

The entities forming part of Restricted Group considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of power, the Group considers the effects of variable consideration and consideration payable to the customer (if any).

Transaction price - remaining performance obligation

The remaining performance obligation disclosure provides the aggregate amount of the transaction price yet to be recognised as at the end of the reporting period and an explanation as to when the Group expects to recognise these amounts in revenue. Applying the practical expedient as given in Ind AS 115, the Group has not disclosed the remaining performance obligation related disclosures for contracts as the revenue recognized corresponds directly with the value to the customer of the entity’s performance completed to date.

(i) Variable consideration

If the consideration in a contract includes a variable amount, the Restricted Group estimates the amount of consideration to which it will be entitled in exchange for transferring the goods or service to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

Rebates

In some PPAs, the Restricted Group provide rebates in invoice if payment is made before the due date. Rebates are offset against amounts payable by the customers. To estimate the variable consideration for the expected future rebate, the Group applies the most likely method.

(ii) Consideration payable to customers

In some PPAs, Restricted Group has to pay consideration to customers. Consideration payable to customers are offset against the revenue recognised as and when sale of power occurs.

Income from liquidated damages and interest on advances

Income from liquidated damages and interest on advance is recognised after certainty of receipt of the same is established.

Income from compensation for loss of revenue

Income from compensation for loss of revenue is recognised after certainty of receipt of the same is established.

Dividend

Dividend income is recognised when the right of the entities forming part of the Restricted Group to receive dividend is established by the reporting date.

Interest income

For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset. When calculating the effective interest rate, the entities forming part of the Restricted Group estimate the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in other income in the Special Purpose Combined Statement of Profit and Loss.

Income from government grants

Refer note (f) for accounting policy.

Contract balances :

(i) Contract assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the entities forming part of Restricted Group perform by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

(ii) Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the entities forming part of Restricted Group have received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the entities forming part of Restricted Group transfer goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the entities forming part of Restricted Group perform under the contract.

(iii) Trade receivables

A receivable represents the right of entities forming part of Restricted Group to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in section (n) Financial instruments – initial recognition and subsequent measurement.

d) Foreign currencies

The Restricted Group Financial Statements are presented in Indian rupees (INR), which is also the functional currency of all entities forming part of Restricted Group. Functional currency is the currency of the primary economic environment in which the entities forming part of Restricted Group operates and is normally the currency in which the entities forming part of Restricted Group primarily generates and expends cash.

Transactions and balances

Transactions in foreign currencies are initially recorded by the Restricted Group at their functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

Exchange differences arising on settlement or translation of monetary items are recognised in profit and loss.

e) Income taxes

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in India. Current income tax relating to items recognised outside profit and loss is recognised outside profit and loss (either in other comprehensive income or in equity). Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate. Current income tax assets and liabilities are offset if a legally enforceable right exists to set off these and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss

- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

In situations where the entities forming part of the Restricted Group are entitled to a tax holiday under the Income-tax Act, 1961, enacted in India, no deferred tax (asset or liability) is recognized in respect of temporary differences which reverse during the tax holiday period. Deferred taxes in respect of temporary differences which reverse after the tax holiday period are recognized in the year in which the temporary differences originate. However, the entities forming part of the Restricted Group restrict the recognition of deferred tax assets to the extent that it has become reasonably certain that sufficient future taxable income will be available against which such deferred tax assets can be realized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit and loss is recognised outside profit and loss (either in OCI or equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Minimum Alternate Tax

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the entities forming part of the Restricted Group will pay normal income tax. Accordingly, MAT is recognised as deferred tax asset in the Special Purpose Combined Balance Sheet when it is probable that future economic benefit associated with it will flow to the entities forming part of the Restricted Group.

f) Government grants

Government grants are recognized where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant is related to an expense item, it is recognized as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant is related to an asset, it is recognized as income in equal amounts over the expected useful life of the related asset.

When the entities forming part of the Restricted Group receive grants of non-monetary assets, the asset and the grant are recorded at fair value amounts and released to Combined Statement of Profit and Loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset i.e. by equal annual instalments.

The entities forming part of the Restricted Group presents grants related to an expense item as other income in the Statement of Profit and Loss. Thus, Generation based incentive and Sale of emission renewable certificates have been recognised as other income.

Generation based incentive

Generation based incentive is recognized on the basis of supply of units generated by the entities forming part of the Restricted Group to the state electricity board from the eligible project in accordance with the scheme of the "Generation Based Incentive (GBI) for Grid interactive Wind Power Projects"

g) Property, plant and equipment

Capital work in progress and freehold land are stated at cost, net of accumulated impairment loss, if any. Property, plant and equipment except freehold land is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Restricted Group depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred.

On transition date to Ind AS, the entities forming part of the Restricted Group have elected to continue with the carrying value of all of its property, plant and equipment recognised as at 1 April 2015 measured as per previous GAAP and use that carrying value as the deemed cost of the property, plant and equipment.

Subsequent costs

The cost of replacing a part of an item of property, plant and equipment is recognised in the carrying amount of the item of property, plant and equipment, if it is probable that the future economic benefits embodied within the part will flow to the entities forming part of the Restricted Group and its cost can be measured reliably with the carrying amount of the replaced part getting derecognised. The cost for day-to-day servicing of property, plant and equipment are recognised in Special Purpose Combined Statement of Profit and Loss as and when incurred.

Derecognition

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the Special Purpose Combined Statement of Profit and Loss when the asset is derecognised.

h) Depreciation / amortisation of property, plant and equipment and intangible assets

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets as follows:

Category	Useful life (in years)
Plant and equipment (wind and solar power projects)*	18-25
Furniture & fixture	10
Office equipment	5
Computers	3
Customer contracts	Life of respective power purchase agreements

* Based on an external technical assessment, the management believes that the useful lives as given above and residual value of 0%-5%, best represents the period over which management expects to use its assets and its residual value. The useful life of plant and equipment is different from the useful life as prescribed under Part C of Schedule II of Companies Act, 2013.

The residual values, useful lives and methods of depreciation and amortisation of property, plant and equipment and intangible assets are reviewed at each financial year end and adjusted prospectively, if appropriate.

i) Leases

As a lessee

A lease is classified at the inception date as a finance lease or an operating lease. A lease that transfers substantially all the risks and rewards incidental to ownership to the Restricted Group is classified as a finance lease. An operating lease is a lease other than a finance lease
Operating lease payments are recognised as an expense in the Combined Statement of Profit and Loss on a straight-line basis over the lease term.

As a lessor
Leases in which the entities forming part of Restricted Group does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

j) Inventories

Inventories are valued at the lower of cost and net realisable value.
Costs incurred in bringing each product to its present location and condition are accounted for as follows:
Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on first in, first out basis.
Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

k) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale. Borrowing costs consist of interest, discount on issue, premium payable on redemption and other costs that an entity incurs in connection with the borrowing of funds (this cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs). The borrowing costs are amortised basis the Effective Interest Rate (EIR) method over the term of the loan. The EIR amortisation is recognised under finance costs in the Statement of Profit and Loss. The amount amortized for the period from disbursement of borrowed funds upto the date of capitalization of the qualifying assets is added to cost of the qualifying assets.

l) Impairment of non-financial assets

The entities forming part of the Restricted Group assess, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the entities forming part of the Restricted Group estimate the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating units (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre -tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The entities forming part of the Restricted Group bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Restricted Group's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the entities forming part of the Restricted Group extrapolate cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the Statement of Profit and Loss.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the entities forming part of the Restricted Group estimate the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying value of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Profit and Loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as an increase in revaluation.

m) Provisions

Provisions are recognised when the entities forming part of the Restricted Group have a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the entities forming part of the Restricted Group expect some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the Statement of Profit and Loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

n) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit and loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the entities forming part of the Restricted Group commit to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:
a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance expense in the Special Purpose Combined Statement of Profit and Loss. The losses arising from impairment are recognised in the Special Purpose Combined Statement of Profit and Loss.

Debt instruments at fair value through other comprehensive income (FVTOCI)

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:
a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
b) The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the entities forming part of the Restricted Group recognize interest income, impairment losses and reversals and foreign exchange gain or loss in the Statement of Profit and Loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to Statement of Profit and Loss. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

Debt instruments at fair value through profit and loss (FVTPL)

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the entities forming part of the Restricted Group may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The entities forming part of the Restricted Group have not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

Equity investments

All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS 103 applies are classified as at FVTPL. For all other equity instruments, the entities forming part of the Restricted Group may make an irrevocable election to present the subsequent changes in the fair value in OCI. The entities forming part of the Restricted Group make such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the entities forming part of the Restricted Group decide to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to Statement of Profit and Loss, even on sale of investment. However, the entities forming part of the Restricted Group may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised when:

- The rights to receive cash flows from the asset have expired, or
- The entities forming part of the respective Restricted Group have transferred their rights to receive cash flows from the asset or have assumed the obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and

Either the entities forming part of the Restricted Group have transferred substantially all the risks and rewards of the asset, or has neither transferred nor retained substantially all the risks and rewards of the asset, but have transferred control of the asset.

When the entities forming part of the Restricted Group have transferred their rights to receive cash flows from an asset or have entered into a pass-through arrangement, they evaluate if and to what extent they have retained the risks and rewards of ownership. When they have neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the entities forming part of the Restricted Group continue to recognise the transferred asset to the extent of the continuing involvement of the entities forming part of the Restricted Group. In that case, the entities forming part of the Restricted Group also recognise an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the entities forming part of the Restricted Group have retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the entities forming part of the Restricted Group could be required to repay.

Impairment of financial assets

In accordance with Ind AS 109, the Restricted Group applies expected credit loss (ECL) model for measurement and recognition of impairment loss on all the financial assets and credit risk exposure.

The entities forming part of the Restricted Group follows 'simplified approach for recognition of impairment loss allowance on trade receivables or contract revenue receivables.

The application of simplified approach does not require the entities forming part of the Restricted Group to track changes in credit risk. Rather it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the entities forming part of the Restricted Group determine that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/expense in the Special Purpose Combined Statement of Profit and Loss.

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit and loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and in the case of loans and borrowings and payables, net of directly attributable transaction costs. The financial liabilities of the entities forming part of the Restricted Group include trade and other payables, derivative financial instruments, loans and borrowings including bank overdraft.

Subsequent measurement
The measurement of financial liabilities depends on their classification as discussed below:-

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in Statement of Profit and Loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss. This category generally applies to borrowings.

The entities forming part of the Restricted Group recognise debt modifications agreed with lenders to restructure their existing debt obligations. Such modifications are done to take advantage of falling interest rates by cancelling the exposure to high interest fixed rate debt, pay a fee or penalty on cancellation and replace it with debt at a lower interest rate (exchange of old debt with new debt). The qualitative factors considered to be relevant for modified financial liabilities include, but are not limited to, the currency that the debt instrument is denominated in, the interest rate (that is fixed versus floating rate), conversion features attached to the instrument and changes in covenants. The accounting treatment is determined depending on whether modifications or exchange of debt instruments represent a settlement of the original debt or merely a renegotiation of that debt. The exchange of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability.

Redeemable non convertible preference shares
Redeemable non convertible preference shares are separated into liability and equity components based on the terms of the contract. On issuance of the redeemable non convertible preference shares, the fair value of the liability component is determined using a market interest rate for an equivalent non-convertible instrument. This amount is classified as a financial liability measured at amortised cost (net of transaction costs) until it is extinguished on conversion. The remainder of the proceeds is allocated to the conversion option that is recognised and included in equity. Transaction costs are deducted from equity, net of associated income tax.

Compulsorily Convertible Preference shares (CCPS)
Compulsorily Convertible Preference shares are accounted for as Instruments entirely equity in nature since conversion option meets Ind AS 32 criteria for fixed to fixed classification and the dividend distribution is discretionary in nature.

Transaction costs are deducted from equity, net of associated income tax. The carrying amount of the conversion option is not remeasured in subsequent years.

Derecognition
A financial liability is derecognised when the obligation under the liability is discharged/ cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

Reclassification of financial assets and liabilities
The Restricted Group determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent.

Offsetting of financial instruments
Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

o) Derivative financial instruments and hedge accounting

Initial recognition and subsequent measurement
Entities forming part of Restricted Group uses derivative financial instruments, such as interest rate swaps and call/put options etc., to hedge its interest rate risks and foreign currency risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to profit or loss, except for the effective portion of cash flow hedges, which is recognised in OCI and later reclassified to profit or loss when the hedge item affects profit or loss or treated as basis adjustment if a hedged forecast transaction subsequently results in the recognition of a non-financial asset or non-financial liability.

For the purpose of hedge accounting, hedges are classified as:
- Fair value hedges when hedging the exposure to changes in the fair value of a recognised asset or liability or an unrecognised firm commitment
- Cash flow hedges when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment
- Hedges of a net investment in a foreign operation

At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to which the Group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes the Group's risk management objective and strategy for undertaking hedge, the hedging/ economic relationship, the hedged item or transaction, the nature of the risk being hedged, hedge ratio and how the entity will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.
Hedges that meet the strict criteria for hedge accounting are accounted for, as described below:

(i) Cash flow hedges
The effective portion of the gain or loss on the hedging instrument is recognised in OCI in the cash flow hedge reserve, while any ineffective portion is recognised immediately in the Special Purpose Combined Statement of Profit and Loss.
The entities forming part of Restricted Group uses interest rate swaps and call/put options etc. as hedges of its exposure to interest rate risks and foreign currency risks in the foreign currency loan. The ineffective portion relating to foreign currency loan is recognised in other income or expenses.

Amounts recognised as OCI are transferred to profit or loss when the hedged transaction affects profit or loss, such as when the hedged item affects the Special Purpose Combined Statement of Profit and Loss or treated as basis adjustment if a hedged item subsequently results in recognition of a non-financial asset or liability.
If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover (as part of the hedging strategy), or if its designation as a hedge is revoked, or when the hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss previously recognised in OCI remains separately in equity until the forecast transaction occurs or the foreign currency firm commitment is met.

p) Cash and cash equivalents
Cash and short-term deposits in the balance sheet comprise cash at banks and cash in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the Statement of cash flows, cash and cash equivalents consist of cash and short term deposits, as defined above, net off bank overdrafts as they considered an integral part of the entities forming part of the Restricted Group's cash management.

q) Measurement of EBITDA
The Restricted Group has elected to present earnings before interest, tax, depreciation and amortization (EBITDA) as a separate line item on the face of the Statement of Profit and Loss. The Restricted Group measure EBITDA on the basis of profit/ (loss) from continuing operations. In their measurement, the companies include interest income but do not include depreciation and amortization expense, finance costs and tax expense.

r) Events occurring after the Balance Sheet date

Impact of events occurring after the balance sheet date that provide additional information materially effecting the determination of the amounts relating to conditions existing at the balance sheet date upto the date of the approval for issue of these Special Purpose Combined Financial Statements by the Board of Directors of the Restricted Group are adjusted to respective assets and liabilities.

The entities forming part of the Restricted Group do not adjust the amounts recognised in its Special Purpose Combined Financial Statements to reflect non-adjusting events after the reporting period.

The entities forming part of the Restricted Group make disclosures in the financial statement in cases of significant events.

s) Contingent liabilities
Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entities forming part of the Restricted Group or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

3.4 Changes in accounting policy and disclosures - new and amended standards

a) New and amended standards
Ind AS 115 Revenue from Contracts with Customers

The entities forming part of Restricted group applied Ind AS 115 for the first time wef 1 April 2018. The nature and effect of the changes as a result of adoption of the new accounting standard are described below. Several other amendments and interpretations apply for the first time in March 2019, but do not have an impact on the combined financial statements of the Restricted Group.

Ind AS 115 was issued on 28 March 2018 and supersedes Ind AS 11 Construction Contracts and Ind AS 18 Revenue and it applies, with limited exceptions, to all revenue arising from contracts with its customers. Ind AS 115 establishes a five-step model to account for revenue arising from contracts with customers and requires that revenue be recognised at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer.

Ind AS 115 requires entities to exercise judgement, taking into consideration all of the relevant facts and circumstances when applying each step of the model to contracts with their customers. The standard also specifies the accounting for the incremental costs of obtaining a contract and the costs directly related to fulfilling a contract. In addition, the standard requires extensive disclosures.

The entities forming part of Restricted Group adopted Ind AS 115 using the modified retrospective method of adoption with the date of initial application of 1 April 2018. Under this method, the standard can be applied either to all contracts at the date of initial application or only to contracts that are not completed at this date. The entities forming part of Restricted Group elected to apply the standard to all contracts that are not completed as at 1 April 2018.

Set out below, are the amounts by which each financial statement line item is affected as at and for the year ended 31 March 2019 as a result of the adoption of Ind AS 115. The adoption of Ind AS 115 did not have a material impact on retained earnings or the Restricted Group's operating, investing and financing cash flows. The first column shows amounts prepared under Ind AS 115 and the second column shows what the amounts would have been had Ind AS 115 not been adopted:

As on 01 April 2017

Particulars	**Note**	**Ind AS 115**	**Ind AS 18**	**Increase/ (decrease)**
Other current financial assets				
Unbilled revenue	6	-	198	(198)

Trade receivables	11	91	107	198

As on 01 April 2018

Particulars	**Note**	**Ind AS 115**	**Ind AS 18**	**Increase/ (decrease)**
Other current financial assets				
Unbilled revenue	6	-	303	(303)
Trade receivables				
Trade receivables	11	1,396	1,093	303

b) Standards issued but not yet effective

Ind AS 12 Recognition of Deferred Tax Assets for Unrealised Losses

The amendments clarify that an entity needs to consider whether tax law restricts the sources of taxable profits against which it may make deductions on the reversal of that deductible temporary difference. Furthermore, the amendments provide guidance on how an entity should determine future taxable profits and explain the circumstances in which taxable profit may include the recovery of some assets for more than their carrying amount.

Entities are required to apply the amendments retrospectively. However, on initial application of the amendments, the change in the opening equity of the earliest comparative period may be recognised in opening retained earnings (or in another component of equity, as appropriate), without allocating the change between opening retained earnings and other components of equity. Entities applying this relief must disclose that fact.

These amendments are effective for annual periods beginning on or after 1 April 2018. However, since the Restricted Group's current practice is in line with the amendment, the Group does not expect any effect on its consolidated financial statements.

Ind AS 116 Leases:

Ind AS 116 Leases was notified in March, 2019 and it replaces Ind AS 17 Leases, including appendices thereto. Ind AS 116 is effective for annual periods beginning on or after 1 April, 2019. Ind AS 116 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under Ind AS 17. The standard includes two recognition exemptions for lessees – leases of 'low-value' assets (e.g., personal computers) and short-term leases (i.e., leases with a lease term of 12 months or less). At the commencement date of a lease, a lessee will recognise a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use asset). Lessees will be required to separately recognise the interest expense on the lease liability and the depreciation expense on the right-of-use asset.

Lessees will be also required to remeasure the lease liability upon the occurrence of certain events (e.g., a change in the lease term, a change in future lease payments resulting from a change in an index or rate used to determine those payments). The lessee will generally recognise the amount of the remeasurement of the lease liability as an adjustment to the right-of-use asset.
Lessor accounting under Ind AS 116 is substantially unchanged from today's accounting under Ind AS 17. Lessors will continue to classify all leases using the same classification principle as in Ind AS 17 and distinguish between two types of leases: operating and finance leases.

The Entities forming part of Restricted Group has implemented the new standard from 01 April 2019 with modified restrospective approach.

c) Other regulatory changes

Pursuant to The Taxation Laws (Amendment) Ordinance, 2019 (Ordinance) issued subsequent to the balance sheet date, the tax rates have changed with effect from 1 Apr 2019. Certain entities forming part of the Restricted Group plan to pay tax at revised rate from next year. If those changes were announced on or before reporting date, it would have resulted in write-off of MAT credit amounting to INR 134 and recognition of Deferred Tax Liability (DTL) amounting to INR 49 on account of re-measurement of deferred tax as at 31 March 2019. The tax charge for the year would have been increased by INR 183

f) Compensation of key management personnel

Remuneration to the key managerial personnel is paid by The Holding Company of the companies in the group and is allocated between the subsidiary companies as management shared services and is not separately identifiable.

g) The facility is covered by corporate guarantee of ReNew Power Private Limited, the holding company. The guarantee shall remain valid and in force till all security is created and perfected to the satisfaction of lenders.

h) ReNew Solar Power Private Limited has pledged 25,500 (31 March 2018: 20,400) equity shares of the entities forming part of the Restricted Group in favour of security trustee on behalf of lenders.

i) ReNew Power Private Limited has pledged 22,236,902 (31 March 2018: 7,348,817) equity shares and 7,323,158 (31 March 2018:2,876,000) preference shares of the entities forming part of the Restricted Group in favour of security trustee on behalf of lenders.

30 Segment information

The managing director of ReNew Power Private Limited takes decisions in respect of allocation of resources and assesses the performance basis the reports/ information provided by functional heads and is thus considered to be the Chief Operating Decision Maker (CODM).

The Restricted Group discloses segment information in a manner consistent with internal reporting to group's Managing Director. The entities forming part of Restricted Group have segments based on type of business operations. The reportable segments of Restricted Group under Ind AS are Wind Power and Solar Power which predominantly relate to generation and sale of electricity and construction activities. The entities forming part of Restricted Group does not operate in more than one geographical segment. The Restricted Group discloses in the segment information operating profit, comparable operating profit and comparable EBITDA.

No operating segment has been aggregated to form the above reportable operating segments. Further, total assets and liabilities balances for each reportable segment are not reviewed by or provided to CODM.

	For the year ended 31 March 2019			For the year ended 31 March 2018

The Revenues from three major customers amounts to INR 2,312 (31 March 2018: three customers INR 758) each of which contributes more than 10% of the total revenue of the Group.

31 Hedging activities and derivatives

Derivatives designated as hedging instruments

The entities forming part of the Restricted Group use certain types of derivative financial instruments (viz. foreign currency forwards, cross-currency interest rate swap) to manage/mitigate their exposure to foreign exchange and interest risk. Further, the entities forming part of the Restricted Group designates such derivative financial instruments (or its components) as hedging instruments for hedging the exchange rate fluctuation and interest risk attributable to either a recognised item or a highly probable forecast transaction ('cash flow hedge'). The effective portion of changes in the fair value of derivative financial instruments (or its components) that are designated and qualify as cash flow hedges, are recognised in the other comprehensive income and held in cash flow hedge reserve - a component of equity. Any gains / (losses) relating to the ineffective portion, are recognised immediately in the Statement of Profit and Loss within other expenses/ other income. The amounts accumulated in equity for highly probable forecast transaction are added to carrying value of non financial asset or non financial liability as basis adjustment, other amounts accumulated in equity are re-classified to the Statement of Profit and Loss in the year when the hedged item affects profit / (loss).

At any point of time, when a forecast transaction is no longer expected to occur, the cumulative gains / (losses) that were reported in equity is immediately transferred to the Statement of Profit and Loss within other expenses / other income.

Cash flow hedges

Hedge has been taken against exposure to foreign currency risk and variable interest outflow on external commercial borrowings and buyer's credit. Terms of the swaps and their respective impact on OCI and Statement of Profit and Loss is as below:-

- Buyers credit (included in short term borrowing)
Pay fixed INR and receive USD and pay fixed interest at 6.81% to 7.80% p.a. and receive a variable interest at 6 month LIBOR plus 0.90% p.a. to 6 month LIBOR plus 1.10% p.a. on the notional amount.

The cash flow hedges through forward is USD 4,529,962 and CCS is USD 12,266,902 outstanding at the year ended 31 March 2019 were assessed to be highly effective and cumulative impact of mark to market gain and restatement of hedged item is INR 7 (31 March 2018: INR 33) with a deferred tax liability of INR 2 (31 March 2018: INR 8), is included in OCI.

Foreign currency and Interest rate risk

Forward contracts and swaps measured at fair value through OCI are designated as hedging instruments in cash flow hedges of interest and principal payments in USD.

	31 March 2019		**31 March 2018**	
	Assets	**Liabilities**	**Assets**	**Liabilities**

32 Commitments, liabilities and contingencies
(to the extent not provided for)

(i) Contingent liabilities

The entities forming part of the Restricted Group have contingent liability on account of delay in project commissioning as on 31 March 2019 INR 5 (31 March 2018: Nil).

(ii) Commitments

Estimated amount of contracts remaining to be executed on capital account and not provided for
There are no capital commitments outstanding as on 31 March 2019 (31 March 2018: 120).

33 Fair values

Set out below, is a comparison by class of the carrying amounts and fair value of the financial instruments of the entities forming part of the Restricted Group:

	31 March 2019		31 March 2018	
	Carrying value	Fair value	Carrying value	Fair value
Financial assets				
Measured at amortised cost				
Loans-non-current	87	87	0	0
Loans-current	887	887	2,556	2,556
Trade receivables	1,396	1,396	91	91
Cash and cash equivalent	379	379	279	279
Bank balances other than cash and cash equivalent	1,645	1,645	1,216	1,216
Other current financial assets	285	285	424	424
Measured at FVTPL				
Investments-current, quoted mutual funds	-	-	922	922
Measured at FVOCI				
Derivative instruments	40	40	6	6
Financial liabilities				
Measured at amortised cost				
Long term borrowings	15,001	15,001	6,069	6,069
Short-term borrowings	4,819	4,819	13,537	13,537
Trade payables	626	626	530	530
Other current financial liabilities	3,578	3,578	9,573	9,573
Measured at FVOCI				
Derivative instruments	-	-	12	12

The management of the entities forming part of the Restricted Group assessed that cash and cash equivalents, trade receivables, trade payables, other current financial liabilities and other current financial assets approximate their carrying amounts largely due to the short-term maturities of these instruments.

For financial assets and liabilities that are measured at fair value, the carrying amounts are equal to the fair values.
The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The following methods and assumptions were used to estimate the fair values:

i The fair values of the entities forming part of the Restricted Group's term loans from financial institutions including current maturities are determined by using Discounted Cash Flow (DCF) method using discount rate that reflects the issuer's borrowing rate as at the end of the reporting period. They are classified as level 3 fair values in the fair value hierarchy due to the inclusion of unobservable inputs including own credit risk. The own non-performance risk as at 31 March 2019 was assessed to be insignificant.

ii The fair values of the security deposits given are determined by using Discounted Cash Flow (DCF) method using discount rate that reflects the lending rate as at the end of the reporting period. They are classified as level 3 fair values in the fair value hierarchy due to the inclusion of unobservable inputs including counterparty credit risk.

iii The entities forming part of the Restricted Group enter into derivative financial instruments with various counter parties, principally financial institutions with investment grade credit ratings. Cross currency interest rate swaps are valued using valuation techniques, which employs the use of market observable inputs. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates, yield curves of the currency, interest rate curves and forward rate curves of the underlying instrument. The changes in counterparty credit risk had no material effect on the hedge effectiveness assessment for derivatives designated in hedge relationships.

34 Fair value hierarchy

The entities forming part of the Restricted Group categorize assets and liabilities measured at fair value into one of three levels depending on the ability to observe inputs employed in their measurement which are described as follows:
i) Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
ii) Level 2 - Inputs are inputs that are observable, either directly or indirectly, other than quoted prices included within level 1 for the asset or liability.
iii) Level 3 - Inputs are unobservable inputs for the asset or liability reflecting significant modifications to observable related market data or assumptions about pricing by market participants.

The following table provides the fair value measurement hierarchy of the assets and liabilities of the entities forming part of the Restricted Group :-

Quantitative disclosures fair value measurement hierarchy for assets/liabilities as at year end:

	Level of fair value measurement	31 March 2019		31 March 2018

35 Financial risk management objectives and policies

The Restricted Group's principal financial liabilities comprise loans and borrowings, trade payables and other financial liabilities.
The main purpose of these financial liabilities is to finance the Restricted Group's operations and to support its operations. The Restricted Group's financial assets include loans, trade and other receivables, and cash and cash equivalents and other financial assets.

The Restricted Group is exposed to market risk, credit risk and liquidity risk. The Restricted Group's senior management oversees the management of these risks. The Restricted Group's senior management is supported by a various sub committees that advises on financial risks and the appropriate financial risk governance framework for the Restricted Group. These committees provides assurance to the Restricted Group's senior management that the Restricted Group's financial risk activities are governed by appropriate policies and procedure and that financial risks are identified, measured and managed in accordance with the Restricted Group's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each risk, which are summarised as below.

Market risk

Market risk is the risk that the Restricted Group's assets and liabilities will be exposed to due to a change in market prices that determine the valuation of these financial instruments. Market risk comprises 3 types of risk: interest rate risk, currency risk and other price risk such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits Include investments in mutual funds and derivative financial instruments.
The sensitivity analyses in the following sections relate to the position as at 31 March 2019. The sensitivity analyses have been prepared on the basis that the amount of net debt, the ratio of fixed to floating interest rates of the debt and derivatives and the proportion of financial instruments in foreign currencies are all constant and on the basis of hedge designations in place as at 31 March 2019.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Restricted Group is exposed to interest rate risk primarily from the external borrowings that are used to finance their operations. In case of external commercial borrowings ("ECB") and buyers credit the Restricted Group believes that the exposure of the Restricted Group to changes in market interest rates is insignificant as the respective companies manage the risk by hedging the changes in the market interest rates through cross currency interest rate swaps. The Restricted Group also monitors the changes in interest rates and actively re-finances its debt obligations to achieve an optimal interest rate exposure.

Interest rate sensitivity

The following table demonstrates the sensitivity to a reasonable possible change in interest rates on financial liabilities, i.e. borrowings in INR and USD. With all other variables held constant, the entities forming part of the Restricted Group's profit before tax is affected through the impact on financial assets, as follows:

	31 March 2019		31 March 2018	
	Increase/decrease in basis points	**Effect on profit before tax**	**Increase/decrease in basis points**	**Effect on profit before tax**
INR	+/(-)50	(-)/+ 55	+/(-)50	(-)/+ 27
	Increase/decrease in basis points	**Effect on equity**	**Increase/decrease in basis points**	**Effect on equity**
INR	+/(-)50	(-)/+ 41	+/(-)50	(-)/+ 20

Foreign currency risk

Foreign Currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Restricted Group is exposed to foreign currency risk arising from imports of goods in US dollars and external commercial borrowings. The Restricted Group hedges its exposure to fluctuations on the translation into INR of its buyer's/supplier's credit and ECB by using foreign currency swaps and forward contracts. The Restricted Group has followed a conservative approach for hedging the foreign currency risk so as to not use complex forex derivatives. The Restricted Group also monitors that the hedges do not exceed the underlying foreign currency exposure. The Restricted Group does not undertake any speculative transaction.

Foreign currency sensitivity

The Restricted Group has hedged its exposure to fluctuations on its buyer's/supplier's credit and ECB through forward contracts and cross currency swaps and thus foreign currency sensitivity has not been disclosed.

Credit risk

Credit risk from balances with banks is managed by treasury department of the entities forming part of the Restricted Group. Investments, in the form of fixed deposits, loans and other investments, of surplus funds are made only with banks and group companies and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed on an annual basis by the entities forming part of the Restricted Group, and may be updated throughout the year subject to approval of company's finance committee. The limits are set to minimize the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

Further the entities forming part of the Restricted Group sought to reduce counterparty credit risk under our long-term contracts in part by entering into power sales contracts with utilities or other customers of strong credit quality and we monitor their credit quality on an on going basis.
The maximum credit exposure to credit risk for the components of the balance sheet at 31 March 2019 and 31 March 2018 is the carrying amount of all the financial assets.

Trade receivables

Customer credit risk is managed basis established policies of the entities forming part of the Entities forming part of Restricted Group, procedures and controls relating to customer credit risk management. Outstanding customer receivables are regularly monitored. The entities forming part of the Entities forming part of Restricted Group do not hold collateral as security.

The entities forming part of the Restricted Group have state utilities/government entities as it's customers with high credit worthiness, therefore, the entities forming part of the Restricted Group do not see any risk related to credit. The credit quality of the customers other than state utilities/government entities is evaluated based on their credit ratings and other publicly available data.

Financial instruments and credit risk

Credit risk from balances with banks is managed by company's treasury department. Investments, in the form of fixed deposits, loans and other investments, of surplus funds are made only with banks & group companies and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed on an annual basis by the respective entity forming part of the Entities forming part of Restricted Group, and and may be updated throughout the year subject to approval of company's finance committee. The limits are set to minimize the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

Liquidity risk

Liquidity risk is the risk that the entities forming part of the Restricted Group will encounter in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The approach of the entities forming part of the Restricted Group to manage liquidity is to ensure , as far as possible, that these will have sufficient liquidity to meet their respective liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risk damage to their reputation.

The entities forming part of the Restricted Group assessed the concentration of risk with respect to refinancing its debt and concluded it to be low. The entities forming part of the Restricted Group have access to a sufficient variety of sources of funding and debt maturing within 12 months can be rolled over with existing lenders.

The entities forming part of the Restricted Group rely mainly on long-term debt obligations to fund their construction activities. To the extent available at acceptable terms, utilized non-recourse debt to fund a significant portion of the capital expenditures and investments required to construct and acquire our wind power plants and related assets. Our non-recourse financing is designed to limit cross default risk to the Parent Company or other subsidiaries and affiliates. Our non-recourse long-term debt is a combination of fixed and variable interest rate instruments. External commercial borrowings which are at variable rate is fixed through the use of cross currency interest rate swaps. In addition, the debt is typically denominated in the currency that matches the currency of the revenue expected to be generated from the benefiting project, thereby reducing currency risk. In certain cases, the currency is matched through the use of derivative instruments. The majority of non-recourse debt is funded by banks and financial institutions, with debt capacity supplemented by unsecured loan from related party.

The table below summarizes the maturity profile of financial liabilities of Restricted Group based on contractual undiscounted payments:

Year ended 31 March 2019	**On demand**	**Less than 3 months**	**3 to 12 months**	**1 to 5 years**	**> 5 years**	**Total**
Long term Borrowings						
Term loan from Banks*	-	-	-	5,410	11,762	17,172
Term loan from Financial Institutions*	-	-	-	3,429	7,408	10,837

36 Capital management

For the purpose of the capital management by the respective entities forming part of the Restricted Group, capital includes issued equity capital, compulsory convertible preference shares, share premium and all other equity reserves attributable to the equity holders of the respective entities forming part of the Restricted Group. The primary objective of the respective entities forming part of the Restricted Group's capital management is to maximise the shareholder value.

The entities forming part of the Restricted Group manage their capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants.

To maintain or adjust the capital structure, respective entities forming part of the Restricted Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The respective entities forming part of the Restricted Group monitor capital using a gearing ratio, which is net debt divided by total capital plus net debt. The respective entities forming part of the Restricted Group includes within net debt, interest bearing loans and borrowings, trade and other payables, less cash and short-term deposits.

The policy of the respective entities forming part of the Restricted Group is to keep the gearing ratio to 3:1 during the construction phase and aim to enhance it to 4:1 post the construction phase. This is in line with industry rate. In the construction phase the entities forming part of Restricted Group manages the ratio at 3:1 through internal funding.

In order to achieve this overall objective, the capital management by the respective entities forming part of the Restricted Group, amongst other things, aims to ensure that they meet financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. There have been no breaches in the financial covenants of any interest-bearing loans and borrowing in the current year.

No changes were made in the objectives, policies or processes for managing capital during the year ended 31 March 2019.

37 Details of dues to Micro, Small and Medium Enterprises as defined under the MSMED Act, 2006

Under the Micro, Small and Medium Enterprises Development Act, 2006, (MSMED) which came into force from 2 October 2006, certain disclosure are required to be made relating to Micro, Small and Medium Enterprises. On the basis of the information and records available with the management, there are no outstanding dues to the Micro, Small and Medium Enterprises development Act, 2006.

Particulars	As at 31 March 2019	As at 31 March 2018
The principal amount and the interest due thereon (to be shown separately) remaining unpaid to any supplier as at the end of each accounting year/period	1	Nil
The amount of interest paid by the buyer in terms of section 16, of the Micro Small and Medium Enterprise Development Act, 2006 along with the amounts of the payment made to the supplier beyond the appointed day during each accounting year/period	Nil	Nil
The amount of interest due and payable for the period of delay in making payment (which have been paid but beyond the appointed day during the year/period) but without adding the interest specified under Micro Small and Medium Enterprise Development Act, 2006.	Nil	Nil
The amount of interest accrued and remaining unpaid at the end of each accounting year/period; and	Nil	Nil
The amount of further interest remaining due and payable even in the succeeding years, until such date when the interest dues as above are actually paid to the small enterprise for the purpose of disallowance as a deductible expenditure under section 23 of the Micro Small and Medium Enterprise Development Act, 2006	Nil	Nil

38 Corporate social responsibility expenditure

As per Section 135 of the Companies Act, 2013, a company, meeting the applicability threshold, needs to spend at least 2% of its average net profit for the immediately preceding three financial years on corporate social responsibility (CSR) activities. The areas for CSR activities as follows :-

1) Sanitation and making available safe drinking water- Construction of toilets, Bore-well, well, Tube-well etc.
2) Empowering women through SHGs (self-help group) and creating income generation activities for the women like stitching and tailoring, goatery, backyard poultry etc.)
3) Ensuring environmental sustainability- animal welfare Plantation, environment awareness,
4) Animal Welfare-Animal health camp, Para –vet training
5) Education awareness, Remedial classes for weak students etc.
6) Health and Hygiene- Health camps in the community, cleanliness drive to create awareness.

A CSR committee has been formed by the respective entity forming part of the Restricted Group as per the Act. The funds were utilised on above mentioned activities which are specified in Schedule VII of the Companies Act, 2013.

(a) Gross amount required to be spent by the entities forming part of the Restricted Group during the year is INR 2 (31 March 2018: INR 0).
(b) Amount spent during the year on:

List of CSR activities	In Cash	Yet to be paid	Total
Current year			
Construction / acquisition of any asset	Nil	Nil	Nil
Other activities	2	1	3
Total	2	1	3
Previous year*			
Construction / acquisition of any asset	Nil	Nil	Nil
Other activities	2	-	2
Total	2	-	2

* The amount yet to be paid in previous year has been subsequently paid in current year.

	Zamira Renewable Private Limited	**Shruti Power Projects Private Limited**
Revenue	5	92
Profit/(loss) before tax	(3)	16

40 Significant accounting judgments, estimates and assumptions

The preparation of special purpose combined financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the accompanying disclosures. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

In the process of applying the accounting policies management has made certain judgements, estimates and assumptions. The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The entities forming part of the Restricted Group based their assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the entities forming part of the Restricted Group. Such changes are reflected in the assumptions when they occur.

A) Accounting judgements:

Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgment is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

The entities forming part of the Restricted Group makes various assumptions and estimates while computing deferred taxes which include production related data (PLFs), projected operations and maintenance costs, projected finance costs, proposed availment of deduction under section 80IA of the Income Tax Act, 1961 and the period over which such deduction shall be availed, accelerated depreciation, other applicable allowances, usage of brought forward losses etc. While these assumptions are based on best available facts in the knowledge of management as on the balance sheet date however, they are subject to change year on year depending on the actual tax laws and other variables in the respective year. Given that the actual assumptions which would be used to file the return of income shall depend upon the tax laws prevailing in respective year, management shall continue to reassess these assumptions while calculating the deferred taxes on each balance sheet date and the impact due to such change, if any, is considered in the respective year.

Depreciation on property, plant and equipment

Depreciation on property, plant and equipment is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management. Considering the applicability of Schedule II of Companies Act, 2013, the management has re-estimated useful lives and residual values of all its property, plant and equipment. The management believes that depreciation rates currently used fairly reflect its estimate of the useful lives and residual values of property, plant and equipment, though these rates in certain cases are different from lives prescribed under Schedule II of the Companies Act, 2013.

Basis legal opinion obtained, management is of the view that application of CERC and/or SERC rates for the purpose of accounting for depreciation expenses is not mandatory. Hence, the entities forming part of the Restricted Group are depreciating the assets bases on life as determined by an expert.

B) Estimates and assumptions:

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values.

Assumptions include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 34 and 35 for further disclosures.

Related party transactions

ReNew Power Private Limited along with all its subsidiaries hereinafter collectively referred to as 'the Group' have entered into inter-company transactions as explained below :

Management shared services

Employee benefit costs and other common expenses are incurred by the Ultimate Holding Company and Holding Company. These expenses are allocated to all the entities of the Group in the form of 'Management Shared Services'. Allocation of cost to the entities involves various estimates including retention, allocation of cost for projects under construction vis-a-vis operating projects, profit mark-up which are assessed through an external expert.

Inter-group unsecured loan

The Group uses unsecured loans to fund requirements of various entities. These loans carry interest rate of 8% (approximates 3-year government bond yield).

Financial instrument

The Group makes inter-group investments in the form of RNCPS . These investment carries interest at a nominal rate and are accounted for as compound financial instruments under Ind AS 32. The rate used for discounting the future cash flows approximate the average market interest rate of borrowings availed by Group.

41 There are no employees on the rolls of the entities forming part of the Restricted Group and therefore there are no employee benefit expenses accrued in the Unaudited Special Purpose Interim Combined Financial Statements. ReNew Power Private Limited and ReNew Power Services Private Limited have charged certain common expenses to its subsidiary companies and fellow subsidiaries respectively on the basis of its best estimate of expenses incurred. ReNew Power Private Limited and ReNew Power Services Private Limited have recovered the said expenses in the form of 'Management Shared Services'. The management believes that the method adopted by the these companies is most appropriate basis for recovering of such common expenses.

42 During the year ended March 2019, certain entities forming part of the Restricted Group reached settlement with some of their suppliers/contractors for compensation for loss of revenue on account of delay in commissioning of power projects. Resultantly, an amount of INR 76 towards Liquidated Damages ('LDs') has been recognized in the combined statement of profit and loss.

Since, the said LDs are directly linked to delay in creating profit making apparatus, the same has been considered as capital receipt and thus has not been included in Book Profit under section 115JB of the Income Tax Act, 1961. The same has also been supported by the opinion of the advisors of the entity forming part of Restricted Group.

43 Zemira Renewable Energy Limited has entered into a long-term Power Purchase Agreement (“PPA”) having a capacity of 50.40 MWs (wind energy projects) with Southern Power Distribution Company of Andhra Pradesh Limited i.e. the distribution company of Andhra Pradesh (“APDISCOM”). The PPA has a fixed rate per unit of electricity for the 25-year term. With regard to aforementioned PPA, certain litigations as described below are currently underway:

The Government of Andhra Pradesh (the “GoAP”) issued an order (the “GO”) dated 1 July 2019 constituting a High-Level Negotiation Committee (the “HLNC”) for review and negotiation of tariff for wind energy projects in the state of Andhra Pradesh. Pursuant to the GO, APDISCOM issued letters dated 11 July 2019 to Zemira Renewable Energy Limited, requesting for revision of tariffs entered into in PPAs. Zemira Renewable Energy Limited filed a writ petition on 23 July 2019 before the AP High Court (“AP High Court) challenging the GO and the said letters issued by APDISCOM for renegotiation of tariffs. The AP High Court issued its order dated September 24, 2019 enumerating the following:

i. Writ petition is allowed, and both GO the subsequent letters are set aside.

ii. Further, APDISCOM were instructed to honour pending and future bills and pay the same at the interim rate of Rs. 2.43 per unit till determination of O.P. No. 17 of 2018 pending before APERC

iii. Andhra Pradesh Electricity Regulatory Commission (the “APERC”) to dispose-off the case within a time frame of six months.

Zemira Renewable Energy Limited along with other certain subsidiaries of the ReNew Power Private Limted having similar PPAs with the APDISCOM ("AP Entities") have filed a Writ Petition before the Division Bench of the AP High Court challenging the jurisdiction of APERC in entertaining O.P. No. 17 of 2018. Parallelly, AP Entities have filed another Writ Appeal before the division bench of the AP High Court challenging AP High Court’s direction to the APDISCOM to pay tariff at interim rate till determination of OP No. 17 of 2018 by APERC.

Zemira Renewable Energy Limited has a net block of INR 3,858 million as at March 31, 2019 and has recognised a revenue of INR 584 million for the year ended 31 March 2019 and has a trade receivable balance of INR 451 million as on 31 March 2019 from sale of electricity against such PPA.

The management basis legal opinion obtained by it, believes that it has strong merits in the case and the final order would be in its favour and hence no adjustment has been made in the special purpose combined financial statements including provision for expected credit loss and impairment.

44 Distribution companies of the state of Karnataka issued demand notices to captive users being the customers of ReNew Wind Energy (AP) Private Limited (“ReNew AP”) which is a part of the Restricted Group. These notices were issued seeking recovery of cross subsidy surcharge and differential between rate of electricity tax applicable to captive users and non-captive users on the ground that these captive users have not consumed the energy in proportion to their respective shareholding in ReNew AP, thereby allegedly violating Rule 3 of the Electricity Rules, 2005. ReNew AP had deposited a sum of INR 31 under protest against the demand raised by distribution companies amounting INR 147. Thereafter, ReNew AP had filed a petition before the Karnataka Electricity Regulatory Commission (the "KERC") contesting these demands. KERC had granted interim relief and stayed the demand notice and disconnection by the distribution companies. The amount paid under protest has been accounted for as recoverable and disclosed under head “Other current assets” in these financial statements.

Apart from above, subsequent to year end, on 20 May 2020, demand notices were issued by distribution companies to one of the captive users of ReNew AP towards energy supplied in financial year ended 31 March 2019 for a sum of INR 97, alleging that the captive user had not consumed energy in proportion to its respective shareholding in ReNew AP. ReNew AP has filed a writ petition on 26 August 2020 before the High Court of Karnataka challenging the issuance of demand notices and seeking their quashing.
ReNew AP, based on legal advice obtained, believes that there are merits in its position and that the demand raised by distribution companies would be rescinded by relevant legal authorities and hence no adjustment has been made in the financial statements in this regard.

45 The combined current liabilities of the Restricted Group as on 31 March 2020 exceed the combined current assets with the combined current ratio being 0.52:1. The primary reason for this is due to unsecured loans provided by RPPL and ReNew Solar Power Private Limited (wholly owned subsidiary of RPPL) to certain entities forming part of the Restricted Group which are repayable on demand and hence these are classified as a current liability in these financial statements. The management of RPPL as well as the project lenders considers these unsecured loans as equity contribution for the purposes of project financing.
Further, RPPL and ReNew Solar Power Private Limited would consider the financial position and liquidity of the respective entities forming part of the Restricted Group prior to making any demand for repayment of such unsecured loans and interest accrued thereon. This shall be done to ensure support by RPPL and ReNew Solar Power Private Limited towards the entities in meeting their operating requirements and liabilities as and when they fall due. Further RPPL has issued an unconditional letter of support for continued operational and financial support in favour of entities forming part of Restricted Group.

46 Due to outbreak of COVID-19 in India and globally, the Restricted Group has made initial assessment of likely adverse impact on economic environment in general and financial risks on account of COVID-19. Considering that the Restricted Group is in the business of generation of electricity which is having "Must Run" status by Ministry of New and Renewable Energy (MNRE), the management believes that the impact of outbreak on the business and financial position of the entities forming part of the Restricted Group will not be significant. The management does not see any risks in the Restricted Group's ability to continue as a going concern and meeting its liabilities as and when they fall due. The Restricted Group is closely monitoring developments, its operations, liquidity and capital resources and is actively working to minimize the impact of the unprecedented situation.

47 Absolute amounts less than INR 500,000 are appearing in the financial statements as "0" due to presentation in millions.

INDEPENDENT AUDITOR'S REPORT

To the Board of Directors of **ReNew Power Private Limited ("RPPL")**

Report on combined financial statements

We have audited the accompanying Special Purpose Combined Financial Statements of Restricted Group (consisting of certain specific subsidiaries of RPPL as listed in note 1 of these financial statements, collectively known as the "Restricted Group") which comprises of the combined Balance Sheet as at March 31, 2018, the combined Statement of Profit and Loss including other comprehensive income, the combined Cash Flow Statement and the combined Statement of Changes in Equity for the year then ended and the related notes, comprising a summary of significant accounting policies and other explanatory information (collectively, the "Special Purpose Combined Financial Statements").

The Combined Financial Statements have been prepared in accordance with the basis of preparation as set out in note 3 to the Combined Financial Statements.

Management's responsibility for the combined financial statements

RPPL's Board of Directors is responsible for the preparation these Special Purpose Combined Financial Statements in accordance with the basis of preparation as set out in note 3 to the Combined Financial Statement. This includes the design, implementation and maintenance of internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Special Purpose Combined Financial Statements that give a true and fair view and are free from material misstatement whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these Special Purpose Combined Financial Statements based on our audit. We conducted our audit in accordance with the Standards on Auditing, issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the Special Purpose Combined Financial Statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the Special Purpose Combined Financial Statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Special Purpose Combined Financial Statements, whether due to fraud or error. In making those risk assessments, we consider internal financial control relevant to the management's preparation of the Special Purpose Combined Financial Statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by management, as well as evaluating the overall presentation of the Special Purpose Combined Financial Statements. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the special purpose Special Purpose Combined Financial Statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Special Purpose Combined Financial Statements as at and for the year ended March 31, 2018 are prepared in all material respects, in accordance with the basis of preparation as set out in note 3.1 to those Special Purpose Combined Financial Statements.

Emphasis of matter

1. Without modifying our opinion, we draw attention to note 2 and 3 to the Special Purpose Combined Financial Statements, which describes that the Restricted Group has not formed a separate legal group of entities during the year ended 31 March 2018, which also describes the basis of preparation, including the approach to and the purpose for preparing them. Consequently, the Restricted Group's Special Purpose Combined Financial Statements may not necessarily be indicative of the financial performances and financial position of the Restricted Group that would have occurred if it had operated as a separate standalone group of entities during the periods presented.

2. We draw attention to note 40 to the Special Purpose Combined Financial Statements, related to the renegotiation of long-term Power Purchase Agreements (the “PPAs”) entered into with Southern Power Distribution Company of A.P. Limited by Zemira Renewable Energy Limited (forming part of the Restricted Group). Zemira Renewable Energy Limited has filed Writ Petition/appeal before the Hon’ble High Court of Andhra Pradesh related to these matters. Pending the outcome of the cases, which is not presently determinable, no adjustment has been made to the Special Purpose Combined Financial Statements.

   Our opinion is not qualified in respect of the matter above.

Other matters

1. The accompanying Special Purpose Combined Financial Statements include total assets of Rs. 7,188 million as at 31 March 2018, and total revenues of Rs. 230 million and net cash inflows of Rs. 103 million for the year ended on that date. in respect of 5 entities forming part of the Restricted Group, which has been audited by other auditors, for which financial statements, other financial information and auditors report have been furnished to us by the management. Our opinion on the Special Purpose Combined Financial Statements, in so far as it relates to the amounts and disclosures included in respect of these entities. and our report as aforesaid in so far as it relates to the aforesaid entity, is based solely on the reports of such other auditors.

2. The Combined Financial Statements of the Restricted Group for the year ended 31 March 2017, included in these Special Purpose Combined Financial Statements, have been audited by the predecessor auditor who expressed an unmodified opinion on those statements on 15 September 2020.

3. These Special Purpose Combined Financial Statements have been prepared by the management of RPPL solely in connection with the proposed issuance of Non-Convertible bonds by each member of the Restricted Group for which RPPL is a guarantor and for inclusion in the Offering Memorandum. As a result, the Combined Financial Statement may not be suitable for another purpose.

1 Corporate information

ReNew Power Private Limited (the "Company" or "Parent" or "RPPL") is a private limited company domiciled in India. The Company was converted into a private limited company with effect from 8 November 2019 and consequently the name of the Company has changed from ReNew Power Limited to ReNew Power Private Limited.

Certain subsidiary companies of the Parent and ReNew Solar Power Private Limited (wholly owned subsidiary of RPPL) which are collectively referred to as the 'Restricted Group' (as more clearly explained in the note below) intends to issue INR denominated Non-Convertible Debentures (referred to as "INR NCDs") to a Mauritian Foreign Portfolio Investor namely India Green Energy Holdings under Voluntary Retention Route as prescribed by the Reserve Bank of India, which in turn will issue USD denominated bonds (referred to as "FPI Bonds"). The FPI Bonds will be listed on Singapore Exchange Securities Trading Limited (SGX-ST).

Name of entity	Holding Company	Holding percentage
ReNew Wind Energy (AP) Private Limited	ReNew Power Private Limited	68%
ReNew Wind Energy (AP 3) Private Limited	ReNew Power Private Limited	100%
Shruti Power Projects Private Limited (acquired on 16 September 16)	ReNew Power Private Limited	100%
Pugalur ReNewable Private Limited	ReNew Power Private Limited	100%
Bidwal ReNewable Private Limited	ReNew Power Private Limited	100%
Zemira ReNewable Energy Limited (acquired on 31 March 18)	ReNew Power Private Limited	100%
ReNew Wind Energy (Rajasthan Four) Private Limited	ReNew Solar Power Private Limited	100%
ReNew Wind Energy (Maharashtra) Private Limited	ReNew Solar Power Private Limited	100%
Bhumi Prakash Private Limited	ReNew Solar Power Private Limited	100%
Tarun Kiran Bhoomi Private Limited	ReNew Solar Power Private Limited	100%
ReNew Wind Energy (MP Three) Private Limited	ReNew Solar Power Private Limited	100%

Entities forming part of the Restricted Group listed above are incorporated in India and are engaged in generation of power through non-conventional and renewable energy sources.

*ReNew Solar Power Private Limited is a 100% subsidiary of ReNew Power Private Limited.

The Special Purpose Combined Financial Statements were approved for issue in accordance with a resolution of the directors of the ReNew Power Private Limited on 10th Ocober 2020

2 Purpose of Special Purpose Combined Financial Statements

The Combined Financial Statements are special purpose financial statements which have been prepared for the purpose of the proposed issue of INR denominated Non-Convertible Debentures (referred to as "INR NCDs") to a Mauritian Foreign Portfolio Investor namely India Green Energy Holdings under Voluntary Retention Route as prescribed by the Reserve Bank of India, which in turn will issue USD denominated bonds (referred to as "FPI Bonds"). The FPI Bonds will be listed on Singapore Exchange Securities Trading Limited (SGX-ST).. The Special Purpose Combined Financial Statements presented herein reflect the Restricted Group's results of operations, assets and liabilities and cash flows for the periods presented. The basis of preparation and significant accounting policies used in preparation of these Special Purpose Combined Financial Statements are set out in Note 3 below. These Special Purpose Combined Financial Statements presented herein reflect the Restricted Group's results of operations, assets and liabilities and cash flows for the period presented. The basis of preparation and significant accounting policies used in preparation of these Special Purpose Combined Financial Statements are set out in Note 3 below.

3 Significant accounting policies

3.1 Basis of preparation

The Special Purpose Combined Financial Statements have been prepared in accordance with the recognition, measurement, presentation and disclosure principles specified in the Indian Accounting Standard (Ind AS) notified under Section 133 of the Companies Act, 2013 as amended from time to time, (except Ind AS 33, Earnings per Share), read with rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 (as amended) issued there under, presentation requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III), as applicable and the Guidance Note on Combined and Carve-out Financial Statements issued by the Institute of Chartered Accounts of India (the "Guidance Note") and other accounting principles generally accepted in India.

Management of the Parent company has prepared the Special Purpose Combined Financial Statements which comprise the Combined Balance Sheet as at 31 March 2018, the Combined Statement of Profit and Loss including other comprehensive income, Combined Statement of Cash Flows and Combined Statement of Changes in Equity for the year ended 31 March 2018, a summary of the significant accounting policies and other explanatory Information.

Management has prepared these Special Purpose Combined Financial Statements to depict the historical cost of the Restricted Group except for the following assets and liabilities which have been measured at fair value:

- Derivative financial instruments,
- Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments)

All intercompany transactions and balances within the Restricted Group have been eliminated in full. The transactions that have taken place with other related parties of entities forming part of the Restricted Group but not forming part of the Restricted Group have been disclosed in accordance with Ind AS 24 Related Party Disclosures.

The Special Purpose Combined Financial Statements are not necessarily indicative of the financial performance, financial position and cash flows of the Restricted Group that would have occurred if it had operated as a separate stand-alone Group of entities during the period presented nor of the Restricted Group's future performance. The items in the Special Purpose Combined Financial Statements have been classified considering the principles under Ind AS 1, Presentation of Financial Statements and Division II of Schedule III of Companies Act 2013.

3.2 Basis of combination

The Special Purpose Combined Financial Statements have been prepared by combining like items of assets, liabilities. equity, income, expenses and cash flows of the entities forming part of Restricted Group. All the intragroup assets and liabilities, equity, income, expenses and cash flows relating to entities forming part of Restricted Group have been eliminated and profits or losses arising from intragroup transactions that are recognised in assets, such as inventory and fixed assets have been eliminated in full. All the inter-group transactions are undertaken on Arms Lengths basis. The resulting financial position may not be that which might have existed if the combining businesses had been a stand-alone business.

The carrying values pertaining to an entity, as reflected in the consolidated financial statements of the Parent, are used for the purpose of preparing Special Purpose Combined Financial Statements including fair value adjustment to assets and liabilities on acquisition along with corresponding impact on deferred taxes.

The non-controlling interest held by outsiders amount to INR 51 and INR 43 as of 31 March 2018 and 31 March 2017 respectively.

Share capital and reserves disclosed in the Special Purpose combined financial statements is not the legal capital and reserves of the Restricted Group and is the aggregation of the share capital and reserves of the individual combining entities.

Income taxes are arrived at by aggregation of the tax expenses actually incurred by the combining businesses, after considering the tax effects of any adjustments which is in accordance with the Guidance Note.

The accounting policies and estimates adopted in the preparation of the Special Purpose Combined Financial Statements are consistent with those used in the Special Purpose Combined Financial Statements for the year ended 31 March 2017.

Business Combination and Goodwill

Business combinations are accounted for using the acquisition method in the consolidated financial statements of the Parent

At the acquisition date of an entity being part of the Restricted Group by the Parent, the identifiable assets acquired and the liabilities assumed are recognised at their acquisition date fair values. For this purpose, the liabilities assumed include contingent liabilities representing present obligation and they are measured at their acquisition fair values irrespective of the fact that outflow of resources embodying economic benefits is not probable. However, the following assets and liabilities acquired are measured at the basis indicated below:

- Deferred tax assets or liabilities are recognised and measured in accordance with Ind AS 12 Income Tax.
- Reacquired rights are measured at a value determined on the basis of the remaining contractual term of the related contract. Such valuation does not consider potential renewal of the reacquired right.
- Potential tax effects of temporary differences and carry forwards of an acquiree that exist at the acquisition date or arise as a result of the acquisition are accounted in accordance with Ind AS 12

At the acquisition date of an entity being part of the Restricted Group by the Parent, the Parent assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred by the Parent over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Parent re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised as Parent's contribution in Other Equity.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Restricted Group’s cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

A cash generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

Where goodwill has been allocated to a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

There are no business combinations made by any of the entities forming part of Restricted Group.

3.3 Summary of significant accounting policies

a) Current versus non-current classification

The Restricted Group presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it is:

- Expected to be realised or intended to sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is treated as current when it is:

- Expected to be settled in normal operating cycle
- Held primarily for the purpose of trading
- Due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets/liabilities are classified as non-current assets/liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation/settlement in cash and cash equivalents. The entities forming part of the Restricted Group have identified twelve months as their operating cycle for classification of their current assets and liabilities.

b) Fair value measurement

The entities forming part of the Restricted Group measure financial instruments, such as, derivatives at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the entities forming part of the Restricted Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The entities forming part of the Restricted Group use valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:
- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For the purpose of fair value disclosures, the entities forming part of the Restricted Group have determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy. (Refer Note 33 and 34).

At each reporting date, the management of the entities forming part of the Restricted Group analyse the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the accounting policies of the Restricted Group.

For assets and liabilities that are recognised in the Financial Statements on a recurring basis, the entities forming part of the Restricted Group determine whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

This note summarises the accounting policy for determination of fair value. Other fair value related disclosures are given in the relevant notes as following:

· Disclosures for significant estimates and assumptions (Refer Note 39)
· Quantitative disclosures of fair value measurement hierarchy (Refer Note 33)
· Financial instruments (including those carried at amortised cost) (Refer Note 32 and 33)

c) Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the entities forming part of the Restricted Group and the revenue can be reliably measured, regardless of when the payment is being made. The following specific recognition criteria must also be met before revenue is recognised:-

Sale of Power
Income from supply of power is recognized on the supply of units generated from the plant to the grid, as per the terms of the PPA entered into with the state electricity board/ private customers.

Generation based Incentive
Income from generation based incentive is recognized on the basis of supply of units generated by the entities forming part of the Restricted Group to the state electricity board from the eligible project in accordance with the scheme of the "Generation Based Incentive (GBI) for Grid interactive Wind Power

Income from liquidated damages, compensation for loss of revenue and interest on advances
Income from liquidated damages, compensation for loss of revenue and interest on advance is recognised after certainty of receipt of the same is established.

Dividend
Dividend income is recognised when the right of the entities forming part of the Restricted Group to receive dividend is established by the reporting date.

Interest income
For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset. When calculating the effective interest rate, the entities forming part of the Restricted Group estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in other income in the Special Purpose Combined Statement of Profit and Loss.

Income from government grants
Refer note (f) for accounting policy.

d) Foreign currencies

The Restricted Group Financial Statements are presented in Indian rupees (INR), which is also the functional currency of all entities forming part of Restricted Group. Functional currency is the currency of the primary economic environment in which the entities forming part of Restricted Group operates and is normally the currency in which the entities forming part of Restricted Group primarily generates and expends cash.

Transactions and balances

Transactions in foreign currencies are initially recorded by the Restricted Group at their functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

Exchange differences arising on settlement or translation of monetary items are recognised in profit and loss.

e) Taxes

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in India. Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate. Current income tax assets and liabilities are offset if a legally enforceable right exists to set off these and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Deferred Tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss

- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

In situations where entities forming part of the Restricted Group is entitled to a tax holiday under the Income-tax Act, 1961, enacted in India, no deferred tax (asset or liability) is recognized in respect of temporary differences which reverse during the tax holiday period. Deferred taxes in respect of temporary differences which reverse after the tax holiday period are recognized in the year in which the temporary differences originate. However, the entities forming part of the Restricted Group restrict the recognition of deferred tax assets to the extent that it has become reasonably certain that sufficient future taxable income will be available against which such deferred tax assets can be realized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in OCI or equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Minimum Alternate Tax

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the entities forming part of the Restricted Group will pay normal income tax. Accordingly, MAT is recognised as deffered tax asset in the Special Purpose Combined Balance Sheet when it is probable that future economic benefit associated with it will flow to the entities forming part of the Restricted Group.

f) Government grants

Government grants are recognized where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant is related to an expense item, it is recognized as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant is related to an asset, it is recognized as income in equal amounts over the expected useful life of the related asset.

When the entities forming part of the Restricted Group receive grants of non-monetary assets, the asset and the grant are recorded at fair value amounts and released to Statement of Profit and Loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset i.e. by equal annual instalments.

The entities forming part of the Restricted Group presents grants related to an expense item as other income in the Statement of Profit and Loss. Thus, Generation based incentive and Sale of emission renewable certificates have been recognised as other income.

Generation based incentive

Generation based incentive is recognized on the basis of supply of units generated by the entities forming part of the Restricted Group to the state electricity board from the eligible project in accordance with the scheme of the "Generation Based Incentive (GBI) for Grid interactive Wind Power Projects"

g) Property, plant and equipment

Capital work in progress and freehold land are stated at cost, net of accumulated impairment loss, if any. Property, plant and equipment, except freehold land, is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the entities forming part of the Restricted Group depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred.

On transition date to Ind AS, the entities forming part of Restricted Group has elected to continue with the carrying value of all of its property, plant and equipment recognised as at 1 April 2015 measured as per previous GAAP and use that carrying value as the deemed cost of the property, plant and equipment.

Subsequent costs

The cost of replacing a part of an item of property, plant and equipment is recognised in the carrying amount of the item of property, plant and equipment, if it is probable that the future economic benefits embodied within the part will flow to the entities forming part of the Restricted Group and its cost can be measured reliably with the carrying amount of the replaced part getting derecognised. The cost for day-to-day servicing of property, plant and equipment are recognised in Statement of Profit and Loss as and when incurred.

Derecognition

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the Special Purpose Combined Statement of Profit and Loss when the asset is derecognised.

h) Depreciation / amortisation of Property, plant and equipment and intangible assets

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets as follows:

Category	Useful life (in years)
Plant and equipment (wind and solar power projects)*	18-25
Furniture & fixture	10
Office equipment	5
Computers	3
Customer contracts	Life of respective power purchase agreements

* Based on an external technical assessment, the management believes that the useful lives as given above and residual value of 0%-5%, best represents the period over which management expects to use its assets and its residual value. The useful life of plant and equipment is different from the useful life as prescribed under Part C of Schedule II of Companies Act, 2013.

The residual values, useful lives and methods of depreciation and amortisation of property, plant and equipment and intangible assets are reviewed at each financial year end and adjusted prospectively, if appropriate.

i) Leases

As a lessee
Operating lease payments are recognised as an expense in the Statement of Profit and Loss on a straight-line basis over the lease term.

A lease is classified at the inception date as a finance lease or an operating lease. A lease that transfers substantially all the risks and rewards incidental to ownership to the Group is classified as a finance lease. An operating lease is a lease other than a finance lease.

As a lessor
Leases in which the entities forming part of Restricted Group does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

j) Inventories

Inventories are valued at the lower of cost and net realisable value.
Costs incurred in bringing each product to its present location and condition are accounted for as follows:
Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on first in, first out basis.
Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

k) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale. Borrowing costs consist of interest, discount on issue, premium payable on redemption and other costs that an entity incurs in connection with the borrowing of funds (this cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs). The borrowing costs are amortised basis the Effective Interest Rate (EIR) method over the term of the loan. The EIR amortisation is recognised under finance costs in the Statement of Profit and Loss. The amount amortized for the period from disbursement of borrowed funds upto the date of capitalization of the qualifying assets is added to cost of the qualifying assets.

l) Impairment of non-financial assets

The entities forming part of the Restricted Group assess, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the entities forming part of the Restricted Group estimate the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating units (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre -tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The entities forming part of the Restricted Group bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Restricted Group's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the entities forming part of the Restricted Group extrapolate cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the Statement of Profit and Loss.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the entities forming part of the Restricted Group estimate the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying value of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Profit and Loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as an increase in revaluation.

m) Provisions

Provisions are recognised when the entities forming part of the Restricted Group have a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the entities forming part of the Restricted Group expect some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the Statement of Profit and Loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

n) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit and loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the entities forming part of the Restricted Group commit to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

Debt instruments at amortised cost

A ‘debt instrument’ is measured at the amortised cost if both the following conditions are met:

a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and

b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance expense in the Statement of Profit and Loss. The losses arising from impairment are recognised in the Statement of Profit and Loss.

Debt instruments at fair value through other comprehensive income (FVTOCI)

A ‘debt instrument’ is classified as at the FVTOCI if both of the following criteria are met:

a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and

b) The asset’s contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the entities forming part of the Restricted Group recognize interest income, impairment losses and reversals and foreign exchange gain or loss in the Statement of Profit and Loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to Statement of Profit and Loss. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

Debt instruments at fair value through profit and loss (FVTPL)

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the entities forming part of the Restricted Group may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as ‘accounting mismatch’). The entities forming part of the Restricted Group have not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

Equity investments

All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS 103 applies are classified as at FVTPL. For all other equity instruments, the entities forming part of the Restricted Group may make an irrevocable election to present the subsequent changes in the fair value in OCI. The entities forming part of the Restricted Group make such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the entities forming part of the Restricted Group decide to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to Statement of Profit and Loss, even on sale of investment. However, the entities forming part of the Restricted Group may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

Derecognition
A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised when:
- The rights to receive cash flows from the asset have expired, or
- The entities forming part of the respective Restricted Group have transferred their rights to receive cash flows from the asset or have assumed the obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and

Either the entities forming part of the Restricted Group have transferred substantially all the risks and rewards of the asset, or has neither transferred nor retained substantially all the risks and rewards of the asset, but have transferred control of the asset.

When the entities forming part of the Restricted Group have transferred their rights to receive cash flows from an asset or have entered into a pass-through arrangement, they evaluate if and to what extent they have retained the risks and rewards of ownership. When they have neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the entities forming part of the Restricted Group continue to recognise the transferred asset to the extent of the continuing involvement of the entities forming part of the Restricted Group. In that case, the entities forming part of the Restricted Group also recognise an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the entities forming part of the Restricted Group have retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the entities forming part of the Restricted Group could be required to repay.

Impairment of financial assets
In accordance with Ind AS 109, the Restricted Group applies expected credit loss (ECL) model for measurement and recognition of impairment loss on all the financial assets and credit risk exposure.
The entities forming part of the Restricted Group follows 'simplified approach for recognition of impairment loss allowance on trade receivables or contract revenue receivables.

The application of simplified approach does not require the entities forming part of the Restricted Group to track changes in credit risk. Rather it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the entities forming part of the Restricted Group determine that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/expense in the Special Purpose Combined Statement of Profit and Loss.

Financial liabilities

Initial recognition and measurement
Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit and loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and in the case of loans and borrowings and payables, net of directly attributable transaction costs. The financial liabilities of the entities forming part of the Restricted Group include trade and other payables, derivative financial instruments, loans and borrowings including bank overdraft.

Subsequent measurement
The measurement of financial liabilities depends on their classification as discussed below:-

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in Statement of Profit and Loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss. This category generally applies to borrowings.

The entities forming part of the Restricted Group recognise debt modifications agreed with lenders to restructure their existing debt obligations. Such modifications are done to take advantage of falling interest rates by cancelling the exposure to high interest fixed rate debt, pay a fee or penalty on cancellation and replace it with debt at a lower interest rate (exchange of old debt with new debt). The qualitative factors considered to be relevant for modified financial liabilities include, but are not limited to, the currency that the debt instrument is denominated in, the interest rate (that is fixed versus floating rate), conversion features attached to the instrument and changes in covenants. The accounting treatment is determined depending on whether modifications or exchange of debt instruments represent a settlement of the original debt or merely a renegotiation of that debt. The exchange of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability.

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

Compulsorily Convertible Preference shares (CCPS)
Compulsorily Convertible Preference shares are accounted for as Instruments entirely equity in nature since conversion option meets Ind AS 32 criteria for fixed to fixed classification and the dividend distribution is discretionary in nature.

Transaction costs are deducted from equity, net of associated income tax. The carrying amount of the conversion option is not remeasured in subsequent years.

Derecognition
A financial liability is derecognised when the obligation under the liability is discharged/ cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

Reclassification of financial assets and liabilities
The Restricted Group determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent.

Offsetting of financial instruments
Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

o) Derivative financial instruments and hedge accounting

Initial recognition and subsequent measurement

The Group uses derivative financial instruments, such as interest rate swaps and call/put options etc., to hedge its interest rate risks and foreign currency risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to profit or loss, except for the effective portion of cash flow hedges, which is recognised in OCI and later reclassified to profit or loss when the hedge item affects profit or loss or treated as basis adjustment if a hedged forecast transaction subsequently results in the recognition of a non-financial asset or non-financial liability.

For the purpose of hedge accounting, hedges are classified as:

- Fair value hedges when hedging the exposure to changes in the fair value of a recognised asset or liability or an unrecognised firm commitment

- Cash flow hedges when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment

- Hedges of a net investment in a foreign operation

At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to which the Group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes the Group's risk management objective and strategy for undertaking hedge, the hedging/ economic relationship, the hedged item or transaction, the nature of the risk being hedged, hedge ratio and how the entity will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

Hedges that meet the strict criteria for hedge accounting are accounted for, as described below:

(i) Cash flow hedges

The effective portion of the gain or loss on the hedging instrument is recognised in OCI in the cash flow hedge reserve, while any ineffective portion is recognised immediately in the Special Purpose Combined Statement of Profit and Loss.

The Group uses interest rate swaps and call/put options etc. as hedges of its exposure to interest rate risks and foreign currency risks in the foreign currency loan. The ineffective portion relating to foreign currency loan is recognised in other income or expenses.

Amounts recognised as OCI are transferred to profit or loss when the hedged transaction affects profit or loss, such as when the hedged item affects the Special Purpose Combined Statement of Profit and Loss or treated as basis adjustment if a hedged item subsequently results in recognition of a non-financial asset or liability.

If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover (as part of the hedging strategy), or if its designation as a hedge is revoked, or when the hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss previously recognised in OCI remains separately in equity until the forecast transaction occurs or the foreign currency firm commitment is met.

p) Cash and cash equivalents

Cash and short-term deposits in the balance sheet comprise cash at banks and cash in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the Statement of cash flows, cash and cash equivalents consist of cash and short term deposits, as defined above, net off bank overdrafts as they considered an integral part of the entities forming part of the Restricted Group's cash management.

q) Measurement of EBITDA

The Restricted Group has elected to present earnings before interest, tax, depreciation and amortization (EBITDA) as a separate line item on the face of the Statement of Profit and Loss. The Restricted Group measure EBITDA on the basis of profit/ (loss) from continuing operations. In their measurement, the companies include interest income but do not include depreciation and amortization expense, finance costs and tax expense.

r) Events occurring after the Balance Sheet date

Impact of events occurring after the balance sheet date that provide additional information materially effecting the determination of the amounts relating to conditions existing at the balance sheet date upto the date of the approval for issue of these Special Purpose Combined Financial Statements by the Board of Directors of the Entities forming part of the Restricted Group are adjusted to respective assets and liabilities.

The entities forming part of the Restricted Group do not adjust the amounts recognised in its Special Purpose Combined Financial Statements to reflect non-adjusting events after the reporting period.

The entities forming part of the Restricted Group make disclosures in the financial statement in cases of significant events.

s) Contingent liabilities

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entities forming part of the Restricted Group or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

3.4 Changes in accounting policy and disclosures - new and amended standards

a) Major Standards issued but not yet effective:

In March 2018, the Ministry of Corporate Affairs issued the Companies (Indian Accounting Standards) Amendments Rules, 2018, notifying new accounting standard Ind AS 115, 'Revenue from Contracts with Customers' and certain amendments to existing standards. The new standard and amendments are applicable to the Entities forming part of the Restricted Group from 1 April 2018.

Ind AS 115 Revenue from Contracts with Customers

In March 2018, the Ministry of Corporate Affairs issued the Companies (Indian Accounting Standards) Amendments Rules, 2018, notifying new accounting standard Ind AS 115, 'Revenue from Contracts with Customers' and certain amendments to existing standards. The new standard and amendments are applicable to the Company from 1 April 2018. Revenue from contracts with Customers outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. The standard replaces most current revenue recognition guidance. The core principle of the new standard is for companies to recognize revenue to depict the transfer of goods or services to customers in amounts that reflect the consideration to which the company expects to be entitled in exchange for those goods or services. The new standard also will result in enhanced disclosures about revenue, provide guidance for transactions that were not previously addressed comprehensively including service revenues and contract modifications and improve guidance for multiple-element arrangements.

The Company is evaluating the requirements of the new standard and the effect on the financial statements is being evaluated, thus impact is not known. The Entities forming part of the Restricted Group has implemented the new standard from 01 April 2018 with modified restrospective approach.

Ind AS 12 Recognition of Deferred Tax Assets for Unrealised Losses

The amendments clarify that an entity needs to consider whether tax law restricts the sources of taxable profits against which it may make deductions on the reversal of that deductible temporary difference. Furthermore, the amendments provide guidance on how an entity should determine future taxable profits and explain the circumstances in which taxable profit may include the recovery of some assets for more than their carrying amount.

Entities are required to apply the amendments retrospectively. However, on initial application of the amendments, the change in the opening equity of the earliest comparative period may be recognised in opening retained earnings (or in another component of equity, as appropriate), without allocating the change between opening retained earnings and other components of equity. Entities applying this relief must disclose that fact.

These amendments are effective for annual periods beginning on or after 1 April 2018. However, since the Group's current practice is in line with the amendment, the Group does not expect any effect on its consolidated financial statements.

Ind AS 116 Leases:

Ind AS 116 Leases was notified in March, 2019 and it replaces Ind AS 17 Leases, including appendices thereto. Ind AS 116 is effective for annual periods beginning on or after 1 April, 2019. Ind AS 116 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under Ind AS 17. The standard includes two recognition exemptions for lessees – leases of 'low-value' assets (e.g., personal computers) and short-term leases (i.e., leases with a lease term of 12 months or less). At the commencement date of a lease, a lessee will recognise a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use asset). Lessees will be required to separately recognise the interest expense on the lease liability and the depreciation expense on the right-of-use asset.

Lessees will be also required to remeasure the lease liability upon the occurrence of certain events (e.g., a change in the lease term, a change in future lease payments resulting from a change in an index or rate used to determine those payments). The lessee will generally recognise the amount of the remeasurement of the lease liability as an adjustment to the right-of-use asset.

Lessor accounting under Ind AS 116 is substantially unchanged from today's accounting under Ind AS 17. Lessors will continue to classify all leases using the same classification principle as in Ind AS 17 and distinguish between two types of leases: operating and finance leases.

The Entities forming part of the Restricted Group has implemented the new standard from 01 April 2019 with modified restrospective approach.

b) Other regulatory changes

On 20th September 2019, vide the Taxation Laws (Amendment) Ordinance, 2019 (the "Ordinance"), the Government of India inserted 115BAA in the Income Tax Act, 1961 which provides domestic companies a non-reversible option to pay corporate tax at reduced rates effective 1st April, 2019, subject to certain conditions. Some of the entities forming part of the Restricted Group have decided to opt for reduced corporate tax rates and accordingly, has recognized current tax and re-measured its deferred taxes as per the provisions of the Ordinance in the financial statements for the year ended March 2020. However the ordinance does not have any impact on the financial statements of the entities forming part of the Restricted group for the period ended 31 March 2018.

The Revenues from three major customers amounts to INR 758 (March 17: INR 582) each of which contributes more than 10% of the total revenue of the Group.

30 Hedging activities and derivatives

Derivatives designated as hedging instruments

The entities forming part of the Restricted Group use certain types of derivative financial instruments (viz. foreign currency forwards, cross-currency interest rate swap) to manage/mitigate their exposure to foreign exchange and interest risk. Further, the entities forming part of the Restricted Group designates such derivative financial instruments (or its components) as hedging instruments for hedging the exchange rate fluctuation and interest risk attributable to either a recognised item or a highly probable forecast transaction ('cash flow hedge'). The effective portion of changes in the fair value of derivative financial instruments (or its components) that are designated and qualify as cash flow hedges, are recognised in the other comprehensive income and held in cash flow hedge reserve - a component of equity. Any gains / (losses) relating to the ineffective portion, are recognised immediately in the Statement of Profit and Loss within other expenses/ other income. The amounts accumulated in equity for highly probable forecast transaction are added to carrying value of non financial asset or non financial liability as basis adjustment, other amounts accumulated in equity are re-classified to the Statement of Profit and Loss in the year when the hedged item affects profit / (loss).

At any point of time, when a forecast transaction is no longer expected to occur, the cumulative gains / (losses) that were reported in equity is immediately transferred to the Statement of Profit and Loss within other expenses / other income.

Cash flow hedges

Hedge has been taken against exposure to foreign currency risk and variable interest outflow on external commercial borrowings and buyer's credit. Terms of the swaps and their respective impact on OCI and Statement of Profit and Loss is as below:-

- Notes

Pay fixed INR and receive USD and pay fixed interest at 6.81% to 7.85% p.a. and receive a variable interest at 6 month LIBOR plus 0.58% to 6 month LIBOR plus 0.62% p.a. on the notional amount.

The cash flow hedges through CCS of USD 226,710,673 and forwards of USD 16,092,119 outstanding at the year ended 31 March 2018 were assessed to be highly effective and cumulative impact of mark to market gai loss and reinstatement of hedged item of of INR 33 (31 March 2017: INR 314) with a deferred tax assets of INR 9 (31 March 2017: INR 97), is included in OCI.

Foreign currency and Interest rate risk

Forward contracts and swaps measured at fair value through OCI are designated as hedging instruments in cash flow hedges of interest and principal payments in USD.

	31 March 2018		31 March 2017	
	Assets	Liabilities	Assets	Liabilities
Forward contracts designated as hedging instruments	6	12	-	60

Measured at FVOCI				
Derivative instruments	12	12	60	60

The management of the entities forming part of the Restricted Group assessed that cash and cash equivalents, trade receivables, trade payables, other current financial liabilities and other current financial assets approximate their carrying amounts largely due to the short-term maturities of these instruments.

For financial assets and liabilities that are measured at fair value, the carrying amounts are equal to the fair values.

The following methods and assumptions were used to estimate the fair values:

i The fair values of the entities forming part of the Restricted Group's term loans from financial institutions including current maturities are determined by using Discounted Cash Flow (DCF) method using discount rate that reflects the issuer's borrowing rate as at the end of the reporting period. They are classified as level 3 fair values in the fair value hierarchy due to the inclusion of unobservable inputs including own credit risk. The own non-performance risk as at 31 March 2018 was assessed to be insignificant.

ii The fair values of the security deposits given are determined by using Discounted Cash Flow (DCF) method using discount rate that reflects the lending rate as at the end of the reporting period. They are classified as level 3 fair values in the fair value hierarchy due to the inclusion of unobservable inputs including counterparty credit risk.

iii The entities forming part of the Restricted Group enter into derivative financial instruments with various counter parties, principally financial institutions with investment grade credit ratings. Cross currency interest rate swaps are valued using valuation techniques, which employs the use of market observable inputs. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates, yield curves of the currency, interest rate curves and forward rate curves of the underlying instrument. The changes in counterparty credit risk had no material effect on the hedge effectiveness assessment for derivatives designated in hedge relationships.

33 Fair value hierarchy

The entities forming part of the Restricted Group categorize assets and liabilities measured at fair value into one of three levels depending on the ability to observe inputs employed in their measurement which are described as follows:
i) Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
ii) Level 2 - Inputs are inputs that are observable, either directly or indirectly, other than quoted prices included within level 1 for the asset or liability.
iii) Level 3 - Inputs are unobservable inputs for the asset or liability reflecting significant modifications to observable related market data or Company's assumptions about pricing by market participants.

The following table provides the fair value measurement hierarchy of the assets and liabilities of the entities forming part of the Restricted Group :-

Quantitative disclosures fair value measurement hierarchy for assets/liabilities as at year end:

	Level of fair value measurement	31 March 2018		31 March 2017	
		Carrying value	Fair value	Carrying value	Fair value
Financial assets not measured at fair value **Measured at amortised cost** Financial assets (Non current):

Buyer's / Supplier's credit (secured)	Level 3	Discounted cash flow	Prevailing interest rates in the market, Future cash flows

34 Financial risk management objectives and policies

The Restricted Group's principal financial liabilities comprise loans and borrowings, trade payables and other financial liabilities.
The main purpose of these financial liabilities is to finance the Restricted Group's operations and to support its operations. The Restricted Group's financial assets include loans, trade and other receivables, and cash and cash equivalents and other financial assets.

The Restricted Group is exposed to market risk, credit risk and liquidity risk. The Restricted Group's senior management oversees the management of these risks. The Restricted Group's senior management is supported by a various sub committees that advises on financial risks and the appropriate financial risk governance framework for the Restricted Group. These committees provides assurance to the Restricted Group's senior management that the Restricted Group's financial risk activities are governed by appropriate policies and procedure and that financial risks are identified, measured and managed in accordance with the Restricted Group's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each risk, which are summarised as below.

Market risk

Market risk is the risk that the Restricted Group's assets and liabilities will be exposed to due to a change in market prices that determine the valuation of these financial instruments. Market risk comprises 3 types of risk: interest rate risk, currency risk and other price risk such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits, investments in mutual funds and derivative financial instruments.
The sensitivity analyses in the following sections relate to the position as at 31 March 2018. The sensitivity analyses have been prepared on the basis that the amount of net debt, the ratio of fixed to floating interest rates of the debt and derivatives and the proportion of financial instruments in foreign currencies are all constant and on the basis of hedge designations in place as at 31 March 2018.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Restricted Group is exposed to interest rate risk primarily from the external borrowings that are used to finance their operations. In case of external commercial borrowings ("ECB") and buyers credit the Restricted Group believes that the exposure of the Restricted Group to changes in market interest rates is insignificant as the respective companies manage the risk by hedging the changes in the market interest rates through cross currency interest rate swaps. The Restricted Group also monitors the changes in interest rates and actively re-finances its debt obligations to achieve an optimal interest rate exposure.

Interest rate sensitivity

The following table demonstrates the sensitivity to a reasonable possible change in interest rates on financial liabilities, i.e. borrowings in INR and USD. With all other variables held constant, the entities forming part of the Restricted Group's profit before tax is affected through the impact on financial assets, as follows:

	31 March 2018		31 March 2017	
	Increase/decrease in basis points	**Effect on profit before tax**	**Increase/decrease in basis points**	**Effect on profit before tax**
INR	+/(-)50	(-)/+ 27	+/(-)50	(-)/+ 21
	Increase/decrease in basis points	**Effect on equity**	**Increase/decrease in basis points**	**Effect on equity**
INR	+/(-)50	(-)/+ 20	+/(-)50	(-)/+ 16

Foreign currency risk

Foreign Currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Restricted Group is exposed to foreign currency risk arising from imports of goods in US dollars and external commercial borrowings. The Restricted Group hedges its exposure to fluctuations on the translation into INR of its buyer's/supplier's credit and ECB by using foreign currency swaps and forward contracts. The Company has followed a conservative approach for hedging the foreign currency risk so as to not use complex forex derivatives. The Restricted Group also monitors that the hedges do not exceed the underlying foreign currency exposure. The Restricted Group does not undertake any speculative transaction.

Foreign currency sensitivity

The Restricted Group has hedged its exposure to fluctuations on its buyer's/supplier's credit and ECB through forward contracts and cross currency swaps and thus foreign currency sensitivity has not been disclosed.

Credit risk

Credit risk is the risk that the power procurer will not meet their obligations under a financial instrument or customer contract, leading to a financial loss. The Entities forming part of Restricted Group is exposed to credit risk from their operating activities (primarily trade receivables) and from its financing activities but this credit risk exposure is insignificant given the fact that substantially whole of the revenues are from state utilities/government entities.

Further the group sought to reduce counterparty credit risk under long-term contracts in part by entering into power sales contracts with utilities or other customers of strong credit quality and we monitor their credit quality on an on going basis.

The maximum credit exposure to credit risk for the components of the balance sheet at 31 March 2018 and 31 March 2017 is the carrying amount of all the financial assets

Trade receivables

Customer credit risk is managed basis established policies of the entities forming part of the Restricted Group, procedures and controls relating to customer credit risk management. Outstanding customer receivables are regularly monitored. The entities forming part of the Restricted Group do not hold collateral as security.

The entities forming part of the Restricted Group have state utilities/government entities as it's customers with high credit worthiness, therefore, the entities forming part of the Restricted Group do not see any risk related to credit. The credit quality of the customers other than state utilities/government entities is evaluated based on their credit ratings and other publicly available data.

Financial instruments and credit risk

Credit risk from balances with banks is managed by group's treasury department. Investments, in the form of fixed deposits, of surplus funds are made only with banks and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed on an annual basis by the respective entity forming part of the Restricted Group, and may be updated throughout the year subject to approval of group's finance committee. The limits are set to minimize the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

Liquidity risk

Liquidity risk is the risk that the entities forming part of the Restricted Group will encounter in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The approach of the entities forming part of the Restricted Group to manage liquidity is to ensure , as far as possible, that these will have sufficient liquidity to meet their respective liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risk damage to their reputation.

The entities forming part of the Restricted Group assessed the concentration of risk with respect to refinancing its debt and concluded it to be low. The entities forming part of the Restricted Group have access to a sufficient variety of sources of funding and debt maturing within 12 months can be rolled over with existing lenders.

The entities forming part of the Restricted Group rely mainly on long-term debt obligations to fund their construction activities. To the extent available at acceptable terms, utilized non-recourse debt to fund a significant portion of the capital expenditures and investments required to construct and acquire our wind power plants and related assets. Our non-recourse financing is designed to limit cross default risk to the Parent Company or other subsidiaries and affiliates. Our non-recourse long-term debt is a combination of fixed and variable interest rate instruments. External commercial borrowings which are at variable rate is fixed through the use of cross currency interest rate swaps. In addition, the debt is typically denominated in the currency that matches the currency of the revenue expected to be generated from the benefiting project, thereby reducing currency risk. In certain cases, the currency is matched through the use of derivative instruments. The majority of non-recourse debt is funded by banks and financial institutions, with debt capacity supplemented by unsecured loan from related party.

The table below summarizes the maturity profile of financial liabilities of Restricted Group based on contractual undiscounted payments:

Year ended 31 March 2018	**On demand**	**Less than 3 months**	**3 to 12 months**	**1 to 5 years**	**> 5 years**	**Total**
Borrowings						
Term loan from Banks*	-	-	-	1,730	3,362	5,092
Term loan from Financial institutions*	-	-	-	1,548	3,240	4,788
Buyer's Suppliers credit	-	792	-	795	-	1,587
Commercial paper		1,964	-	-	-	1,964
Short term borrowings						
Loans from related party	6,791	-	-	-	-	6,791
Acceptances	-	3,990	-	-	-	3,990
Other financial liabilities						
Current maturities of long term borrowings*	-	220	617	-	-	837
Interest accrued but not due on borrowings	141	84	10	-	-	235
Capital creditors	537	6,810	1,437	-	-	8,784
Derivative Instruments	-	12	-	-	-	12
Trade payable						
Trades payable	478	52	2	-	-	532

* Including future interest payments.

The entities forming part of the Restricted Group expect liabilities with current maturities to be repaid from net cash provided by operating activities of the entity to which the debt relates or through opportunistic refinancing activity or some combination thereof.

Year ended 31 March 2017	**On demand**	**Less than 3 months**	**3 to 12 months**	**1 to 5 years**	**> 5 years**	**Total**
Borrowings						
Term loan from banks*	-	-	625	9,961	1,172	11,758

Trade payable	600	109	-	-	-	709

* Including future interest payments.

35 Capital management

For the purpose of the capital management by the respective entities forming part of the Restricted Group, capital includes issued equity capital, compulsory convertible preference shares, share premium and all other equity reserves attributable to the equity holders of the respective entities forming part of the Restricted Group. The primary objective of the respective entities forming part of the Restricted Group's capital management is to maximise the shareholder value.

The entities forming part of the Restricted Group manage their capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants.

To maintain or adjust the capital structure, respective entities forming part of the Restricted Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The respective entities forming part of the Restricted Group monitor capital using a gearing ratio, which is net debt divided by total capital plus net debt. The respective entities forming part of the Restricted Group includes within net debt, interest bearing loans and borrowings, trade and other payables, less cash and short-term deposits.

The policy of the respective entities forming part of the Restricted Group is to keep the gearing ratio to 3:1 during the construction phase and aim to enhance it to 4:1 post the construction phase. This is in line with industry rate. In the construction phase the entities forming part of Restricted Group manages the ratio at 3:1 through internal funding.

In order to achieve this overall objective, the capital management by the respective entities forming part of the Restricted Group, amongst other things, aims to ensure that they meet financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. There have been no breaches in the financial covenants of any interest-bearing loans and borrowing in the current year or the previous year.

No changes were made in the objectives, policies or processes for managing capital during the year ended 31 March 2018.

36 Details of dues to Micro, Small and Medium Enterprises as defined under the MSMED Act, 2006

Under the Micro, Small and Medium Enterprises Development Act, 2006, (MSMED) which came into force from 2 October 2006, certain disclosure are required to be made relating to Micro, Small and Medium Enterprises. On the basis of the information and records available with the management, there are no outstanding dues to the Micro, Small and Medium Enterprises development Act, 2006.

Particulars	As at 31 March 2018	As at 31 March 2017
The principal amount and the interest due thereon (to be shown separately) remaining unpaid to any supplier as at the end of each accounting year/period	Nil	Nil
The amount of interest paid by the buyer in terms of section 16, of the Micro Small and Medium Enterprise Development Act, 2006 along with the amounts of the payment made to the supplier beyond the appointed day during each accounting year/period	Nil	Nil
The amount of interest due and payable for the period of delay in making payment (which have been paid but beyond the appointed day during the year/period) but without adding the interest specified under Micro Small and Medium Enterprise Development Act, 2006.	Nil	Nil
The amount of interest accrued and remaining unpaid at the end of each accounting year/period; and	Nil	Nil
The amount of further interest remaining due and payable even in the succeeding years, until such date when the interest dues as above are actually paid to the small enterprise for the purpose of disallowance as a deductible expenditure under section 23 of the Micro Small and Medium Enterprise Development Act, 2006	Nil	Nil

37 Corporate social responsibility expenditure

As per Section 135 of the Companies Act, 2013, a company, meeting the applicability threshold, needs to spend at least 2% of its average net profit for the immediately preceding three financial years on corporate social responsibility (CSR) activities. The areas for CSR activities as follows :-

1) Sanitation and making available safe drinking water- Construction of toilets, Bore-well, well, Tube-well etc.
2) Empowering women through SHGs (self-help group) and creating income generation activities for the women like stitching and tailoring, goatery, backyard poultry etc.)
3) Ensuring environmental sustainability- animal welfare Plantation, environment awareness,
4) Animal Welfare-Animal health camp, Para –vet training
5) Education awareness, Remedial classes for weak students etc.
6) Health and Hygiene- Health camps in the community, cleanliness drive to create awareness.

A CSR committee has been formed by the respective entity forming part of the Restricted Group as per the Act. The funds were utilised on above mentioned activities which are specified in Schedule VII of the Companies Act, 2013.

(a) Gross amount required to be spent by the entities forming part of the Restricted Group during the year is INR 0 (31 March 2017: INR 6).
(b) Amount spent during the year on:

List of CSR activities	In Cash	Yet to be paid	Total
Current year			
Construction / acquisition of any asset	Nil	Nil	Nil
Other activities	2	-	2
Total	2	-	2
Previous year*			
Construction / acquisition of any asset	Nil	Nil	Nil
Other activities	0	8	8
Total	**0**	**8**	**8**

* The amount yet to be paid in previous year has been subsequently paid in current year.

-----------------------------------This space has been left blank intentionally---------------------------------------

38 Entities acquired by The Parent forming part of Restricted Group

The Parent have acquired unlisted entities based in India and carrying out business activities relating to generation of power through non-conventional and renewable energy sources which are forming a part of the Restricted Group, inexchange for cash consideration. The Parent have acquired these entities because the Parent's management believes that the acquisition would enable the group to strengthen its position in renewable energy sector.

Carrying amount of assets and liabilities reflect the same values as appearing in the consolidated financial statements of the Parent.

Particulars	**For the year ended 31 March 2018** **Zemira Renewable Energy Limited**	**For the year ended 31 March 2017** **Shruti Power Projects Private Limited**
Acquisition date	**31 March 2018**	**16 September 2016**
Segment	**Wind**	**Wind**
Assets	**INR**	**INR**
Property plant and equipment	3,562	557
Intangible assets	457	48
Loans	-	0
Deferred tax assets (net)	1	0
Other non-current assets	-	0
Prepayments - Current	-	13
Cash and cash equivalents	0	14
Bank balances other than cash and cash equivalent	-	52
Others current financial assets	4	0
Other current assets	-	111
	4,024	**795**
Liabilities		
Long-term borrowings	-	375
Short-term borrowings	2	97
Deferred tax liabilities (net)	-	(0)
Trade payables	0	25
Other current financial liabilities	4,024	26
Other current liabilities	0	0
	4,026	**523**
Total identifiable net assets at fair value	**(3)**	**272**
Goodwill on acquisition	3	-
Parent's contribution	3	49

Following are the impacts of business combinations accounting in the consolidated financial statements of the Parent on the Special Purpose Combined Financial Statements

Particulars	**For the year ended 31 March 2018**	**For the year ended 31 March 2017**
	Zemira Renewable Energy Limited	**Shruti Power Projects Private Limited**
1. Assets: [Increase/(Decrease)]		
Property plant and equipment	457	48
Intangible assets	(456)	12
Deferred tax assets (net)	(0)	(11)
Goodwill	2	-
Total impact on Assets	**3**	**49**
2. Liabilities: [Increase/(Decrease)]	-	-
Total impact of Liabilities	-	-
2. Equity: [Increase/(Decrease)]		
Parent's Contribution	3	49
Total impact of Equity	**3**	**49**

From the date of acquisition, acquired entitles have contributed in revenue and profit/loss before tax follows:

Particulars	**From the date of acquisition till 31 March 2018**	**From the respective date of acquisition till 31 March 2017**
	Zamira Renewable Private Limited	**Shruti Power Projects Private Limited**
Revenue	0	26
Profit/(loss) before tax	(0)	(11)

If the combination had taken place at the beginning of the year, revenue from operations and the loss before tax would have been:

Particulars	**For the year ended 31 March 2018**	**From 1 April 2016 to 31 March 2017**
	Zamira Renewable Private Limited	**Shruti Power Projects Private Limited**
Revenue	5	92
Profit/(loss) before tax	(3)	16

39 Significant accounting judgments, estimates and assumptions

The preparation of special purpose combined financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the accompanying disclosures. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

In the process of applying the accounting policies management has made certain judgements, estimates and assumptions. The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The entities forming part of the Restricted Group based their assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the entities forming part of the Restricted Group. Such changes are reflected in the assumptions when they occur.

A) Accounting judgements:

Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgment is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

The entities forming part of the Restricted Group makes various assumptions and estimates while computing deferred taxes which include production related data (PLFs), projected operations and maintenance costs, projected finance costs, proposed availment of deduction under section 80IA of the Income Tax Act, 1961 and the period over which such deduction shall be availed, accelerated depreciation, other applicable allowances, usage of brought forward losses etc. While these assumptions are based on best available facts in the knowledge of management as on the balance sheet date however, they are subject to change year on year depending on the actual tax laws and other variables in the respective year. Given that the actual assumptions which would be used to file the return of income shall depend upon the tax laws prevailing in respective year, management shall continue to reassess these assumptions while calculating the deferred taxes on each balance sheet date and the impact due to such change, if any, is considered in the respective year.

Depreciation on property, plant and equipment

Depreciation on property, plant and equipment is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management. Considering the applicability of Schedule II of Companies Act, 2013, the management has re-estimated useful lives and residual values of all its property, plant and equipment. The management believes that depreciation rates currently used fairly reflect its estimate of the useful lives and residual values of property, plant and equipment, though these rates in certain cases are different from lives prescribed under Schedule II of the Companies Act, 2013.

Basis legal opinion obtained, management is of the view that application of CERC and/or SERC rates for the purpose of accounting for depreciation expenses is not mandatory. Hence, the entities forming part of the Restricted Group are depreciating the assets bases on life as determined by an expert.

B) Estimates and assumptions:

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values.

Assumptions include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 30 and 31 for further disclosures.

Related party transactions

ReNew Power Private Limited along with all its subsidiaries hereinafter collectively referred to as 'the Group' have entered into inter-company transactions as explained below :

Management shared services

Employee benefit costs and other common expenses are incurred by the Ultimate Holding Company and Holding Company. These expenses are allocated to all the entities of the Group in the form of 'Management Shared Services'. Allocation of cost to the entities involves various estimates including retention, allocation of cost for projects under construction vis-a-vis operating projects, profit mark-up which are assessed through an external expert.

Inter-group unsecured loan

The Group uses unsecured loans to fund requirements of various entities. These loans carry interest rate of 8% (approximates 3-year government bond yield).

Financial instrument

The Group makes inter-group investments in the form of RNCPS. These investment carries interest at a nominal rate and are accounted for as compound financial instruments under Ind AS 32. The rate used for discounting the future cash flows approximate the average market interest rate of borrowings availed by Group.

40 Zemira Renewable Energy Limited has entered into a long-term Power Purchase Agreement ("PPA") having a capacity of 50.40 MWs (wind energy projects) with Southern Power Distribution Company of Andhra Pradesh Limited i.e. the distribution company of Andhra Pradesh ("APDISCOM"). The PPA has a fixed rate per unit of electricity for the 25-year term. With regard to aforementioned PPA, certain litigations as described below are currently underway:

The Government of Andhra Pradesh (the "GoAP") issued an order (the "GO") dated 1 July 2019 constituting a High-Level Negotiation Committee (the "HLNC") for review and negotiation of tariff for wind energy projects in the state of Andhra Pradesh. Pursuant to the GO, APDISCOM issued letters dated 11 July 2019 to Zemira Renewable Energy Limited, requesting for revision of tariffs entered into in PPAs. Zemira Renewable Energy Limited filed a writ petition on 23 July 2019 before the AP High Court ("AP High Court) challenging the GO and the said letters issued by APDISCOM for renegotiation of tariffs. The AP High Court issued its order dated September 24, 2019 enumerating the following:
i. Writ petition is allowed, and both GO the subsequent letters are set aside.
ii. Further, APDISCOM were instructed to honour pending and future bills and pay the same at the interim rate of Rs. 2.43 per unit.
iii. Andhra Pradesh Electricity Regulatory Commission (the "APERC") to dispose-off the case within a time frame of six months.

Zemira Renewable Energy Limited has filed a Writ Petition before the division bench of the AP High Court challenging the jurisdiction of APERC in entertaining the said matter. Parallelly, Zemira Renewable Energy Limited has filed another Writ Appeal before the division bench of the AP High Court challenging AP High Court's direction to the APDISCOM to tariff at interim rate.

Zemira Renewable Energy Limited has a net block of INR 4017 million as at March 31, 2018 and has recognised a revenue of INR 5 million for the year ended 31 March 2018 and has a trade receivable balance of INR 5 million as on 31 March 2018 from sale of electricity against such PPA.

The management basis legal opinion obtained by it, believes that it has strong merits in the case and the final order would be in its favour and hence no adjustment has been made in the special purpose combined financial statements including provision for impairment.

41 The combined current liabilities of the Restricted Group as on 31 March 2020 exceed the combined current assets with the combined current ratio being 0.61:1. The primary reason for this is due to unsecured loans provided by RPPL and ReNew Solar Power Private Limited (wholly owned subsidiary of RPPL) to certain entities forming part of the Restricted Group which are repayable on demand and hence these are classified as a current liability in these financial statements. The management of RPPL as well as the project lenders considers these unsecured loans as equity contribution for the purposes of project financing.

Further, RPPL and ReNew Solar Power Private Limited would consider the financial position and liquidity of the respective entities forming part of the Restricted Group prior to making any demand for repayment of such unsecured loans and interest accrued thereon. This shall be done to ensure support by RPPL and ReNew Solar Power Private Limited towards the entities in meeting their operating requirements and liabilities as and when they fall due. Further RPPL has issued an unconditional letter of support for continued operational and financial support in favour of entities forming part of Restricted Group.

42 There are no employees on the rolls of the entities forming part of the Restricted Group and therefore there are no employee benefit expenses accrued in the Unaudited Special Purpose Interim Combined Financial Statements. ReNew Power Private Limited and ReNew Power Services Private Limited have charged certain common expenses to its subsidiary companies and fellow subsidiaries respectively on the basis of its best estimate of expenses incurred. ReNew Power Private Limited and ReNew Power Services Private Limited have recovered the said expenses in the form of 'Management Shared Services'. The management believes that the method adopted by the these companies is most appropriate basis for recovering of such common expenses.

43 Due to outbreak of COVID-19 in India and globally, the entities forming part of Restricted Group has made initial assessment of likely adverse impact on economic environment in general and financial risks on account of COVID-19. Considering that the Restricted Group is in the business of generation of electricity which is having "Must Run" status by Ministry of New and Renewable Energy (MNRE), the management believes that the impact of outbreak on the business and financial position of the entities forming part of the Restricted Group will not be significant. The management does not see any risks in the Restricted Group's ability to continue as a going concern and meeting its liabilities as and when they fall due. The entities forming part of the Restricted Group is closely monitoring developments, its operations, liquidity and capital resources and is actively working to minimize the impact of the unprecedented situation.

44 Absolute amounts less than INR 500,000 are appearing in the financial statements as "0" due to presentation in millions.

INDEPENDENT AUDITOR'S REPORT

To the Members of ReNew Power Private Limited

Report on the Audit of the Standalone Ind AS Financial Statements

Opinion

We have audited the accompanying standalone Ind AS financial statements of ReNew Power Private Limited ("the Company"), which comprise the Balance sheet as at 31 March 2020, the Statement of Profit and Loss, including the statement of Other Comprehensive Income, the Cash Flow Statement and the Statement of Changes in Equity for the year then ended, and notes to the standalone Ind AS financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone Ind AS financial statements give the information required by the Companies Act, 2013, as amended ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2020, its loss including other comprehensive income, its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the standalone Ind AS financial statements in accordance with the Standards on Auditing (SAs), as specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the 'Auditor's Responsibilities for the Audit of the standalone Ind AS Financial Statements' section of our report. We are independent of the Company in accordance with the 'Code of Ethics' issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the standalone Ind AS financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone Ind AS financial statements for the financial year ended 31 March 2020. These matters were addressed in the context of our audit of the standalone Ind AS financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have determined the matters described below to be the key audit matters to be communicated in our report. We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the standalone Ind AS financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the standalone Ind AS financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying standalone Ind AS financial statements.

Key audit matters	How our audit addressed the key audit matter
Related Party Transactions – Accuracy and completeness of related party transactions and disclosure thereof *(as described in note 35 of the standalone Ind AS financial statements)*	
We identified the measurement, completeness, presentation and disclosure of related party transactions as a key audit matter due to the high volume and complexity of business transactions with related parties during the year ended 31 March 2020.	Our audit procedures included the following: • Obtained an understanding of the process and tested the design and operating effectiveness of key controls that management has established to identify, account for and disclose related party transactions. • Obtained an updated list of all related parties to the Company and reviewed the general ledger against this list to ensure completeness of transactions. • We read contracts and agreements with related parties to understand the nature of the transactions. • We agreed the amounts disclosed to underlying documentation and reviewing relevant agreements, on a sample basis, as part of our evaluation of the disclosure. • We obtained an understanding of the Company's methodology of determination of arms-length price. We have also obtained and evaluated the Company's independent expert's reports on validation of arms-length price. • Made enquiries of management in order to identify if any related party transactions outside the normal course of business have taken place. • We evaluated the completeness of the disclosures through review of statutory information, books and records and other documents obtained during the course of our audit.
Debt repayment obligations and liquidity *(as described in note 42(e) of the standalone Ind AS financial statements)*	
External funding in the form of long term and short-term borrowings, are an integral part of the Company's business model. It is the key source of funds used by the business to finance its projects, projects of its subsidiaries and operations. Such external borrowings represent the largest liability on the balance sheet. As at 31 March 2020, the Company's borrowings from sources other than loans from its subsidiaries and entities under joint control amount to 33% of the balance sheet total and its Debt is to Equity ratio is 45%. Out of total external borrowings, the following are due for repayment over next 12 months: a. INR 8,881 million is the current maturities of long-term borrowings, and	Our audit procedures include the following: • We obtained an understanding of the process followed by the management for preparation of cash flow forecast, inputs used in the model to estimate the future cash flows as well as the sensitivity analysis prepared in this context. • We discussed with management and assessed the assumptions and judgements used in the estimate of future cash flows having regards to past performance and current emerging business trends affecting the business and industry. We did this assessment with reference to budgets and the underlying substantiations. • We assessed the maturity profile of the Company's borrowings to test that loans maturing within the next twelve months were classified in current liabilities. • We obtained an understanding of management's assessment for repayment of obligations due over next 12 months. We compared the repayment

Key audit matters	How our audit addressed the key audit matter
b. Various working capital facilities amounting to INR 2,159 million. We have identified the Company's ability to service the debt repayment obligations and liquidity as a key audit matter because of the subjective elements such as: • estimate of expected future cash flows, • realization of existing and future receivables, • repayment by subsidiaries of short terms funds provided by the Company, • forecasted results and operational performance, and • expectation around refinancing of existing debt. These estimates are based on assumptions, including expectations of future economic and market developments.	obligations with that considered in the future cash flows. • We assessed the Company's ability to refinance its obligation based on the past trends, credit ratings, ability to generate steady cash flows over long term contracts and access to capital. • We also assessed the adequacy of the related disclosures in the financial statements.

Other Information

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Director's report, but does not include the standalone Ind AS financial statements and our auditor's report thereon.

Our opinion on the standalone Ind AS financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.
In connection with our audit of the standalone Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether such other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management for the Standalone Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these standalone Ind AS financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone Ind AS financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone Ind AS financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone Ind AS financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone Ind AS financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone Ind AS financial statements, including the disclosures, and whether the standalone Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone Ind AS financial statements for the financial year ended 31 March 2020 and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2016 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the "Annexure 1" a statement on the matters specified in paragraphs 3 and 4 of the Order.
2. As required by Section 143(3) of the Act, we report that:

   (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;

   (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;

   (c) The Balance Sheet, the Statement of Profit and Loss including the Statement of Other Comprehensive Income, the Cash Flow Statement and Statement of Changes in Equity dealt with by this Report are in agreement with the books of account;

   (d) In our opinion, the aforesaid standalone Ind AS financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Companies (Indian Accounting Standards) Rules, 2015, as amended;

   (e) On the basis of the written representations received from the directors as on 31 March 2020 taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2020 from being appointed as a director in terms of Section 164 (2) of the Act;

   (f) With respect to the adequacy of the internal financial controls over financial reporting of the Company with reference to these standalone Ind AS financial statements and the operating effectiveness of such controls, refer to our separate Report in "Annexure 2" to this report;

   (g) In our opinion, the managerial remuneration for the year ended 31 March 2020 has been paid / provided by the Company to its directors in accordance with the provisions of section 197 read with Schedule V to the Act;

   (h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended in our opinion and to the best of our information and according to the explanations given to us:

      i. The Company has disclosed the impact of pending litigations on its financial position in its standalone Ind AS financial statements – Refer note 45 (i) to the standalone Ind AS financial statements;

      ii. The Company has made provision, as required under the applicable law or accounting standards, for material foreseeable losses, if any, on long-term contracts including derivative contracts – Refer note 39 to the standalone Ind AS financial statements;

iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

Annexure 1 referred to in paragraph 1 of our report of even date under section 'Report on other legal and regulatory requirements'

Re: ReNew Power Private Limited ("the Company")

(i) (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets.

(b) Fixed assets have been physically verified by the management during the year and no material discrepancies were identified on such verification.

(c) According to information and explanations given by the management the title deeds of immovable properties included in property, plant and equipment except for freehold land amounting to Rs. 41 million for which registration is pending are held in the name of the Company. It has been explained to us that the title deeds for freehold land amounting to Rs. 362 million as at 31 March 2020, have been given as security (mortgage and charge) against the Non-convertible debentures issued and that original title deeds are kept with Vistara ITCL India Limited and Axis Trustee Services Limited as security for the lenders and therefore the same could not be made available to us for our verification and have also not been independently confirmed by the Security Trustee. Further, the title deeds of freehold land amounting to Rs. 60 million as at 31 March 2020, for which original title deed is not made available to us for verification and hence we are unable to comment on the same.

(ii) The management has conducted physical verification of inventory at reasonable intervals during the year and no material discrepancies were noticed on such physical verification. There was no inventory lying with third parties.

(iii) According to the information and explanations given to us, the Company has not granted any loans, secured or unsecured to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under section 189 of the Companies Act, 2013. Accordingly, the provisions of clause 3(iii) (a), (b) and (c) of the Order are not applicable to the Company and hence not commented upon.

(iv) In our opinion and according to the information and explanations given to us, there are no loans, investments, guarantees, and securities given in respect of which provisions of section 185 of the Companies Act, 2013 are applicable. Further, since the Company is an infrastructure company within the meaning of Schedule VI of the Companies Act, 2013, the provision of section 186 of the Companies Act, 2013 is not applicable.

(v) The Company has not accepted any deposits within the meaning of Sections 73 to 76 of the Act and the Companies (Acceptance of Deposits) Rules, 2014 (as amended). Accordingly, the provisions of clause 3(v) of the Order are not applicable.

(vi) We have broadly reviewed the books of account maintained by the Company pursuant to the rules made by the Central Government for the maintenance of cost records under section 148(1) of the Companies Act, 2013 and are of the opinion that prima facie, the specified accounts and records have been made and maintained. We have not, however, made a detailed examination of the same.

(vii) (a) Undisputed statutory dues including income-tax, goods and service tax, employees' state insurance, cess and other statutory dues have generally been regularly deposited with the appropriate authorities though there has been a slight delay in a few cases. The provisions relating to provident fund, sales-tax, service tax, duty of custom, duty of excise and value added tax are not applicable to the Company.

(b) According to the information and explanations given to us, no undisputed amounts payable in respect of income-tax, goods and service tax, employees' state insurance, cess and other statutory dues were outstanding, at the year end, for a period of more than six months from the date they became payable. The provisions relating to provident fund, sales-tax, service tax, duty of custom, duty of excise and value added tax are not applicable to the Company.

(c) According to the information and explanations given to us, there are no dues of income-tax, goods and service tax, employees' state insurance, cess and other statutory dues, which have not been deposited on account of any dispute. The provisions relating to provident fund, sales-tax, service tax, duty of custom, duty of excise and value added tax are not applicable to the Company.

(viii) In our opinion and according to the information and explanations given by the management, the Company has not defaulted in repayment of loans or borrowing to a financial institution, bank or government or dues to debenture holders.

(ix) In our opinion and according to the information and explanations given by the management, monies raised by the company by way of bonds and term loans were applied for the purpose for which they were raised. The Company has not raised any money by way of initial public offer/ further public offer/ debt instruments.

(x) Based upon the audit procedures performed for the purpose of reporting the true and fair view of the financial statements and according to the information and explanations given by the management, we report that no fraud by the company or no fraud on the company by the officers and employees of the Company has been noticed or reported during the year.

(xi) According to the information and explanations given by the management, the managerial remuneration has been paid / provided in accordance with the requisite approvals mandated by the provisions of section 197 read with Schedule V to the Companies Act, 2013.

(xii) In our opinion, the Company is not a nidhi company. Therefore, the provisions of clause 3(xii) of the order are not applicable to the Company and hence not commented upon.

(xiii) According to the information and explanations given by the management, transactions with the related parties are in compliance with section 177 and 188 of Companies Act, 2013 where applicable and the details have been disclosed in the notes to the financial statements, as required by the applicable accounting standards.

(xiv) According to the information and explanations given by the management, the Company has complied with provisions of section 42 of the Companies Act, 2013 in respect of the private placement of shares during the year. According to the information and explanations given by the management, we report that the amounts raised, have been used for the purposes for which the funds were raised. Further there has been no preferential allotment or private placement of fully or partly convertible debentures during the year.

(xv) According to the information and explanations given by the management, the Company has not entered into any non-cash transactions with directors or persons connected with him as referred to in section 192 of Companies Act, 2013.

(xvi) According to the information and explanations given to us, the provisions of section 45-IA of the Reserve Bank of India Act, 1934 are not applicable to the Company.

Annexure 2 to the Independent Auditor’s Report of even date on the financial statements of ReNew Power Private Limited

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of ReNew Power Private Limited (“the Company”) as of 31 March 2020 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s Management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor’s Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting with reference to these Ind AS financial statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) and the Standards on Auditing as specified under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting with reference to these Ind AS financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting with reference to these Ind AS financial statements and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting with reference to these Ind AS financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting with reference to these Ind AS financial statements.

Meaning of Internal Financial Controls over Financial Reporting with Reference to these Ind AS Financial Statements

A company's internal financial control over financial reporting with reference to these Ind AS financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting with reference to these Ind AS financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting with reference to these Ind AS financial statements

Because of the inherent limitations of internal financial controls over financial reporting with reference to these Ind AS financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting with reference to these Ind AS financial statements to future periods are subject to the risk that the internal financial control over financial reporting with reference to these Ind AS financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting with reference to these Ind AS financial statements and such internal financial controls over financial reporting with reference to these Ind AS financial statements were operating effectively as at 31 March 2020, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

1 General information

ReNew Power Private Limited ('the Company') is a private limited company domiciled in India. The Company was converted into a private limited company with effect from 08 November 2019 and consequently the name of the Company has changed from ReNew Power Limited to ReNew Power Private Limited.

The registered office of the Company is located at 138, Ansal Chamber - II Bhikaji Cama Place, New Delhi-110066. The Company is carrying out business activities relating to generation of power through non-conventional and renewable energy sources.

The Financial Statements of the Company were approved for issue by the Company's Board of Directors on 08 June 2020.

2 Basis of preparation

The Company prepared its Financial Statements as per Indian Accounting Standards (Ind AS) prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015, as amended.

The Financial Statements have been prepared using presentation and disclosure requirements of the Schedule III of Companies Act, 2013.

The Financial Statements have been prepared on a historical cost basis, except for the following assets and liabilities which have been measured at fair value:

- Derivative financial instruments
- Financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments)

3.1 Summary of Significant Accounting Policies

a) Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it is:

- Expected to be realised or intended to sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is treated as current when it is:

- Expected to be settled in normal operating cycle
- Held primarily for the purpose of trading
- Due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets/liabilities are classified as non-current assets/liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation/settlement in cash and cash equivalents. The company has identified twelve months as their operating cycle for classification of their current assets and liabilities.

b) Fair value measurement

The Company measures financial instruments, such as, derivatives at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy.

At each reporting date, the management of the Company analyses the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the accounting policies of the Company.

For assets and liabilities that are recognised in the Financial Statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

This note summarises the accounting policy for determination of fair value. Other fair value related disclosures are given in the relevant notes as following:

· Disclosures for significant estimates and assumptions (Refer Note 43)
· Quantitative disclosures of fair value measurement hierarchy (Refer Note 41)
· Financial instruments (including those carried at amortised cost) (Refer Note 40 and 41)

c) Revenue recognition

Revenue from contracts with customers

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has generally concluded that it is the principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer.

Sale of Power

Income from supply of power is recognised on the supply of units generated from plant to the grid over a period of time, as per terms of the Power Purchase Agreement ("PPA") entered into with the customers.

The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of power, the Company considers the effects of variable consideration and consideration payable to the customer (if any).

Transaction Price - Remaining Performance Obligation

The remaining performance obligation disclosure provides the aggregate amount of the transaction price yet to be recognised as at the end of the reporting period and an explanation as to when the Company expects to recognise these amounts in revenue. Applying the practical expedient as given in Ind AS 115, the Company has not disclosed the remaining performance obligation related disclosures for contracts as the revenue recognized corresponds directly with the value to the customer of the entity’s performance completed to date.

Income from services (management consultancy)

Revenue from projects management/technical consultancy are recognised as per the terms of agreement on the basis of services rendered. The Company recognises revenue from projects management/technical consultancy over time because the customer simultaneously receives and consumes the benefits provided to them, as per the terms of the agreement entered with the customer.

(i) Variable consideration

If the consideration in a contract includes a variable amount, the Company estimates the amount of consideration to which it will be entitled in exchange for transferring the goods or service to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

Rebates

In some PPAs, the Company provide rebates in invoice if payment is made before the due date. These are adjusted against revenue and are offset against amounts payable by the customers. To estimate the variable consideration for the expected future rebate, the Company applies the most likely method.

(ii) Consideration payable to customers

In some PPAs, Company has to pay consideration to customers. Consideration payable to customers are offset against the revenue recognised as and when sale of power occurs.

Income from compensation for loss of revenue

Income from compensation for loss of revenue is recognised after certainty of receipt of the same is established.

Dividend

Dividend income is recognised when the right of the Company to receive dividend is established by the reporting date.

Contract balances

(i) Contract assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

(ii) Contract Liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract.

Trade receivables

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in section (r) Financial instruments – initial recognition and subsequent measurement.

Income from government grants

Refer note (g) for accounting policy.

d) Foreign currencies

The Company Financial Statements are presented in Indian rupees (INR), which is also the functional currency and the currency of the primary economic environment in which the Company operate.

Transactions and balances

Transactions in foreign currencies are initially recorded by the company at their functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

Exchange differences arising on settlement or translation of monetary items are recognised in profit or loss with the exception of the following:
- Exchange differences arising on monetary items that are designated as part of the hedge of the Company's net investment of a foreign operation. These are recognised in OCI until the net investment is disposed of, at which time, the cumulative amount is reclassified to profit or loss.
- Tax charges and credits attributable to exchange differences on those monetary items are also recorded in OCI.

e) Taxes

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in India. Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate. Current income tax assets and liabilities are offset if a legally enforceable right exists to set off these.

Deferred Tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss

- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

In situations where company is entitled to a tax holiday under the Income-tax Act, 1961, enacted in India, no deferred tax (asset or liability) is recognized in respect of temporary differences which reverse during the tax holiday period. Deferred taxes in respect of temporary differences which reverse after the tax holiday period are recognized in the year in which the temporary differences originate. However, the company restrict the recognition of deferred tax assets to the extent that it has become reasonably certain that sufficient future taxable income will be available against which such deferred tax assets can be realized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in OCI or equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Minimum Alternate Tax

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Company.

f) Government grants

Government grants are recognized where there is reasonable assurance that the grant will be received and all attached conditions will be compiled with. When the grant related to an expense item, it is recognized as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant related to an asset, it is recognized as income in equal amounts over the expected useful life of the related asset.

When the company receive grants of non-monetary assets, the asset and the grant are recorded at fair value amounts and released to profit or loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset i.e. by equal annual instalments.

The company presents grants related to an expense item as other income in the Statement of Profit and Loss. Thus, Generation based incentive and Sale of emission reduction certificates have been recognised as other income.

Generation based Incentive :

Generation based incentive is recognized on the basis of supply of units generated by the Company to the state electricity board from the eligible project in accordance with the scheme of the "Generation Based Incentive (GBI) for Grid interactive Wind Power Projects"

g) Inventories

Inventories are valued at the lower of cost and net realisable value.
Costs incurred in bringing each product to its present location and condition are accounted for as follows:
Consumables and spares: cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on first in, first out basis.
Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

h) Property, plant and equipment

Capital work in progress is stated at cost, net of accumulated impairment loss, if any. Property, plant and equipment, except freehold land, is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred.

On transition date to Ind AS, the Company has elected to continue with the carrying value of all of its property, plant and equipment recognised as at 1 April 2015 measured as per previous GAAP and use that carrying value as the deemed cost of the property, plant and equipment.

Subsequent Costs

The cost of replacing a part of an item of property, plant and equipment is recognised in the carrying amount of the item of property, plant and equipment, if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably with the carrying amount of the replaced part getting derecognised. The cost for day-to-day servicing of property, plant and equipment are recognised in Statement of Profit and Loss as and when incurred.

Derecognition

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the Statement of Profit and Loss when the asset is derecognised.

Gains or losses arising from de-recognition of PPE are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

i) Intangible assets

Intangible assets acquired separately are measured in initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses.
The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with finite life are reviewed at least at the end of each reporting period.

Customer related intangibles are capitalized if they meet the definitions of an intangible asset and the recognition criteria are satisfied. Customer-related intangibles acquired as part of a business combination are valued at fair value and those acquired separately are measured at cost. Such intangibles are amortized over the remaining useful life of the customer relationships or the period of the contractual arrangements.

On transition date to Ind AS, the Company has elected to continue with the carrying value of all of its intangible assets recognised as at 1 April 2015 measured as per previous GAAP and use that carrying value as the deemed cost of the property, plant and equipment.

j) Depreciation/amortization of property, plant and equipment and intangibles

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets as follows:

Category	**Life (in years)**
Plant and equipment (solar rooftop projects)*	25 years or terms of power purchase agreement, whichever is less (15-25 years)
Plant and equipment (wind power projects)*	18-25
Plant and equipment (others)	5-18
Office equipment	5
Furniture and fixture	10
Computers	3
Computer servers	6
Computer softwares	3-6
Leasehold improvements	Over the period of lease

* Based on an external technical assessment, the management believes that the useful lives as given above and residual value of 0%-5%, best represents the period over which management expects to use its assets and its residual value. The useful life of plant and equipment is different from the useful life as prescribed under Part C of Schedule II of Companies Act, 2013.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

k) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale. Borrowing costs consist of interest, discount on issue, premium payable on redemption and other costs that an entity incurs in connection with the borrowing of funds (this cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs). The borrowing costs are amortised basis the Effective Interest Rate (EIR) method over the term of the loan. The EIR amortisation is recognised under finance costs in the Statement of Profit and Loss. The amount amortized for the period from disbursement of borrowed funds upto the date of capitalization of the qualifying assets is added to cost of the qualifying assets.

l) Leases

As per Ind AS 17 applicable till period ended 31 March 2019

As a lessee

Operating lease payments are recognised as an expense in the Statement of Profit and Loss on a straight-line basis over the lease term.

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

As a lessor

Leases in which the Company does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

As per Ind AS 116 applicable from 1 April 2019

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

As a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

The Company recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets (leasehold land and leasehold building) are depreciated on a straight-line basis over the lease term.

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

The right-of-use assets are also subject to impairment. Refer to the accounting policies in section (m) Impairment of non-financial assets.

ii) Lease liabilities

At the commencement date of the lease, the Company recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including insubstance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short-term leases and leases of low value assets are recognised as expense on a straight-line basis over the lease term.

As a lessor

Leases in which the Company does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

m) Impairment of non-financial assets

The company assess, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the company estimate the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating units (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre -tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the statement of profit and loss.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Profit and Loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as an increase in revaluation.

n) Share based payments

Company provides additional benefits to certain members of senior management and employees of the Company and a subsidiary in the form of share-based payments, whereby employees render services as consideration for equity instruments (equity-settled transactions).

Equity-settled transactions

The cost of equity-settled transactions is determined by the fair value at the date when the grant is made using an appropriate valuation model.

The cost is recognized, together with a corresponding increase in share-based payment reserve in equity, over the period in which the performance and/or service conditions are fulfilled in employee benefit expenses. The cumulative expense recognized for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Company's best estimate of the numbers of equity instruments that will ultimately vest. The statement of profit and loss expense or credit for a period represents the movement in cumulative expense recognized as at the beginning and end of that period and is recognized in employee benefit expense.

Service and non-market performance conditions are not taken into account when determining the grant date fair value of awards, but the likelihood of the conditions being met is assessed as part of the Company's best estimate of the number of equity instruments that will ultimately vest. Market performance conditions are reflected within the grant date fair value. Any other condition attached to an award, but without associated service requirement, are considered to be non-vesting conditions. Non-vesting conditions are reflected in the fair value of an award and lead to an immediate expensing of an award unless there are also service and/or performance conditions.

No expense is recognized for awards that do not ultimately vest because of non-market performance and/or service conditions have not been met. Where awards include a market or non-market condition, the transaction are treated as vested irrespective of whether the market or non-vesting condition is satisfied, provided that all other performance and/or service condition are satisfied.

Share based payment cost, to the extent pertaining to the employees of subsidiary, is reduced from employee benefit expenses of the Company and is considered as deemed investment in the form of capital contribution in the subsidiary.

o) Retirement and other employee benefits

Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The company recognize contribution payable to the provident fund scheme as an expense, when an employee renders the related service.

The Company operates a defined benefit plan in India, viz., gratuity. The cost of providing benefit under this plan is determined on the basis of actuarial valuation at each year-end carried out using the projected unit cost method.

Remeasurements comprising of actuarial gain and losses, the effect of the asset ceiling, excluding amount recognized in the net interest on the defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognized in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods.

Accumulated leave, which is expected to be utilized within the next twelve months, is treated as short term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company treats the accumulated leave expected to be carried forward beyond twelve months, as long term employee benefit for measurement purposes. Such long term compensated absences are determined on the basis of actuarial valuation at each year-end carried out using the projected unit cost method. Remeasurements comprising of actuarial gain and losses are recognized in the balance sheet with a corresponding debit or credit to profit or loss in the period in which they occur. The Company presents the leave as current liability in the balance sheet, to the extent is does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where Company has unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

Past service costs are recognised in Statement of Profit and Loss on the earlier of:
- The date of the plan amendment or curtailment, and
- The date that the Company recognises related restructuring costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Company recognises the following changes in the net defined benefit obligation as an expense in the Statement of Profit and Loss:
- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- Net interest expense or income

p) Provisions

Provisions are recognised when the company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the Statement of Profit and Loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

q) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

Debt instruments at amortised cost

A ‘debt instrument’ is measured at the amortised cost if both the following conditions are met:

a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and

b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss.

Debt instruments at fair value through other comprehensive income (FVTOCI)

A ‘debt instrument’ is classified as at the FVTOCI if both of the following criteria are met:

a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and

b) The asset’s contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the Statement of Profit and Loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to Statement of Profit and Loss. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

Debt instruments at fair value through profit or loss (FVTPL)

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as ‘accounting mismatch’). The company has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

Equity investments

All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS 103 applies are classified as at FVTPL. For all other equity instruments, the Company may make an irrevocable election to present the subsequent changes in the fair value in OCI. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to Statement of Profit and Loss, even on sale of investment. However, the company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised when:

- The rights to receive cash flows from the asset have expired, or
- The respective company has transferred their rights to receive cash flows from the asset or have assumed the obligation to pay the received cash flows in full without material delay to a third party under a ‘pass-through’ arrangement; And
- Either the companies under the company has transferred substantially all the risks and rewards of the asset, or has neither transferred nor retained substantially all the risks and rewards of the asset, but have transferred control of the asset.

When the Company have transferred their rights to receive cash flows from an asset or have entered into a pass-through arrangement, they evaluate if and to what extent they have retained the risks and rewards of ownership. When they have neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the company continues to recognise the transferred asset to the extent of the continuing involvement of company. In that case, the company also recognise an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the company could be required to repay.

Impairment of financial assets

In accordance with Ind AS 109, the company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on all the financial assets and credit risk exposure.
The Company follows 'simplified approach for recognition of impairment loss allowance on trade receivables or contract revenue receivables.

The application of simplified approach does not require the Company to track changes in credit risk. Rather it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/expense in the Statement of Profit and Loss.

Financial liabilities

Initial recognition and measurement
Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and in the case of loans and borrowings and payables, net of directly attributable transaction costs.
The financial liabilities of the company include trade and other payables, derivative financial instruments, loans and borrowings including bank overdraft.

Subsequent measurement
The measurement of financial liabilities depends on their classification as discussed below:-

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss. This category generally applies to borrowings.

The Company recognise debt modifications agreed with lenders to restructure their existing debt obligations. Such modifications are done to take advantage of falling interest rates by cancelling the exposure to high interest fixed rate debt, pay a fee or penalty on cancellation and replace it with debt at a lower interest rate (exchange of old debt with new debt). The qualitative factors considered to be relevant for modified financial liabilities include, but are not limited to, the currency that the debt instrument is denominated in, the interest rate (that is fixed versus floating rate), conversion features attached to the instrument and changes in covenants. The accounting treatment is determined depending on whether modifications or exchange of debt instruments represent a settlement of the original debt or merely a renegotiation of that debt. The exchange of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability.

Compound Instruments- Compulsorily Convertible Preference Shares (CCPS)

Compulsorily Convertible Preference Shares (CCPS) are separated into liability and equity components based on the terms of the contract.
On issuance of the convertible preference shares, the fair value of the liability component is determined using a market rate for an equivalent non-convertible instrument. This amount is classified as a financial liability measured at amortised cost (net of transaction costs) until it is extinguished on conversion or redemption.
The remainder of the proceeds is allocated to the conversion option that is recognised and included in equity since conversion option meets Ind AS 32 criteria for fixed to fixed classification. Transaction costs are deducted from equity, net of associated income tax. The carrying amount of the conversion option is not remeasured in subsequent years.
Transaction costs are apportioned between the liability and equity components of the convertible preference shares based on the allocation of proceeds to the liability and equity components when the instruments are initially recognised.

Transaction costs that relate to the issue of a compound financial instrument are allocated to the liability and equity components of the instrument in proportion to the allocation of proceeds. Transaction costs that relate jointly to more than one transaction (for example, cost of issue of debentures, listing fees) are allocated to those transactions using a basis of allocation that is rational and consistent with similar transactions.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged/ cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

Reclassification of financial assets and liabilities

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

r) Investment in subsidiaries and associates

The Company has elected to recognize its investments in subsidiaries and associate companies at cost in accordance with the option available in Ind AS 27, ‘Separate Financial Statements’, less accumulated impairment loss, if any. Cost represents amount paid for acquisition of the said investments.

The Company has elected to continue with the carrying value for all of its investments in subsidiaries and associate companies as recognised in the financial statements on transition to Ind AS, measured as per the previous GAAP and use that as its deemed cost as at the date of transition.

On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to profit or loss.

The details of such investment are given in Note 6. Refer to the accounting policies in section (m) Impairment of non-financial assets.

s) Derivative financial instruments and hedge accounting

Initial recognition and subsequent measurement

The Company uses derivative financial instruments, such as interest rate swaps and call options, to hedge its interest rate risks and foreign currency risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to profit or loss, except for the effective portion of cash flow hedges, which is recognised in OCI and later reclassified to profit or loss when the hedge item affects profit or loss or treated as basis adjustment if a hedged forecast transaction subsequently results in the recognition of a non-financial asset or non-financial liability.

For the purpose of hedge accounting, hedges are classified as:

- Fair value hedges when hedging the exposure to changes in the fair value of a recognised asset or liability or an unrecognised firm commitment

- Cash flow hedges when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment

- Hedges of a net investment in a foreign operation

At the inception of a hedge relationship, the Company formally designates and documents the hedge relationship to which the Company wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes the Company's risk management objective and strategy for undertaking hedge, the hedging/ economic relationship, the hedged item or transaction, the nature of the risk being hedged, hedge ratio and how the entity will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

Hedges that meet the strict criteria for hedge accounting are accounted for, as described below:

Interest income

For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in finance income in the Statement of Profit and Loss.

The details of such investment are given in Note 6. Refer to the accounting policies in section (m) Impairment of non-financial assets.

t) Cash and Cash-Equivalents

Cash and short-term deposits in the balance sheet comprise cash at banks and cash in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the Statement of cash flows, cash and cash equivalents consist of cash and short term deposits, as defined above, net off bank overdrafts as they considered an integral part of the Company's cash management.

u) Measurement of EBITDA

The company has elected to present earnings before interest, tax, depreciation and amortization (EBITDA) as a separate line item on the face of the Statement of Profit and Loss. The company measure EBITDA on the basis of profit/ (loss) from continuing operations. In their measurement, the companies include interest income but do not include depreciation and amortization expense, finance costs and tax expense.

v) Events occurring after the Balance Sheet date

Impact of events occurring after the balance sheet date that provide additional information materially effecting the determination of the amounts relating to conditions existing at the balance sheet date are adjusted to respective assets and liabilities.

The Company does not adjust the amounts recognised in its financial statements to reflect non-adjusting events after the reporting period.

The Company makes disclosures in the financial statement in cases of significant events.

w) Contingent liabilities

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

x) Earnings per equity share

Basic earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares outstanding during the period. Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented for any share splits and bonus shares issues including for changes effected prior to the approval of the financial statements by the Board of Directors.

The dilutive effect of outstanding options is reflected as additional share dilution in the computation of diluted earnings per share.

3.2 Changes in accounting policy and disclosures- New and amended standards

The Company applied Ind AS 116 for the first time. The nature and effect of the changes as a result of adoption of the new accounting standard are described below.
Several other amendments and interpretations apply for the first time in March 2020, but do not have an impact on the financial statements of the Company. The Company has not early adopted any standards or amendments that have been issued but are not yet effective.

a) Ind AS 116 Leases:

Ind AS 116 supersedes Ind AS 17 Leases. The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to recognise most leases on the balance sheet. Lessor accounting under Ind AS 116 is substantially unchanged from Ind AS 17. Lessors will continue to classify leases as either operating or finance leases using similar principles as in Ind AS 17. Therefore, Ind AS 116 does not have an impact for leases where the Group is the lessor.

The Company adopted Ind AS 116 using the modified retrospective method of adoption, with the date of initial application of 1 April 2019, the right-of-use assets were recognised based on the amount equal to the lease liabilities, adjusted for any related prepaid and accrued lease payments previously recognised. Lease liabilities were recognised based on the present value of the remaining lease payments, discounted using the incremental borrowing rate at the date of initial application. There is no impact on equity on transition to Ind AS 116 as on 1 April 2019.

The Company elected to use the transition practical expedient to not reassess whether a contract is or contains a lease at 1 April 2019. Instead, the Company applied the standard only to contracts that were previously identified as leases applying Ind AS 17 and Appendix C to Ind AS 17 at the date of initial application. Therefore, the comparative information was not restated and continues to be reported under Ind AS 17. The Company also applied the available practical expedients wherein it:

- Used a single discount rate to a portfolio of leases with reasonably similar characteristics
- Relied on its assessment of whether leases are onerous immediately before the date of initial application
- Applied the short-term leases exemptions to leases with lease term that ends within 12 months of the date of initial application
- Excluded the initial direct costs from the measurement of the right-of-use asset at the date of initial application
- Used hindsight in determining the lease term where the contract contained options to extend or terminate the lease

The effect of adopting Ind AS 116 as at 1 April 2019 was, as follows:

Particulars	**Note**	**(INR in Mn)** **Ind AS 116 impact as at 1 April 2019**
Assets - Increase/(decrease):		
Non-current assets		
Right of use assets	5A	511
Prepayments	9	(126)
Other non-current assets		
Deferred rent	10	(18)
Current assets

Liabilities - (Increase)/decrease:		
Non-current liabilities		
Financial liabilities		
Lease liabilities	18	(272)
Current liabilities		
Financial liabilities		
Trade payables	22	(34)
Lease liabilities	18	(113)

b) Other regulatory changes

Pursuant to the Taxation law (Amendment) Ordinance 2019 ('Ordinance') issued by Ministry of Law and Justice on 20 September 2019 with an effective 01 April 2019, domestic companies have the option to pay corporate income tax at 22% plus applicable surcharge and cess subject to certain conditions. Basis the assessment carried, Comapny have decided not to opt for the lower tax rate under the Ordinance owing to carried forward tax losses, unutilized MAT credit and various other tax benefits available to such entities. Accordingly, the Company has decided to continue with existing tax structure, and hence there is no impact of Ordinance on these Financial Statements.

Term loan in Indian rupees from banks (Secured)

Term loans specific to projects are secured by a first pari passu charge by way of mortgage on immovable properties, first pari passu charge by way of hypothecation of tangible moveable assets, first charge on all the current assets, intangible assets and accounts. Further secured by way of assignment of all the rights, title, interest, benefit, claims and demands under all the project agreements, letter of credit, insurance contracts and proceeds, guarantees, performance bond etc. of the respective projects.

Term loans not specific to projects is to be exclusively secured by hypothecation of loans and advances and book debts and it has to be further secured by pledge over 51% shares, compulsorily convertible debentures and other equity like instruments of one direct subsidiary.

Term loan in Indian rupees from financial institutions (Secured)

Secured by a first pari passu charge by way of mortgage on immovable properties, first pari passu charge by way of hypothecation of tangible moveable assets, first charge on all the current assets, intangible assets and accounts. Further secured by way of assignment of all the rights, title, interest, benefit, claims and demands under all the project agreements, letter of credit, insurance contracts and proceeds, guarantees, performance bond etc. of the company.

Listed senior secured notes

Secured by way of exclusive mortgage over immovable properties and exclusive charge by way of hypothecation of tangible and intangible movable assets. Further secured by way of hypothecation over rights and benefit, claims and demands under all the project agreements, letter of credit, insurance contracts and proceeds, guarantees, performance bond etc. of the company. Secondary Charge over the account receivables, book debts and cash flows.

Compulsorily convertible preference shares (CCPS) treated as financial liability as per Ind AS 109

On 27 June 2019, the Company has issued 49,184,611 number of Compulsory Convertible Preference Shares (Series A) amounting to INR 20,903 :

Name of Allottee	Number of shares alloted	Face value	Amount received	Balance as at 31 March 2020
GS Wyvern Holding Limited	16,395,294	425	6,968	7,734
Green Rock B 2014 Limited (acting in its capacity as trustee of Green Stone A 2014 Trust)	16,318,729	425	6,935	7,698
Canada Pension Plan Investment Board	16,470,588	425	7,000	7,769
Total	**49,184,611**		**20,903**	**23,200**

Each Series A CCPS are non-cumulative and shall be entitled to a preferred rate of dividend of 0.0001% over the Equity Shares of the Company. These CCPS carry a yield of 15.02%. These are mandatorily convertible upon the occurrence of the earliest of certain events as enumerated in terms specified in board resolution passed for issuance of CCPS but no later than 3 years from the date of allotment. Conversion shall occur at conversion price which will be computed in the manner as terms specified in board resolution passed for issuance of CCPS on the date of conversion. Series A CCPS do not meet the criteria of conversion into fixed number of equity shares given conversion price is not currently assertainable, accordingly these CCPS have been recorded as financial liability and carried at amortized cost.

32 Earnings per share (EPS)

The following reflects the profit and share data used for the basic and diluted EPS computations:

		For the year ended 31 March 2020	For the year ended 31 March 2019
Profit attributable to equity holders for basic earnings		(2,619)	54
Net profit/(loss) for calculation of basic EPS		(2,619)	54
Weighted average number of equity shares for calculating basic EPS		459,201,195	379,797,836
Basic earnings per share		(5.70)	0.14
Net profit/(loss) for calculation of diluted EPS		(2,619)	54
Weighted average number of equity shares for calculating diluted EPS		459,201,195	385,804,858
Diluted earnings per share*		(5.70)	0.14
		No. of shares	**No. of shares**
Weighted average number of equity shares in calculating basic EPS	(a)	379,924,556	379,797,836
Effect of dilution in calculating basic EPS and diluted EPS			
Compulsorily convertible preference shares	(b)	79,276,639	-
Weighted average number of equity shares in calculating basic EPS	**(c) = (a) + (b)**	**459,201,195**	**379,797,836**
Effect of dilution in calculating diluted EPS			
Convertible equity for employee stock option plan	(d)	4,866,286	6,007,022
Weighted average number of equity shares in calculating diluted EPS	**(e) = (c) + (d)**	**464,067,481**	**385,804,858**

* Since the effect of conversion of employee stock option plan was anti-dilutive in the current year, it has not been considered for the purpose of computing Diluted EPS.

33 Gratuity and other post-employment benefit plans

Retirement benefit in the form of provident fund is a defined contribution scheme. The contributions to the provident fund are charged to the statement of profit and loss for the year when the contributions are due. The Company has no obligation, other than the contribution payable to the provident fund.

The Company has a defined benefit gratuity plan. Gratuity is computed as 15 days salary, for every completed year of service or part thereof in excess of 6 months and is payable on retirement/termination/resignation. The benefit vests on the employees after completion of 5 years of service. The Gratuity liability has not been externally funded. Company makes provision of such gratuity liability in the books of accounts on the basis of actuarial valuation as per the projected unit credit method.

The following tables summarize the components of net benefit expense recognized in the statement of profit and loss and the unfunded status and amounts recognized in the balance sheet for the Gratuity.

Statement of profit and loss

Net employees benefit expense recognised in employee cost	**For the year ended 31 March 2020**	**For the year ended 31 March 2019**
Current service cost	19	14
Interest cost on benefit obligation	5	3
Net expense recognised in profit & loss	**24**	**17**
Net expense/(income) recognised in other comprehensive income	11	(2)

Balance Sheet

Benefit liability	**As at 31 March 2020**	**As at 31 March 2019**
Present value of unfunded obligation	85	60
Net liability	85	60

	As at 31 March 2020	**As at 31 March 2019**
Changes in the present value of the defined benefit obligation		
Opening defined benefit obligation	60	9
Current service cost	19	14
Interest cost	5	3
Benefits paid	(10)	(0)
Remeasurements during the year due to:		
- Experience adjustments	2	(2)
- Change in financial assumptions	9	-
- Change in demographic assumptions	-	(0)
Liabilities settled/assumed *	-	36
Closing defined benefit obligation	85	60

Since the entire amount of plan obligation is unfunded therefore changes in fair value of plan assets, categories of plan assets as a percentage of the fair value of total plan assets and Company's expected contribution to the plan assets for the next period is not given.

* Liability transferred on account of transfer of certain employees from ReNew Power Services Private Limited.

The principal assumptions used in determining gratuity obligations	**As at 31 March 2020**	**As at 31 March 2019**
Discount rate	6.85%	7.75%
Salary escalation	10.00%	10.00%

The estimates of future salary increases considered in actuarial valuation take account of inflation, total amount of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

The Company regularly assesses these assumptions with the projected long-term plans and prevalent industry standards. The impact of sensitivity due to changes in the significant actuarial assumptions on the defined benefit obligations is given in the table below:

Particulars	**Change in assumptions**	**As at 31 March 2020**	**As at 31 March 2019**
Discount rate	+ 0.5%	91	57
	- 0.5%	80	67
Salary escalation	+ 0.5%	90	63
	- 0.5%	80	58

The sensitivity analysis above has been determined based on a method that extrapolates the impact on defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting year.

Projected plan cash flow:

The table below shows the expected cash flow profile of the benefits to be paid to the current membership of the plan based on past service of the employees as at the valuation date

Maturity Profile	**As at 31 March 2020**	**As at 31 March 2019**
Within next 12 months	3	2
From 2 to 5 years	22	16
From 6 to 9 years	25	20
10 years and beyond	183	152

The weighted average duration to the payment of these cash flows is 12.26 years (31 March 2019: 11.89 years).

Risk analysis
The Company is exposed to a number of risks in the defined benefit plans. Most significant risks pertaining to defined benefits plans and management estimation of the impact of these risks are as follows:

· Inflation risk: Currently the Company has not funded the defined benefit plans. Therefore, the Company will have to bear the entire increase in liability on account of inflation.

· Longevity risk/life expectancy: The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and at the end of the employment. An increase in the life expectancy of the plan participants will increase the plan liability.

· Salary growth risk: The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. An increase in the salary of the plan participants will increase the plan liability.

Defined contribution plan:	**For the year ended 31 March 2020**	**For the year ended 31 March 2019**
Contribution to provident fund & other fund charged to statement of profit & loss*	74	56

*This amount is inclusive of amount capitalized in different projects.

34 Leases

As per Ind AS 17 applicable till period ended 31 March 2019
The Company has entered into commercial property lease for its offices. The lease have non-cancellable commitment period which has remaining term of 5 years. The Company has the option, under some of its leases, to lease the assets for additional terms of upto three years.

Future minimum rentals payables under non- cancellable operating lease (excluding lease equalisation reserve) are as follows:

Particulars	**For the year ended 31 March 2019**
Within one year	110
After one year but not more than five years	330

As per Ind AS 116 applicable from 1 April 2019
The Company has entered into leases for its offices and leasehold lands. Lease of offices and lands generally have lease terms of 5 to 17 years.
The Company also has certain leases of regional offices and office equipment with lease terms of 12 months or less and lease of office equipments with low value. The Company applies the ‘short-term lease’ and ‘lease of low-value assets’ recognition exemptions for these leases.

The weighted average incremental borrowing rate applied to lease liabilities recognised in the balance sheet at the date of initial application is 10.40%.

Set out below are the carrying amounts of lease liabilities and the movements during the period:

Particulars	**For the year ended 31 March 2020**
As at 1 April 2019 on account of adoption of Ind AS 116	385
Additions	10
Accretion of interest	37
Payments	(117)
Balance as on 31 March 2020	**315**

Refer note 3.2(a) for approach followed by the Company for transition to Ind AS 116.

The lease liabilities as at 1 April 2019 can be reconciled to the operating lease commitments as of 31 March 2019, as follows:

Operating lease commitments as at 31 March 2019	440
Weighted average incremental borrowing rate as at 1 April 2019	10.40%
Discounted operating lease commitments as at 1 April 2019	366
Add: Lease liabilities of lease hold land and regional office not considered in operating lease commitment	19
Lease liabilities as at 1 April 2019	**385**

a) There are no restrictions or covenants imposed by leases.
b) Refer note 29 for rental expense recorded for short-term leases and low value leases for the year ended 31 March 2020.
c) There are no amounts payable toward variable lease expense recognised for the year ended 31 March 2020.
d) The maturity analysis of lease liabilities are disclosed in note 42.
e) There are no leases which have not yet commenced to which the lessee is committed (if any).

36 Share Based Payment

The Company has five share-based payment schemes for its employees:
2018 Stock Option Plan, 2017 Stock Option Plan, 2016 Stock Option Plan, 2014 Stock Option Plan and 2011 Stock Option Plan ('Group Stock Option Plans') approved by the board. According to the ESOP schemes, the employee selected by the compensation committee from time to time will be entitled to options as per grant letter issued by the committee, subject to satisfaction of prescribed vesting conditions.

The relevant terms of the ESOP schemes are as below:

Plans	**2018 Stock Option Plan Modified**	**2018 Stock Option Plan**	**2017 Stock Option Plan**	**2016 Stock Option Plan**	**2014 Stock Option Plan**	**2011 Stock Option Plan**
Grant Date	16-Aug-19	Multiple	Multiple	Multiple	Multiple	Multiple
Vesting period	Grants will vest in 5 years on quarterly basis which shall commence one year after the date of grant of options	**Time Linked Vesting**: 50 % of grants will vest in 5 years as follows: i) One year from the date of grant, the Options for the first four quarters shall vest immediately. ii) Thereafter, vesting will continue on a quarterly basis for the unvested Options. Remaining 50% will vest at the end of 5 years from the date of grant. **2018 Stock Option Plan (modified):** Grants will vest in 5 years on quarterly basis which shall commence one year after the date of grant of options.	**Time Linked Vesting:** 50 % of grants will vest in 5 years as follows: i) One year from the date of grant, the Options for the first four quarters shall vest immediately. ii) Thereafter, vesting will continue on a quarterly basis for the unvested Options. Remaining 50% will vest at the end of 5 years from the date of grant.	**Time Linked Vesting:** 5 years on quarterly basis effective from 1 December 2015 on completion of one year from the date of grant, the Options for the first seven quarters shall vest immediately. Thereafter, vesting will continue on quarterly basis for the unvested Options commencing from 1 December 2017. **Performance linked vesting:** The Options shall vest annually and shall be prorated over a period of 3 years from the date of grant and shall be subject to the EBITDA achieved by the Company for the last completed financial year. The vesting of the Options shall take place at the end of the first anniversary of the date of grant ("Vesting Date") and thereafter on 31 March 2018 and 31 March 2019 or at a later date when the audited financial statements of the Company are available.	**Time Linked Vesting:** 5 years on quarterly basis which shall commence one year after the date of grant of option	**Time Linked Vesting:** 5 years from the grant date
Exercise period	Within 10 years from date of grant upon vesting	Within 10 years from date of grant upon vesting	Within 10 years from date of grant upon vesting	Within 10 years from date of grant upon vesting	Within 10 years from date of grant upon vesting	Within 10 years from date of grant upon vesting
Exercise price / Fair value on the date of grant	INR 400	INR 415	INR 340	INR 205	INR 100 or 131	INR 100
Settlement type	Equity Settled	Equity Settled	Equity Settled	Equity Settled	Equity Settled	Equity Settled

The details of options outstanding under the ESOP schemes are summarized below:

Particulars	**No of options (in million)**	
	2019-20	**2018-19**
Outstanding at the beginning of the year	19	21
Granted during the year	1	1
Forfeited during the year	2	0
Repurchase during the year	-	-
Exercised during the year	-	3
Outstanding at the end of the year	18	19
Exercisable at the end of the year	9	9

- The weighted average exercise price of these options outstanding was INR 280 for the year ended 31 March 2020 (31 March 2019: INR 258).
- The weighted average exercise price of these options granted during the year was INR 400 for the year ended 31 March 2020 (31 March 2019: INR 415)
- There are no options exercised during the current year. The weighted average exercise price of options exercised during 31 March 2019 was INR 100.
- The weighted average exercise price of these options forfeited during the year was INR 172 for the year ended 31 March 2020 (31 March 2019: INR 226).
- The weighted average exercise price of excercisable options was INR 206 for the year ended 31 March 2020 (31 March 2019: INR 178).

Particulars	**2019-20***	**2018-19***
Dividend yield (%)	2.9%	1.5%
Expected volatility (%)	23%	15%
Risk–free interest rate (%)	6.53%	7.70% - 8.12%
Weighted average remaining contractual life	6.30 years	6.86 years
Weighted average remaining contractual life of options granted	9.37 years	9.47 years

The fair value of share options granted is estimated at the date of grant using an appropriate valuation model, taking into account the terms and conditions upon which the share options were granted.

37 Segment Information

The Chairman and Managing Director of ReNew Power Limited takes decision in respect of allocation of resources and assesses the performance basis the report/ information provided by functional heads and are thus considered to be Chief Operating Decision Maker.
The Company is in the business of development and operation of wind and solar power plant. Considering the nature of Company's business and operation, there are no separate reportable segments (business and/ or geographical) in accordance with the requirements of Ind AS 108 'Operating segment' and hence, there are no additional disclosures to be provided other than those already provided in the financial statements.

The Revenues from four major customers amounts to INR 3,848 (three major customers in year ended 31 March 2019: INR 2,917) each of which contributes more than 10% of the total revenue of the Company.

38 Corporate social responsibility expenditure

As per Section 135 of the Companies Act, 2013, a company, meeting the applicability threshold, needs to spend at least 2% of its average net profit for the immediately preceding three financial years on corporate social responsibility (CSR) activities. The areas for CSR activities are as follows :-

1) Sanitation & making available safe drinking water- Construction of toilets, Bore-well, well, Tube-well etc.
2) Empowering women through SHGs (self-help group) and creating income generation activities for the women like stitching and tailoring, goatery, backyard poultry etc.)
3) Ensuring environmental sustainability- animal welfare Plantation, environment awareness,
4) Animal Welfare-Animal health camp, Para –vet training
5) Education awareness, Remedial classes for weak students etc.
6) Health and Hygiene- Health camps in the community, cleanliness drive to create awareness.
7) Sports Training- Sports training camps in community
8) Education facility improvement- Construction of Solar power plant in schools

A CSR committee has been formed by the Company as per the Act. The funds were utilised on above mentioned activities which are specified in Schedule VII of the Companies Act, 2013.

(a) Gross amount required to be spent by the Company during the year is INR 8 (31 March 2019: INR 11).
(b) Amount spent during the year on:

List of CSR activities	In Cash	Yet to be paid	Total
Current year			
Construction / Acquisition of any asset	-	-	-
Other activities	10	1	11
Total	**10**	**1**	**11**
Previous year*			
Construction / Acquisition of any asset	3	3	6
Other activities	5	0	5
Total	**8**	**3**	**11**

* The amount yet to be paid in previous year has been subsequently paid in current year.

39 Hedging activities and derivatives

Derivatives designated as hedging instruments

The Company uses certain types of derivative financial instruments (viz. Forwards Contracts, Swaps, Call Options, Call Spreads) to manage/mitigate their exposure to foreign exchange and interest risk. Further, the entity designates such derivative financial instruments (or its components) as hedging instruments for hedging the exchange rate fluctuation and interest risk attributable to either a recognised item or a highly probable forecast transaction (‘Cash flow hedge’). The effective portion of changes in the fair value of Derivative financial instruments (or its components) that are designated and qualify as Cash flow hedges, are recognised in the Other comprehensive income and held in Cash flow hedge reserve - a component of Equity. Any gains / (losses) relating to the ineffective portion, are recognised immediately in the statement of profit and loss within other income / other expenses. The amounts accumulated in Equity for highly probable forecast transaction are added to carrying value of non financial asset or non financial liability as basis adjustment, other amounts accumulated in Equity are re-classified to the statement of profit and loss in the periods when the hedged item affects profit / (loss).

At any point of time, when a forecast transaction is no longer expected to occur, the cumulative gains / (losses) that were reported in equity is immediately transferred to the statement of profit and loss within other income / other expenses.

Cash flow hedges

Hedge has been taken against exposure to foreign currency risk and variable interest outflow on External Commercial Borrowings. Terms of the swaps and their respective impact on OCI and statement of profit and loss is as below:-

-Notes (included in Long-term borrowings)
Pay fixed INR and receive USD and pay fixed interest in INR at 6.34% to 7.18% p.a. and receive a fixed interest in USD at 5.88% to 6.45% on the notional amount.

The cash flow hedges through COS of USD 750,000,000, Call Option of USD 750,000,000 and forwards of USD 2,902,500 outstanding at the year ended 31 March 2020 were assessed to be highly effective and cumulative impact of mark to market gain and restatement of hedged item is INR 168 (31 March 2019: Nil) with a deferred tax Liability of INR 1015 (31 March 2019: Nil), is included in OCI.

Mark to market loss on ineffective portion of hedge of swaps for the year ended March 31 2020 Nil (March 31 2019: INR Nil) has been charged to the Statement of Profit and Loss.

Foreign currency and Interest rate risk

Cross currency interest rate swaps measured at fair value through OCI are designated as hedging instruments in cash flow hedges of interest and principal payments in USD.

	31 March 2020		**31 March 2019**	
	Assets	**Liabilities**	**Assets**	**Liabilities**
Cross currency interest rate swaps designated as hedging instruments	3,254	-	-	-

Hedging reserve movement	**As at 31 March 2020**	**As at 31 March 2019**
Balance at the beginning of the year	-	-
Gain/(loss) recognised on cash flow hedges	168	-
Income tax relating to gain/loss recognized on cash flow hedges	(1,015)	-
Balance at the end of the year	**(847)**	**-**

40 Fair values

Set out below, is a comparison by class of the carrying amounts and fair value of the financial instruments of the Company:

	31 March 2020		31 March 2019	
	Carrying value	Fair value	Carrying value	Fair value
Financial assets				
Measured at amortised cost				
Investments, unquoted debt securities	14,592	14,592	4,909	4,909
Loans- non current	20,655	20,655	3,076	3,076
Share application money pending allotment	-	-	1,263	1,263
Interest accrued on loans to subsidiaries	-	-	356	356
Trade receivables	4,615	4,615	3,638	3,638
Cash and cash equivalent	2,916	2,916	280	280
Bank balances other than cash and cash equivalent	13,920	13,920	4,283	4,283
Bank deposits with remaining maturity for more than twelve months	79	79	60	60
Loans- current	73,960	73,960	61,187	61,187
Other current financial assets	9,840	9,840	4,597	4,597
Measured at FVOCI				
Derivative instruments	3,254	3,254	-	-
Financial liabilities				
Measured at amortised cost				
Non Convertible Debentures (secured) (NCDs)	6,414	6,414	24,194	24,194
Acceptances (unsecured)	-	-	4,904	4,904
Term loan from bank (secured)	1,308	1,308	14,252	14,252
Term loan from financial institutions (secured)	2,884	2,884	-	-
Listed senior secured notes	56,037	56,037	-	-
Liability component of compulsorily convertible preference shares	23,200	23,200	-	-
Short-term borrowings	55,027	55,027	31,909	31,909
Trade payables	1,105	1,105	984	984
Other current financial liabilities	15,184	15,184	5,750	5,750

The management of the Company assessed that cash and cash equivalent, bank balance other than cash and cash equivalent, loans-current, other current financial assets, trade receivables, trade payables, short term borrowings and other current financials liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments.

The financial assets above do not include investments in subsidiaries which are measured at cost in accordance with Ind AS 101, Ind AS 27 and Ind AS 28.

The following methods and assumptions were used to estimate the fair values:

i The fair values of the Company's non convertible debentures, acceptances, term loans from banks, term loans from financial institutions and listed senior secured notes including current maturities are determined by using Discounted Cash Flow (DCF) method using discount rate that reflects the issuer's borrowing rate as at the end of the reporting period. The own non-performance risk as at 31 March 2020 was assessed to be insignificant.

ii The fair values of the liability component of compulsory convertible preference shares including current maturities are determined by using Discounted Cash Flow (DCF) method using discount rate that reflects the borrowing rate as at the end of the reporting period. They are classified as level 3 fair values in the fair value hierarchy due to the inclusion of unobservable inputs including own credit risk. The own non-performance risk as at 31 March 2020 was assessed to be insignificant.

iii The fair values of the Company's investments and security deposits are determined by using Discounted Cash Flow (DCF) method using discount rate that reflects the lending rate as at the end of the reporting period. They are classified as level 3 fair values in the fair value hierarchy due to the inclusion of unobservable inputs including counterparty credit risk.

iv The Company enters into derivative financial instruments with various counterparties, principally financial institutions with investment grade credit ratings. Cross currency interest rate swaps are valued using valuation techniques, which employs the use of market observable inputs. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates, yield curves of the currency, interest rate curves and forward rate curves of the underlying instrument. The changes in counterparty credit risk had no material effect on the hedge effectiveness assessment for derivatives designated in hedge relationships.

41 Fair value hierarchy

The Company categorizes assets and liabilities measured at fair value into one of three levels depending on the ability to observe inputs employed in their measurement which are described as follows:
i) Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
ii) Level 2 - Inputs are inputs that are observable, either directly or indirectly, other than quoted prices included within level 1 for the asset or liability.
iii) Level 3 - Inputs are unobservable inputs for the asset or liability reflecting significant modifications to observable related market data or Company's assumptions about pricing by market participants.

The following table provides the fair value measurement hierarchy of the assets and liabilities of the Company :-

Quantitative disclosures fair value measurement hierarchy for assets/liabilities as at year end:

	Level of fair value measurement	31 March 2020		31 March 2019	
		Carrying value	Fair value	Carrying value	Fair value
Measured at fair value through other comprehensive income					
Derivative instruments	Level 2	3,254	3,254	-	-
Total		-	-	-	-
Financial assets measured at amortised cost					
Financial Assets (Non current): Loans					
Investments, unquoted debt securities	Level 3	14,592	14,592	4,909	4,909
Security deposits	Level 3	69	69	61	61
Loan to subsidiaries	Level 3	6,004	6,004	1,769	1,769
Loan to subsidiaries - redeemable non cumulative preference shares	Level 3	14,582	14,582	1,246	1,246
Total		**35,247**	**35,247**	**7,985**	**7,985**
Financial Assets (Non current): Others					
Bank deposits with remaining maturity for more than twelve months	Level 3	79	79	60	60
Total		**79**	**79**	**60**	**60**

	Level of fair value measurement	31 March 2020		31 March 2019	
		Carrying value	Fair value	Carrying value	Fair value
Financial liabilities measured at amortised cost					
Long-term borrowings					
Non Convertible Debentures (secured) (NCDs)	Level 3	6,414	6,414	24,194	24,194
Acceptances (unsecured)	Level 3	-	-	4,904	4,904

Listed senior secured notes	Level 3	Discounted cash flow	Prevailing interest rates in the market, Future cash flows
Liability component of compulsorily convertible preference shares	Level 3	Discounted cash flow	Prevailing interest rates in the market, Future cash flows
Financial assets measured at fair value through other comprehensive income			
Derivative instruments	Level 2	Maket value techniques	Forward foreign currency exchange rates, interest rates to discount future cash flows

--This space has been left blank intentionally.--

42 Financial Risk Management objectives and policies

The Company's principal financial liabilities comprise loans and borrowings, trade and other payables.
The main purpose of these financial liabilities is to finance the Company's operations and to support its operations. The Company's financial assets include loans, trade and other receivables, and cash & cash equivalents that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Company's senior management is supported by a various sub committees that advises on financial risks and the appropriate financial risk governance framework for the Company. These committees provides assurance to the Company's senior management that the Company's financial risk activities are governed by appropriate policies and procedure and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each risk, which are summarised as below.

(a) Market Risk

Market risk is the risk that the Company's assets and liabilities will be exposed to due to a change in market prices that determine the valuation of these financial instruments. Market risk comprises 3 types of risk: interest rate risk, currency risk and other price risk such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings and deposits..

The sensitivity analyses in the following sections relate to the position as at 31 March 2020. The sensitivity analysis have been prepared on the basis that the amount of net debt and the ratio of fixed to floating interest rates of the debt are all constant as at 31 March 2020.

(b) Interest rate Risk:

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to interest rate risk primarily from the external borrowings that are used to finance their operations. The Company also monitors the changes in interest rates and actively re finances its debt obligations to achieve an optimal interest rate exposure.

Interest Rate Sensitivity

The following table demonstrates the sensitivity to a reasonable possible change in interest rates on financial liabilities, i.e. floating interest rate of borrowings in INR. With all other variables held constant, the Company's profit before tax is affected through the impact on loans and borrowings, as follows:

	31 March 2020		31 March 2019	
	Increase/decrease in basis points	**Effect on profit before tax**	**Increase/decrease in basis points**	**Effect on profit before tax**
INR	+/(-)50	(-)/+ 86	+/(-)50	(-)/+ 72
	Increase/decrease in basis points	**Effect on equity**	**Increase/decrease in basis points**	**Effect on equity**
INR	+/(-)50	(-)/+ 59	+/(-)50	(-)/+ 49

(c) Foreign Currency Risk:

Foreign Currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company is exposed to foreign currency risk arising from imports of goods in US dollars. The Company hedges its exposure to fluctuations on the translation into INR of its buyer's/supplier's credit and foreign currency loans by using foreign currency swaps and forward contracts. The Company has followed a conservative approach for hedging the foreign currency risk so as to not use complex forex derivatives. The Company also monitors that the hedges do not exceed the underlying foreign currency exposure. The Company does not undertake any speculative transaction.

(d) Credit Risk

Credit risk is the risk that the power procurer will not meet their obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from their operating activities (primarily trade receivables) but this credit risk exposure is insignificant given the fact that substantially whole of the revenues are from state utilities/government entities.

Further the Company sought to reduce counterparty credit risk under long-term contracts in part by entering into power sales contracts with utilities or other customers of strong credit quality and we monitor their credit quality on an on going basis.
The maximum credit exposure to credit risk for the components of the balance sheet at 31 March 2020 and 31 March 2019 is the carrying amount of all the financial assets.

Trade Receivables

Customer credit risk is managed basis established policies of Company, procedures and controls relating to customer credit risk management. Outstanding customer receivables are regularly monitored. The Company does not hold collateral as security.

The Company has state utilities/government entities as it's customers with high credit worthiness, therefore, the Company does not see any risk related to credit. The credit quality of the customers other than state utilities/government entities is evaluated based on their credit ratings and other publicly available data.

Financial instruments and credit risk

Credit risk from balances with banks is managed by company's treasury department. Investments, in the form of fixed deposits, loans and other investments, of surplus funds are made only with banks & group companies and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed on an annual basis by the Company, and may be updated throughout the year subject to approval of company's finance committee. The limits are set to minimize the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

(e) Liquidity Risk

Liquidity risk is the risk that the Company will encounter in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The approach of the Company to manage liquidity is to ensure , as far as possible, that these will have sufficient liquidity to meet their respective liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risk damage to their reputation.
The Company assessed the concentration of risk with respect to refinancing its debt and concluded it to be low. The Company has access to a sufficient variety of sources of funding and debt maturing within 12 months can be rolled over with existing lenders.

The Company rely mainly on long-term debt obligations to fund their construction activities. To the extent available at acceptable terms, utilized non-recourse debt to fund a significant portion of the capital expenditures and investments required to construct and acquire our wind and solar power plants and related assets. The Company's non-recourse financing is designed to limit default risk and is a combination of fixed and variable interest rate instruments. In addition, the debt is typically denominated in the currency that matches the currency of the revenue expected to be generated from the benefiting project, thereby reducing currency risk. The majority of non-recourse debt is funded by banks and financial institutions, with debt capacity supplemented by unsecured loan from related party.

The table below summarizes the maturity profile of financial liabilities of Company based on contractual undiscounted payments:

Year ended 31 March 2020	On demand	Less than 3 months	3 to 12 months	1 to 5 years	> 5 years	Total
Borrowings (other than preference shares) #						
Term loan from banks*	-	-	-	1,382	-	1,382
Loans from financial institutions*	-	-	-	3,124	-	3,124
Non convertible debentures*	-	-	-	5,086	3,311	8,397
Listed senior secured notes*	-	-	-	45,324	23,088	68,412
Short term borrowings						
Loans from related party	52,868	-	-	-	-	52,868
Acceptances	-	-	159	-	-	159
Working capital demand loans	-	2,000	-	-	-	2,000
Lease liabilities	-	35	92	231	7	365
Other financial liabilities						
Current maturities of long term borrowings*	-	434	13,515	-	-	13,949
Interest accrued but not due on borrowings	2,823	49	433	-	-	3,305
Interest accrued but not due on debentures	-	62	129	-	-	191
Purchase consideration payable	304	-	-	-	-	304
Mark to market derivative instruments	-	3,254	-	-	-	3,254
Capital Creditors	1	1,344	-	-	-	1,345
Trade payables						
Trade payables	100	1,005	-	-	-	1,105

* Including future interest payments.

The Company expect liabilities with current maturities to be repaid from net cash provided by operating activities of the entity to which the debt relates or through opportunistic refinancing activity or some combination thereof.

# The Company has issued Compulsorily convertible preference shares, which are mandatorily convertible into equity shares. Therefore there is no outflow involved. Therefore these CCPS are excluded from maturity profile of financial liabilities.

Year ended 31 March 2019	On demand	Less than 3 months	3 to 12 months	1 to 5 years	> 5 years	Total
Borrowings						
Term loan from banks*	-	-	-	15,791	-	15,791
Non convertible debentures*	-	-	-	25,055	3,615	28,670
Acceptances	-	-	-	5,065	-	5,065
Short term borrowings						
Loans from related party	27,440	-	-	-	-	27,440
Working capital demand loans	-	1,969	2,500	-	-	4,469
Other financial liabilities						
Current maturities of long term borrowings*	-	734	5,135	-	-	5,869
Interest accrued but not due on borrowings	1,020	33	-	-	-	1,053
Interest accrued but not due on debentures	-	197	116	-	-	313
Capital Creditors	-	784	-	-	-	784
Purchase consideration payable	304	-	-	-	-	304
Trade payables						
Trade payables	336	648	-	-	-	984

* Including future interest payments.

The Company has estimated its ability to service the debt repayment obligations and maintain adequate liquidity for its operations by considering the estimates around expected future cash flows, realization of existing and future receivables, forecasted results and its operational performance. Further, Company is actively engaged in discussions with various lenders for securing funds for its projects in pipeline and refinancing of its existing debt obligations on maturity. Company basis its assessment is confident of generating adequate inflows for meeting its liabilities maturing over next 12 months.

43 Significant accounting judgments, estimates and assumptions

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the accompanying disclosures. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

In the process of applying the accounting policies management has made certain judgements, estimates and assumptions. The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based their assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

A) Accounting judgements:

Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgment is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

The Company makes various assumptions and estimates while computing deferred taxes which include production related data (PLFs), projected operations and maintenance costs, projected finance costs, proposed availment of deduction under section 80IA of the Income Tax Act, 1961 and the period over which such deduction shall be availed, accelerated depreciation, other applicable allowances, usage of brought forward losses etc. While these assumptions are based on best available facts in the knowledge of management as on the balance sheet date however, they are subject to change year on year depending on the actual tax laws and other variables in the respective year. Given that the actual assumptions which would be used to file the return of income shall depend upon the tax laws prevailing in respective year, management shall continue to reassess these assumptions while calculating the deferred taxes on each balance sheet date and the impact due to such change, if any, is considered in the respective year.

Depreciation on property, plant and equipment

Depreciation on property, plant and equipment is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management. Considering the applicability of Schedule II of Companies Act, 2013, the management has re-estimated useful lives and residual values of all its property, plant and equipment. The management believes that depreciation rates currently used fairly reflect its estimate of the useful lives and residual values of property, plant and equipment, though these rates in certain cases are different from lives prescribed under Schedule II of the Companies Act, 2013.

Basis legal opinion obtained, management is of the view that application of CERC and/or SERC rates for the purpose of accounting for depreciation expenses is not mandatory. Hence, Company is depreciating the assets bases on life as determined by an expert.

B) Estimates and assumptions:

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values.

Assumptions include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 40 and 41 for further disclosures.

Related party transactions

ReNew Power Private Limited along with all its subsidiaries hereinafter collectively referred to as 'the Group' have entered into inter-company transactions as explained below :

Management Shared Services

Employee benefit costs and other common expenses are incurred by the Company. These expenses are allocated to all the entities of the Group in the form of 'Management Shared Services'. Allocation of cost to the entities involves various estimates including retention, allocation of cost for projects under construction vis-a-vis operating projects, profit mark-up which are assessed through an external expert.

Financial instrument

The Group makes inter-group investments in the form of RNCPS and CCDs. These investment carries interest at a nominal rate and are accounted for as compound financial instruments under Ind AS 32. The rate used for discounting the future cash flows approximate the average market interest rate of borrowings availed by Group.

Inter-group unsecured loan

The Group uses unsecured loans to fund requirements of various entities. These loans carry interest rate higher than a return expected from 10-year government bond yield.

44 Capital management

For the purpose of the capital management, capital includes issued equity capital, compulsorily convertible debentures, compulsorily convertible preference shares, share premium and all other equity reserves attributable to the equity holders of the Company. The primary objective of the Company's management is to maximise the shareholder value.

The Company manage their capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants.

To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Company monitor capital using a gearing ratio, which is net debt divided by total capital plus net debt. The Company includes within net debt, interest bearing loans and borrowings and other payables, less cash and short-term deposits.

The Company systematically evaluates opportunities for managing its assets including that of buying new assets, partially or entirely sell existing assets & potential new joint ventures. Crystallization of any such opportunity shall help the Company in improving the overall portfolio of assets, cash flow management and shareholder returns.

The policy of the Company is to keep the gearing ratio of the power project to 3:1 during the construction phase and aim to enhance it to 4:1 post the construction phase. This is in line with the industry standard ratio. The current gearing ratios of the various projects in the Group is between 3:1 to 4:1.

In order to achieve this overall objective, the capital management of the Company, amongst other things, aims to ensure that they meet financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements.

No changes were made in the objectives, policies or processes for managing capital during the year ended 31 March 2020.

45 Commitments Liabilities and Contingencies
(to the extent not provided for)

(i) Contingent liabilities

The Company has contingent liability of INR 73 on account of liquidated damages for delay in commissioning of wind power projects. The management believes that any amount of liquidated damages to be levied by customer shall be entirely reimbursable from capital vendors of respective projects as per the terms of the agreement (31 March 2019: Nil).

(ii) Commitments:

Estimated amount of contracts remaining to be executed on capital account and not provided for

At 31 March 2020, the Company has capital commitment (net of advances) pertaining to commissioning of wind energy projects of INR 1,290 (31 March 2019: INR 6,432).

46 Details of dues to Micro, Small and Medium Enterprises as defined under the MSMED Act, 2006

Under the Micro, Small and Medium Enterprises Development Act, 2006, (MSMED) which came into force from 2 October 2006, certain disclosure are required to be made relating to Micro, Small and Medium Enterprises. On the basis of the information and records available with the management, there are no outstanding dues to the Micro, Small and Medium Enterprises development Act, 2006.

Particulars	As at 31 March 2020	As at 31 March 2019
The principal amount and the interest due thereon (to be shown separately) remaining unpaid to any supplier as at the end of each accounting year/period	Nil	Nil
The amount of interest paid by the buyer in terms of section 16, of the Micro Small and Medium Enterprise Development Act, 2006 along with the amounts of the payment made to the supplier beyond the appointed day during each accounting year/period	Nil	Nil
The amount of interest due and payable for the period of delay in making payment (which have been paid but beyond the appointed day during the year/period) but without adding the interest specified under Micro Small and Medium Enterprise Development Act, 2006.	Nil	Nil
The amount of interest accrued and remaining unpaid at the end of each accounting year/period; and	Nil	Nil
The amount of further interest remaining due and payable even in the succeeding years, until such date when the interest dues as above are actually paid to the small enterprise for the purpose of disallowance as a deductible expenditure under section 23 of the Micro Small and Medium Enterprise Development Act, 2006	Nil	Nil

47 Absolute amounts less than INR 500,000 are appearing in the financial statements as "0" due to presentation in millions.

48 Due to outbreak of COVID-19 in India and globally, the Company has made initial assessment of likely adverse impact on economic environment in general and financial risks on account of COVID-19. Considering that the Company is in the business of generation of electricity which is having "Must Run" status by Ministry of New and Renewable Energy (MNRE), the management believes that the impact of outbreak on the business and financial position of the company will not be significant. The management does not see any risks in the Company's ability to continue as a going concern and meeting its liabilities as and when they fall due. For under construction projects, though the physical activities have been constrained and partially impacted, however management does not anticipate any delay in meeting the original timelines and expects that overall completion timelines for respective projects shall be achieved as set out in respective power purchase agreements with customers. Further, MNRE has issued office memorandum dated April 17, 2020 stating the Time-Extension in Scheduled Commissioning date of RE projects for lockdown time and additional thirty days (30 days) for normalization after the end of such lockdown due to COVID- 19 which further negates any potential risk of liquidated damages. The Company is closely monitoring developments, its operations, liquidity and capital resources and is actively working to minimize the impact of the unprecedented situation.

INDEPENDENT AUDITOR'S REPORT

To the Members of ReNew Power Limited

Report on the Audit of the Standalone Ind AS Financial Statements

Opinion

We have audited the accompanying standalone Ind AS financial statements of ReNew Power Limited ("the Company"), which comprise the Balance sheet as at 31 March 2019, the Statement of Profit and Loss, including the statement of Other Comprehensive Income, the Cash Flow Statement and the Statement of Changes in Equity for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone Ind AS financial statements give the information required by the Companies Act, 2013, as amended ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2019, its profit including other comprehensive income its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the standalone Ind AS financial statements in accordance with the Standards on Auditing (SAs), as specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the 'Auditor's Responsibilities for the Audit of the Standalone Ind AS Financial Statements' section of our report. We are independent of the Company in accordance with the 'Code of Ethics' issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the standalone Ind AS financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone Ind AS financial statements for the financial year ended 31 March 2019. These matters were addressed in the context of our audit of the standalone Ind AS financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have determined the matters described below to be the key audit matters to be communicated in our report. We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the standalone Ind AS financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the standalone Ind AS financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying standalone Ind AS financial statements.

Key audit matters	**How our audit addressed the key audit matter**
Related Party Transactions *(as described in note 35 of the standalone Ind AS financial statements)*	
We identified the measurement, completeness, presentation and disclosure of related party transactions as a key audit matter due to the high volume and complexity of business transactions with related parties during the year ended 31 March 2019.	Our audit procedures included the following: ▪ Obtained an understanding of the process that management has established to identify, account for and disclose related party transactions. ▪ Obtained an updated list of all related parties of the Company and reviewed the general ledger against this list to ensure completeness of transactions. ▪ We read contracts and agreements with related parties to understand the nature of the transactions. ▪ We agreed the amounts disclosed to underlying documentation and reviewing relevant agreements on a sample basis, as part of our evaluation of the disclosure. ▪ Made enquiries of management in order to identify if any related party transactions outside the normal course of business have taken place. ▪ We evaluated the completeness of the disclosures through review of statutory information, books and records and other documents obtained during the course of our audit.

Other Information

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Annual report, but does not include the standalone Ind AS financial statements and our auditor's report thereon.

Our opinion on the standalone Ind AS financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether such other information is materially inconsistent with the standalone Ind AS financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management for the Standalone Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these standalone Ind AS financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone Ind AS financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

These Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone Ind AS financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone Ind AS financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone Ind AS financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone Ind AS financial statements, including the disclosures, and whether the standalone Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone Ind AS financial statements for the financial year ended 31 March 2019 and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2016 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, based on our audit, we give in the "Annexure 1" a statement on the matters specified in paragraphs 3 and 4 of the Order.
2. As required by Section 143(3) of the Act, we report that:
   (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;
   (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;

(c) The Balance Sheet, the Statement of Profit and Loss including the Statement of Other Comprehensive Income, the Cash Flow Statement and Statement of Changes in Equity dealt with by this Report are in agreement with the books of account;

(d) In our opinion, the aforesaid standalone Ind AS financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Companies (Indian Accounting Standards) Rules, 2015, as amended;

(e) On the basis of the written representations received from the directors as on 31 March 2019 taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2019 from being appointed as a director in terms of Section 164 (2) of the Act;

(f) With respect to the adequacy of the internal financial controls over financial reporting of the Company with reference to these standalone Ind AS financial statements and the operating effectiveness of such controls, refer to our separate Report in "Annexure 2" to this report;

(g) In our opinion, the managerial remuneration for the year ended 31 March 2019 has been paid / provided by the Company to its directors in accordance with the provisions of section 197 read with Schedule V to the Act;

(h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended in our opinion and to the best of our information and according to the explanations given to us:

i. The Company does not have any pending litigations which would impact its financial position;

ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses;

iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

Annexure 1 referred to in paragraph 1 of our report of even date under section 'Report on other legal and regulatory requirements'

Re: ReNew Power Limited ("the Company")

(i) (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets.

(b) Fixed assets have been physically verified by the management during the year and no material discrepancies were identified on such verification.

(c) According to information and explanations given by the management the title deeds of immovable properties included in property, plant and equipment are held in the name of the Company. It has been explained to us that the title deeds for 82 cases of freehold land have been given as security (mortgage and charge) against the Non convertible debentures issued and that original title deeds are kept with security trustee, Vistara ITCL India Limited and IDBI Trusteeship Services Limited as security for the lenders and therefore the same could not be made available to us for our verification and have also not been independently confirmed by the security trustee/lender. Further, the title deeds of 2 case of freehold land amounting to Rs. 15 million as at 31 March 2019 for which original title deed is not made available to us for verification and hence we are unable to comment on the same.

(ii) The management has conducted physical verification of inventory at reasonable intervals during the year and no material discrepancies were noticed on such physical verification. There was no inventory lying with third parties.

(iii) According to the information and explanations given to us, the Company has not granted any loans, secured or unsecured to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under section 189 of the Companies Act, 2013. Accordingly, the provisions of clause 3(iii) (a), (b) and (c) of the Order are not applicable to the Company and hence not commented upon.

(iv) In our opinion and according to the information and explanations given to us, there are no loans, investments, guarantees, and securities given in respect of which provisions of section 185 of the Companies Act, 2013 are applicable. Further, since the Company is an infrastructure company within the meaning of Schedule VI of the Companies Act, 2013, the provision of section 186 of the Companies Act 2013 is not applicable.

(v) The Company has not accepted any deposits within the meaning of Sections 73 to 76 of the Act and the Companies (Acceptance of Deposits) Rules, 2014 (as amended). Accordingly, the provisions of clause 3(v) of the Order are not applicable.

(vi) We have broadly reviewed the books of account maintained by the Company pursuant to the rules made by the Central Government for the maintenance of cost records under section 148(1) of the Companies Act, 2013 and are of the opinion that prima facie, the specified accounts and records have been made and maintained. We have not, however, made a detailed examination of the same.

(vii)(a) The Company is regular in depositing with appropriate authorities undisputed statutory dues including income-tax, goods and service tax, cess and other statutory dues applicable to it. The provisions relating to provident fund, employees' state insurance, sales-tax, service tax, duty of custom, duty of excise and value added tax are not applicable to the Company.

(b) According to the information and explanations given to us, no undisputed amounts payable in respect of income-tax, goods and service tax, cess and other statutory dues were outstanding, at the year end, for a period of more than six months from the date they became payable. The provisions relating to provident fund, employees' state insurance, sales-tax, service tax, duty of custom, duty of excise and value added tax are not applicable to the Company.

(c) According to the information and explanations given to us, there are no dues of income-tax, goods and service tax, cess and other statutory dues, which have not been deposited on account of any dispute. The provisions relating to provident fund, employees' state insurance, sales-tax, service tax, duty of custom, duty of excise and value added tax are not applicable to the Company.

(viii) In our opinion and according to the information and explanations given by the management, the Company has not defaulted in repayment of loans or borrowing to a financial institution, bank or government or dues to debenture holders.

(ix) In our opinion and according to the information and explanations given by the management, monies raised by the company by way of term loans and debentures were applied for the purpose for which they were raised. The Company has not raised any money by way of initial public offer/ further public offer.

(x) Based upon the audit procedures performed for the purpose of reporting the true and fair view of the financial statements and according to the information and explanations given by the management, we report that no fraud by the company or no fraud on the company by the officers and employees of the Company has been noticed or reported during the year.

(xi) According to the information and explanations given by the management, the managerial remuneration has been paid / provided in accordance with the requisite approvals mandated by the provisions of section 197 read with Schedule V to the Companies Act, 2013.

(xii) In our opinion, the Company is not a nidhi company. Therefore, the provisions of clause 3(xii) of the order are not applicable to the Company and hence not commented upon.

(xiii) According to the information and explanations given by the management, transactions with the related parties are in compliance with section 177 and 188 of Companies Act, 2013 where applicable and the details have been disclosed in the notes to the financial statements, as required by the applicable accounting standards.

(xiv) According to the information and explanations given to us and on an overall examination of the balance sheet, the company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year under review and hence, reporting requirements under clause 3(xiv) are not applicable to the company and, not commented upon.

(xv) According to the information and explanations given by the management, the Company has not entered into any non-cash transactions with directors or persons connected with him as referred to in section 192 of Companies Act, 2013.

(xvi) According to the information and explanations given to us, the provisions of section 45-IA of the Reserve Bank of India Act, 1934 are not applicable to the Company.

Annexure 2 to the Independent Auditor's Report of even date on the financial statements of ReNew Power Limited

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of ReNew Power Limited ("the Company") as of 31 March 2019 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's responsibility for Internal Financial Controls

The Company's Management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting with reference to these Ind AS financial statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing as specified under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting with reference to these Ind AS financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting with reference to these Ind AS financial statements and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting with reference to these Ind AS financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting with reference to these Ind AS financial statements.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting with reference to these Ind AS financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting with reference to these Ind AS financial statements to future periods are subject to the risk that the internal financial control over financial reporting with reference to these Ind AS financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting with reference to these Ind AS financial statements and such internal financial controls over financial reporting with reference to these Ind AS financial statements were operating effectively as at 31 March 2019, based on the internal control over financial reporting criteria established by the Company, considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

1 General information

ReNew Power Limited (‘the Company’) is a public limited company domiciled in India. The Company was converted into a public limited company with effect from 17 April 2018 and consequently the name of the company has changed from ReNew Power Private Limited to ReNew Power Limited.

The registered office of the Company is located at 138, Ansal Chamber - II Bikaji Cama Place, New Delhi-110066. The Company is carrying out business activities relating to generation of power through non-conventional and renewable energy sources.

The Financial Statements of the Company were authorised for issue by the Company's Board of Directors on 29 May 2019.

2 Basis of preparation

The Company prepared its Financial Statements as per Ind AS prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015, as amended.

The Financial Statements have been prepared using presentation and disclosure requirements of the Schedule III of Companies Act, 2013.

The Financial Statements have been prepared on a historical cost basis, except for the following assets and liabilities which have been measured at fair value:

- Derivative financial instruments
- Financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments)

3.1 Summary of Significant Accounting Policies

a) Use of Estimates

The preparation of Financial Statements in conformity with Ind AS requires the Management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the Management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

b) Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it is:

- Expected to be realised or intended to sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is treated as current when it is:

- Expected to be settled in normal operating cycle
- Held primarily for the purpose of trading
- Due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets/liabilities are classified as non-current assets/liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation/settlement in cash and cash equivalents. The company has identified twelve months as their operating cycle for classification of their current assets and liabilities.

c) Fair value measurement

The Company measures financial instruments, such as, derivatives at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy. (Refer Note 38 and 39).

At each reporting date, the management of the Company analyses the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the accounting policies of the Company.

For assets and liabilities that are recognised in the Financial Statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

This note summarises the accounting policy for determination of fair value. Other fair value related disclosures are given in the relevant notes as following:

· Disclosures for significant estimates and assumptions (Refer Note 41)
· Quantitative disclosures of fair value measurement hierarchy (Refer Note 39)
· Financial instruments (including those carried at amortised cost) (Refer Note 38)

d) Revenue recognition

Revenue from contracts with customers

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has generally concluded that it is the principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer.

Sale of Power

Income from supply of power is recognized on the supply of units generated from the plant to the grid, as per the terms of the Power Purchase Agreements ("PPA") entered into with the customers.

The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of power, the Company considers the effects of variable consideration and consideration payable to the customer (if any).

Income from services (management consultancy)

Revenue from projects management/technical consultancy are recognised as per the terms of agreement on the basis of services rendered.

(i) Variable consideration

If the consideration in a contract includes a variable amount, the Company estimates the amount of consideration to which it will be entitled in exchange for transferring the goods or service to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

Rebates

In some PPAs, the Company provide rebates in invoice if payment is made before the due date. Rebates are offset against amounts payable by the customers. To estimate the variable consideration for the expected future rebate, the Company applies the most likely method.

(ii) Consideration payable to customers

In some PPAs, Company has to pay consideration to customers. Consideration payable to customers are offset against the revenue recognised as and when sale of power occurs.

Income from compensation for loss of revenue

Income from compensation for loss of revenue is recognised after certainty of receipt of the same is established.

Dividend

Dividend income is recognised when the right of the Company to receive dividend is established by the reporting date.

(iii) Contract balances

Contract assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

Contract Liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract.

Trade receivables

A receivable represents the Company’s right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in section (r) Financial instruments – initial recognition and subsequent measurement.

Income from government grants

Refer note (g) for accounting policy.

e) Foreign currencies

The Company Financial Statements are presented in Indian rupees (INR), which is also the functional currency and the currency of the primary economic environment in which the Company operate.

Transactions and balances

Transactions in foreign currencies are initially recorded by the company at their functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

Exchange differences arising on settlement or translation of monetary items are recognised in profit or loss with the exception of the following:
- Exchange differences arising on monetary items that are designated as part of the hedge of the Company's net investment of a foreign operation. These are recognised in OCI until the net investment is disposed of, at which time, the cumulative amount is reclassified to profit or loss.
- Tax charges and credits attributable to exchange differences on those monetary items are also recorded in OCI.

f) Taxes

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in India. Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate. Current income tax assets and liabilities are offset if a legally enforceable right exists to set off these.

Deferred Tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date. Deferred tax liabilities are recognised for all taxable temporary differences.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised. The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

In situations where company is entitled to a tax holiday under the Income-tax Act, 1961, enacted in India, no deferred tax (asset or liability) is recognized in respect of temporary differences which reverse during the tax holiday period. Deferred taxes in respect of temporary differences which reverse after the tax holiday period are recognized in the year in which the temporary differences originate. However, the company restrict the recognition of deferred tax assets to the extent that it has become reasonably certain that sufficient future taxable income will be available against which such deferred tax assets can be realized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in OCI or equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Minimum Alternate Tax
Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Company.

g) Government grants

Government grants are recognized where there is reasonable assurance that the grant will be received and all attached conditions will be compiled with. When the grant related to an expense item, it is recognized as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant related to an asset, it is recognized as income in equal amounts over the expected useful life of the related asset.

When the company receive grants of non-monetary assets, the asset and the grant are recorded at fair value amounts and released to profit or loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset i.e. by equal annual instalments.

The company presents grants related to an expense item as other income in the Statement of Profit and Loss. Thus, Generation based incentive and Sale of emission reduction certificates have been recognised as other income.

Generation based Incentive :
Generation based incentive is recognized on the basis of supply of units generated by the Company to the state electricity board from the eligible project in accordance with the scheme of the "Generation Based Incentive (GBI) for Grid interactive Wind Power Projects"

h) Inventories

Inventories are valued at the lower of cost and net realisable value.
Costs incurred in bringing each product to its present location and condition are accounted for as follows:
Consumables and spares: cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on first in, first out basis.
Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

i) Property, plant and equipment

Capital work-in-progress, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred.

Subsequent Costs
The cost of replacing a part of an item of property, plant and equipment is recognised in the carrying amount of the item of property, plant and equipment, if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably with the carrying amount of the replaced part getting derecognised. The cost for day-to-day servicing of property, plant and equipment are recognised in Statement of Profit and Loss as and when incurred.

Derecognition

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

Gains or losses arising from de-recognition of PPE are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

j) Intangible assets

Intangible assets acquired separately are measured in initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses.
The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with finite life are reviewed at least at the end of each reporting period.

Customer related intangibles are capitalized if they meet the definitions of an intangible asset and the recognition criteria are satisfied. Customer-related intangibles acquired as part of a business combination are valued at fair value and those acquired separately are measured at cost. Such intangibles are amortized over the remaining useful life of the customer relationships or the period of the contractual arrangements.

k) Depreciation/amortization of property, plant and equipment

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets as follows:

Category	**Life**
Plant and equipment (solar rooftop projects)*	25 years or terms of power purchase agreement, whichever is less (15-25 years)
Plant and equipment (wind power projects)*	18-25
Plant and equipment (others)	5-18
Office equipment	5
Furniture and fixture	10
Computers	3
Computer servers	6
Computer softwares	3-6
Leasehold improvements	Over the period of lease (5 years)

* Based on an external technical assessment, the management believes that the useful lives as given above and residual value of 0%, best represents the period over which management expects to use its assets and its residual value. The useful life of plant and equipment is different from the useful life as prescribed under Part C of Schedule II of Companies Act, 2013.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

l) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale. Borrowing costs consist of interest, discount on issue, premium payable on redemption and other costs that an entity incurs in connection with the borrowing of funds (this cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs). The borrowing costs are amortised basis the Effective Interest Rate (EIR) method over the term of the loan. The EIR amortisation is recognised under finance costs in the Statement of Profit or Loss. The amount amortized for the period from disbursement of borrowed funds upto the date of capitalization of the qualifying assets is added to cost of the qualifying assets.

m) Leases

As a lessee

Operating lease payments are recognised as an expense in the statement of profit and loss on a straight-line basis over the lease term

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

n) Impairment of non-financial assets

The company assess, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the company estimate the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating units (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre -tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the statement of profit and loss.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Profit or Loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as an increase in revaluation.

o) Share based payments

Company provides additional benefits to certain members of senior management and employees of the Company and a subsidiary in the form of share-based payments, whereby employees render services as consideration for equity instruments (equity-settled transactions).

Equity-settled transactions

The cost of equity-settled transactions is determined by the fair value at the date when the grant is made using an appropriate valuation model.

The cost is recognized, together with a corresponding increase in share-based payment reserve in equity, over the period in which the performance and/or service conditions are fulfilled in employee benefit expenses. The cumulative expense recognized for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Company's best estimate of the numbers of equity instruments that will ultimately vest. The statement of profit and loss expense or credit for a period represents the movement in cumulative expense recognized as at the beginning and end of that period and is recognized in employee benefit expense.

Service and non-market performance conditions are not taken into account when determining the grant date fair value of awards, but the likelihood of the conditions being met is assessed as part of the Company's best estimate of the number of equity instruments that will ultimately vest. Market performance conditions are reflected within the grant date fair value. Any other condition attached to an award, but without associated service requirement, are considered to be non-vesting conditions. Non-vesting conditions are reflected in the fair value of an award and lead to an immediate expensing of an award unless there are also service and/or performance conditions.

No expense is recognized for awards that do not ultimately vest because of non-market performance and/or service conditions have not been met. Where awards include a market or non-market condition, the transaction are treated as vested irrespective of whether the market or non-vesting condition is satisfied, provided that all other performance and/or service condition are satisfied.

Share based payment cost, to the extent pertaining to the employees of subsidiary, is reduced from employee benefit expenses of the Company and is considered as deemed investment in the form of capital contribution in the subsidiary.

p) Retirement and other employee benefits

Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The company recognize contribution payable to the provident fund scheme as an expense, when an employee renders the related service.

The Company operates a defined benefit plan in India, viz., gratuity. The cost of providing benefit under this plan is determined on the basis of actuarial valuation at each year-end carried out using the projected unit cost method.

Remeasurements comprising of actuarial gain and losses, the effect of the asset ceiling, excluding amount recognized in the net interest on the defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognized in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods.

Accumulated leave, which is expected to be utilized within the next twelve months, is treated as short term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company treats the accumulated leave expected to be carried forward beyond twelve months, as long term employee benefit for measurement purposes. Such long term compensated absences are determined on the basis of actuarial valuation at each year-end carried out using the projected unit cost method. Remeasurements comprising of actuarial gain and losses are recognized in the balance sheet with a corresponding debit or credit to profit or loss in the period in which they occur. The Company presents the leave as current liability in the balance sheet, to the extent is does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where Company has unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

Past service costs are recognised in Statement of Profit or Loss on the earlier of:
- The date of the plan amendment or curtailment, and
- The date that the Company recognises related restructuring costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Company recognises the following changes in the net defined benefit obligation as an expense in the Statement of Profit and Loss:
- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- Net interest expense or income

q) Provisions

Provisions are recognised when the company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the Statement of Profit and Loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

r) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

Debt instruments at amortised cost

A ‘debt instrument’ is measured at the amortised cost if both the following conditions are met:
a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss.

Debt instruments at fair value through other comprehensive income (FVTOCI)

A ‘debt instrument’ is classified as at the FVTOCI if both of the following criteria are met:
a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
b) The asset’s contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the P&L. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to Statement of P&L. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

Debt instruments at fair value through profit or loss (FVTPL)
FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as ‘accounting mismatch’). The company has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of P&L.

Equity investments
All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS 103 applies are classified as at FVTPL. For all other equity instruments, the Company may make an irrevocable election to present the subsequent changes in the fair value in OCI. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to Statement of Profit and Loss, even on sale of investment. However, the company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

Derecognition
A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised when:

- The rights to receive cash flows from the asset have expired, or
- The respective company has transferred their rights to receive cash flows from the asset or have assumed the obligation to pay the received cash flows in full without material delay to a third party under a ‘pass-through’ arrangement; And
- Either the companies under the company has transferred substantially all the risks and rewards of the asset, or has neither transferred nor retained substantially all the risks and rewards of the asset, but have transferred control of the asset.

When the Company have transferred their rights to receive cash flows from an asset or have entered into a pass-through arrangement, they evaluate if and to what extent they have retained the risks and rewards of ownership. When they have neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the company continues to recognise the transferred asset to the extent of the continuing involvement of company. In that case, the company also recognise an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the company could be required to repay.

Impairment of financial assets
In accordance with Ind AS 109, the company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on all the financial assets and credit risk exposure.
The Company follows 'simplified approach for recognition of impairment loss allowance on trade receivables or contract revenue receivables.

The application of simplified approach does not require the Company to track changes in credit risk. Rather it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/expense in the Statement of profit and loss (P&L).

Financial liabilities

Initial recognition and measurement
Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and in the case of loans and borrowings and payables, net of directly attributable transaction costs.
The financial liabilities of the company include trade and other payables, derivative financial instruments, loans and borrowings including bank overdraft.

Subsequent measurement
The measurement of financial liabilities depends on their classification as discussed below:-

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss. This category generally applies to borrowings.

The Company recognise debt modifications agreed with lenders to restructure their existing debt obligations. Such modifications are done to take advantage of falling interest rates by cancelling the exposure to high interest fixed rate debt, pay a fee or penalty on cancellation and replace it with debt at a lower interest rate (exchange of old debt with new debt). The qualitative factors considered to be relevant for modified financial liabilities include, but are not limited to, the currency that the debt instrument is denominated in, the interest rate (that is fixed versus floating rate), conversion features attached to the instrument and changes in covenants. The accounting treatment is determined depending on whether modifications or exchange of debt instruments represent a settlement of the original debt or merely a renegotiation of that debt. The exchange of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability.

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit or Loss.

Compound Instruments- Compulsory Convertible Debentures (CCDs)

Compulsory Convertible Debentures (CCDs) are separated into liability and equity components based on the terms of the contract

Basis the terms of these compound financial instruments the distributions to holders of an equity instrument are being recognised by the entity directly in equity. Transaction costs of an equity transaction are being accounted for as a reduction from equity.

The company recognises interest, dividends, losses and gains relating to such financial instrument or a component that is a financial liability as income or expense in profit or loss.

The present value of the liability part of the compulsory convertible debentures classified under financial liabilities and the equity component is calculated by subtracting the liability from the total proceeds of CCDs.

Transaction costs that relate to the issue of a compound financial instrument are allocated to the liability and equity components of the instrument in proportion to the allocation of proceeds. Transaction costs that relate jointly to more than one transaction (for example, cost of issue of debentures, listing fees) are allocated to those transactions using a basis of allocation that is rational and consistent with similar transactions.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged/ cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit or Loss.

Reclassification of financial assets and liabilities

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

Interest income

For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in finance income in the Statement of Profit and Loss.

s) Cash and Cash-Equivalents

Cash and short-term deposits in the balance sheet comprise cash at banks and cash in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the Statement of cash flows, cash and cash equivalents consist of cash and short term deposits, as defined above, net off bank overdrafts as they considered an integral part of the Company's cash management.

t) Measurement of EBITDA

The company has elected to present earnings before interest, tax, depreciation and amortization (EBITDA) as a separate line item on the face of the Statement of Profit and Loss. The company measure EBITDA on the basis of profit/ (loss) from continuing operations. In their measurement, the companies include interest income but do not include depreciation and amortization expense, finance costs and tax expense.

u) Events occurring after the Balance Sheet date

Impact of events occurring after the balance sheet date that provide additional information materially effecting the determination of the amounts relating to conditions existing at the balance sheet date are adjusted to respective assets and liabilities.

The Company does not adjust the amounts recognised in its financial statements to reflect non-adjusting events after the reporting period.

The Company makes disclosures in the financial statement in cases of significant events.

v) Contingent liabilities

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

w) Earnings per equity share

Basic earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares outstanding during the period. Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issue data later date. Dilutive potential equity shares are determined independently for each period presented.

The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented for any share splits and bonus shares issues including for changes effected prior to the approval of the financial statements by the Board of Directors.

'The dilutive effect of outstanding options is reflected as additional share dilution in the computation of diluted earnings per share'

3.2 Changes in accounting policy and disclosures- New and amended standards

a) New and amended standards

Ind AS 115 Revenue from Contracts with Customers

The Company applied Ind AS 115 for the first time during the FY 2018-19. The nature and effect of the changes as a result of adoption of the new accounting standard are described below.

Ind AS 115 was issued on 28 March 2018 and supersedes Ind AS 11 Construction Contracts and Ind AS 18 Revenue and it applies, with limited exceptions, to all revenue arising from contracts with its customers. Ind AS 115 establishes a five-step model to account for revenue arising from contracts with customers and requires that revenue be recognised at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer.

Ind AS 115 requires entities to exercise judgement, taking into consideration all of the relevant facts and circumstances when applying each step of the model to contracts with their customers. The standard also specifies the accounting for the incremental costs of obtaining a contract and the costs directly related to fulfilling a contract. In addition, the standard requires extensive disclosures.

The Company adopted Ind AS 115 using the modified retrospective method of adoption with the date of initial application of 1 April 2018. Under this method, the standard can be applied either to all contracts at the date of initial application or only to contracts that are not completed at this date. The Company elected to apply the standard to all contracts that are not completed as at 1 April 2018.

Set out below, are the amounts by which each financial statement line item is affected as at and for the year ended 31 March 2019 as a result of the adoption of Ind AS 115. The adoption of Ind AS 115 did not have a material impact on OCI or the Company’s operating, investing and financing cash flows. The first column shows amounts prepared under Ind AS 115 and the second column shows what the amounts would have been had Ind AS 115 not been adopted:

Particulars	**Note**	**Ind AS 115**	**Ind AS 18**	**Increase/ (decrease)**
Other current financial assets				
Unbilled revenue	7	-	202	(202)
Trade receivables				
Trade receivables	12	3,638	3,436	202

b) Standards issued but not yet effective

Ind AS 116 Leases:

Ind AS 116 Leases was notified in March, 2019 and it replaces Ind AS 17 Leases, including appendices thereto. Ind AS 116 is effective for annual periods beginning on or after 1 April, 2019. Ind AS 116 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under Ind AS 17. The standard includes two recognition exemptions for lessees – leases of 'low-value' assets (e.g., personal computers) and short-term leases (i.e., leases with a lease term of 12 months or less). At the commencement date of a lease, a lessee will recognise a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use asset). Lessees will be required to separately recognise the interest expense on the lease liability and the depreciation expense on the right-of-use asset.

Lessees will be also required to remeasure the lease liability upon the occurrence of certain events (e.g., a change in the lease term, a change in future lease payments resulting from a change in an index or rate used to determine those payments). The lessee will generally recognise the amount of the remeasurement of the lease liability as an adjustment to the right-of-use asset.

Lessor accounting under Ind AS 116 is substantially unchanged from today's accounting under Ind AS 17. Lessors will continue to classify all leases using the same classification principle as in Ind AS 17 and distinguish between two types of leases: operating and finance leases.

The Company has identified amortisation of leasehold land, rent expense and employee car lease expense as the area having potential impact.

The Company is evaluating the requirements of the new standard and the effect on the areas indentified in financial statements is being evaluated, thus impact is not known.

Mortgage and hypothecation on Property, plant and equipment:
Property, plant and equipment with a carrying amount of INR 22,522 (31 March 2018: INR 15,958) are subject to a pari passu first charge to respective lenders for project term loans and debentures as disclosed in Note 16.

^ Capitalised borrowing costs
The amount of borrowing costs capitalised during the year was INR 394 (31 March 2018: INR 4). The rate used to determine the amount of borrowing costs eligible for capitalisation was the effective interest rate of the specific borrowing.

*** Adjustment pertains to following**
* Adjustment of INR Nil (31 March 2018: INR 6) is on account of actualisation of provisional capitalization.

* Represents transaction cost on long term borrowings charged to statement of profit & loss on account of derecognition due to substantial modification.

30 Earnings per share (EPS)	**For the year ended 31 March 2019**	**For the year ended 31 March 2018**

The following reflects the profit and share data used for the basic and diluted EPS computations:

Profit attributable to equity holders for basic earnings	54	861
	54	861
Net profit for calculation of basic EPS	54	861
Weighted average number of equity shares for calculating basic EPS	379,797,836	339,327,176
Basic earnings per share	0.14	2.54
Net profit for calculation of diluted EPS	54	861
Weighted average number of equity shares for calculating diluted EPS	385,804,858	346,071,290
Diluted earnings per share	0.14	2.49

	No. of shares	**No. of shares**
Weighted average number of equity shares in calculating basic EPS	379,797,836	339,327,176
Effect of dilution		
Convertible equity for employee stock option plan	6,007,022	6,744,114
Weighted average number of equity shares in calculating diluted EPS	385,804,858	346,071,290

31 Gratuity and other post-employment benefit plans

Retirement benefit in the form of provident fund is a defined contribution scheme. The contributions to the provident fund are charged to the statement of profit and loss for the year when the contributions are due. The Company has no obligation, other than the contribution payable to the provident fund.

The Company has a defined benefit gratuity plan. Gratuity is computed as 15 days salary, for every completed year of service or part thereof in excess of 6 months and is payable on retirement/termination/resignation. The benefit vests on the employees after completion of 5 years of service. The Gratuity liability has not been externally funded. Company makes provision of such gratuity liability in the books of accounts on the basis of actuarial valuation as per the projected unit credit method.

The following tables summarize the components of net benefit expense recognized in the statement of profit and loss and the unfunded status and amounts recognized in the balance sheet for the Gratuity.

Statement of profit and loss

Net employees benefit expense recognised in employee cost	**For the year ended 31 March 2019**	**For the year ended 31 March 2018**
Current service cost	15	4
Interest cost on benefit obligation	3	0
Net expense recognised in profit & loss	**18**	**4**
Net expense/(income) recognised in other comprehensive income	(2)	(1)

Balance Sheet

Benefit liability	**As at 31 March 2019**	**As at 31 March 2018**
Present value of unfunded obligation	61	9
Net liability	61	9

	As at 31 March 2019	**As at 31 March 2018**
Changes in the present value of the defined benefit obligation		
Opening defined benefit obligation	9	26
Current service cost	15	4
Interest cost	3	0
Benefits paid	(0)	-
Remeasurements during the year due to:		
- Experience adjustments	(2)	(1)
- Change in financial assumptions	-	(0)
- Change in demographic assumptions	(0)	-
Liabilities settled/assumed *	36	(20)
Closing defined benefit obligation	61	9

Since the entire amount of plan obligation is unfunded therefore changes in fair value of plan assets, categories of plan assets as a percentage of the fair value of total plan assets and Company's expected contribution to the plan assets for the next period is not given.

* Liability transferred on account of transfer of certain employees from ReNew Power Services Private Limited.

The principal assumptions used in determining gratuity obligations	**As at 31 March 2019**	**As at 31 March 2018**
Discount rate	7.75%	7.75%
Salary escalation	10.00%	10.00%

The estimates of future salary increases considered in actuarial valuation take account of inflation, total amount of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

The Company regularly assesses these assumptions with the projected long-term plans and prevalent industry standards. The impact of sensitivity due to changes in the significant actuarial assumptions on the defined benefit obligations is given in the table below:

Particulars	**Change in assumptions**	**As at 31 March 2019**	**As at 31 March 2018**
Discount rate	+ 0.5%	57	8
	- 0.5%	67	(9)
Salary escalation	+ 0.5%	63	9
	- 0.5%	58	(9)

The sensitivity analysis above has been determined based on a method that extrapolates the impact on defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting year.

Projected plan cash flow:

The table below shows the expected cash flow profile of the benefits to be paid to the current membership of the plan based on past service of the employees as at the valuation date:

Maturity Profile	**As at 31 March 2019**	**As at 31 March 2018**
Within next 12 months	2	1
Between 2 and 5 years	16	2
Between 5 and 10 years	20	6
Beyond 10 years	152	11

The weighted average duration to the payment of these cash flows is 11.89 years (31 March 2018: 8.64 years).

Risk analysis
The Company is exposed to a number of risks in the defined benefit plans. Most significant risks pertaining to defined benefits plans and management estimation of the impact of these risks are as follows:

· Inflation risk: Currently the Company has not funded the defined benefit plans. Therefore, the Company will have to bear the entire increase in liability on account of inflation.

· Longevity risk/life expectancy: The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and at the end of the employment. An increase in the life expectancy of the plan participants will increase the plan liability.

· Salary growth risk: The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. An increase in the salary of the plan participants will increase the plan liability.

Defined contribution plan:	**For the year ended 31 March 2019**	**For the year ended 31 March 2018**
Contribution to provident fund & other fund charged to statement of profit & loss*	56	9

*This amount is inclusive of amount capitalized in different projects.

32 Operating lease commitments

The Company has entered into commercial property lease for its offices. The lease have non-cancellable commitment period which has remaining term of 5 years. The Company has the option, under some of its leases, to lease the assets for additional terms of upto three years.

Future minimum rentals payables under non- cancellable operating lease (excluding lease equalisation reserve) are as follows

Particulars	**For the year ended 31 March 2019**	**For the year ended 31 March 2018**
Within one year	110	110
After one year but not more than five years	330	441

34 Share Based Payment

The Company has five share-based payment schemes for its employees:
2018 Stock Option Plan, 2017 Stock Option Plan, 2016 Stock Option Plan, 2014 Stock Option Plan and 2011 Stock Option Plan ('Group Stock Option Plans') approved by the board. According to the ESOP schemes, the employee selected by the compensation committee from time to time will be entitled to options as per grant letter issued by the committee, subject to satisfaction of prescribed vesting conditions.

Plans	**2018 Stock Option Plan**	**2017 Stock Option Plan**	**2016 Stock Option Plan**	**2014 Stock Option Plan**	**2011 Stock Option Plan**
Grant Date	Multiple	Multiple	Multiple	Multiple	Multiple
Vesting period	**Time Linked Vesting**: 50 % of grants will vest in 5 years as follows: i) One year from the date of garnt, the Options for the first four quarters shall vest immediately. ii)Thereafter, vesting will continue on a quarterly basis for the unvested Options. Remaining 50% will vest at the end of 5 years from the date of grant.	**Time Linked Vesting**: 50 % of grants will vest in 5 years as follows: i) One year from the date of garnt, the Options for the first four quarters shall vest immediately. ii)Thereafter, vesting will continue on a quarterly basis for the unvested Options. Remaining 50% will vest at the end of 5 years from the date of grant.	**Time Linked Vesting**: 5 years on quarterly basis effective from December 1, 2015 on completion of one year from the date of grant, the Options for the first seven quarters shall vest immediately. Thereafter, vesting will continue on qualrterly basis for the unvested Options commencing from December 1, 2017. **Performance linked vesting**: The Options shall est annually and shall be prorated over a period of 3 years from the date of grant and shall be subject to the EBITDA achieved by the Company for the last completed financial year. The vesting of the Options shall take place at the end of the first anniversary of the date of grant ("Vesting Date") and thereafter on March 31, 2018 and March 31, 2019 or at a later date when the audited financial statements of the Company are available	**Time Linked Vesting**: 5 years on quarterly basis which shall commence one year after the date of grant of option	**Time Linked Vesting**: 5 years from the grant date
Exercise period	Within 10 years from date of grant upon vesting	Within 10 years from date of grant upon vesting	Within 10 years from date of grant upon vesting	Within 10 years from date of grant upon vesting	Within 10 years from date of grant upon vesting
Exercise price	Rs.415	Rs.340	Rs.205	Rs.100 or 131	Rs.100
Settlement type	Equity Settled	Equity Settled	Equity Settled	Equity Settled	Equity Settled

The details of options outstanding under the ESOP schemes are summarized below:

Particulars	**No of options (in million)**	
	2018-19	**2017-18**
Outstanding at the beginning of the year	21	11
Granted during the year	1	10
Forfeited during the year	0	0
Repurchase during the year	-	0
Exercised during the year	3	0
Outstanding at the end of the year	19	21
Exercisable at the end of the year	9	18

- The weighted average exercise price of these options outstanding was INR 258 for the period ended 31 March 2019 (31 March 2018: INR 246).
- The weighted average exercise price of these options granted during the year was INR 415 for the period ended 31 March 2019 (31 March 2018: INR 340)
- The weighted average exercise price of these options exercised during the period was INR 205 for the period ended 31 March 2019 (31 March 2018: INR 100).
- The weighted average exercise price of these options forfeited/repurchased during the period was INR 290 for the period ended 31 March 2019 (31 March 2018 INR. 226).

Particulars	**2018-19**	**2017-18**
Dividend yield (%)	1.5%	1.5%
Expected volatility (%)	15%	15%
Risk–free interest rate (%)	7.70% - 8.12%	6.64% - 6.96%
Weighted average remaining contractual life	6.86 years	7.85 years

The fair value of share options granted is estimated at the date of grant using an appropriate valuation model, taking into account the terms and conditions upon which the share options were granted.

35 Segment Information

The Chairman and Managing Director of ReNew Power Limited takes decision in respect of allocation of resources and assesses the performance basis the report/ information provided by functional heads and are thus considered to be Chief Operating Decision Maker.
The Company is in the business of development and operation of wind and solar power plant. Considering the nature of Company's business and operation, there are no separate reportable segments (business and/ or geographical) in accordance with the requirements of Ind AS 108 'Operating segment' and hence, there are no additional disclosures to be provided other than those already provided in the financial statements.

The Revenues from three major customers amounts to INR 2,917 (31 March 2018: three customers INR 2,472) each of which contributes more than 10% of the total revenue of the Company.

36 Corporate social responsibility expenditure

As per Section 135 of the Companies Act, 2013, a company, meeting the applicability threshold, needs to spend at least 2% of its average net profit for the immediately preceding three financial years on corporate social responsibility (CSR) activities. The areas for CSR activities as follows :-

1) Sanitation & making available safe drinking water- Construction of toilets, Bore-well, well, Tube-well etc.
2) Empowering women through SHGs (self-help group) and creating income generation activities for the women like stitching and tailoring, goatery, backyard poultry etc.)
3) Ensuring environmental sustainability- animal welfare Plantation, environment awareness,
4) Animal Welfare-Animal health camp, Para –vet training
5) Education awareness, Remedial classes for weak students etc.
6) Health and Hygiene- Health camps in the community, cleanliness drive to create awareness.
7) Sports Training- Sports training camps in community
8) Education facility improvement- Construction of Solar power plant in schools

A CSR committee has been formed by the Company as per the Act. The funds were utilised on above mentioned activities which are specified in Schedule VII of the Companies Act, 2013.

(a) Gross amount required to be spent by the Company during the year is INR 11 (31March 2018: INR 8).
(b) Amount spent during the year on:

List of CSR activities	In Cash	Yet to be paid	Total
Current year			
Construction / Acquisition of any asset	3	3	6
Other activities	5	0	5
Total	**8**	**3**	**11**
Previous year*			
Construction / Acquisition of any asset	-	-	-
Other activities	13	3	16
Total	**13**	**3**	**16**

* The amount yet to be paid in previous year has been subsequently paid in current year.

37 Reconciling the amount of revenue recognised in the statement of profit and loss with the contracted price

Particulars	For the year ended 31 March 2019
Income as per contracted price	5,007
Less: Adjustments	
Discounts and rebates	38
Operating charges	10
Income from contract with customers	**4,959**

38 Fair values

Set out below, is a comparison by class of the carrying amounts and fair value of the financial instruments of the Company, other than those with carrying amounts that are reasonable approximations of fair values:

	31 March 2019		31 March 2018	
	Carrying value	**Fair value**	**Carrying value**	**Fair value**
Financial assets				
Investments-non current, unquoted debt securities	4,909	4,909	3,937	3,937
Loans-non current	3,076	3,076	1,006	1,006
Other non current financial assets	1,679	1,679	2,263	2,263
Investments-current, quoted mutual funds	-	-	1,006	1,006
Loans-current	61,187	61,187	47,251	47,251
Trade receivables	3,638	3,638	3,296	3,296
Cash and cash equivalent	280	280	1,467	1,467
Bank balances other than cash and cash equivalent	4,283	4,283	1,099	1,099
Other current financial assets	4,597	4,597	4,295	4,295
Financial liabilities				
Long term borrowings	43,350	43,350	42,005	42,005
Short-term borrowings	31,909	31,909	7,618	7,618
Trade payables	984	984	1,005	1,005
Other current financial liabilities	5,750	5,750	1,482	1,482

The management of the Company assessed that current investments, cash and cash equivalents, trade receivables, trade payables, short term borrowings, other current financials liabilities and other current financial assets approximate their carrying amounts largely due to the short-term maturities of these instruments.

The financial assets above do not include investments in subsidiaries which are measured at cost in accordance with Ind AS 101, Ind AS 27 and Ind AS 28.

The following methods and assumptions were used to estimate the fair values:

The fair values of the Company's non convertible debentures and term loans from banks including current maturities are determined by using Discounted Cash Flow (DCF) method using discount rate that reflects the issuer's borrowing rate as at the end of the reporting period. The own non-performance risk as at 31 March 2019 was assessed to be insignificant.

39 Fair value hierarchy

The Company categorizes assets and liabilities measured at fair value into one of three levels depending on the ability to observe inputs employed in their measurement which are described as follows:
i) Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
ii) Level 2 - Inputs are inputs that are observable, either directly or indirectly, other than quoted prices included within level 1 for the asset or liability.
iii) Level 3 - Inputs are unobservable inputs for the asset or liability reflecting significant modifications to observable related market data or Company's assumptions about pricing by market participants.

The following table provides the fair value measurement hierarchy of the assets and liabilities of the Company :-

Quantitative disclosures fair value measurement hierarchy for assets/liabilities as at year end:

	Level of fair value measurement	**31 March 2019**		**31 March 2018**	
		Carrying value	**Fair value**	**Carrying value**	**Fair value**

40 Financial Risk Management objectives and policies

"The Company's principal financial liabilities comprise loans and borrowings, trade and other payables.
The main purpose of these financial liabilities is to finance the Company's operations and to support its operations. The Company's financial assets include loans, trade and other receivables, and cash & cash equivalents that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Company's senior management is supported by a various sub committees that advises on financial risks and the appropriate financial risk governance framework for the Company. These committees provides assurance to the Company's senior management that the Company's financial risk activities are governed by appropriate policies and procedure and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each risk, which are summarised as below.

Market Risk

Market risk is the risk that the Company's assets and liabilities will be exposed to due to a change in market prices that determine the valuation of these financial instruments. Market risk comprises 3 types of risk: interest rate risk, currency risk and other price risk such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings and deposits..

The sensitivity analyses in the following sections relate to the position as at 31 March 2019. The sensitivity analysis have been prepared on the basis that the amount of net debt and the ratio of fixed to floating interest rates of the debt are all constant as at 31 March 2019.

Interest rate Risk:

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to interest rate risk primarily from the external borrowings that are used to finance their operations. The Company also monitors the changes in interest rates and actively re finances its debt obligations to achieve an optimal interest rate exposure.

Interest Rate Sensitivity

The following table demonstrates the sensitivity to a reasonable possible change in interest rates on financial liabilities, i.e. floating interest rate of borrowings in INR. With all other variables held constant, the Company's profit before tax is affected through the impact on loans and borrowings, as follows:

	31 March 2019		31 March 2018	
	Increase/decrease in basis points	**Effect on profit before tax**	**Increase/decrease in basis points**	**Effect on profit before tax**
INR	+/(-)50	(-)/+ 72	+/(-)50	(-)/+ 5
	Increase/decrease in basis points	**Effect on equity**	**Increase/decrease in basis points**	**Effect on equity**
INR	+/(-)50	(-)/+ 49	+/(-)50	(-)/+ 3

Credit Risk

Credit risk is the risk that the power procurer will not meet their obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from their operating activities (primarily trade receivables) but this credit risk exposure is insignificant given the fact that substantially whole of the revenues are from state utilities/government entities.

Further the Company sought to reduce counterparty credit risk under long-term contracts in part by entering into power sales contracts with utilities or other customers of strong credit quality and we monitor their credit quality on an on going basis.
The maximum credit exposure to credit risk for the components of the balance sheet at 31 March 2019 and 31 March 2018 is the carrying amount of all the financial assets.

Trade Receivables

Customer credit risk is managed basis established policies of Company, procedures and controls relating to customer credit risk management. Outstanding customer receivables are regularly monitored. The Company does not hold collateral as security.

The Company has state utilities/government entities as it's customers with high credit worthiness, therefore, the Company does not see any risk related to credit. The credit quality of the customers other than state utilities/government entities is evaluated based on their credit ratings and other publicly available data.

Financial instruments and credit risk

Credit risk from balances with banks is managed by Company's treasury department. Investments, in the form of fixed deposits, of surplus funds are made only with banks and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed on an annual basis by the Company, and may be updated throughout the year subject to approval of Company's finance committee. The limits are set to minimize the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

Liquidity Risk

Liquidity risk is the risk that the Company will encounter in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The approach of the Company to manage liquidity is to ensure , as far as possible, that these will have sufficient liquidity to meet their respective liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risk damage to their reputation.
The Company assessed the concentration of risk with respect to refinancing its debt and concluded it to be low. The Company has access to a sufficient variety of sources of funding and debt maturing within 12 months can be rolled over with existing lenders.

The Company rely mainly on long-term debt obligations to fund their construction activities. To the extent available at acceptable terms, utilized non-recourse debt to fund a significant portion of the capital expenditures and investments required to construct and acquire our wind and solar power plants and related assets. The Company's non-recourse financing is designed to limit default risk and is a combination of fixed and variable interest rate instruments. In addition, the debt is typically denominated in the currency that matches the currency of the revenue expected to be generated from the benefiting project, thereby reducing currency risk. The majority of non-recourse debt is funded by banks and financial institutions, with debt capacity supplemented by

The table below summarizes the maturity profile of financial liabilities of Company based on contractual undiscounted payments:

Year ended 31 March 2019	**On demand**	**Less than 3 months**	**3 to 12 months**	**1 to 5 years**	**> 5 years**	**Total**
Borrowings (other than preference shares)						
Term loan from banks*	-	-	-	15,791	-	15,791

* Including future interest payments.

41 Significant accounting judgments, estimates and assumptions

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the accompanying disclosures. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

In the process of applying the accounting policies management has made certain judgements, estimates and assumptions. The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based their assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

A) Accounting judgements:

Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgment is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

The Company makes various assumptions and estimates while computing deferred taxes which include production related data (PLFs), projected operations and maintenance costs, projected finance costs, proposed availment of deduction under section 80IA of the Income Tax Act, 1961 and the period over which such deduction shall be availed, accelerated depreciation, other applicable allowances, usage of brought forward losses etc. While these assumptions are based on best available facts in the knowledge of management as on the balance sheet date however, they are subject to change year on year depending on the actual tax laws and other variables in the respective year. Given that the actual assumptions which would be used to file the return of income shall depend upon the tax laws prevailing in respective year, management shall continue to reassess these assumptions while calculating the deferred taxes on each balance sheet date and the impact due to such change, if any, is considered in the respective year.

Depreciation on property, plant and equipment

Depreciation on property, plant and equipment is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management. Considering the applicability of Schedule II of Companies Act, 2013, the management has re-estimated useful lives and residual values of all its property, plant and equipment. The management believes that depreciation rates currently used fairly reflect its estimate of the useful lives and residual values of property, plant and equipment, though these rates in certain cases are different from lives prescribed under Schedule II of the Companies Act, 2013.

Basis legal opinion obtained, management is of the view that application of CERC and/or SERC rates for the purpose of accounting for depreciation expenses is not mandatory. Hence, Company is depreciating the assets bases on life as determined by an expert.

B) Estimates and assumptions:

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values.

Assumptions include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 38 and for further disclosures.

Related party transactions

Management Shared Services

Employee benefit costs and other common expenses are incurred by the Holding Company & fellow subsidiary. These expenses are allocated to all the entities of the Group in the form of 'Management Shared Services'. Allocation of cost to the entities involves various estimates, reasonability of which is assessed through an external expert.

Estimates used:
Retention of shareholders cost by the Holding Company / fellow subsidiary: 7.50%
Allocation of Cost for Projects under construction vis-a-vis operating projects: 5:1
Profit mark-up: 5% plus applicable taxes

Financial instrument

The Group makes inter-group investments in the form of RNCPS and CCDs. These investment carries interest at a nominal rate and are accounted for as compound financial instruments under Ind AS 32. The rate used for discounting the future cash flows approximate the average market interest rate of borrowings availed by Group.

Inter-group unsecured loan

The Group uses unsecured loans to fund requirements of various entities. These loans carry interest rate of 8% (approximates 3-year government bond yield).

Inter-Group EPC

The Group through a few companies undertake the EPC activity for entities within group and for third parties. The Group basis a report from an external expert charges a profit margin in the range on 3-5%.

42 The Company has received a show cause notice from Competition Commission of India (the "CCI") dated 28 February 2019 under regulation 48 of the Competition Commission of India (General) Regulations, 2009 read with section 43A of the Competition Act, 2002 in relation to ReNew Power's Group's acquisition of Ostro Energy Private Limited in terms of regulation 8 of the Competition Commission of India (Procedure in regard to the transaction of business in relation to combinations) Regulations, 2011 (Combination Regulations).

The Company has filed a petition before CCI submitting that the acquisition was not required to be reported based on exemption available in act for "small target exemption".

The Company believes that it has merits in its submission. Impact, if any, of the above mentioned show-cause notice is not likely to be material. Accordingly, no adjustment has been made to these financial statements.

43 Capital management

For the purpose of the capital management, capital includes issued equity capital, compulsory convertible debentures, share premium and all other equity reserves attributable to the equity holders of the Company. The primary objective of the Company's management is to maximise the shareholder value.

The Company manage their capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants.

To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Company monitor capital using a gearing ratio, which is net debt divided by total capital plus net debt. The Company includes within net debt, interest bearing loans and borrowings, other payables, less cash and short-term deposits.

The policy of the Company is to keep the gearing ratio of the power project to 3:1 during the construction phase and aim to enhance it to 4:1 post the construction phase. This is in line with the the industry standard ratios. The current gearing ratios for the various projects in the Company is between 3:1 to 4:1.

In order to achieve this overall objective, the capital management of the Company, amongst other things, aims to ensure that they meet financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. There have been no breaches in the financial covenants of any interest-bearing loans and borrowing in the current period.

No changes were made in the objectives, policies or processes for managing capital during the period ended 31 March 2019.

44 Commitments Liabilities and Contingencies
(to the extent not provided for)

(i) Contingent liabilities

At 31 March 2019, the Company has contingent liabilities of INR Nil (31 March 2017: Nil)

(ii) Commitments:

Estimated amount of contracts remaining to be executed on capital account and not provided for

At 31 March 2019, the Company has capital commitment (net of advances) pertaining to commissioning of wind energy projects of INR 6,432 (31 March 2018: INR 14,240).

45 Details of dues to Micro, Small and Medium Enterprises as defined under the MSMED Act, 2006

Under the Micro, Small and Medium Enterprises Development Act, 2006, (MSMED) which came into force from 2 October 2006, certain disclosure are required to be made relating to Micro, Small and Medium Enterprises. On the basis of the information and records available with the management, there are no outstanding dues to the Micro, Small and Medium Enterprises development Act, 2006.

Particulars	As at 31 March 2019	As at 31 March 2018
The principal amount and the interest due thereon (to be shown separately) remaining unpaid to any supplier as at the end of each accounting year/period	Nil	Nil
The amount of interest paid by the buyer in terms of section 16, of the Micro Small and Medium Enterprise Development Act, 2006 along with the amounts of the payment made to the supplier beyond the appointed day during each accounting year/period	Nil	Nil
The amount of interest due and payable for the period of delay in making payment (which have been paid but beyond the appointed day during the year/period) but without adding the interest specified under Micro Small and Medium Enterprise Development Act, 2006.	Nil	Nil
The amount of interest accrued and remaining unpaid at the end of each accounting year/period; and	Nil	Nil
The amount of further interest remaining due and payable even in the succeeding years, until such date when the interest dues as above are actually paid to the small enterprise for the purpose of disallowance as a deductible expenditure under section 23 of the Micro Small and Medium Enterprise Development Act, 2006	Nil	Nil

46 During the previous year, the Company has reached settlement with certain suppliers/contractors for compensation for loss of revenue on account of delay commissioning of Sadla project. Resultantly, an amount of INR 255 towards liquidated damages (LDs) has been recognised in the statement of profit & loss.
Since, the said LDs are directly linked to delay in creating profit making apparatus, the same has been considered as capital receipt and thus has not been included in Book Profit under section 115JB of the Income Tax Act, 1961.

47 Absolute amounts less than INR 500,000 are appearing in the financial statements as "0" due to presentation in millions.

INDEPENDENT AUDITOR'S REPORT

To the Members of ReNew Power Limited (formerly known as ReNew Power Private Limited and ReNew Power Ventures Private Limited)

Report on the Standalone Ind AS Financial Statements

We have audited the accompanying standalone Ind AS financial statements of ReNew Power Limited (formerly known as ReNew Power Private Limited and ReNew Power Ventures Private Limited) ("the Company"), which comprise the Balance Sheet as at 31 March 2018, the Statement of Profit and Loss, including the statement of Other Comprehensive Income, the Cash Flow Statement for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Standalone Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone Ind AS financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial control that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these standalone Ind AS financial statements based on our audit. We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder. We conducted our audit of the standalone Ind AS financial statements in accordance with the Standards on Auditing, issued by the Institute of Chartered Accountants of India, as specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the standalone Ind AS financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the standalone Ind AS financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on whether the Company has in place an adequate internal financial controls system over financial reporting and the effectiveness of such controls. An audit also

Annexure 1 referred to in paragraph 1 of our report of even date under section 'Report on other legal and regulatory requirements'

Re: ReNew Power Limited ('the Company')

(i) (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets.

(b) Fixed assets have been physically verified by the management during the year and no material discrepancies were identified on such verification.

(c) According to the information and explanations given by the management, the title deeds of immovable properties included in property, plant and equipment are held in the name of the Company. It has been explained to us that the title deeds of 10 cases of freehold land have been given as security (mortgage and charge) against the senior secured bonds and that original title deeds are kept with the security trustees – Vistra ITCL India Limited and IDBI Trusteeship Services Limited as trustee for the bond holders and therefore the same could not be made available to us for our verification and have also not been independently confirmed by the security trustee. Further title deeds for 7 cases of freehold land amounting to Rs. 7 million were not available with the Company and hence we are unable to comment on the same.

(ii) The Company's business does not involve inventories and accordingly, the requirements under paragraph 3(ii) of the Order are not applicable to the Company.

(iii) According to the information and explanations given to us, the Company has not granted any loans, secured or unsecured to companies, firms or other parties covered in the register maintained under section 189 of the Companies Act, 2013. Accordingly, the provisions of clause 3(iii)(a) and (b) of the Order are not applicable to the Company and hence not commented upon.

(iv) In our opinion and according to the information and explanations given to us, there are no loans, guarantees and securities granted in respect of which provisions of section 185 of the Companies Act, 2013 are applicable. Further, since the Company is an infrastructure company within the meaning of Schedule VI of the Companies Act, 2013, the provision of section 186 of the Companies Act, 2013 is not applicable.

(v) The Company has not accepted any deposits within the meaning of Sections 73 to 76 of the Act and the Companies (Acceptance of Deposits) Rules, 2014 (as amended). Accordingly, the provisions of clause 3(v) of the Order are not applicable.

(vi) We have broadly reviewed the books of account maintained by the Company pursuant to the rules made by the Central Government for the maintenance of cost records under section 148(1) of the Companies Act, 2013 and are of the opinion that prima facie, the specified accounts and records have been made and maintained. We have not, however, made a detailed examination of the same.

(vii)(a) Undisputed statutory dues including income-tax, goods & service tax, customs duty, provident fund, cess and other material statutory dues have generally been regularly deposited with the appropriate authorities though there has been a slight delay in a few cases. The provisions relating to employees' state insurance and excise duty are not applicable to the Company.

(b) According to the information and explanations given to us, no undisputed amounts payable in respect of income-tax, goods & service tax, customs duty, provident fund, cess and other statutory dues were outstanding, at the year end, for a period of more than six months from the date they became payable. The provisions relating to employees' state insurance and excise duty are not applicable to the Company.

(c) According to the information and explanations given to us, there are no dues of income tax, goods & service tax, customs duty, excise duty and cess which have not been deposited on account of any dispute.

(viii) In our opinion and according to the information and explanations given by the management, the Company has not defaulted in repayment of dues to a bank, financial institutions or debenture holders. The Company did not have any loans or borrowing in respect of government during the year.

(ix) In our opinion and according to the information and explanations given by the management, the Company has utilized the monies raised by way of term loans and debentures for the purposes for which they were raised. The Company has not raised moneys by way of initial public offer / further public offer.

(x) Based upon the audit procedures performed for the purpose of reporting the true and fair view of the financial statements and according to the information and explanations given by the management, no fraud by the Company or no fraud on the Company by the officers and employees of the Company has been noticed or reported during the year.

(xi) According to the information and explanations given by the management, the provisions of section 197 read with Schedule V of the Act is not applicable to the Company and hence reporting under clause 3(xi) are not applicable and hence not commented upon.

(xii) In our opinion, the Company is not a nidhi company. Therefore, the provisions of clause 3 (xii) of the order are not applicable to the Company and hence not commented upon.

(xiii) According to the information and explanations given by the management, transactions with the related parties are in compliance with section 177 and 188 of Companies Act, 2013 where applicable and the details have been disclosed in the notes to the financial statements, as required by the applicable accounting standards.

(xiv) According to the information and explanations given by the management, the Company has complied with provisions of section 42 of the Companies Act, 2013 in respect of the preferential allotment or private placement of shares during the year. According to the information and explanations given by the management, we report that the amounts raised, have been used for the purposes for which the funds were raised. The Company has not raised funds through fully or partly convertible debentures during the year.

(xv) According to the information and explanations given by the management, the Company has not entered into any non-cash transactions with directors or persons connected with him as referred to in section 192 of Companies Act, 2013.

Annexure 2 to the Independent Auditor's Report of even date on the Ind AS financial statements of ReNew Power Limited

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of ReNew Power Limited ("the Company") as of 31 March 2018 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's Management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting with reference to these Ind AS financial statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing as specified under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting with reference to these Ind AS financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls over financial reporting with reference to these Ind AS financial statements and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting with reference to these Ind AS financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls over financial reporting with reference to these Ind AS financial statements.

Meaning of Internal Financial Controls Over Financial Reporting with reference to these Ind AS financial statements

A company's internal financial control over financial reporting with reference to these Ind AS financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally

... Company's internal financial controls over financial reporting with [illegible]

Inherent Limitations of Internal Financial Controls over Financial Reporting with reference to these Ind AS financial statements

[illegible] inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls over [illegible]

1 General information

ReNew Power Limited ('the Company') (Formerly known as 'ReNew Power Private Limited' and 'ReNew Power Ventures Private Limited') is a public limited company domiciled in India. The Company was converted into a public company with effect from 17 April 2018 and consequently the name of the Company has changed from ReNew Power Private Limited to ReNew Power Limited.

During the year, the Company issued and allotted 10,000 Non -Convertible Debentures at a face value of INR 1 each to (Total value INR 10,000) for the purpose of refinancing of existing term loans on 26 February 2018 and the same are listed under the Wholesale Debt Market Segment of National Stock Exchange with effect from 22 May 2018.

The registered office of the Company is located at 138, Ansal Chamber - II Bhikaji Cama Place, New Delhi-110066. The Company is carrying out business activities relating to generation of power through non-conventional and renewable energy sources.

The Financial Statements of the Company were authorised for issue by the Company's Board of Directors on 16 July 2018.

2 Basis of preparation

The Company prepared its Financial Statements as per Ind AS prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015, as amended.

The Financial Statements have been prepared using presentation and disclosure requirements of the Schedule III of Companies Act, 2013.

The Financial Statements have been prepared on a historical cost basis, except for the following assets and liabilities which have been measured at fair value:

- Financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments)

3 Summary of Significant Accounting Policies

a) Use of Estimates

The preparation of Financial Statements in conformity with Ind AS requires the Management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the Management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

b) Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it is:

- Expected to be realised or intended to sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is treated as current when it is:

- Expected to be settled in normal operating cycle
- Held primarily for the purpose of trading
- Due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets/liabilities are classified as non-current assets/liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation/settlement in cash and cash equivalents. The company has identified twelve months as their operating cycle for classification of their current assets and liabilities.

c) Fair value measurement

The Company measures financial instruments, such as, derivatives at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.
The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:
- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy. (Refer Note 35 and 36).

At each reporting date, the management of the Company analyses the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the accounting policies of the Company.

At each reporting date, the management of the Company analyses the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the accounting policies of the Company.

For assets and liabilities that are recognised in the Financial Statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For assets and liabilities that are recognised in the Financial Statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

This note summarises the accounting policy for determination of fair value. Other fair value related disclosures are given in the relevant notes as following:
· Disclosures for significant estimates and assumptions (Refer Note 43)
· Quantitative disclosures of fair value measurement hierarchy (Refer Note 36)
· Financial instruments (including those carried at amortised cost) (Refer Note 35)

d) Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. The following specific recognition criteria must also be met before revenue is recognised:-

Sale of Power

Income from supply of power is recognized on the supply of units generated from the plant to the grid, as per the terms of the PPA entered into with the state electricity board/ private customers.

Generation based Incentive

Income from generation based incentive is recognized on the basis of supply of units generated by the company to the state electricity board from the eligible project in accordance with the scheme of the "Generation Based Incentive (GBI) for Grid interactive Wind Power Projects"

Income form services (Management Consultancy)

Revenue from projects management/ technical consultancy are recognized as per the terms of the agreement on the basis of services rendered.

Sale of Reduction Emission Certificates (RECs)

Income from sale of RECs is recognised on sale of these certificates.

Income from liquidated damages, compensation for loss of revenue and interest on advances

Income from liquidated damages, compensation for loss of revenue and interest on advance is recognised after certainty of receipt of the same is established.

Dividend

Dividend income is recognised when the right of the Company to receive dividend is established by the reporting date.

Interest income

For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in finance income in the Statement of Profit and Loss.

Income from government grants

Refer note (g) for accounting policy.

e) Foreign currencies

The Company Financial Statements are presented in Indian rupees (INR), which is also the functional currency and the currency of the primary economic environment in which the Company operate.

Transactions and balances

Transactions in foreign currencies are initially recorded by the company at their functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

Exchange differences arising on settlement or translation of monetary items are recognised in profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items that are measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e. translation differences on items whose fair value gain or loss is recognised in Other Comprehensive Income (OCI) or profit or loss are also recognised in OCI or profit or loss, respectively).

f) Income taxes

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in India. Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate. Current income tax assets and liabilities are offset if a legally enforceable right exists to set off these.

Deferred Tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date. Deferred tax liabilities are recognised for all taxable temporary differences.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised. The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

In situations where company is entitled to a tax holiday under the Income-tax Act, 1961, enacted in India, no deferred tax (asset or liability) is recognized in respect of temporary differences which reverse during the tax holiday period. Deferred taxes in respect of temporary differences which reverse after the tax holiday period are recognized in the year in which the temporary differences originate. However, the company restrict the recognition of deferred tax assets to the extent that it has become reasonably certain that sufficient future taxable income will be available against which such deferred tax assets can be realized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in OCI or equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Minimum Alternate Tax

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Company.

g) Government grants

Government grants are recognized where there is reasonable assurance that the grant will be received and all attached conditions will be compiled with. When the grant related to an expense item, it is recognized as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant related to an asset, it is recognized as income in equal amounts over the expected useful life of the related asset.

When the company receive grants of non-monetary assets, the asset and the grant are recorded at fair value amounts and released to profit or loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset i.e. by equal annual instalments.

The company presents grants related to an expense item as other income in the Statement of Profit and Loss. Thus, Generation based incentive and Sale of emission reduction certificates have been recognised as other income.

Generation based Incentive
Generation based incentive is recognized on the basis of supply of units generated by the Company to the state electricity board from the eligible project in accordance with the scheme of the "Generation Based Incentive (GBI) for Grid interactive Wind Power Projects"

h) Property, plant and equipment

Capital work-in-progress, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred.

Subsequent Costs
The cost of replacing a part of an item of property, plant and equipment is recognised in the carrying amount of the item of property, plant and equipment, if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably with the carrying amount of the replaced part getting derecognised. The cost for day-to-day servicing of property, plant and equipment are recognised in Statement of Profit and Loss as and when incurred.

As permitted by Ind AS 101 First-time Adoption of Indian Accounting Standards, the company has continued to apply paragraph 46A of AS 11 The Effects of changes in Foreign Exchange Rates under Indian GAAP.

Accordingly, the Company adjusts exchange differences arising on translation/settlement of long-term foreign currency monetary items recognised in the financial statements for the period ending immediately before the beginning of the first Ind AS financial reporting period pertaining to the acquisition of a depreciable asset to the cost of the asset and depreciates the same over the remaining life of the asset. In accordance with MCA circular dated August 09, 2012, exchange differences adjusted to the cost of fixed assets are total differences, arising on long-term foreign currency monetary items pertaining to the acquisition of a depreciable asset, for the period. In other words, the company do not differentiate between exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost and other exchange difference.

Gains or losses arising from de-recognition of PPE are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

Derecognition
An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised. The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

i) Intangible assets

Intangible assets acquired separately are measured in initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses.
The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with finite life are reviewed at least at the end of each reporting period.

j) Depreciation/amortization of PPE

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets as follows:

Category	Years
Plant and equipment (solar rooftop projects)*	25 years or terms of power purchase agreement, whichever is less (15-25 years)
Plant and equipment (wind power projects)*	25
Plant and equipment (others)	5-18
Office equipment	5
Furniture and fixture	10
Computers	3
Computer servers	6
Computer softwares	3-6
Leasehold improvements	Over the period of lease i.e. 5

* Based on an external technical assessment, the management believes that the useful lives as given above and residual value of 0%-5%, best represents the period over which management expects to use its assets and its residual value. The useful life of plant and equipment is different from the useful life as prescribed under Part C of Schedule II of Companies Act, 2013.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

k) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale. Borrowing costs consist of interest, discount on issue, premium payable on redemption and other costs that an entity incurs in connection with the borrowing of funds (this cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs). The borrowing costs are amortised basis the Effective Interest Rate (EIR) method over the term of the loan. The EIR amortisation is recognised under finance costs in the Statement of Profit or Loss. The amount amortized for the period from disbursement of borrowed funds upto the date of capitalization of the qualifying assets is added to cost of the qualifying assets.

l) Leases

As a leasee

Operating lease payments are recognised as an expense in the statement of profit and loss on a straight-line basis over the lease term

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

m) Impairment of non-financial assets

The company assess, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the company estimate the asset’s recoverable amount. An asset’s recoverable amount is the higher of an asset’s or cash-generating units (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre -tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company’s CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the statement of profit and loss.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Profit or Loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as an increase in revaluation.

n) Share based payments

Company provides additional benefits to certain members of senior management and employees of the Company and a subsidiary in the form of share-based payments, whereby employees render services as consideration for equity instruments (equity-settled transactions).

Equity-settled transactions

The cost of equity-settled transactions is determined by the fair value at the date when the grant is made using an appropriate valuation model.

The cost is recognized, together with a corresponding increase in share-based payment reserve in equity, over the period in which the performance and/or service conditions are fulfilled in employee benefit expenses. The cumulative expense recognized for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Company's best estimate of the numbers of equity instruments that will ultimately vest. The statement of profit and loss expense or credit for a period represents the movement in cumulative expense recognized as at the beginning and end of that period and is recognized in employee benefit expense.

Service and non-market performance conditions are not taken into account when determining the grant date fair value of awards, but the likelihood of the conditions being met is assessed as part of the Company's best estimate of the number of equity instruments that will ultimately vest. Market performance conditions are reflected within the grant date fair value. Any other condition attached to an award, but without associated service requirement, are considered to be non-vesting conditions. Non-vesting conditions are reflected in the fair value of an award and lead to an immediate expensing of an award unless there are also service and/or performance conditions.

No expense is recognized for awards that do not ultimately vest because of non-market performance and/or service conditions have not been met. Where awards include a market or non-market condition, the transaction are treated as vested irrespective of whether the market or non-vesting condition is satisfied, provided that all other performance and/or service condition are satisfied.

Share based payment cost, to the extent pertaining to the employees of subsidiary, is reduced from employee benefit expenses of the Company and is considered as deemed investment in the form of capital contribution in the subsidiary.

o) Retirement and other employee benefits

Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The company recognize contribution payable to the provident fund scheme as an expense, when an employee renders the related service.

The Company operates a defined benefit plan in India, viz., gratuity. The cost of providing benefit under this plan is determined on the basis of actuarial valuation at each year-end carried out using the projected unit cost method.

Remeasurements comprising of actuarial gain and losses, the effect of the asset ceiling, excluding amount recognized in the net interest on the defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognized in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods.

Accumulated leave, which is expected to be utilized within the next twelve months, is treated as short term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company treats the accumulated leave expected to be carried forward beyond twelve months, as long term employee benefit for measurement purposes. Such long term compensated absences are determined on the basis of actuarial valuation at each year-end carried out using the projected unit cost method. Remeasurements comprising of actuarial gain and losses are recognized in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods. The Company presents the leave as current liability in the balance sheet, to the extent is does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where Company has unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

Past service costs are recognised in Statement of Profit or Loss on the earlier of:
- The date of the plan amendment or curtailment, and
- The date that the Company recognises related restructuring costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Company recognises the following changes in the net defined benefit obligation as an expense in the Statement of Profit and Loss:
- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- Net interest expense or income

p) Provisions

Provisions are recognised when the company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the Statement of Profit and Loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

q) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

Debt instruments at amortised cost

A ‘debt instrument’ is measured at the amortised cost if both the following conditions are met:
a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss.

Debt instruments at fair value through other comprehensive income (FVTOCI)

A ‘debt instrument’ is classified as at the FVTOCI if both of the following criteria are met:
a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
b) The asset’s contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the P&L. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to Statement of P&L. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

Debt instruments at fair value through profit or loss (FVTPL)

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as ‘accounting mismatch’). The company has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of P&L.

Equity investments

All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS 103 applies are classified as at FVTPL. For all other equity instruments, the Company may make an irrevocable election to present the subsequent changes in the fair value in OCI. The Group makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to Statement of Profit and Loss, even on sale of investment. However, the company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

Other equity investments

All other equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS103 applies are classified as at FVTPL. For all other equity instruments, the company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised when:
- The rights to receive cash flows from the asset have expired, or
- The respective company has transferred their rights to receive cash flows from the asset or have assumed the obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; And
- Either the companies under the company has transferred substantially all the risks and rewards of the asset, or has neither transferred nor retained substantially all the risks and rewards of the asset, but have transferred control of the asset.

When the Company have transferred their rights to receive cash flows from an asset or have entered into a pass-through arrangement, they evaluate if and to what extent they have retained the risks and rewards of ownership. When they have neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the company continues to recognise the transferred asset to the extent of the continuing involvement of company. In that case, the company also recognise an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the company could be required to repay.

Impairment of financial assets

In accordance with Ind AS 109, the company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on all the financial assets and credit risk exposure.
The Company follows 'simplified approach for recognition of impairment loss allowance on trade receivables or contract revenue receivables.

The application of simplified approach does not require the Company to track changes in credit risk. Rather it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/expense in the Statement of profit and loss (P&L).

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and in the case of loans and borrowings and payables, net of directly attributable transaction costs.
The financial liabilities of the company include trade and other payables, derivative financial instruments, loans and borrowings including bank overdraft.

Subsequent measurement

The measurement of financial liabilities depends on their classification as discussed below:-

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss. This category generally applies to borrowings.

The Company recognise debt modifications agreed with lenders to restructure their existing debt obligations. Such modifications are done to take advantage of falling interest rates by cancelling the exposure to high interest fixed rate debt, pay a fee or penalty on cancellation and replace it with debt at a lower interest rate (exchange of old debt with new debt). The qualitative factors considered to be relevant for modified financial liabilities include, but are not limited to, the currency that the debt instrument is denominated in, the interest rate (that is fixed versus floating rate), conversion features attached to the instrument and changes in covenants. The accounting treatment is determined depending on whether modifications or exchange of debt instruments represent a settlement of the original debt or merely a renegotiation of that debt. The exchange of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability.

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit or Loss.

Compound Instruments- Compulsory Convertible Debentures (CCDs)

Compulsory Convertible Debentures (CCDs) are separated into liability and equity components based on the terms of the contract

Basis the terms of these compound financial instruments the distributions to holders of an equity instrument are being recognised by the entity directly in equity. Transaction costs of an equity transaction are being accounted for as a reduction from equity.

The company recognises interest, dividends, losses and gains relating to such financial instrument or a component that is a financial liability as income or expense in profit or loss.

The present value of the liability part of the compulsory convertible debentures classified under financial liabilities and the equity component is calculated by subtracting the liability from the total proceeds of CCDs.

Transaction costs that relate to the issue of a compound financial instrument are allocated to the liability and equity components of the instrument in proportion to the allocation of proceeds. Transaction costs that relate jointly to more than one transaction (for example, cost of issue of debentures, listing fees) are allocated to those transactions using a basis of allocation that is rational and consistent with similar transactions.

Convertible Preference Shares

Convertible preference shares are separated into liability and equity components based on the terms of the contract. On issuance of the convertible preference shares, the fair value of the liability component is determined using a market interest rate for an equivalent non-convertible instrument. This amount is classified as a financial liability measured at amortised cost (net of transaction costs) until it is extinguished on conversion or redemption. The remainder of the proceeds is allocated to the conversion option that is recognised and included in equity since conversion option meets Ind AS 32 criteria for fixed to fixed classification.

Transaction costs are deducted from equity, net of associated income tax. The carrying amount of the conversion option is not remeasured in subsequent years. Transaction costs are apportioned between the liability and equity components of the convertible preference shares based on the allocation of proceeds to the liability and equity components when the instruments are initially recognised.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged/ cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit or Loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

r) Cash and Cash-Equivalents

Cash and short-term deposits in the balance sheet comprise cash at banks and cash in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the Statement of cash flows, cash and cash equivalents consist of cash and short term deposits, as defined above, net off bank overdrafts as they considered an integral part of the Company's cash management.

s) Measurement of EBITDA

The company has elected to present earnings before interest, tax, depreciation and amortization (EBITDA) as a separate line item on the face of the Statement of Profit and Loss. The company measure EBITDA on the basis of profit/ (loss) from continuing operations. In their measurement, the companies include interest income but do not include depreciation and amortization expense, finance costs and tax expense.

t) Events occurring after the Balance Sheet date

Impact of events occurring after the balance sheet date that provide additional information materially effecting the determination of the amounts relating to conditions existing at the balance sheet date are adjusted to respective assets and liabilities.

The Company does not adjust the amounts recognised in its financial statements to reflect non-adjusting events after the reporting period.

The Company makes disclosures in the financial statement in cases of significant events.

u) Contingent liabilities

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

v) Earnings per equity share

Basic earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares outstanding during the period. Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issue data later date. Dilutive potential equity shares are determined independently for each period presented.

The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented for any share splits and bonus shares issues including for changes effected prior to the approval of the financial statements by the Board of Directors.

'The dilutive effect of outstanding options is reflected as additional share dilution in the computation of diluted earnings per share'

w) Standards issued but not yet effective:

In March 2018, the Ministry of Corporate Affairs issued the Companies (Indian Accounting Standards) Amendments Rules, 2018, notifying new accounting standard Ind AS 115, ‘Revenue from Contracts with Customers’ and certain amendments to existing standards. The new standard and amendments are applicable to the Group from 1 April 2018.

Ind AS 115 Revenue from Contracts with Customers:

Revenue from contracts with Customers outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. The standard replaces most current revenue recognition guidance. The core principle of the new standard is for companies to recognize revenue to depict the transfer of goods or services to customers in amounts that reflect the consideration to which the company expects to be entitled in exchange for those goods or services. The new standard also will result in enhanced disclosures about revenue, provide guidance for transactions that were not previously addressed comprehensively including service revenues and contract modifications and improve guidance for multiple-element arrangements. The new Standard will come into effect for the annual reporting periods beginning on or after 1 April 2018.

The Group is evaluating the requirements of the new standard and the effect on the financial statements is being evaluated, thus impact is not known.

Amendments to Ind AS 12 Recognition of Deferred Tax Assets for Unrealised Losses:

The amendments clarify that an entity needs to consider whether tax law restricts the sources of taxable profits against which it may make deductions on the reversal of that deductible temporary difference. Furthermore, the amendments provide guidance on how an entity should determine future taxable profits and explain the circumstances in which taxable profit may include the recovery of some assets for more than their carrying amount.

Entities are required to apply the amendments retrospectively. However, on initial application of the amendments, the change in the opening equity of the earliest comparative period may be recognised in opening retained earnings (or in another component of equity, as appropriate), without allocating the change between opening retained earnings and other components of equity. Entities applying this relief must disclose that fact.

These amendments are effective for annual periods beginning on or after 1 April 2018. However, since the Group’s current practice is in line with the amendment, the Group does not expect any effect on its consolidated financial statements.

Appendix B to Ind AS 21 Foreign Currency Transactions and Advance Consideration:

The Appendix clarifies that, in determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration, the date of the transaction is the date on which an entity initially recognises the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, then the entity must determine the transaction date for each payment or receipt of advance consideration.

Entities may apply the Appendix requirements on a fully retrospective basis. Alternatively, an entity may apply these requirements prospectively to all assets, expenses and income in its scope that are initially recognised on or after:

(i) The beginning of the reporting period in which the entity first applies the Appendix, or
(ii) The beginning of a prior reporting period presented as comparative information in the financial statements of the reporting period in which the entity first applies the Appendix.

The Appendix is effective for annual periods beginning on or after 1 April 2018. The Group is evaluating the requirements of the new standard and the effect on the financial statements is being evaluated, thus impact is not known.

The Group has disclosed only those new standards or amendments that are expected to have an impact on its financial position, performance and disclosures.

At 31 March 2017	-	-	-	-
At 31 March 2018	-	-	-	-

Terms of conversion of CCDs
Compulsory Convertible Debentures (CCD) are redeemable by compulsory conversion into equity shares based on the service condition which is dependent on the number of months for which the debenture holder is in service at the Company from September 22, 2011 on a pro-rata basis upto maximum of 60 months. Further the conversion is also dependent on performance condition which is based on the enterprise value of the capital contributed. The conversion would happen at earliest of the following three events:
- the end of ten years from the date of issue, viz., September 23, 2011,
- filing of prospectus by the Company with the Registrar of Companies or
- on the decision of the Holding Company 'GS Wyvern Holding Ltd.'.

These CCD carry a non - cumulative interest coupon rate of 0.001% per annum on its face value. These CCD's do not have any voting right and are not entitled to any dividend on the underlying shares as long as they are not converted into equity shares. These CCD have been converted into 8,853,353 shares during financial year end 31 March 2017.

29 Earnings per share (EPS)	**For the year ended 31 March 2018**	**For the year ended 31 March 2017**

The following reflects the profit and share data used for the basic and diluted EPS computations:

Profit attributable to equity holders for basic earnings	860.89	812.94
	860.89	812.94
Net profit for calculation of basic EPS	860.89	812.94
Weighted average number of equity shares for calculating basic EPS	339,327,176	281,984,176
Basic earnings per share	2.54	2.88
Net profit for calculation of diluted EPS	860.89	812.94
Weighted average number of equity shares for calculating diluted EPS	346,071,290	300,493,604
Diluted earnings per share	2.49	2.71

	No. of shares	**No. of shares**
Weighted average number of equity shares in calculating basic EPS	339,327,176	281,984,176
Effect of dilution		
Convertible equity for compulsory convertible debentures (CCD)	-	7,806,127
Convertible equity for employee stock option plan	6,744,114	10,703,301
Weighted average number of equity shares in calculating diluted EPS	346,071,290	300,493,604

30 Gratuity and other post-employment benefit plans

Retirement benefit in the form of provident fund is a defined contribution scheme. The contributions to the provident fund are charged to the statement of profit and loss for the year when the contributions are due. The Company has no obligation, other than the contribution payable to the provident fund.

The Company has a defined benefit gratuity plan. Gratuity is computed as 15 days salary, for every completed year of service or part thereof in excess of 6 months and is payable on retirement/termination/resignation. The benefit vests on the employees after completion of 5 years of service. The Gratuity liability has not been externally funded. The Company makes provision of such gratuity liability in the books of accounts on the basis of actuarial valuation as per the projected unit credit method.

The following tables summarize the components of net benefit expense recognized in the statement of profit and loss and the unfunded status and amounts recognized in the balance sheet for the Gratuity.

Statement of profit and loss

Net employees benefit expense recognised in employee cost	**31 March 2018**	**31 March 2017**
Current service cost	3.86	7.30
Interest cost on benefit obligation	0.38	1.49
Net benefit expense*	**4.24**	**7.78**

* This amount is inclusive of amount capitalised in different projects.

Balance Sheet

Benefit asset/(liability)	**31 March 2018**	**31 March 2017**
Present value of unfunded obligation	(8.73)	(25.57)
Net liability	**(8.73)**	**(25.57)**

	31 March 2018	**31 March 2017**
Changes in the present value of the defined benefit obligation		
Opening defined benefit obligation	25.57	12.80
Current service cost	3.86	6.79
Interest cost	0.38	0.99
Remeasurements during the period due to:		
- Experience adjustments	(0.50)	1.40
- Change in financial assumptions	(0.27)	3.59
- Change in demographic assumptions	-	-
Liabilities settled *	(20.30)	-
Closing defined benefit obligation	8.73	25.57

* Liability transferred on account of transfer of certain employees from ReNew Power Limited (holding company).

Since the entire amount of plan obligation is unfunded therefore changes in fair value of plan assets, categories of plan assets as a percentage of the fair value of total plan assets and Company's expected contribution to the plan assets for the next year is not given.

The principal assumptions used in determining gratuity obligations	**31 March 2018**	**31 March 2017**
Discount rate	7.75%	7.40%
Salary Escalation	10.00%	10.00%

The estimates of future salary increases considered in actuarial valuation take account of inflation, total amount of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

The Company regularly assesses these assumptions with the projected long-term plans and prevalent industry standards. The impact of sensitivity due to changes in the significant actuarial assumptions on the defined benefit obligations is given in the table below:

Particulars	**Change in assumptions**	**31 March 2018**	**31 March 2017**
Discount rate	+ 0.5%	8.37	24.06
	- 0.5%	(9.12)	(27.23)
Salary escalation	+ 0.5%	8.78	26.64
	- 0.5%	(8.69)	(24.52)

The sensitivity analysis above has been determined based on a method that extrapolates the impact on defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting period.

Gratuity amounts for current year and previous years	**31 March 2018**	**31 March 2017**	**31 March 2016**	**31 March 2015**	**31 March 2014**
Defined benefit obligation	8.73	25.57	12.80	6.95	3.59
Surplus/(Deficit)	(8.73)	(25.57)	(12.80)	(6.95)	(3.59)
Experience adjustment on plan (gain)/loss	0.50	3.59	(0.33)	(0.66)	0.53

Projected plan cash flow:

The table below shows the expected cash flow profile of the benefits to be paid to the current membership of the plan based on past service of the employees as at the valuation date:

Maturity Profile	**31 March 2018**	**31 March 2017**
Within next 12 months	0.74	0.89
Between 2 and 5 years	2.14	6.51
Between 5 and 10 years	5.77	8.49
Beyond 10 years	11.03	63.81

The weighted average duration to the payment of these cash flows is 8.64 years (31 March 2017: 12.39 years).

Risk analysis
The Company is exposed to a number of risks in the defined benefit plans. Most significant risks pertaining to defined benefits plans and management estimation of the impact of these risks are as follows:

· Inflation risk: Currently the Company has not funded the defined benefit plans. Therefore, the Company will have to bear the entire increase in liability on account of inflation.
· Longevity risk/life expectancy: The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and at the end of the employment. An increase in the life expectancy of the plan participants will increase the plan liability.
· Salary growth risk: The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. An increase in the salary of the plan participants will increase the plan liability.

Defined contribution plan:	**31 March 2018**	**31 March 2017**
Contribution to provident fund & other fund charged to statement of profit & loss*	9.36	36.87

*This amount is inclusive of amount capitalized in different projects.

31 Operating lease commitments

The Company has entered into commercial property lease for various projects. The lease have non-cancellable commitment period which has remaining term of 5 years. The Company has the option, under some of its leases, to lease the assets for additional terms of upto three years.

Future minimum rentals payables under non- cancellable operating lease (excluding lease equalisation reserve) are as follows

Particulars	**For the year ended 31 March 2018**	**For the year ended 31 March 2017**
Within one year	110.02	44.68
After one year but not more than five years	441.48	29.56

33 Share Based Payment

The Company has four share-based payment schemes for its employees:
2017 Stock Option Plan, 2016 Stock Option Plan, 2014 Stock Option Plan and 2011 Stock Option Plan ('Group Stock Option Plans') approved by the board. According to the ESOP schemes, the employee selected by the compensation committee from time to time will be entitled to options as per grant letter issued by the committee, subject to satisfaction of prescribed vesting conditions.

Plans	Group Stock Option Plans
Grant Date	Multiple
Vesting period	**2017 Stock Option Plan** **Time linked vesting:** i) 50 % of grants will vest in 5 years on quarterly basis which shall commence one year after the date of grant of options ii) Remaining 50% will vest at the end of 5 years from the date of grant. **2016 Stock Option Plan** **Time linked vesting:** 5 years on quarterly basis which shall commence one year after the date of grant of option **Performance linked vesting:** The Options shall vest annually and shall be prorated over a period of 3 years from the date of Grant and shall be subject to the threshold EBIDTA achieved by the Company for the last completed financial year. **2014 Stock Option Plan** **Time linked vesting:** 5 years on quarterly basis which shall commence one year after the date of grant of option **2011 Stock Option Plan** **Time linked vesting:** 5 years from the grant date
Exercise period	Within 10 years from date of grant upon vesting
Exercise price	INR 100 to Rs 340
Settlement type	Equity settled

The details of options outstanding under the ESOP schemes are summarized below:

Particulars	No of options (in million)	
	2017-18	2016-17
Outstanding at the beginning of the year	11.17	16.71
Granted during the year*	10.13	5.33
Forfeited during the year	0.10	0.02
Repurchase during the year	0.04	-
Exercised during the year	0.03	10.84
Outstanding at the end of the year	21.14	11.17
Exercisable at the end of the year	17.53	4.26

- The weighted average exercise price of these options outstanding was INR 246.00 as on 31 March 2018 (31 March 2017: INR 159.98).
- The weighted average exercise price of these options granted during the year was INR 340.00 for the period ended 31 March 2018 (31 March 2017: INR 205.00)
- The weighted average exercise price of these options exercised during the period was INR 100.00 for the period ended 31 March 2018 (31 March 2017 128.18).
- The weighted average exercise price of these options forfeited/repurchased during the period was INR 226.00 for the period ended 31 March 2018 (31 March 2017 129.00).

Particulars	2017-18 *	2016-2017
Dividend yield (%)	1.5%	2%
Expected volatility (%)	15%	34%
Risk–free interest rate (%)	6.64% - 6.96%	6.90% - 8.53%
Weighted average remaining contractual life	7.85 years	6.87 years

The fair value of share options granted is estimated at the date of grant using black-scholes simulation model, taking into account the terms and conditions upon which the share options were granted.

* Based on Category I Merchant Banker report

34 Segment Information

The Chairmain and Managing Director of the Company takes decision in respect of allocation of resources and assesses the performance basis the reports/ information provided by functional heads and is thus considered to be Chief Operating Decision Maker.

The Company is in the business of development and operation of wind and solar power plant (refer note 1). Considering the nature of company's business and operations, there are no separate reportable segments (business and/ or geographical) in accordance with the requirements of Ind AS 108 'Operating segment' and hence, there are no additional disclosures to be provided other than those already provided in the financial statements.

The Revenues from three major customers (31 March 2017: two customers) under wind segment amounts to INR 2,471.69 (31 March 2017: INR 1,749.93) each of which contributes more than 10% of the total revenue of the Company.

35 Fair values

Set out below, is a comparison by class of the carrying amounts and fair value of the financial instruments of the Company, other than those with carrying amounts that are reasonable approximations of fair values:

	31 March 2018		**31 March 2017**	
	Carrying value	**Fair value**	**Carrying value**	**Fair value**
Financial assets				
Investments-non current, unquoted debt securities	3,936.92	3,936.92	-	-
Loans-non current	1,005.94	1,005.94	862.43	862.43
Bank deposits with remaining maturity for more than twelve months	2,263.22	2,263.22	30.02	30.02
Share application money pending allotment	-	-	2,540.00	2,540.00
Investments-current, quoted mutual funds	1,005.71	1,005.71	-	-
Trade receivables	3,295.77	3,295.77	3,394.65	3,394.65
Cash and cash equivalent	1,466.96	1,466.96	9,312.54	9,312.54
Bank balances other than cash and cash equivalent	1,099.29	1,099.29	1,937.56	1,937.56
Loans-current	47,251.52	47,251.52	10,001.02	10,001.02
Other current financial assets	4,294.65	4,294.65	2,842.90	2,842.90
	65,619.97			
Financial liabilities				
Non Convertible Debentures	28,146.25	28,146.25	13,704.96	13,704.96
Term loan in Indian rupees from bank	13,858.61	13,858.61	-	-
Term loan in Indian rupees from financial institutions	-	-	31.28	31.28
Short-term borrowings	7,617.89	7,617.89	5,001.66	5,001.66
Trade payables	1,004.35	1,004.35	1,059.64	1,059.64
Other current financial liabilities	1,481.92	1,481.92	2,411.42	2,411.42

The management of the Company assessed that current investments, cash and cash equivalents, trade receivables, trade payables, short term borrowings, other current financials liabilities and other current financial assets approximate their carrying amounts largely due to the short-term maturities of these instruments.

The financial assets above do not include investments in subsidiaries which are measured at cost in accordance with Ind AS 101, Ind AS 27 and Ind AS 28

The following methods and assumptions were used to estimate the fair values:

The fair values of the Company's non-convertible debentures, term loans from banks and financial institutions including current maturities are determined by using Discounted Cash Flow (DCF) method using discount rate that reflects the issuer's borrowing rate as at the end of the reporting period. The own non-performance risk as at 31 March 2018 was assessed to be insignificant.

36 Fair value hierarchy

The Company categorizes assets and liabilities measured at fair value into one of three levels depending on the ability to observe inputs employed in their measurement which are described as follows:
i) Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
ii) Level 2 - Inputs are inputs that are observable, either directly or indirectly, other than quoted prices included within level 1 for the asset or liability.
iii) Level 3 - Inputs are unobservable inputs for the asset or liability reflecting significant modifications to observable related market data or Company's assumptions about pricing by market participants.

The following table provides the fair value measurement hierarchy of the assets and liabilities of the Company :-

Quantitative disclosures fair value measurement hierarchy for assets/liabilities as at year end:

	Level of fair value measurement	**31 March 2018**		**31 March 2017**

37 Financial Risk Management objectives and policies

"The Company's principal financial liabilities comprise loans and borrowings, trade and other payables.
The main purpose of these financial liabilities is to finance the Company's operations and to support its operations. The Company's financial assets include loans, trade and other receivables, and cash & cash equivalents that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Company's senior management is supported by a various sub committees that advises on financial risks and the appropriate financial risk governance framework for the Company. These committees provides assurance to the Company's senior management that the Company's financial risk activities are governed by appropriate policies and procedure and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each risk, which are summarised as below.

Market Risk

Market risk is the risk that the Company's assets and liabilities will be exposed to due to a change in market prices that determine the valuation of these financial instruments. Market risk comprises 3 types of risk: interest rate risk, currency risk and other price risk such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings and deposits..

The sensitivity analyses in the following sections relate to the position as at 31 March 2018. The sensitivity analyses have been prepared on the basis that the amount of net debt and the ratio of fixed to floating interest rates of the debt are all constant as at 31 March 2018.

Interest rate Risk:

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to interest rate risk primarily from the external borrowings that are used to finance their operations. The Company also monitors the changes in interest rates and actively re finances its debt obligations to achieve an optimal interest rate exposure.

Interest Rate Sensitivity

The following table demonstrates the sensitivity to a reasonable possible change in interest rates on financial liabilities, i.e. floating interest rate of borrowings in INR. With all other variables held constant, the Company's profit before tax is affected through the impact on loans and borrowings, as follows:

	31 March 2018		31 March 2017	
	Increase/decrease in basis points	**Effect on profit before tax**	**Increase/decrease in basis points**	**Effect on profit before tax**
INR	+/(-)50	(-)/+ 4.60	+/(-)50	(-)/+ 7.00
	Increase/decrease in basis points	**Effect on equity**	**Increase/decrease in basis points**	**Effect on equity**
INR	+/(-)50	(-)/+ 3.16	+/(-)50	(-)/+ 4.84

Interest rate sensitivity has been disclosed for borrowings with floating rate of interest, for borrowings with fixed rate of interest, sensitivity disclosure has not been given

Foreign Currency Risk:

Foreign Currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company does not have any foreign currency exposures as on 31 March 2018. In case of foreign currency exposures, the Company monitors that the hedges do not exceed the underlying foreign currency exposure. The Company does not undertake any speculative transactions.

Credit Risk

Credit risk is the risk that the power procurer will not meet their obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from their operating activities (primarily trade receivables) but this credit risk exposure is insignificant given the fact that substantially whole of the revenues are from state utilities/government entities.

Further the Company sought to reduce counterparty credit risk under long-term contracts in part by entering into power sales contracts with utilities or other customers of strong credit quality and we monitor their credit quality on an on going basis.
The maximum credit exposure to credit risk for the components of the balance sheet at 31 March 2018 and 31 March 2017 is the carrying amount of all the financial assets.

Trade Receivables

Customer credit risk is managed basis established policies of Company, procedures and controls relating to customer credit risk management. Outstanding customer receivables are regularly monitored. The Company does not hold collateral as security.

The Company has state utilities/government entities as it's customers with high credit worthiness, therefore, the Company does not see any risk related to credit. The credit quality of the customers other than state utilities/government entities is evaluated based on their credit ratings and other publicly available data.

Financial instruments and credit risk

Credit risk from balances with banks is managed by group's treasury department. Investments, in the form of fixed deposits, of surplus funds are made only with banks and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed on an annual basis by the Company, and may be updated throughout the year subject to approval of group's finance committee. The limits are set to minimize the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

Liquidity Risk

Liquidity risk is the risk that the Company will encounter in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The approach of the Company to manage liquidity is to ensure , as far as possible, that these will have sufficient liquidity to meet their respective liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risk damage to their reputation.

The Company assessed the concentration of risk with respect to refinancing its debt and concluded it to be low. The Company has access to a sufficient variety of sources of funding and debt maturing within 12 months can be rolled over with existing lenders.

The Company rely mainly on long-term debt obligations to fund their construction activities. To the extent available at acceptable terms, utilized non-recourse debt to fund a significant portion of the capital expenditures and investments required to construct and acquire our wind and solar power plants and related assets. The Company's non-recourse financing is designed to limit default risk and is a combination of fixed and variable interest rate instruments. In addition, the debt is typically denominated in the currency that matches the currency of the revenue expected to be generated from the benefiting project, thereby reducing currency risk. The majority of non-recourse debt is funded by banks and financial institutions, with debt capacity supplemented by unsecured loan from

The table below summarizes the maturity profile of financial liabilities of Company based on contractual undiscounted payments:

Year ended 31 March 2018	On demand	Less than 3 months	3 to 12 months	1 to 5 years	> 5 years	Total
Borrowings						
Term loan from Banks *	-	-	-	16,377.75	-	16,377.75

38 Capital management

For the purpose of the capital management, capital includes issued equity capital, compulsory convertible debentures, share premium and all other equity reserves attributable to the equity holders of the Company. The primary objective of the Company's management is to maximise the shareholder value.

The Company manage their capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants.

To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Company monitor capital using a gearing ratio, which is net debt divided by total capital plus net debt. The Company includes within net debt, interest bearing loans and borrowings, other payables, less cash and short-term deposits.

The policy of the Company is to keep the gearing ratio of the power project to 3:1 during the construction phase and aim to enhance it to 4:1 post the construction phase. This is in line with the the industry standard ratios. The current gearing ratios for the various projects in the Company is between 3:1 to 4:1.

In order to achieve this overall objective, the capital management of the Company, amongst other things, aims to ensure that they meet financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. There have been no breaches in the financial covenants of any interest-bearing loans and borrowing in the current period.

No changes were made in the objectives, policies or processes for managing capital during the year ended 31 March 2018.

39 Commitments Liabilities and Contingencies
(to the extent not provided for)

(i) Contingent liabilities
At 31 March 2018, the Company has contingent liabilities of INR Nil (31 March 2017: Nil)

(ii) Commitments:
Estimated amount of contracts remaining to be executed on capital account and not provided for
At 31 March 2018, the Company has capital commitment (net of advances) pertaining to commissioning of wind energy projects of INR 14,239.72 (31 March 2017: 1,222.39).

40 Details of dues to Micro, Small and Medium Enterprises as defined under the MSMED Act, 2006

Under the Micro, Small and Medium Enterprises Development Act, 2006, (MSMED) which came into force from 2 October 2006, certain disclosure are required to be made relating to Micro, Small and Medium Enterprises. On the basis of the information and records available with the management, there are no outstanding dues to the Micro, Small and Medium Enterprises development Act, 2006.

Particulars	As at 31 March 2018	As at 31 March 2017
The principal amount and the interest due thereon (to be shown separately) remaining unpaid to any supplier as at the end of each accounting year/period	Nil	Nil
The amount of interest paid by the buyer in terms of section 16, of the Micro Small and Medium Enterprise Development Act, 2006 along with the amounts of the payment made to the supplier beyond the appointed day during each accounting year/period	Nil	Nil
The amount of interest due and payable for the period of delay in making payment (which have been paid but beyond the appointed day during the year/period) but without adding the interest specified under Micro Small and Medium Enterprise Development Act, 2006.	Nil	Nil
The amount of interest accrued and remaining unpaid at the end of each accounting year/period; and	Nil	Nil
The amount of further interest remaining due and payable even in the succeeding years, until such date when the interest dues as above are actually paid to the small enterprise for the purpose of disallowance as a deductible expenditure under section 23 of the Micro Small and Medium Enterprise Development Act, 2006	Nil	Nil

41 During the year, the Company has reached settlement with certain suppliers/contractors for compensation for loss of revenue on account of delay commissioning of Sadla project. Resultantly, an amount of INR 254.84 (31 March 2017: INR Nil) towards liquidated damages (LDs) has been recognised in the statement of profit & loss.

Since, the said LDs are directly linked to delay in creating profit making apparatus, the same has been considered as capital receipt and thus has not been included in Book Profit under section 115JB of the Income Tax Act, 1961.

42 Corporate social responsibility expenditure

(a) Gross amount required to be spent by the Company during the year is INR 8.21 (31March 2017: INR 5.31).
(b) Amount spent during the year on:

List of CSR activities	In Cash	Yet to be paid	Total
Construction / Acquisition of any asset	nil	nil	nil
Activities relating to:			
Current year	12.97	2.69	15.66
Previous year	(4.12)	(2.87)	(6.99)
1) Sanitation & making available safe drinking water- Construction of toilets, Bore-well, well, Tube-well etc. 2) Empowering women through SHGs (self-help group) and creating income generation activities for the women like stitching and tailoring, goatery, backyard poultry etc.) 3) Ensuring environmental sustainability- animal welfare Plantation, environment awareness, 4) Animal Welfare-Animal health camp, Para –vet training 5) Education awareness, Remedial classes for weak students etc. 6) Health and Hygiene- Health camps in the community, cleanliness drive to create awareness.			

43 Significant accounting judgments, estimates and assumptions

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the accompanying disclosures. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

In the process of applying the accounting policies management has made certain judgements, estimates and assumptions. The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based their assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

a) Accounting judgements

Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgment is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

The Company makes various assumptions and estimates while computing deferred taxes which include production related data (PLFs), projected operations and maintenance costs, projected finance costs, proposed availment of deduction under section 80IA of the Income Tax Act, 1961 and the period over which such deduction shall be availed, usage of brought forward losses etc. While these assumptions are based on best available facts in the knowledge of management as on the balance sheet date however, they are subject to change year on year depending on the actual tax laws and other variables in the respective year. Given that the actual assumptions which would be used to file the return of income shall depend upon the tax laws prevailing in respective year, management shall continue to reassess these assumptions while calculating the deferred taxes on each balance sheet date and the impact due to such change, if any, is considered in the respective year.

Accounting adjustment to ‘other equity’ on account of equity component of compound financial instruments with regard to compulsorily convertible debentures, have not been considered as part of the transition amount and interest income on loan to subsidiaries – redeemable preference shares has not been considered as part of book profits for the purpose of computation of MAT under section 115JB of the Income Tax Act, 1961 since these instruments are capital in nature and the interest income is notional in nature. The Company has considered advise by their legal counsel in this judgement

Depreciation on property, plant and equipment

Depreciation on property, plant and equipment is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management. Considering the applicability of Schedule II of Companies Act, 2013, the management has re-estimated useful lives and residual values of all its property, plant and equipment. The management believes that depreciation rates currently used fairly reflect its estimate of the useful lives and residual values of property, plant and equipment, though these rates in certain cases are different from lives prescribed under Schedule II of the Companies Act, 2013.

Basis legal opinion obtained, management is of the view that application of CERC and/or SERC rates for the purpose of accounting for depreciation expenses is not mandatory. Hence, Company is depreciating the assets bases on life as determined by an expert.

b) Estimates and assumptions

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values.

Assumptions include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 37 and 38 for further disclosures.

44 Absolute amounts less than INR 5,000 are appearing in the financial statements as "0.00" due to presentation in millions.
