SUSTAINABILITY
REPORT 2021

Nordic Group Of Companies

NORDIC® Flow Control | avitools | MULTIHEIGHT | AUSTIN ENERGY | ENSURE Engineering | EnviPure®

Table of Contents

1. Highlights

1.1 Corporate profile

Nordic Group Limited (**Nordic** or the '**Company**'), together with its subsidiaries (the '**Group**'), is a global solutions provider in areas of System Integration, Maintenance, Repair, Overhaul & Trading, Precision Engineering, Scaffolding, Insulation Services, Petrochemical & Environmental Engineering Services and Cleanroom, Air & Water Engineering Solutions. The Group's Precision Engineering operations is based in Suzhou, People's Republic of China (**PRC**); our head office and three production facilities are located in Singapore. The Group also has subsidiaries in Suzhou and Malaysia and is segregated into the following divisions:

- *Systems Integration Division:* We turn systems into solutions by providing Flow, Automation and Navigation solutions

- *Maintenance, Repair, Overhaul & Trading Division:* We provide after-sales service support for the marine, oil & gas and infrastructure industries.

- *Precision Engineering Division:* We design and build tooling systems, and provide turnkey production solutions for the aerospace, marine, medical, oil & gas, and electronic manufacturing industries.

- *Scaffolding Services Division:* We provide scaffolding and alternative access solutions for the oil & gas, petrochemical, construction and marine industries.

- *Insulation Services Division:* We specialise in supplying hot and cryogenic insulation, passive fireproofing and industrial coatings and thermal spray aluminium to the marine, oil and gas, petrochemical and pharmaceutical industries.

- *Petrochemical & Environmental Engineering Services Division:* We specialise in engineering repairs, maintenance, plant turnaround services as well as decontamination and recovery services to the petrochemical, manufacturing and infrastructure industries.

- *Cleanroom, Air & Water Solutions Division:* We specialize in cleanroom, air and water engineering solutions which includes tools hook up services, air pollution control scrubbers and water treatment plants for the semiconductor, oil and gas, power plant and municipality sectors.

Nordic was listed on the Mainboard of Singapore Exchange in 2010.

1.2 Message to stakeholders

On behalf of our Board of Directors, it is my pleasure to present our Sustainability Report for the financial year ended 31 December 2020 (**FY2020**).

The key to Nordic's success is our continuous commitments in providing engineering solutions with excellent quality through our extensive experience and expertise. These continuous commitments allowed the Group to build quality in our products and services while taking care of our society and environment.

While providing excellent quality solutions worldwide, the Group also emphasises on building a sustainable business model. Our management understands that to determine the performance of the Group, one has to look beyond the financial results. Thus, our management implemented several initiatives to ensure the Group contributes to the society and environment.

While involving in the engineering works, wastes such as solid wastes, chemical wastes and waste water are unavoidable during our daily operations. Hence, the management implemented strict operating procedures to handle the treatment and disposal of these wastes. Reusable wastes are identified, separately stored and recycled to minimise the wastes. Non-reusable wastes such as chemical wastes and waste waters are treated with special care and disposed through proper channels as per the requirements.

The Group has zero tolerance to workplace hazards and has over the years integrated work place safety to the corporate culture. From formal trainings to monitoring practices, the Group has strict set of policies to create a safe and healthy working environment for our employees. Notably, the Group has received several occupational safety and health related awards in year 2020 from our customers such as Pfizer, REC, PIPENET-APECO, Air Liquide, Chevron Oronite, Sebmcorp Marine and ExxonMobil.

The following sections of this Sustainability Report summarises more initiatives the Group has taken to ensure a sustainable business model and a brighter future for our society and environment.

Finally, we wish to confirm that the Board has considered sustainability issues as part of its strategic formulation, determined the material environmental, social and governance (**ESG**) factors and overseen the management and monitoring of the material ESG factors.

On behalf of the Board of Directors

CHANG YEH HONG
Executive Chairman

1.3 Scope of sustainability report

The scope of the report covers information on material sustainability aspects of Nordic, namely the Group's significant subsidiaries, Multiheight Scaffolding Pte Ltd (**Multiheight**), Nordic Flow Control Pte Ltd (**Nordic Flow Control**) and Envipure Pte Ltd (**Envipure**), from 1 January 2020 to 31 December 2020 unless otherwise specified. This should sufficiently address stakeholders' concerns in relation to sustainability issues arising from the major business operations of the Group.

This report is prepared in accordance with the Global Reporting Initiative (**GRI**) Standards: Core Option as it provides a set of an extensive framework that is widely accepted as a global standard for sustainability reporting. It also considers the Sustainability Reporting Guide in Practice Note 7.6 of the Singapore Exchange Securities Trading Limited (**SGX-ST**) Listing Manual. In preparing our report, we applied the GRI's principles for defining report content and report quality by considering the Group's activities, impacts and substantive expectations and interests of its stakeholders.

The data and information provided within the report have not been verified by an independent third party. We have relied on internal data monitoring and verification to ensure accuracy.
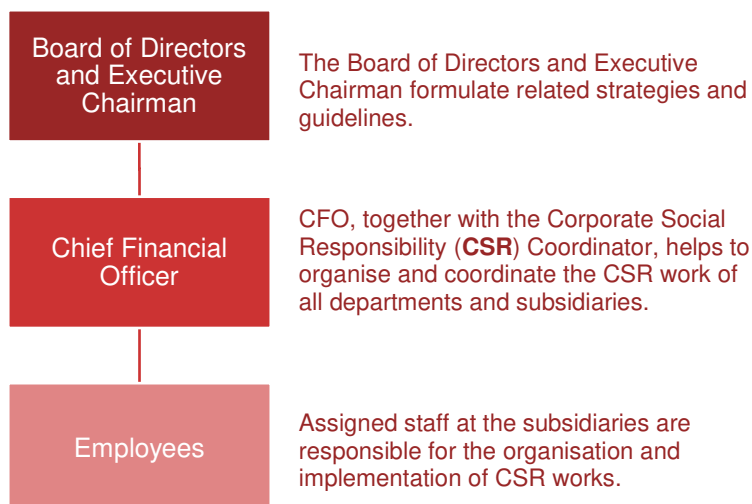

Sustainability contact

We welcome your views and feedback on our sustainability practices and reporting at sr@nordicgrouplimited.com.

2. Our approach to sustainability

2.1 Sustainability organisational structure

Sustainability is a vital part of our corporate strategy for achieving long-term growth. The values we create for our people, the environment and society at large very much determine our financial performance. We developed a sustainability organisational structure to move things forward:

Board of Directors and Executive Chairman	The Board of Directors and Executive Chairman formulate related strategies and guidelines.
Chief Financial Officer	CFO, together with the Corporate Social Responsibility (**CSR**) Coordinator, helps to organise and coordinate the CSR work of all departments and subsidiaries.
Employees	Assigned staff at the subsidiaries are responsible for the organisation and implementation of CSR works.

2.2 Sustainability strategy

At the Group, our sustainability strategy aims to create integrated values. Together with disciplined execution of our strategy and a commitment to doing business responsibly, we commit to deliver value to all our stakeholders through the following:

Workplace Safety · **Productivity** · **Environment Protection** · **People and Community**
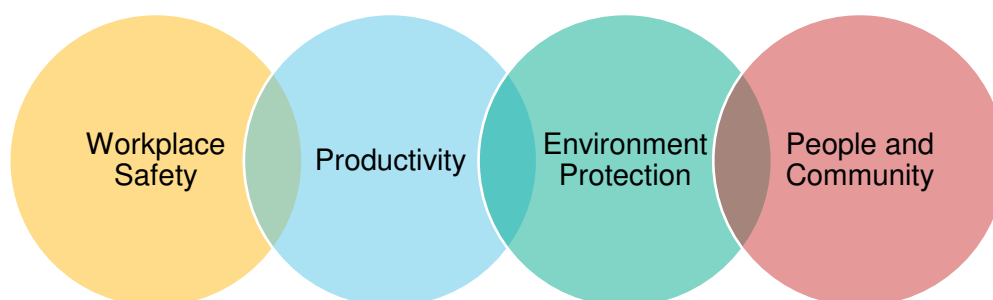

The sustainable strategy is underpinned by our comprehensive and extensive internal policies that covers the areas above such as performance monitoring, employee training, waste reduction and management, employee welfare and occupational safety and health.

The strategy is also guided by external sources, including ISO 9001, ISO 45001, ISO 14001, Singapore's Code of Corporate Governance, GRI Standards and Sustainability Reporting Guide in Practice Note 7.6 of the SGX-ST Listing Rules.

2.3 Sustainability materiality matrix

We recognise the need to continuously develop our responsible business approach in order to address growing stakeholder expectations around our impact on the economy, environment and society. As such, we periodically consult with our stakeholders to determine the issues that are most relevant to them and Nordic. Some of our stakeholder's comments can be found in **Appendix B**.

Using a materiality index, we align our responsible business priorities with the Nordic's principal business and operational risks, as illustrated in the diagram below.

We have also developed metrics to help us measure our progress, as indicated in our sustainability scorecard in **Appendix A**. We will review and adjust the matrix each year, as the external and business context changes.
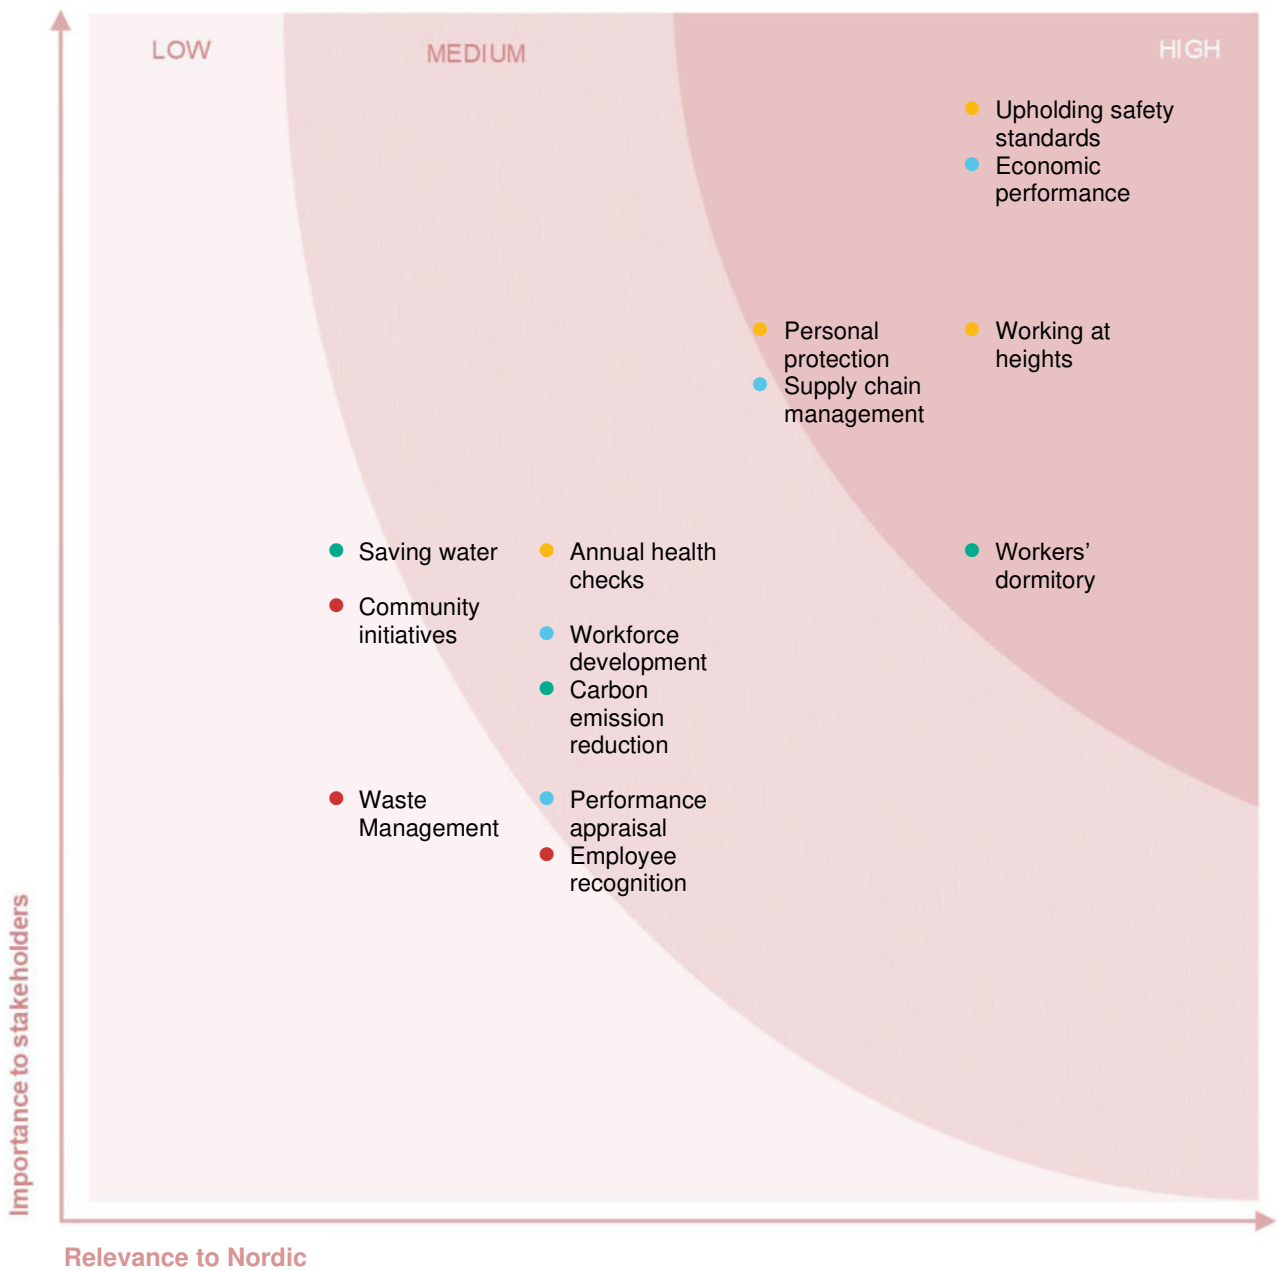

3. Our performance

3.1 How we measure our performance

Our **sustainability strategy** is embedded into the appropriate parts of our business, with dedicated teams for each focus area, and coordination by our relevant departmental managers.

Progress will be tracked in two key ways: measuring performance against metrics, and evaluating how well the programs have advanced, through a series of 'commitments'.

Metrics and targets

We have established key performance indicators for each of the four focus areas outlined in our **sustainability strategy** since we adopted sustainability reporting in 2017. Periodically, we plan to introduce new metrics and update targets to ensure alignment with our strategy.

Commitments

To ensure we have a robust sustainability program in place, we will also publish the key initiatives we plan to implement within the next year.

3.2 Workplace safety

Overview

Working in a highly regulated and hazardous industry, our Group adopts a culture where health and safety are of paramount importance. Our Group has set a policy that demands us to adhere to relevant legal and regulatory requirements and recognised industry standards. Our Group places high emphasis on safety and believes strongly in maintaining zero occupational injuries, diseases, property and environmental damage over the course of our work.

We constantly review and improve our internal processes; conduct proper training and planning to uphold our safety standards. Our people represent our Group's most important assets and we strive continuously to create a safe and healthy working environment for all our employees to thrive in.

Upholding safety standards

The Group has a set of policies that demand all employees to adhere to the relevant safety laws and regulations, industry standards as well as customer's requirements (e.g. ISO 45001:2018).

We understand that prevention is crucial when it comes to managing safety in the workplace. Each business unit has a designated Health, Safety and Environment (**HSE**) representative responsible to educate employees on the importance of safety in the workplace.

Monthly and yearly HSE meetings are conducted and attended by employees with the aim to increase the awareness of employees toward safety in the workplace, including the sharing of preferred safety practices and behaviors, and safety incidents during the period.

0
Fatalities

5
Serious incident

6
Workplace injuries

Other functions of the HSE representatives include the investigation of safety incidents and breaches. Investigation is carried out to identify the root cause and tabled during the HSE meeting for sharing.

In addition, employee performance appraisals include safety performance. Breaches to safety requirements will be reflected in the annual performance appraisal as demerit points.

While we believe that incident prevention is key, we also prepare our employees to handle and respond to the emergencies. This is important to reduce and limit the impact and casualty as a result of the incidents.

In 2020, the Group achieved 0 fatalities. However, there were 5 serious incidents and 6 workplace injuries involving our employees for which safety guidelines have been highlighted to the workers to prevent re-occurrence.

Going forward, we will continue to concentrate our efforts and work on upholding our safety standards to achieve the following:

- Ensure employee's compliance with the relevant safety regulations (internal and external);
- Utilise effective communication channels and HSE training programs that helps enhance the overall safety awareness of employees; and

Minimise serious incidents and workplace injuries and achieve zero fatalities.

Working at heights

The Group's engineering works will unavoidably expose employees to working at heights (**WAH**), particularly in our engineering repair and scaffolding businesses.

WAH is a major concern for the Group over the years as these incidents accounts for more than half of the workplace fatalities in Singapore. We strictly abide to the recommendations issued by the National WAH Taskforce to help reduce WAH accidents. From these initiatives, our workers will better understand the regulations and comply with the law while working safely at heights.

Our businesses have also received other quality certifications such as the ISO 45001:2018 – Erection & Dismantling of Metal Scaffolding and BizSAFE Star and Partner awards. These are testament to our achievements in meeting stringent quality and safety requirements over the years.

Personal protection

The Group has strict requirements on the use of Personnel Protective Equipment (PPE) in the worksites. Periodical inspection is conducted by the HSE department to ensure the proper use of PPEs by workers.

Workers who were found to be in breach of PPE requirements at the worksites will be subjected to strict internal penalties.

PPEs provided to the workers are also carefully chosen based on the quality and the safety needs of the workers conducting different engineering works.

Annual health checks

Working in hazardous environment can subject workers to health issues. To minimise the impact, the Group ensures high quality and adequate PPEs are used by workers all times.

In addition, worksites subjected to periodical internal as well as external inspections to ensure the worksites hazards are removed or controlled.

As required by ISO 45001:2018, the Group also provides periodical health checks for the employees to ensure the employees' health is properly monitored. Other than pre-employment health checks, special work positions depending on the exposure-level to hazards, such as chemicals, will be subject to additional in-depth health checks such as:

- Manganese contamination test for welders
- Blood test for benzene for chemical cleaners
- Health checks for asbestos workers

Safety awards and accreditation

The Group has received various safety awards over the years and these awards are testament to the Group's internal methodologies and processes which were thoroughly reviewed as part of the evaluation process for the award. The Group's performance in 2020 is as follows:

MULTIHEIGHT	• PIPENET-APECO Certificate of Appreciation in recognition for our contribution to HSE at Jurong Rock Caverns, Jurong Island • Air Liquide Certificate of Appreciation in recognition to their contribution to Micron 10A project for 500,000 safe man hours • Air Liquide Award for winning the inter-company 3nd Runner Up for Behaviour Safety • Chevron Oronite in recognition for our excellent support for an incident, injury and infection free year • ExxonMobil Safety Performance for an injury free 2020
NORDIC® Flow Control	• Sembcorp Marine WSH Performance Award 2000 for Zero Lost Time Injury from January to March 2020
EnviPure® We Purify The Environment	• REC Certificate of Appreciation in recognition of excellent support and commitment towards HSE • Micron Exyte Best Safe Worker Award for the month of December at Micron FAB 10A

Safety awareness and best practices begin with individual employee and transcend into the Group's overall safety culture. Our Group is delighted to receive these awards as they reflect our perseverance in promoting a safe work culture. Such awards also serve as a benchmark and encouragement for all our businesses to strive forward.

3.3 Productivity

Overview

Productivity is the key to the economic growth of a nation. Singapore has always emphasised on the productivity of the nation's work force to sustain economic growth. To contribute to the nation's economy, the Group keeps track of the productivity in every aspect of the businesses that includes securing new projects, exploring new business opportunities, value creation to the customers and their feedback, skills competency of employee and workers as well as resources acquisition and optimisation in the individual projects.

Economic performance

The Group strives to deliver upmost satisfaction to its customers by understanding their needs and meeting them through deliverables of the highest quality. This is reflected in the Group's safety and quality track records and various awards given by the customers. In addition, the Group has established a set of internal controls and process manuals to adhere to closely to ensure our work is completed to specification and of high quality, including ISO 9001:2008, ISO 45001:2018, ISO14001:2015 and BizSAFE Star.

In addition to these, we constantly seek for new solutions through innovation to keep abreast with the latest technology and processes in the industry and perform regular reviews of our quality policy requirements so as to adhere to stringent product and service consistency and legal requirements.

Supply chain management

To contribute to the local economy, the Group has close business relationship with reliable local suppliers. In 2020, 86.8% of the Group's purchases was spent on local suppliers. This was similar to the local purchases made in 2019.

Localised supply chains help us to develop closer relationships with our suppliers to ensure the proper alignment of our policies that will help us maintain a high level of quality and integrity in the procurement of goods and services for the Group. It also benefits the local economy, by economic value and job creation to the local communities.

The Group has comprehensive procurement policies and procedures in place to effectively manage our supply chain. This is crucial to help us to achieve our goals by optimising the resources available.

Our suppliers must abide by the general Terms and Conditions of our Purchase Contract or Purchase Order. The Group encourages fair competition between potential suppliers and fair purchase practices that achieve constructive business relationship.
Performance appraisal

To increase the productivity, the Group has comprehensive performance appraisal programme and rewards system based on the result of the appraisal. The performance appraisal programme is essential to the Group to understand the skills level of the employees and appropriate training programmes can be designed to fill up the skill gaps.

$49.0m
Revenue

86.8%
Purchases from local suppliers

% Purchases from local suppliers

Year	Value
2017	85
2018	95.7
2019	84.6
2020	86.8

The employee annual performance appraisal has at least 70% of quantifiable evaluation criteria. Also, the Group actively collects the information of the performance throughout the year such as inputs from direct supervisors, client scoring and feedbacks, mentor and mentee system for new employee, as well as periodical employee communication sessions.

This collected information allow the Group to understand the performance and skills development needs of each team and individual employee from multiple aspects. This is crucial for the Group to develop annual training programs for employee that are designed to enhance the skills of the employee and aims to improve the overall productivity.

In 2020, all of our employees are at least subject to an annual performance appraisal by their superiors. We seek to continue this practice in the coming year.

Workforce development

We believe in providing our employees a safe environment to work in, both from an internal control and industry standard perspective. We remain committed to provide equal and ample opportunities for employees to upgrade and hone their skill sets in order for them to excel. To achieve this, the management builds several two-way communication channels to ensure the career development needs of the employee are taken into consideration whenever it is possible.

Opportunities for continuous learning in the workplace is very important. Every employee has equal opportunities to upgrade and sharpen their skill sets through the well-planned training programs.

In 2020, the Group's employees received an average of 7.5 training hours each. Training Hours dropped significantly as compared to previous years because of restrictions placed due to the Covid-19 pandemic. Training centres were shut and restrictions placed on number of attendees when they reopened after the Circuit Breaker period. Internal trainings were also limited due to safe management measures where workers were not allowed to congregate or mix together from other companies/dormitories.
Hiring skilled workers continues to be a strategy adopted on repeat projects where no new skills were required.

Certified On-the-Job Training Centre (COJTC)

The Group has COJTCs at its subsidiaries, Multiheight and Ensure.

COJTCs are certified by Institute of Technical Education (**ITE**) of Singapore with the aim to help companies to develop high quality on-the-job training (**OJT**) practices. Companies to be certified for COJTC are required to meet strict standards and requirements that prove the company has quality OJT system. Periodical reviews will be conducted by ITE to ensure the certified companies continue to make efforts in improving their OJT system.

Having COJTCs in both Multiheight and Ensure allows the Group to provide highest quality of OJTs to the employee and conduct courses and specialised trainings to sharpen employees' skill sets.

3.4 Environmental protection

Overview

We are committed to environmental protection, reducing carbon emissions, preventing pollution, minimising wastage and utilising our resources efficiently. Our Group sets in place strict operating procedures to handle the treatment, disposal of waste and takes pride in adopting greener solutions constantly in our daily operations to reduce environmental pollution.

Comprehensive policies are developed to ensure the Group's commitment towards environmental protection, reducing carbon emissions, preventing pollution, minimising waste and efficiency on resources utilisation can be achieved during our daily operations and in every project that we undertake.

Carbon emission reduction

The corporate culture of protecting the environment is reflected in every operation and project undertaken by Nordic.

The Group committed to positive action on climate change and dedicated to reducing the carbon emission in our engineering projects. Employees are educated and reminded to save the electricity and diesel for transportation on a yearly basis through the HSE training program. The Group also has policies and procedures to guide employee to reduce energy consumption well ensuring the quality of works.

To determine the carbon footprint, we collect energy usage data from each of our businesses and then calculate our total annual greenhouse gas emissions.

In 2020, the Group generated a carbon footprint of 551.0 tonnes of carbon dioxide emission (tCO_2e) with a carbon emission intensity of 99.50 $kgCO_2e$ per square meter of total operation floor area. The intensity increased because of increased diesel consumption with the new safe management controls. The number of workers allowed on each vehicle was reduced drastically.

We follow the Greenhouse Gas Protocol established by the World Resources Institute and the World Business Council for Sustainable Development, the standard manual for measuring corporate greenhouse gas emissions. Using the "control method", we include 100% of the emissions associated with businesses which we directly control. Our carbon footprint includes:

- All fuels used directly by our companies (Scope 1 emissions)

- All purchased electricity used in our facilities (Scope 2 emissions)

The Group will continue its efforts and monitor the performance on the carbon emission reduction.

99.50kg

Carbon emission intensity per square meter of total operation floor area

Carbon Emisson (tonnes)
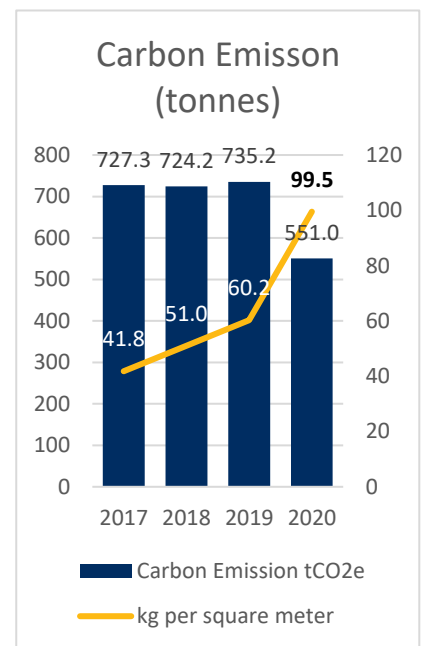

Waste management

Waste disposal is a significant environmental challenge to engineering projects. The Group adopts the procedures of reuse, treatment and dispose to handle the wastes created during the operation of engineering works.

As part of our on-going efforts to protect the environment, our Group implemented a waste recycling programme which involves the installation of separate bins to collect reusable waste for reuse. In 2020, the Group recycled a total of 34 tonnes of waste for reuse. The decrease is due to Envipure which is newly acquired and their engineering work has less recycled waste as compared to other entities like Austin and Ensure.

Chemicals and hydrocarbon waste products produced by the Group, such as paints and engine oil, are treated with special care, stored in locked and isolated environment, and disposed through proper biohazard disposal channels.

Saving water

Water scarcity is a growing concern around the world and a serious global challenge that we must work together to address. Water consumption in the engineering industries are intensive. Hence, the Group has adopted a wide range of measures to reduce water consumption at the project sites including water recycling system and HSE training program that remind employee to save and recycle the water.

In 2020, total water consumption of the Group was 10,942 liters with a water consumption intensity of 1.98 liters per square meter of total operation floor area. The significant increase was due to the workers living at the factory premises (temporary living quarters) due to the lockdown situation at several dormitories.
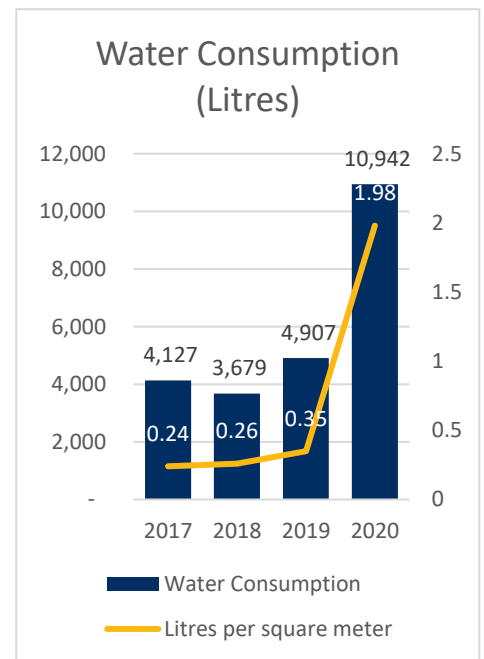

The Group will continue its efforts and monitor the performance on the water consumption. Progress and performance on the reduction on water consumption will be reported in the following year.

2019	4,907	0.35
2020	10,942	1.98

3.5 People and community

Overview

Our people are our most important asset. We strive to create an enjoyable working environment to our employees. The Group has various employee events and awards conducted to appreciate the efforts of our employees and recognise their accomplishments.

Through our people, we are also committed in making positive contributions to our community by giving back to the society and helping the less privileged.

Employee recognition

To recognise the efforts of our employees, the Group has various recognition awards to serve as encouragement for the employees to excel and grow together with the Company. These include long services award (for example, 5, 10, 15, 20 years etc) and safe performance self-assessment award (good behavioral approach towards safety in working).

The group understands the importance of having work life balance for employees. A happy working environment will bring the best out of the employees. Despite the pandemic, the group made time to recognise our workers who were hit the most by arranging appreciation lunch and dinner for them. The group also liaised with NGOs to organise and distribute basic necessities such as masks, hand sanitizers etc to our workers and to educate and constantly remind them to take care of their health. Other team bonding activities were put on hold but we hope to have more employee engagement in the coming year.

In 2020, the Group has an employee turnover rate of 37.9%. This was an decrease from 2019. This decrease was mainly due to workers being locked down with no flights to or from their countries. We will continue to listen to our employees and seek to identify ways to improve their working environment and ensure that their needs are met.

Worker's dormitory

The Group periodically assesses the needs of our employees and strives to reasonably improve their welfare.

Due to the Covid-19 pandemic, we have segregated our workers based on the cohorting plans across all the dormitories in Singapore. This allows us to have business continuity and also less stressful for our workers who were already locked down for long periods of time in April to July 2020.

Community initiatives

In FY2020, our Group did not take part or make donations in any community initiatives due to the shut down n restrictions in social gatherings due to the Covid-19 pandemic.

Appendix B: Consulting our stakeholders

We listen to our stakeholders and engage with them on an ongoing and ad hoc basis. An overview of our approach and rationale is set out below (with stakeholders listed in alphabetical order), together with the feedback we have received.

Stakeholders	How we listen	Why we do it	What you've told us
Customers	• Daily operations meetings • Site walks/ safety walks • Meetings with customer's procurement department	• Adhere to safety concerns • Adhere to health concerns • Adhere to environmental concerns for raw materials (insulation mat, diesel pump, chemicals)	• Provision of services required • Adhere to customers standards • Ability to meet customers delivery timelines
Employees	• Internal updates and communication • Events and functions • Company retreats • Project celebrations	• Training programme • Employee training • People developer • Proper upkeep of dormitories	• Equal opportunities • Career progression • Benefits and rewards • External courses
Regulatory authorities (SGX, MOM, IRAS)	• Regular updates and communication • Reports and compliance • Periodical meetings	• Good relationship between SGX and Company • Dialogue with SGX • Active participation in SGX events to increase visibility and transparency	• Compliance with relevant rules and regulations
Shareholder and investors	• SGX Announcements • Shareholder's meeting • Annual reports • Company's website • Regular updates and communication	• Committed to delivering economic value to our capital providers through a strong financial performance and our methods of engagement with them.	• Long-term profitability • Sustainability matters • Group's performance against targets • Compliance with all relevant requirements
Suppliers	• Supplier's meetings • Negotiation of special price for big projects	• Adhere to safety concerns	• Ability to meet Company's standards (e.g. BizSafe or ISO)
