Perubahan liabilitas manfaat polis masa depan diakui dalam laba rugi tahun berjalan. Liabilitas manfaat polis masa depan telah dihitung menggunakan metode Gross Premium Reserve maupun metode harian. Liability for future policy benefits is the amount of funds that must be provided by the insurer to pay benefits and claims in the future to the party as stated in the policy. Changes in liability for future policy benefits are recognised in profit or loss for the year. Liability for future policy benefits has been calculated using the Gross Premium Reserve method and the daily method. The assumptions used to calculate future liability reserves for policyholders with Gross Premium Reserves are based on the best estimate assumptions which include assumptions on mortality, morbidity, lapses expenses inflation rates, and interest rates.

Premi yang belum merupakan pendapatan adalah bagian dari premi yang belum diakui sebagai pendapatan karena masa pertanggungannya masih berjalan pada akhir tahun. B. Risiko pasar dan risiko likuiditas

(i) Manajemen risiko likuiditas

Risiko likuiditas adalah risiko akibat ketidakmampuan Bank untuk memenuhi kewajiban yang jatuh tempo dari sumber pendanaan arus kas dan/atau dari aset likuid berkualitas tinggi yang dapat diagunkan, tanpa mengganggu aktivitas dan kondisi keuangan Bank.

B. Market risk and liquidity risk

(i) Liquidity risk management

Liquidity risk represents the risk of Bank's inability to fulfill all financial liabilities when they become due from its financing cash flows and/or high quality liquid assets that can be pledged, without negatively impacting the Bank's activities and financial condition.

62. MANAJEMEN RISIKO (lanjutan)

B. Risiko pasar dan risiko likuiditas (lanjutan)

(i) Manajemen risiko likuiditas (lanjutan)

Untuk mengukur besarnya risiko likuiditas, Bank menggunakan beberapa indikator, antara lain adalah rasio Giro Wajib Minimum ("GWM") pada Bank Indonesia dan kas, Penyangga Likuiditas Makroprudensial ("PLM"), cadangan likuiditas, Rasio Intermediasi Makroprudensial ("RIM"), *Liquidity Coverage Ratio* ("LCR"), *Net Stable Funding Ratio* ("NSFR"), dan ketergantungan terhadap pendanaan nasabah besar.

GWM adalah simpanan minimum yang wajib dipelihara oleh Bank dalam bentuk saldo rekening giro pada Bank Indonesia atau surat berharga yang besarnya ditetapkan oleh Bank Indonesia sebesar persentase tertentu dari dana pihak ketiga (DPK). PLM merupakan persentase kepemilikan surat berharga Rupiah yang dapat digunakan dalam operasi pasar terbuka, antara lain SBI, SDBI, SBN, SRBI, dan BI-FRN.

Cadangan likuiditas adalah alat likuid Bank di atas GWM dengan fungsi untuk pemenuhan kebutuhan likuiditas yang tidak terjadwal. Dalam mengelola cadangan likuiditas, Bank memiliki batasan dalam bentuk limit *safety level*, yaitu proyeksi cadangan likuiditas Bank untuk 1 bulan ke depan. Pada tanggal 30 Juni 2026, cadangan likuiditas berada di atas *safety level*.

RIM adalah rasio hasil perbandingan antara kredit yang diberikan dan surat berharga korporasi yang memenuhi persyaratan tertentu yang dimiliki bank terhadap dana pihak ketiga, surat-surat berharga yang memenuhi persyaratan tertentu yang diterbitkan oleh Bank dan pinjaman yang memenuhi persyaratan tertentu yang diterima oleh Bank. Pada tanggal 30 Juni 2026. RIM Bank Mandiri saja sebesar 87,31%.

***62. RISK MANAGEMENT** (continued)*

B. Market risk and liquidity risk (continued)

(i) Liquidity risk management (continued)

The Bank's liquidity risk is measured through several indicators, which are minimum statutory reserve ratio ("GWM") in Bank Indonesia and cash, Macroprudential Liquidity Reserve ("PLM"), liquidity reserve, Macroprudential Intermediation Ratio ("RIM"), Liquidity Coverage Ratio ("LCR"), Net Stable Funding Ratio ("NSFR"), and dependency on large customer deposits.

GWM is a minimum deposits required to be maintained by the Bank in the form of current accounts with Bank Indonesia or marketable securities in which the amount is determined by Bank Indonesia based on certain percentage from total deposits from customers. PLM is an ownership percentage in Rupiah marketable securities which can be used in open market operations i.e., SBI, SDBI, SBN, SRBI, and BI-FRN.

Liquidity reserve is the Bank's liquidity on top of GWM to anticipate unscheduled liquidity needs. In managing the liquidity reserve, Bank has liquidity reserve limit in the form of safety level limit, which represents the Bank's liquidity reserve projection for one following month. As of 30 June 2026, the liquidity reserve balance is above the safety level.

RIM is a ratio of loans and qualified marketable securities owned by the Bank to the customer deposits qualified debt securities issued by the Bank and qualified borrowing received by the Bank. As of 30 June 2026. The Banks's RIM is 87.31%.

62. MANAJEMEN RISIKO (lanjutan)

B. Risiko pasar dan risiko likuiditas (lanjutan)

(i) Manajemen risiko likuiditas (lanjutan)

LCR merupakan rasio antara *High Quality Liquid Assets* (HQLA) dengan estimasi total arus kas keluar bersih (*net cash outflow*) selama 30 (tiga puluh) hari ke depan dalam skenario krisis. LCR bertujuan untuk meningkatkan ketahanan likuiditas jangka pendek Bank dalam kondisi krisis. Pada tanggal 30 Juni 2026. LCR Bank Mandiri saja sebesar 123,40%.

NSFR merupakan rasio perbandingan antara pendanaan stabil yang tersedia (*available stable funding*) dengan pendanaan stabil yang diperlukan (*required stable funding*). Pada tanggal 30 Juni 2026. NSFR Bank Mandiri saja sebesar 106,64%.

Kondisi likuiditas Bank di masa mendatang diproyeksikan melalui metodologi *liquidity gap*, yang merupakan *maturity mismatch* antara komponen-komponen aset dan liabilitas (termasuk *off-balance sheet*), yang disusun ke dalam periode waktu (*time bucket*) berdasarkan *contractual maturity* ataupun *behavioral maturity*. Pada tanggal 30 Juni 2026, proyeksi likuiditas Bank sampai dengan 12 bulan ke depan berada dalam posisi surplus. Meskipun proyeksi likuiditas 12 bulan ke depan surplus, Bank selalu mempersiapkan alternatif *funding* apabila kondisi likuiditas pasar menjadi ketat atau tidak sesuai dengan prediksi Bank.

Untuk mengetahui dampak perubahan faktor pasar maupun faktor internal pada kondisi ekstrim (krisis) terhadap kondisi likuiditas, Bank melakukan *stress testing* risiko likuiditas secara berkala. Hasil *stress testing* yang dilakukan telah dipaparkan kepada Manajemen. Hasil *stress testing* menunjukkan bahwa Bank dapat bertahan pada kondisi krisis likuiditas.

***62. RISK MANAGEMENT** (continued)*

B. Market risk and liquidity risk (continued)

(i) Liquidity risk management (continued)

LCR is a ratio between High Quality Liquid Assets (HQLA) with the estimation of total net cash outflow for the next 30 (thirty) days under a crisis scenario. LCR is used to improve the short-term liquidity of the Bank under a crisis conditions. As of 30 June 2026. The Bank's LCR is 123.40%.

NSFR is a ratio comparing the available stable funding to required stable funding. As of 30 June 2026. The Bank's NSFR is 106.64%.

The Bank uses liquidity gap methodology to project its liquidity conditions for the future. Liquidity gap is basically a maturity mismatch between components of assets and liabilities (including off-balance sheet), which are classified into time bucket based on their contractual maturity or behavioral maturity. As of 30 June 2026, the Bank's liquidity forecast up to next 12 months is at a surplus position. Even in the surplus position for the next 12 months, the Bank always prepares for alternative funding to anticipate tight liquidity in the market or the liquidity is not as expected.

To determine the impact of changes in market factors and internal factors under extreme conditions (crisis) to the liquidity, the Bank conducts stress testing of liquidity risk on a regular basis. The results of stress testing performed was presented to the Management. The stress testing result showed that the Bank will be able to survive under liquidity crisis conditions.

62. MANAJEMEN RISIKO (lanjutan)

B. Risiko pasar dan risiko likuiditas (lanjutan)

(i) Manajemen risiko likuiditas (lanjutan)

Meskipun hasil *stress testing* menunjukkan bahwa risiko likuiditas dapat dikelola dengan baik, Bank memiliki *Liquidity Contingency Plan* (LCP) yang meliputi strategi pendanaan dan strategi *pricing* dalam kondisi krisis, antara lain pinjaman pasar uang, *repo*, pinjaman bilateral, FX *swap* dan *wholesale funding*. Dalam LCP, penetapan kondisi likuiditas dan strategi-strategi pendanaan telah mempertimbangkan kondisi internal dan eksternal.

Dalam rangka mengantisipasi timbulnya risiko likuiditas akibat adanya perubahan faktor ekonomi global, Bank Mandiri memonitor indikator - indikator eksternal di antaranya: indONIA, suku bunga kebijakan Bank Indonesia (*BI Rate*), *yield* SUN 10 tahun, *outstanding* likuiditas perbankan Rupiah, Indeks Harga Saham Gabungan (IHSG), *rate interbank call money*, *yield* UST 10 tahun, nilai tukar USD/IDR, *Credit Default Swap* (CDS) 5 tahun Indonesia, serta informasi pasar terkini.

Pelaporan jatuh tempo pada tanggal 30 Juni 2026, 31 Desember 2025 dan 2024, didasarkan pada jangka waktu yang tersisa sejak tanggal-tanggal tersebut. Secara historis, terdapat bagian dari simpanan dalam jumlah yang cukup besar yang diperpanjang pada saat jatuh tempo. Selain itu, jika terdapat keperluan likuiditas, Obligasi pemerintah (portofolio diukur pada nilai wajar melalui laba rugi dan tersedia untuk dijual diukur pada nilai wajar melalui penghasilan komprehensif lain) dapat dicairkan dengan menggunakannya sebagai jaminan dalam pasar antar bank.

***62. RISK MANAGEMENT** (continued)*

B. Market risk and liquidity risk (continued)

(i) Liquidity risk management (continued)

Although the stress testing result showed liquidity risk is well managed, Bank has Liquidity Contingency Plan (LCP) in crisis condition which covers funding strategy and pricing strategy including money market borrowing, repo, bilateral borrowing, FX swap and wholesale funding. In LCP, determination of liquidity situations and funding strategies have considered internal and external conditions.

To anticipate liquidity risks due to volatility of global economic condition, Bank Mandiri monitors external indicators, including indONIA, BI Rate, 10-years SUN Yield, Rupiah Banking Liquidity Outstanding, Composite Stock Price Index (IHSG), Rate Interbank Call Money, 10-years UST Yield, USD/IDR Exchange Rate, Indonesia's 5-years Credit Default Swap (CDS) and the current market informations.

The maturity profile as of 30 June 2026, 31 December 2025 an 2024 are based on the remaining period from these dates. Historically, there were a large portion of deposits to be renewed upon maturity. In addition, if there is a need for liquidity, Government bonds (at fair value through profit or loss and fair value through other comprehensive income) can be exercised by utilising as collateral in interbank market.

(ii) Manajemen risiko suku bunga *portfolio banking book* (lanjutan)

Sumber risiko suku bunga *banking book* adalah *repricing risk* (*repricing mismatch* antara komponen aset dan liabilitas), *basis risk* (penggunaan suku bunga acuan yang berbeda), *yield curve risk* (perubahan bentuk dan *slope yield curve*) dan *option risk* (pelunasan kredit atau pencairan deposito sebelum jatuh tempo). Bank menggunakan *repricing gap* dan melakukan *sensitivity analysis* guna memperoleh proyeksi perubahan *Net Interest Income* ("NII").

a. Sensitivitas terhadap pendapatan bunga - neto

(ii) Interest rate risk management on banking book portfolio (continued)

The sources of banking book's interest rate risk are repricing risk (repricing mismatch between asset and liability components), basis risk (usage of different interest rate reference), yield curve risk (changes in shape and slope of the yield curve) and the option risk (loan repayment or redeem of deposit before maturity). The Bank uses the repricing gap and performs sensitivity analysis to obtain the projected Net Interest Income ("NII").

Untuk mengetahui dampak perubahan suku bunga dan nilai tukar pada kondisi ekstrim (krisis) terhadap pendapatan dan modal, Bank melakukan *stress testing* risiko pasar *banking book* secara berkala.

To assess the impact of changes in interest rates and exchange rates at extreme conditions (crisis) to earnings and capital, the Bank conducts stress testing on the market risk of banking book regularly.

(iii) Manajemen *pricing*

Bank menerapkan kebijakan *pricing* baik untuk produk dana maupun produk kredit. Kebijakan *pricing* merupakan salah satu strategi untuk memaksimalkan *Net Interest Margin* ("NIM") dan sekaligus mendukung Bank menguasai *market share* dengan mempertimbangkan kondisi persaingan.

Bank secara konsisten berupaya menerapkan strategi sebagai *market leader* dalam hal *pricing* pendanaan. Namun demikian, dengan mempertimbangkan kondisi likuiditas dan kebutuhan dana, Bank dapat menerapkan strategi agresif (lebih besar dari pesaing utama) atau defensif (sama atau lebih kecil dari pesaing utama).

(iii) Pricing management

The Bank implements pricing policy for loans or deposit products. The pricing policy is one of the Bank's strategy to maximise Net Interest Margin ("NIM") and to support the Bank to dominate the market share by considering the competition condition.

The Bank consistently manages to apply the strategy as market leader in terms of fund pricing. However, considering the liquidity conditions and funding needs, the Bank may implement an aggressive strategy (greater than major competitors) or defensive (equal to or smaller than major competitors).

(iii) Manajemen *pricing* (lanjutan)

Dalam menetapkan suku bunga kredit, Bank menerapkan *risk based pricing* yaitu pemberian suku bunga kredit kepada nasabah bervariasi berdasarkan tingkat risiko kreditnya. Dalam rangka meminimalkan risiko suku bunga, maka suku bunga kredit disesuaikan dengan suku bunga sumber dana pembiayaan. Selain biaya dana, suku bunga kredit ditetapkan dengan mempertimbangkan biaya *overhead*, premi risiko kredit dan marjin keuntungan Bank dengan tetap memperhatikan *competitiveness* dengan pesaing utama. Suku bunga kredit dapat berupa suku bunga mengambang (*floating rate*) atau suku bunga tetap (*fixed rate*) untuk tenor tertentu.

Risiko nilai tukar adalah potensi kerugian yang timbul akibat pergerakan nilai tukar di pasar yang berlawanan pada saat Bank memiliki posisi terbuka. Bank menerapkan manajemen risiko nilai tukar yang memadai sehingga terhindar dari kerugian akibat perubahan atau volatilitas nilai tukar. Risiko nilai tukar berasal dari transaksi valuta asing dengan nasabah atau *counterparty* yang menyebabkan posisi terbuka dalam valuta asing maupun posisi struktural dalam valuta asing akibat penyertaan modal. Bank mengelola risiko nilai tukar dengan melakukan pemantauan dan pengelolaan Posisi Devisa Neto ("PDN") sesuai dengan limit internal dan ketentuan Bank Indonesia.

(iv) Manajemen risiko nilai tukar

Perhitungan PDN pada tanggal 30 Juni 2026, 31 Desember 2025 dan 2024 berdasarkan Peraturan Bank Indonesia No. 12/10/PBI/2010 tanggal 1 Juli 2010 yang telah diperbaharui oleh Peraturan Bank Indonesia No. 17/5/PBI/2015 tanggal 29 Mei 2015 yang mengatur mengenai penghapusan peraturan PDN 30 menit. Sesuai dengan Peraturan Bank Indonesia, rasio PDN secara keseluruhan adalah penjumlahan nilai absolut dari selisih bersih antara aset dan liabilitas dalam laporan posisi keuangan untuk setiap mata uang asing yang dinyatakan dalam Rupiah ditambah dengan selisih bersih dari tagihan dan liabilitas komitmen dan kontinjensi, yang dicatat dalam rekening administratif, untuk setiap mata uang asing, yang dinyatakan dalam Rupiah.

(iii) Pricing management (continued)

In determine interest rates, the Bank implements risk-based pricing by providing a range of interest rate of loan to customers based on credit risk level. In order to minimize interest rate risk, the loan interest rate is adjusted with interest rate from cost of funds. Other than cost of funds, loan interest rates are determined with consideration to overhead costs, credit risk premiums and profit margins as well as taking into account the Bank's competitiveness with its major competitors. Interest rates for loan can be either a floating or a fixed rate for certain tenors.

Exchange rate risk represents potential loss arising from unfavourable exchange rate movements in the market when the Bank has an open position. The Bank applies a proper foreign exchange risk management to avoid loss arising from exchange rate changes or volatility. Exchange rate risk arises from foreign exchange currency transactions with customer or counterparty which leads to an open position in foreign currency or structural positions in foreign currencies due to capital investment. The Bank manages exchange rate risk by monitoring and managing the Net Open Position ("NOP") in accordance with internal limits and the regulation of Bank Indonesia.

(iv) Foreign exchange risk management

The calculation of the net open position as of 30 June 2026, 31 December 2025 and 2024 is based on Bank Indonesia's Regulation No. 12/10/PBI/2010 dated 1 July 2010 which amended by Bank Indonesia's Regulation No. 17/5/PBI/2015 dated on 29 May 2015 regarding removal implementation NOP 30 minutes. In accordance with Bank Indonesia Regulation, the overall NOP ratio is the total absolute amount from the net difference between assets and liabilities for each foreign currency on statement of financial position which presented in Rupiah added with the net difference between receivables and payables of commitments and contingencies for each foreign currency recorded in administrative which presented in Rupiah.

62. MANAJEMEN RISIKO (lanjutan)

B. Risiko pasar dan risiko likuiditas (lanjutan)

(v) Nilai wajar aset dan liabilitas keuangan (lanjutan)

Nilai wajar instrumen keuangan yang diperdagangkan dalam pasar aktif (misalnya efek yang diukur pada nilai wajar melalui laba rugi dan nilai wajar melalui penghasilan komprehensif lain) ditentukan berdasarkan harga pasar kuotasian pada tanggal pelaporan.

Suatu pasar dianggap aktif apabila informasi mengenai kuotasian dapat dengan mudah dan secara berkala tersedia dari suatu bursa, pedagang efek, atau *broker*, kelompok penilai harga pasar industri tertentu, regulator dan harga-harga tersebut mencerminkan transaksi pasar yang aktual dan reguler pada tingkat yang wajar. Harga pasar kuotasian untuk aset keuangan yang dimiliki Grup adalah harga penawaran sekarang. Instrumen-instrumen tersebut termasuk dalam Tingkat 1. Instrumen yang termasuk dalam Tingkat 1 umumnya meliputi investasi ekuitas dan surat hutang terdaftar di Bursa Efek Indonesia yang diklasifikasikan sebagai surat berharga yang diukur pada nilai wajar melalui laba rugi dan nilai wajar melalui penghasilan komprehensif lain.

Nilai wajar instrumen keuangan yang tidak diperdagangkan pada pasar aktif (meliputi derivatif *over the counter* dan obligasi pemerintah yang tidak aktif) ditentukan dengan teknik penilaian internal.

Teknik-teknik penilaian tersebut memaksimumkan penggunaan data pasar yang dapat diobservasi dan sedapat mungkin meminimalisir penggunaan estimasi yang bersifat spesifik dari entitas. Seluruh input yang dibutuhkan untuk menentukan nilai wajar instrumen keuangan dapat diobservasi dari pasar, oleh karena itu instrumen tersebut termasuk dalam Tingkat 2. Sebaliknya, jika salah satu atau lebih data tidak didasarkan pada data pasar yang dapat diobservasi, instrumen ini termasuk dalam Tingkat 3.

***62. RISK MANAGEMENT** (continued)*

B. Market risk and liquidity risk (continued)

(v) Fair value of financial assets and liabilities (continued)

The fair value of financial instruments traded in active markets (such as marketable securities which are measured at fair value through profit or loss and fair value through other comprehensive income) was determined based on quoted market prices at the reporting date.

A market is considered active if the information regarding price quotations can be easily obtained and regularly available from an exchange, securities dealer or broker, the market price of a particular industry assessors, regulators and those price reflects actual and regular market transactions at a fair value. Quoted market price for financial assets owned by the Group are using current offering price. These instruments are included in Level 1. The instruments included in Level 1 generally include investments in shares in IDX and debt securities classified as held for trading and fair value through other comprehensive income.

The fair value of financial instruments that are not traded in an active market (include over-the-counter derivatives and inactive government bonds) are determined by internal valuation techniques.

The valuation techniques maximise the use of observable market data when available and as far as possible to minimise the use of specific estimates of the entity. If all the inputs needed to determine the fair value of financial instruments are observable from market, therefore the instrument is included in Level 2. Instead, if one or more data is not based on observable market data, these instrument are included in Level 3.

(i) Giro pada Bank Indonesia, giro pada bank lain, penempatan pada Bank Indonesia dan bank lain, tagihan lainnya - transaksi perdagangan, tagihan atas efek-efek yang dibeli dengan janji dijual kembali, tagihan akseptasi dan aset lain-lain (lanjutan)

Estimasi nilai wajar terhadap penempatan dengan suku bunga tetap, tagihan lainnya - transaksi perdagangan, tagihan atas efek-efek yang dibeli dengan janji dijual kembali, tagihan akseptasi dan aset lain-lain ditetapkan berdasarkan diskonto arus kas dengan menggunakan suku bunga pasar uang yang berlaku untuk utang dengan risiko kredit dan sisa jatuh tempo yang serupa. Dikarenakan sisa jatuh tempo di bawah satu tahun, nilai tercatat dari penempatan dengan suku bunga tetap, tagihan lainnya - transaksi perdagangan, tagihan atas efek-efek yang dibeli dengan janji dijual kembali, tagihan akseptasi dan aset lain-lain adalah perkiraan yang layak atas nilai wajar.

(ii) Efek-efek dan obligasi pemerintah (diukur pada biaya perolehan dan biaya perolehan diamortisasi)

Nilai wajar untuk efek-efek dan obligasi pemerintah yang diukur pada biaya perolehan dan biaya perolehan diamortisasi ditetapkan berdasarkan harga pasar atau harga kuotasi perantara (*broker*)/pedagang efek (*dealer*). Jika informasi ini tidak tersedia, nilai wajar diestimasi dengan menggunakan harga pasar kuotasi efek yang memiliki karakteristik kredit, jatuh tempo dan *yield* yang serupa atau dinilai dengan menggunakan metode valuasi internal.

(v) Fair value of financial assets and liabilities (continued)

(i) Current accounts with Bank Indonesia, current accounts with other banks, placement with Bank Indonesia and other banks, other receivables - trading transactions, securities purchased under agreements to resell, acceptance receivables and other assets (continued)

The estimated fair value of fixed interest bearing placements, other receiveables - trading transactions, securities purchased under agreements to resell, acceptance receivables and other assets is based on discounted cash flows using prevailing money market interest rates for debts with similar credit risk and remaining maturity. Since the remaining maturity is below one year, the carrying amount of fixed interest bearing placements, other receiveables - trading transactions, securities purchased under agreements to resell, acceptance receivables and other assets is a reasonable approximation of fair value.

(ii) Marketable securities and government bonds (measured at cost and amortised cost)

The fair value for marketable securities and goverment bonds measured at cost and amortised cost is determined based on market prices or intermediary (broker)/dealer quotes. If this information is not available, the fair value is estimated using market prices of similar credit, maturity and yield securities or evaluated using internal valuation methods.

Estimasi nilai wajar dari kredit yang diberikan dan piutang/pembiayaan syariah, piutang pembiayaan konsumen serta investasi bersih dalam sewa pembiayaan mencerminkan jumlah diskonto dari estimasi kini dari arus kas masa depan yang diharapkan akan diterima. Nilai wajar dari kredit yang diberikan dan piutang/pembiayaan syariah, piutang pembiayaan konsumen serta investasi bersih dalam sewa pembiayaan ditentukan dengan mendiskontokan arus kas yang diharapkan pada tingkat suku bunga pasar terkini.

(iv) Simpanan dari nasabah dan simpanan dari bank lain, liabilitas atas efek-efek yang dijual dengan janji dibeli kembali, liabilitas akseptasi dan liabilitas lain-lain

Estimasi nilai wajar simpanan yang bisa ditarik kembali sewaktu-waktu, termasuk simpanan tanpa bunga, adalah sebesar jumlah terutang/nilai tercatat ketika utang tersebut dibayarkan.

Estimasi nilai wajar simpanan dengan tingkat suku bunga tetap, liabilitas atas efek-efek yang dijual dengan janji dibeli kembali, liabilitas akseptasi dan liabilitas lain-lain yang tidak memiliki kuotasi di pasar aktif ditetapkan berdasarkan diskonto arus kas dengan menggunakan suku bunga utang baru dengan sisa jatuh tempo yang serupa. Dikarenakan sisa jatuh tempo di bawah satu tahun, nilai tercatat dari simpanan dengan tingkat bunga tetap, liabilitas akseptasi dan liabilitas lain-lain adalah perkiraan yang layak atas nilai wajar.

The estimated fair value of loans and sharia receivables/financing, consumer financing receivables, and net investment in finance leases represents the discounted amount of estimated future cash flows expected to be received. The fair value of loans and sharia receivables/financing, consumer financing receivables, and net investment in finance leases is determined by discounting the expected future cash flows at current market interest rates.

(iv) Deposits from customers and other banks, securities sold under agreements to repurchase, acceptance payables and other liabilities

The estimated fair value of deposits that can be withdrawn at any time, includes non-interest bearing deposits, is the payable amount/carrying amount when the payable is paid.

The estimated fair value of fixed interest bearing deposits, securities sold under agreements to repurchase, acceptance payables and other liabilities not quoted in an active market is based on discounted cash flows using interest rates for new debts with similar remaining maturity. As the remaining maturity is below one year, the carrying amount of fixed interest bearing deposits, acceptance payables and other liabilities is a reasonable approximation of fair value.

(vi) *Value at Risk* (VaR)

Dalam pelaksanaan pengelolaan risiko pasar *trading*, Bank menerapkan prinsip *segregation of duties* dengan cara melakukan pemisahan antara unit *front office* (melaksanakan transaksi *trading*), unit *middle office* (melaksanakan proses manajemen risiko serta menyusun kebijakan dan prosedur) dan unit *back office* (melaksanakan proses *settlement* transaksi).

Analisa risiko pasar atas aktivitas *trading treasury* dilakukan secara harian menggunakan pendekatan sesuai *best practice* yang ada dan mengacu pada ketentuan internal dan eksternal yang berlaku, salah satunya melalui perhitungan VaR.

VaR adalah potensi kerugian maksimum dari posisi portofolio Bank (*open position*) dengan *confidence level* dan *holding period* tertentu dalam kondisi pasar yang normal. Metode perhitungan VaR yang digunakan Bank yaitu metode *Historical Simulation* yang tidak membutuhkan asumsi bahwa pergerakan faktor pasar terdistribusi normal. Bank menghitung VaR berdasarkan 250 hari data faktor pasar historis.

VaR is the maximum potential loss from the Bank's portfolio position (open position) with a certain confidence level and holding period under normal market conditions. The Bank calculates VaR based on 250 days of historical market factor data.

2. Pada tanggal 31 Desember 2023 untuk suku bunga acuan LIBOR dalam mata uang USD untuk tenor *overnight*, 1 (satu) bulan, 3 (tiga) bulan, 6 (enam) bulan dan 12 (dua belas) bulan.

Eksposur risiko Bank yang secara langsung terdampak dari reformasi acuan suku bunga terdiri dari *portfolio* kredit korporasi, transaksi derivatif dan *borrowing* yang menggunakan suku bunga acuan USD LIBOR.

Saat ini Bank telah menggunakan suku bunga acuan *Secured Overnight Financing Rate* (SOFR) atau suku bunga acuan lain yang disepakati untuk menggantikan suku bunga acuan USD LIBOR. Terkait suku bunga acuan SOFR, terdapat beberapa perbedaan antara USD LIBOR dan SOFR. USD LIBOR adalah "*term rate*", yang berarti USD LIBOR dipublikasikan untuk beberapa periode pinjaman (sebagai contoh 3 (tiga) bulanan atau 6 (enam) bulanan) dan bersifat "*forward looking*" (LIBOR dipublikasikan pada awal periode), sedangkan SOFR merupakan suku bunga acuan yang bersifat "*backward looking*", berdasarkan suku bunga *overnight* dari transaksi *actual*, dan dipublikasikan pada akhir periode *overnight*.

a. LIBOR (continued)

1. As of 31 December 2021, the reference interest rate is LIBOR for all tenors in GBP, EUR, CHF and JPY and in USD for 1 (one) week and 2 (two) months tenors.

2. On 31 December 2023, the reference interest rate is LIBOR in USD for the overnight tenor, 1 (one) month, 3 (three) months, 6 (six) months and 12 (twelve) months.

The Bank's risk exposures that are directly affected by the interest rate benchmark reform consist of a portfolio of corporate loans, derivative transactions and borrowing using the USD LIBOR benchmark interest rate.

Currently, the Bank has used to use the Secured Overnight Financing Rate (SOFR) benchmark interest rate or other agreed benchmark interest rate to replace the USD LIBOR benchmark interest rate. Regarding the SOFR benchmark interest rate, there are several differences between USD LIBOR and SOFR. USD LIBOR is the "term rate", which means that USD LIBOR is published for several loan periods (for example 3 (three) months or 6 (six) months) and is "forward looking" (LIBOR is published at the beginning of the period), while SOFR is the rate "backward-looking" benchmark interest rate, based on the overnight interest rate of actual transactions, and published at the end of the overnight period.

Selain itu, LIBOR merupakan tingkat suku bunga yang telah memperhitungkan *credit spread*, sementara SOFR saat ini adalah suku bunga yang hampir *risk free* berdasarkan transaksi pasar *repurchase agreement* (repo) US Treasury.

Untuk melakukan transisi atas kontrak dan perjanjian yang saat ini mengacu ke USD LIBOR menjadi mengacu ke suku bunga acuan alternatif (SOFR), diperlukan penyesuaian untuk memastikan bahwa kedua suku bunga acuan tersebut secara ekonomis setara.

Dari segi manajemen risiko pasar, Bank telah mengidentifikasi dan mengantisipasi perubahan yang terjadi pada aspek - aspek antara lain perubahan *market data*, yang selanjutnya berdampak pada hasil perhitungan *mark to market*, perhitungan dan monitoring VaR, dan perhitungan lain - lain terkait risiko pasar. Terhadap perubahan-perubahan yang terjadi tersebut, Bank telah melakukan penyesuaian pada sistem manajemen risiko pasar dan ketentuan internal terkait, serta telah melaporkan realisasi *enhancement* pada sistem ke regulator. Pada tahun 2024, seluruh transaksi derivatif *treasury* dengan mata uang USD telah menggunakan USD SOFR sebagai suku bunga acuannya.

Dalam hal kaitannya dengan risiko likuiditas, perubahan atas suku bunga acuan LIBOR menjadi suku bunga acuan alternatif lain juga dapat berdampak pada kondisi likuiditas Bank. Dalam hal ini, perubahan nominal pembayaran bunga kredit, transaksi derivatif dan/atau bunga pinjaman dapat berpengaruh pada nilai arus kas yang diterima atau dibayarkan oleh

a. LIBOR (continued)

In addition, LIBOR is an interest rate that has taken into account credit spreads, while SOFR is currently an almost risk free interest rate based on US Treasury repurchase agreement (repo) market transactions.

In order to make the transition of contracts and agreements that currently refer to USD LIBOR to refer to the alternative benchmark interest rate (SOFR), adjustments are needed to ensure that the two benchmark interest rates are economically equivalent.

In terms of market risk management, the Bank has identified and anticipated changes that occured in aspects including changes in market data, which in turn will have an impact on the results of the mark to market calculation, VaR calculation and monitoring, and other calculations related to market risk. With regard to these changes, the Bank has made adjustments to the market risk management system and has reported system enhancement realisation to the regulator. In 2024, all treasury derivative transactions with USD currency have used USD SOFR as benchmark interest rate.

In terms of liquidity risk, changes in the LIBOR benchmark interest rate to another alternative benchmark interest rate may also have an impact on the Bank's liquidity condition. In this case, changes in the nominal payment of credit interest, derivative transactions and/or loan interest may affect the value of cash flows received or paid by the Bank, including those

Bank juga telah melakukan kajian yang dibutuhkan dalam proses transisi terkait proses dan model valuasi instrumen keuangan.

Selain melakukan usaha berkelanjutan dalam pemantauan kondisi terkini terkait transisi USD LIBOR, Bank juga telah melakukan diskusi lebih intensif dengan pelaku industri baik yang berasal dari dalam maupun luar negeri dalam rangka *benchmark* serta komunikasi dengan Regulator untuk memastikan transisi perubahan suku bunga acuan dari USD LIBOR ke suku bunga acuan alternatif berjalan dengan baik, sekaligus meminimalisasi risiko yang muncul dari proses transisi tersebut.

As a form of market risk mitigation, as of 30 June 2026, 31 December 2025 and 2024, the Bank has identified the need for changes to the information system and the Bank has made adjustments to the system. The Bank has also conducted studies needed in the transition process related to the process and model of the valuation of financial instruments.

In 2023, the Bank has communicated with affected counterparties and/or customers to provide the latest information regarding changes that may occur as a result of the reform of the interest rate reference, specifically USD LIBOR, either through socialization, discussion or in writing. The Bank has identified areas that have a significant risk of discontinuing USD LIBOR, namely developing information systems and adjusting business processes to accommodate the use of alternative reference interest rates, conducting contract amendments/repapering and/or reviewing fallback clauses on existing contracts.

In addition to carrying out continuous efforts in monitoring the latest conditions related to the USD LIBOR transition, the Bank has also conducted more intensive discussions with industry players both from within and outside the country in the context of benchmarking and communication with Regulators to ensure the transition of changes in the benchmark interest rate from USD LIBOR to alternative interest rates went well, also to minimize the risk arising from the transition process.

(viii) Dampak Reformasi Acuan Suku Bunga (lanjutan)

b. JIBOR (lanjutan)

Selain itu, JIBOR merupakan tingkat suku bunga yang menggunakan metode perhitungan *simple average* (dengan *trimming* 15% *highest* dan 15% *lowest*) dan *in-advance* (*forward looking*), sementara indONIA menggunakan metode perhitungan *volume weighted average* (rata-rata tertimbang berdasarkan *volume*) dan *compounded in-advance, compounded in-arrears* atau *hybrid.* Untuk melakukan transisi atas kontrak dan perjanjian yang saat ini mengacu ke JIBOR menjadi mengacu ke suku bunga acuan alternatif, diperlukan penyesuaian untuk memastikan bahwa kedua suku bunga acuan tersebut secara ekonomis setara.

Saat ini Bank terus memantau perkembangan terkini terkait transisi JIBOR dan berencana melakukan diskusi lebih intensif dengan pelaku industri serta Regulator untuk memastikan transisi perubahan suku bunga acuan dari JIBOR ke suku bunga acuan alternatif berjalan dengan baik, serta untuk meminimalisasi risiko dari proses transisi tersebut. Bank akan secara berkelanjutan menilai risiko yang akan timbul dari transisi JIBOR dimaksud.

Berikut adalah informasi kuantitatif tentang instrumen keuangan yang belum beralih ke acuan suku bunga alternatif pada tanggal 30 Juni 2026, yang menunjukkan secara terpisah aset keuangan non derivatif kredit korporasi dan derivatif (Bank Mandiri saja).

(viii) Impact of Interest Rate Benchmark Reform (continued)

b. JIBOR (continued)

In addition, JIBOR is an interest rate that uses a simple average calculation method (with trimming 15% highest and 15% lowest) and in-advance (forward looking), while indONIA uses a volume weighted average calculation method (weighted average based on volume) and compounded in-advance, compounded in-arrears or hybrid. In order to make the transition from contracts and agreements that currently refer to JIBOR to referring to alternative benchmark interest rates, adjustments are needed to ensure that the two benchmark interest rates are economically equivalent.

Currently, the Bank continues to monitor the latest developments related to the JIBOR transition and plans to engage in more intensive discussions with industry players and regulators to ensure a smooth transition from JIBOR to an alternative benchmark interest rate, as well as to minimize the risks associated with the transition process. The Bank will continuously assess the potential risks arising from the JIBOR transition.

The following is quantitative information on financial instruments that have not yet switched to the alternative benchmark interest rate as of 30 June 2026, which separately shows non-derivative financial assets of corporate credit and derivatives (Bank Mandiri only).

Hal audit utama yang teridentifikasi dalam audit kami diuraikan sebagai berikut.

The key audit matters identified in our audit are outlined as follows.

1. **Cadangan kerugian penurunan nilai atas kredit yang diberikan dan piutang/pembiayaan syariah**

   Seperti yang dijelaskan dalam Catatan 12, Kredit yang Diberikan dan Piutang/Pembiayaan Syariah, atas laporan keuangan konsolidasian pada tanggal 31 Desember 2024, cadangan kerugian penurunan nilai atas kredit yang diberikan dan piutang/pembiayaan syariah adalah sebesar Rp 49.354.645 juta dan ditentukan berdasarkan Pernyataan Standar Akuntansi Keuangan ("PSAK") yang berlaku.

   Kami berfokus pada area ini karena saldo cadangan kerugian penurunan nilai atas kredit yang diberikan dan piutang/pembiayaan syariah mewakili 95% dari jumlah cadangan kerugian penurunan nilai untuk aset keuangan Grup, dimana nilainya signifikan terhadap laporan keuangan konsolidasian Grup. Lebih lanjut, dalam menentukan cadangan kerugian penurunan nilai, Grup mengadopsi model kompleks yang menggunakan sejumlah parameter, mengandalkan input data internal dan eksternal, melibatkan pertimbangan-pertimbangan manajemen yang subjektif dan asumsi-asumsi dengan tingkat ketidakpastian yang tinggi.

   Kredit yang diberikan

   Seperti yang dijelaskan dalam Catatan 2.c.H, Cadangan Kerugian Penurunan Nilai Aset Keuangan, atas laporan keuangan konsolidasian pada tanggal 31 Desember 2024, cadangan kerugian penurunan nilai atas kredit yang diberikan ditentukan berdasarkan Pernyataan Standar Akuntansi Keuangan 109 – Instrumen Keuangan ("PSAK 109").

   Untuk kredit yang tidak mengalami penurunan nilai dan kredit yang mengalami penurunan nilai yang secara individual tidak dianggap signifikan, Grup menghitung cadangan kerugian penurunan nilai secara kolektif menggunakan model parameter-parameter risiko yang memasukkan parameter utama, seperti *Probability of Default* ("PD"), *Loss Given Default* ("LGD"), *Exposure at Default* ("EAD"), dengan memperhitungkan informasi perkiraan masa depan dan data eksternal lainnya. Untuk kredit yang diberikan yang secara individual dianggap signifikan, Grup menghitung cadangan kerugian penurunan nilai secara individual dengan mengestimasi arus kas ekspektasian yang diperoleh dari kredit yang diberikan.

1. ***Allowance for impairment losses on loans and sharia receivables/financing***

   As described in Note 12, Loans and Sharia Receivables/Financing, to the consolidated financial statements, as at 31 December 2024, the allowance for impairment losses on loans and sharia receivables/financing was Rp 49,354,645 million and was determined based on the applicable Statement of Financial Accounting Standards ("SFAS").

   We focused on this area because the balance of allowance for impairment losses on loans and sharia receivables/financing represented 95% of the total allowance for impairment losses for the Group's financial assets, which was significant to the Group's consolidated financial statements. Furthermore, to determine the allowance for impairment losses, the Group adopted a complex model that used a number of parameters, relied on internal and external data inputs, involved subjective management judgements and assumptions subject to a high degree of uncertainty.

   Loans

   As described in Note 2.c.H, Allowance for Impairment Losses of Financial Assets, to the consolidated financial statements as at 31 December 2024, the allowance for impairment losses for loans was determined based on Statement of Financial Accounting Standards 109 – Financial Instruments ("SFAS 109").

   For non-impaired loans and for impaired loans which were not considered individually significant, the Group calculated the allowance for impairment losses collectively using a risk parameter model that incorporated key parameters, such as Probability of Default ("PD"), Loss Given Default ("LGD"), and Exposure at Default ("EAD"), after considering forward-looking information and other external data. For loans that were considered individually significant, the Group calculated the allowance for impairment losses on an individual basis by estimating the expected cash flows to be obtained from the loans.

Piutang/pembiayaan syariah

Seperti yang dijelaskan dalam Catatan 2.c.H, Cadangan Kerugian Penurunan Nilai Aset Keuangan, atas laporan keuangan konsolidasian, cadangan kerugian penurunan nilai atas piutang murabahah ditentukan berdasarkan PSAK 402 - Akuntansi Murabahah ("PSAK 402"). Cadangan kerugian penurunan nilai atas pinjaman *qardh*, pembiayaan musyarakah dan mudharabah, ditentukan berdasarkan PSAK yang berlaku.

Atas piutang murabahah yang secara individual tidak dianggap signifikan, Grup menghitung cadangan kerugian penurunan nilai secara kolektif menggunakan model parameter risiko dengan menggunakan parameter-parameter utama yaitu PD dan LGD. Untuk piutang/pembiayaan syariah yang secara individual dianggap signifikan, Grup menghitung cadangan kerugian penurunan nilai secara individual dengan mengestimasi arus kas ekspektasian dari piutang/pembiayaan syariah.

Sharia receivables/financing

As described in Note 2.c.H, Allowance for Impairment Losses of Financial Assets, to the consolidated financial statements, the allowance for impairment losses for murabahah receivables was determined based on SFAS 402 - Murabahah Accounting ("SFAS 402"). The allowance for impairment losses for funds of qardh, musyarakah and mudharabah financing, was determined based on the applicable SFAS.

For Murabahah receivables, which are not considered to be individually significant, the Group assessed allowance for impairment losses collectively by using the risk parameter modelling approach that incorporated key parameters such as PD and LGD. For sharia receivables/financing which are considered individually significant, the Group assessed allowances for impairment losses individually by estimating the expected cash flows obtained from the sharia receivables/financing.

- *Testing the information technology (IT) general controls over the allowance for impairment losses calculation system as well as the IT application controls over the completeness and accuracy of the data;*
- *Testing the significant modelling assumptions used in the allowance for impairment losses model calculated collectively including the determination of the PD, LGD and EAD, which involved (i) evaluation of the model and methodology used in the quantitative calculation; and (ii) evaluation of the historical data and macroeconomic forecast used by comparing them with publicly available information on macroeconomic prospect;*

- Menguji input data ke model cadangan kerugian penurunan nilai, secara sampel, untuk menilai keakuratan dan kelengkapannya;
- Menguji, secara sampel, keakuratan identifikasi manajemen atas kredit yang diberikan yang mengalami peningkatan signifikan risiko kredit dan gagal bayar dengan mempertimbangkan informasi keuangan dan non-keuangan debitur dan bukti eksternal yang relevan;
- Membandingkan, secara sampel, data yang digunakan pada perhitungan cadangan kerugian penurunan nilai, dengan data yang tercatat di sistem perbankan utama Grup pada tanggal pelaporan;
- Secara sampel, melakukan perhitungan matematis ulang atas perhitungan cadangan kerugian penurunan nilai untuk memeriksa keakuratan nilai tercatat cadangan kerugian penurunan nilai atas kredit yang diberikan;
- Secara sampel, untuk kredit yang diklasifikasikan sebagai Tahap 2 dan Tahap 3 (kredit dengan cadangan kerugian penurunan nilai dihitung secara individual), memeriksa kecukupan cadangan kerugian penurunan nilai dengan melakukan pengujian atas asumsi-asumsi yang digunakan oleh manajemen, jumlah dan waktu estimasi arus kas masa depan yang disiapkan oleh manajemen berdasarkan informasi keuangan debitur dan/atau penjamin, penilaian agunan terbaru dan informasi lain yang tersedia yang digunakan dalam perhitungan cadangan kerugian penurunan nilai atas kredit yang diberikan;
- Dengan melibatkan spesialis TI, menguji keakuratan perhitungan jumlah hari tunggakan dari tanggal jatuh tempo kredit dan penilaian atas kolektibilitas kredit berdasarkan jumlah hari tertunggak yang digunakan dalam penentuan PD; dan
- Menilai kecukupan pengungkapan terkait cadangan kerugian penurunan nilai atas kredit yang diberikan dalam konteks persyaratan pengungkapan Standar Akuntansi Keuangan di Indonesia.

- *Testing, on a sample basis, the data inputs to the allowance for impairment losses model, to assess their accuracy and completeness;*
- *Testing, on a sample basis, the accuracy of management's identification of loans that experience a significant increase in credit and default risk by considering the debtor's financial and non-financial information and relevant external evidence;*
- *Comparing, on a sample basis, the data used in the allowance for impairment losses calculation with the data recorded in the Group's core banking system at the reporting date;*
- *On a sample basis, performing mathematical recalculation of the allowance for impairment losses calculation to assess the accuracy of the allowance recorded for impairment losses for loans;*
- *On a sample basis, for loans classified as Stage 2 and Stage 3 (loans where allowance for impairment losses are calculated individually), assessing the adequacy of allowance for impairment losses by testing the assumptions used by management, the amount and timing of estimates of future cash flows prepared by management based on the debtor's and/or guarantor's financial information, the latest collateral valuation and other available information used in calculation of allowance for impairment losses on loans granted;*
- *By involving IT specialists, we tested the accuracy of the number of days past due from the credit due date and assessed the accuracy of credit collectibility based on the number of days past due which used in the determination of the PD; and*
- *Assessing the adequacy of the disclosures related to allowance for impairment losses on loans in the context of Indonesian Financial Accounting Standards disclosure requirements.*

Piutang/pembiayaan syariah

Kami melakukan prosedur-prosedur audit berikut untuk merespons hal audit utama ini:

- Kami memperoleh pemahaman, mengevaluasi dan menguji efektivitas desain serta operasi pengendalian internal yang berkaitan dengan pengukuran cadangan kerugian penurunan nilai untuk piutang dan pembiayaan syariah.
- Menguji, secara sampel, keakuratan identifikasi peningkatan risiko kredit atas piutang/pembiayaan syariah secara signifikan terhadap bukti objektif penurunan nilai;
- Memeriksa, secara sampel, kecukupan cadangan kerugian penurunan nilai untuk piutang dan pembiayaan syariah yang mengalami penurunan nilai, yang dihitung secara individual. Atas sampel tersebut, kami menilai kecukupan cadangan kerugian penurunan nilai dengan melakukan pengujian atas jumlah dan periode estimasi arus kas masa depan yang disiapkan oleh manajemen, menilai asumsi-asumsi dan estimasi-estimasi yang digunakan dengan membandingkan jadwal pembayaran kembali dan tingkat pengembalian yang efektif yang digunakan pada perhitungan cadangan kerugian penurunan nilai dengan informasi yang tertera pada perjanjian piutang/pembiayaan syariah;
- Menilai metodologi dan asumsi-asumsi pemodelan signifikan yang digunakan dalam model cadangan kerugian penurunan nilai yang dihitung secara kolektif, termasuk penentuan PD dan LGD, yang diterapkan sebagai persyaratan PSAK 402, yang melibatkan (i) evaluasi model dan metodologi yang digunakan dalam perhitungan kuantitatif; dan (ii) menguji kelengkapan dan keakuratan data yang digunakan sebagai basis dalam penentuan tingkat PD dan LGD, dengan melibatkan spesialis TI kami;

- Melakukan pengujian atas keakuratan perhitungan jumlah hari tertunggak dari tanggal jatuh tempo kredit dan pengujian atas kolektibilitas kredit berdasarkan jumlah hari tertunggak;

Sharia receivables/financing

We have performed the following audit procedures to address this key audit matter:

- *We understood, evaluated and tested the design and operating effectiveness of internal controls related to the measurement of impairment losses for sharia receivables and financing.*
- *Testing, on a sample basis, the accuracy of management's identification of the sharia receivables/financing of significant increases in credit risk against objective evidence of impairment;*
- *Testing, on a sample basis, the adequacy of the individual allowance for impairment losses for sharia receivables and financing that had been impaired. For these samples, we assessed the adequacy of allowance for impairment losses by testing the amount and period of estimated future cash flows prepared by management, assessed the assumptions and estimates used by comparing the repayment schedule and effective rate of return used in calculating allowance for impairment losses with information stated in the sharia receivables/financing agreement;*
- *Assessing the methodology and significant modelling assumptions used in the allowance for impairment losses model calculated collectively, including the determination of PD and LGD applied as requirements of SFAS 402, which involved (i) evaluating the models and methodologies used in quantitative calculations; and (ii) testing the completeness and accuracy of the data used as the basis for determining PD and LGD levels, with the involvement of our IT specialists;*

- *Assessing the adequacy of the disclosures related to allowance for impairment losses on sharia receivables/financing in the context of Indonesian Financial Accounting Standards disclosure requirements.*

2. Pengoperasian dan pengendalian sistem Teknologi Informasi (TI) pelaporan keuangan

Grup sangat bergantung pada infrastruktur, sistem dan pengendalian TI untuk mendukung kegiatan operasional sehari-hari dan proses pelaporan keuangan. Lingkungan TI Grup dianggap kompleks dengan mempertimbangkan jumlah dan kompleksitas sistem utama pelaporan keuangan dan kompleksitas antarmuka antar sistem. Pengendalian tingkat entitas TI, pengendalian keamanan siber, dan pengendalian umum TI merupakan bagian penting dari kerangka pengendalian internal Bank. Oleh karena itu, kami menganggap pengoperasian dan pengendalian sistem teknologi informasi pelaporan keuangan Grup sebagai hal audit utama.

Bagaimana Audit Kami Merespons Hal Audit Utama

Kami memperoleh pemahaman pengelolaan sistem TI serta pengendalian yang mendukung proses pelaporan keuangan. Kami menilai efektivitas desain, implementasi dan pengoperasian pengendalian utama yang terkait, termasuk:

1. Pengendalian manajemen perubahan: Proses dan pengendalian yang dijalankan untuk mengembangkan, menguji dan mengesahkan perubahan pada fungsi dan konfigurasi di dalam sistem;
2. Pengendalian keamanan akses: Pengendalian akses pengguna dirancang untuk melaksanakan pemisahan tugas, mengatur penggunaan akun dengan akses istimewa atau proses otorisasi untuk perubahan data; dan
3. Pengendalian untuk operasional TI: Pengendalian untuk operasional dilaksanakan untuk memastikan bahwa setiap masalah TI yang muncul telah ditindaklanjuti.

2. Operation and controls of financial reporting Information Technology (IT) systems

The Group is heavily reliant on its IT infrastructure, systems and controls for its daily operations and financial reporting processes. The IT environment of the Group is considered to be complex due to the number and complexity of the key financial reporting systems and interfaces between systems. IT entity level controls, cybersecurity controls and IT general controls are important components of the Bank's internal control framework. Therefore, we considered the operation and controls of the Group's financial reporting information technology systems to be a key audit matter.

How Our Audit Addressed the Key Audit Matters

We understood the IT systems and controls that supported the financial reporting process. We assessed the effectiveness of the design, implementation and operation of the associated key controls, including:

1. *Change management controls: The processes and controls used to develop, test and authorise changes to the functionality and configurations within systems;*
2. *Access security controls: The access controls designed to enforce segregation of duties, govern the use of high privileged accounts or the authorisation process to change the data; and*
3. *IT operation related controls: The controls over operations is carried out to ensure that any IT issues that arise have been addressed.*

Kami menguji pengendalian utama yang bergantung pada TI yang mendukung proses pelaporan keuangan, seperti perhitungan otomatis pada sistem, pemrosesan transaksi, laporan yang dihasilkan sistem, dan antarmuka data antar sistem. Pengujian kami meliputi inspeksi atas konfigurasi sistem yang relevan disertai dengan pengujian hasil keluaran sistem berdasarkan sampel.

We tested key IT dependent controls supporting the financial reporting process, such as automated system calculations, transaction processing, system generated reports and data interfaces between systems. Our testing included the inspection of the relevant system configurations and supplemented with the testing of the system outputs on a sample basis.

3. Estimasi atas liabilitas kepada pemegang polis

3. Estimation of liabilities to policyholders

Seperti yang dijelaskan dalam Catatan 35, Liabilitas lain-lain, atas laporan keuangan konsolidasian, nilai cadangan teknis, yang terdiri atas manfaat polis masa depan dari produk non unit-link dan estimasi liabilitas klaim dan terdapat pada liabilitas kepada pemegang polis sebesar Rp 7.170.554 juta pada tanggal 31 Desember 2024.

As described in Note 35, Other Liabilities, to the consolidated financial statements, the technical reserve, which represents future policy benefits from non-unit-linked products and an estimated claim liability and forms part of the liabilities to policyholders, of Rp 7,170,554 million as at 31 December 2024.

Kewajiban untuk menentukan penyelesaian klaim masa depan melibatkan penilaian yang kompleks dan subjektif tentang peristiwa masa depan, baik internal maupun eksternal terhadap bisnis, di mana perubahan kecil dalam asumsi-asumsi dapat mengakibatkan dampak material terhadap estimasi kewajiban ini. Manajemen dibantu oleh pakar aktuaris untuk melakukan perhitungan kewajiban tersebut.

The determination of the liabilities for future claim settlements involved complex and subjective assessment of future events, both internal and external to the business, where a small change in assumptions could have a material impact on the estimation of these liabilities. Management was assisted by an actuarial expert in its calculation of the liabilities.

Terdapat ketidakpastian yang timbul dari berbagai asumsi-asumsi aktuaria. Asumsi-asumsi yang dipakai untuk menghitung cadangan liabilitas masa depan pemegang polis dan estimasi liabilitas klaim ditentukan berdasarkan estimasi tingkat mortalita, morbidita, tingkat pembatalan polis, biaya, tingkat inflasi dan tingkat suku bunga seperti yang dijelaskan dalam Catatan 2.z, Kontrak Asuransi, atas laporan keuangan konsolidasian. Selain itu, Grup juga menerapkan asumsi margin untuk risiko pemburukan atas produk tersebut.

There is also uncertainty arising from various actuarial assumptions. The assumptions used to calculate the policyholder's future liability reserves and the estimated claim liabilities were determined based on the estimates of mortality, morbidity, lapse, expenses, inflation rates and interest rates as described in Note 2.z, Insurance Contracts, to the consolidated financial statements. In addition, the Group also applied margin assumptions to the risk of deterioration over those products.

Bagaimana Audit Kami Merespons Hal Audit Utama

Kami memperoleh pemahaman perhitungan manajemen atas estimasi liabilitas kepada pemegang polis. Kami mengevaluasi estimasi liabilitas kepada pemegang polis, dengan melakukan prosedur-prosedur berikut:

- Dengan melibatkan ahli aktuaria kami, menguji asumsi-asumsi yang digunakan dalam menghitung cadangan teknis, termasuk evaluasi tingkat diskonto, asumsi morbidita dan mortalita, tingkat pembatalan polis dan alokasi biaya berdasarkan data historis dan informasi yang tersedia untuk umum;
- Mengevaluasi kompetensi, kapabilitas dan objektivitas tenaga ahli aktuaria yang membantu manajemen untuk melakukan perhitungan atas utang kepada pemegang polis;
- Memeriksa kelengkapan data yang digunakan untuk menghitung saldo cadangan teknis dengan melakukan rekonsiliasi antara laporan aktuaria manajemen, buku besar dan buku besar pembantu pada tanggal 31 Desember 2024;
- Dengan melibatkan ahli aktuaria kami, melakukan perhitungan matematis ulang, secara sampel, atas *Gross Premium Reserve* ("GPV") untuk portofolio jangka panjang tradisional dan Cadangan Risiko untuk portofolio *unit link*, saldo aset reasuransi, kecukupan bruto dan bersih atas cadangan *Incurred but not Recorded ("IBNR")* dan pengujian kecukupan liabilitas untuk portofolio tradisional pada tanggal 31 Desember 2024; dan
- Menilai kecukupan pengungkapan terkait nilai liabilitas kepada pemegang polis dalam konteks persyaratan pengungkapan Standar Akuntansi Keuangan di Indonesia.

How Our Audit Addressed the Key Audit Matters

We understood management's calculation of the estimation of liabilities to policyholders. We evaluated the estimation of liabilities to policyholders, by performing the following procedures:

- *By involving our actuarial expert, testing the assumptions used to determine the technical reserves, which involved evaluation of the discount rates, assumptions of morbidity and mortality, lapse rate and cost allocation based on historical data and publicly available information;*
- *Evaluating the competence, capabilities and objectivity of actuarial experts who assisted management in the calculation of the obligation to policyholders.*
- *Checking the completeness of the data used to calculate the technical reserve balance by reconciling management's actuarial reports, general ledger and sub-ledgers as at 31 December 2024;*
- *By involving our actuarial expert, performing independent mathematical recalculation, on a sample basis, of the Gross Premium Reserve ("GPV") for traditional long-term portfolios and Risk Reserves for unit-linked portfolios, reinsurance asset balances, the gross and net adequacy of Incurred but not Recorded ("IBNR") reserves and liability adequacy testing ("LAT") for traditional portfolios as at 31 December 2024; and*
- *Assessing the adequacy of the disclosures related to the liabilities to policyholders in the context of Indonesian Financial Accounting Standards disclosure requirements.*

Ketika kami membaca laporan tahunan, jika kami menyimpulkan bahwa terdapat suatu kesalahan penyajian material di dalamnya, kami diharuskan untuk mengomunikasikan hal tersebut kepada pihak yang bertanggung jawab atas tata kelola dan mengambil tindakan tepat berdasarkan Standar Audit yang ditetapkan oleh Institut Akuntan Publik Indonesia.

Tanggung Jawab Manajemen dan Pihak yang Bertanggung Jawab atas Tata Kelola terhadap Laporan Keuangan Konsolidasian

Responsibilities of Management and Those Charged with Governance for The Consolidated Financial Statements

Manajemen bertanggung jawab atas penyusunan dan penyajian wajar laporan keuangan konsolidasian tersebut sesuai dengan Standar Akuntansi Keuangan di Indonesia, dan atas pengendalian internal yang dianggap perlu oleh manajemen untuk memungkinkan penyusunan laporan keuangan konsolidasian yang bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan.

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with Indonesian Financial Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Dalam penyusunan laporan keuangan konsolidasian, manajemen bertanggung jawab untuk menilai kemampuan Grup dalam mempertahankan kelangsungan usahanya, mengungkapkan, sesuai dengan kondisinya, hal-hal yang berkaitan dengan kelangsungan usaha dan menggunakan basis akuntansi kelangsungan usaha kecuali manajemen memiliki intensi untuk melikuidasi Grup atau menghentikan operasi, atau tidak memiliki alternatif yang realistis selain melaksanakannya.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Pihak yang bertanggung jawab atas tata kelola bertanggung jawab untuk mengawasi proses pelaporan keuangan Grup.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Tanggung Jawab Auditor terhadap Audit atas Laporan Keuangan Konsolidasian

Tujuan kami adalah untuk memperoleh keyakinan memadai tentang apakah laporan keuangan konsolidasian secara keseluruhan bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan, dan untuk menerbitkan laporan auditor yang mencakup opini kami. Keyakinan memadai merupakan suatu tingkat keyakinan tinggi, namun bukan merupakan suatu jaminan bahwa audit yang dilaksanakan berdasarkan Standar Audit akan selalu mendeteksi kesalahan penyajian material ketika hal tersebut ada. Kesalahan penyajian dapat disebabkan oleh kecurangan maupun kesalahan dan dianggap material jika, baik secara individual maupun secara agregat, dapat diekspektasikan secara wajar akan memengaruhi keputusan ekonomi yang diambil oleh pengguna berdasarkan laporan keuangan konsolidasian tersebut.

Sebagai bagian dari suatu audit berdasarkan Standar Audit, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga:

- Mengidentifikasi dan menilai risiko kesalahan penyajian material dalam laporan keuangan konsolidasian, baik yang disebabkan oleh kecurangan maupun kesalahan, mendesain dan melaksanakan prosedur audit yang responsif terhadap risiko tersebut, serta memperoleh bukti audit yang cukup dan tepat untuk menyediakan basis bagi opini kami. Risiko tidak terdeteksinya kesalahan penyajian material yang disebabkan oleh kecurangan lebih tinggi dari yang disebabkan oleh kesalahan, karena kecurangan dapat melibatkan kolusi, pemalsuan, penghilangan secara sengaja, pernyataan salah, atau pengabaian pengendalian internal.
- Memperoleh suatu pemahaman tentang pengendalian internal yang relevan dengan audit untuk mendesain prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektivitasan pengendalian internal Grup.
- Mengevaluasi ketepatan kebijakan akuntansi yang digunakan serta kewajaran estimasi akuntansi dan pengungkapan terkait yang dibuat oleh manajemen.

Auditors' Responsibilities for The Audit of The Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- *Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.*
- *Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.*
- *Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.*

- Menyimpulkan ketepatan penggunaan basis akuntansi kelangsungan usaha oleh manajemen dan, berdasarkan bukti audit yang diperoleh, apakah terdapat suatu ketidakpastian material yang terkait dengan peristiwa atau kondisi yang dapat menyebabkan keraguan signifikan atas kemampuan Grup untuk mempertahankan kelangsungan usahanya. Ketika kami menyimpulkan bahwa terdapat suatu ketidakpastian material, kami diharuskan untuk menarik perhatian dalam laporan auditor kami ke pengungkapan terkait dalam laporan keuangan konsolidasian atau, jika pengungkapan tersebut tidak memadai, harus menentukan apakah perlu untuk memodifikasi opini kami. Kesimpulan kami didasarkan pada bukti audit yang diperoleh hingga tanggal laporan auditor kami. Namun, peristiwa atau kondisi masa depan dapat menyebabkan Grup tidak dapat mempertahankan kelangsungan usaha.

- *Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.*

- Mengevaluasi penyajian, struktur dan isi laporan keuangan konsolidasian secara keseluruhan, termasuk pengungkapannya, dan apakah laporan keuangan konsolidasian mencerminkan transaksi dan peristiwa yang mendasarinya dengan suatu cara yang mencapai penyajian wajar.

- *Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.*

- Memperoleh bukti audit yang cukup dan tepat terkait informasi keuangan entitas atau aktivitas bisnis dalam Grup untuk menyatakan opini atas laporan keuangan konsolidasian. Kami bertanggung jawab atas arahan, supervisi, dan pelaksanaan audit grup. Kami tetap bertanggung jawab sepenuhnya atas opini audit kami.

- *Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.*

Kami mengomunikasikan kepada pihak yang bertanggung jawab atas tata kelola mengenai, antara lain, ruang lingkup dan saat yang direncanakan atas audit, serta temuan audit signifikan, termasuk setiap defisiensi signifikan dalam pengendalian internal yang teridentifikasi oleh kami selama audit.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Kami juga memberikan suatu pernyataan kepada pihak yang bertanggung jawab atas tata kelola bahwa kami telah mematuhi ketentuan etika yang relevan mengenai independensi, dan mengomunikasikan seluruh hubungan, serta hal-hal lain yang dianggap secara wajar berpengaruh terhadap independensi kami, dan, jika relevan, pengamanan terkait.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Dari hal-hal yang dikomunikasikan kepada pihak yang bertanggung jawab atas tata kelola, kami menentukan hal-hal tersebut yang paling signifikan dalam audit atas laporan keuangan konsolidasian periode kini dan oleh karenanya menjadi hal audit utama. Kami menguraikan hal audit utama dalam laporan auditor kami, kecuali peraturan perundang-undangan melarang pengungkapan publik tentang hal tersebut atau ketika, dalam kondisi yang sangat jarang terjadi, kami menentukan bahwa suatu hal tidak boleh dikomunikasikan dalam laporan kami karena konsekuensi merugikan dari mengomunikasikan hal tersebut akan diekspektasikan secara wajar melebihi manfaat kepentingan publik atas komunikasi tersebut.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

b. Penggabungan usaha

Pada akhir bulan Februari 1998, Pemerintah Republik Indonesia (selanjutnya disebut "Pemerintah") mengumumkan rencana untuk melakukan restrukturisasi atas Bank Peserta Penggabungan. Sehubungan dengan rencana restrukturisasi tersebut, Pemerintah mendirikan Bank Mandiri pada bulan Oktober 1998 dengan melakukan penyetoran tunai dan pengalihan saham Pemerintah pada Bank Peserta Penggabungan (Catatan 40a dan 40b). Selisih antara harga transfer dan nilai buku saham pada saat restrukturisasi tidak dihitung karena dinilai tidak praktis. Seluruh kerugian yang timbul selama periode restrukturisasi diakui dalam Program Rekapitalisasi.

Rencana restrukturisasi tersebut dirancang untuk menggabungkan usaha Bank Peserta Penggabungan ke dalam Bank Mandiri pada bulan Juli 1999 dan rekapitalisasi Bank Mandiri. Restrukturisasi Bank Peserta Penggabungan ke dalam Bank Mandiri juga mencakup:

- Restrukturisasi kredit yang diberikan;
- Restrukturisasi aset non-kredit yang diberikan;
- Rasionalisasi kantor cabang di dalam dan luar negeri;
- Rasionalisasi sumber daya manusia.

Berdasarkan Akta Notaris Sutjipto, S.H., No. 100 tanggal 24 Juli 1999, Bank Peserta Penggabungan secara hukum melakukan penggabungan usaha ke dalam Bank Mandiri. Akta Penggabungan Usaha tersebut disahkan oleh Menteri Kehakiman Republik Indonesia dengan Surat Keputusan No. C-13.781.HT.01.04.TH.99 tanggal 29 Juli 1999 dan disetujui oleh Gubernur Bank Indonesia dengan Surat Keputusan No. 1/9/KEP.GBI/1999 tanggal 29 Juli 1999. Penggabungan tersebut dinyatakan sah oleh Kepala Kantor Departemen Perindustrian dan Perdagangan Jakarta Selatan melalui Surat Keputusan No. 09031827089 tanggal 31 Juli 1999.

Pada tanggal efektif penggabungan usaha:

- Semua aset dan liabilitas Bank Peserta Penggabungan dialihkan ke Bank Mandiri sebagai Bank Hasil Penggabungan;

Pada tanggal efektif dimaksud, Bank Peserta Penggabungan secara hukum dibubarkan tanpa proses likuidasi dan Bank Mandiri sebagai Bank Hasil Penggabungan menerima seluruh hak dan liabilitas dari Bank Peserta Penggabungan.

b. Merger

At the end of February 1998, the Government of the Republic of Indonesia (hereinafter referred to as "Government") announced its plan to restructure the Merged Banks. In connection with the restructurisation plan, the Government established Bank Mandiri in October 1998 through the payment of cash and the transfer the Government's shares of the Merged Banks (Notes 40a and 40b). The difference between the transfer price and the book value of the shares at the time of the restructurisation was not calculated as it was considered not practicable to do so. All losses incurred during the year of restructuring were recognised in the Recapitalisation Program.

The restructurisation plan was designed to merge the Merged Banks' business into Bank Mandiri on July 1999 and the recapitalisation of Bank Mandiri. The restructurisation of the Merged Banks into Bank Mandiri also covered the following:

- *Restructurisation of loans;*
- *Restructurisation of non-loan assets;*
- *Rationalisation of domestic and overseas offices;*
- *Rationalisation of human resources.*

Pada tanggal 26 Juni 2024, telah ditandatangani dokumen Akta Pengambilalihan Saham No. 88 antara Bank Mandiri dan IFG Life serta Akta Jual Beli Saham No. 89 antara Kimia Farma dan IFG Life, keduanya dibuat di hadapan Mala Mukti S.H., LL.M., notaris di Jakarta. Sejak ditandatanganinya Akta Pengambilalihan Saham dan Akta Jual Beli Saham tersebut susunan pemegang saham Mandiri Inhealth menjadi IFG Life memiliki sebesar 80% saham dan Bank Mandiri memiliki sebesar 20% saham. Dengan demikian, Bank Mandiri kehilangan pengendalian atas Mandiri Inhealth yang mengakibatkan Bank Mandiri menghentikan pengakuan terhadap aset bersih Mandiri Inhealth pada nilai tercatatnya. Pengalihan saham tersebut telah disetujui sebelumnya melalui RUPS Mandiri Inhealth yang dinyatakan dalam Akta Pernyataan Keputusan Para Pemegang Saham Mandiri Inhealth No. 90, yang dibuat di hadapan Mala Mukti S.H., LL.M., notaris di Jakarta dan pemberitahuannya telah dicatat ke dalam Sistem Administrasi Badan Hukum Kementerian Hukum dan Hak Asasi Manusia Republik Indonesia sesuai surat tertanggal 27 Juni 2024 No. AHU-AH.01.09-0219371.

Transaksi pengalihan saham Mandiri Inhealth tersebut merupakan kombinasi bisnis entitas sepengendali dimana pemegang saham pengendali (*ultimate shareholder*) dari pemegang saham Mandiri Inhealth yaitu Bank Mandiri, Kimia Farma, dan IFG Life adalah Pemerintah Republik Indonesia. Oleh karena itu, transaksi divestasi tersebut dicatat berdasarkan metode penyatuan kepemilikan sesuai Pernyataan Standar Akuntansi Keuangan ("PSAK") No. 338 (Revisi 2014), "Kombinasi Bisnis Entitas Sepengendali".

Perbedaan antara jumlah imbalan yang diterima dan jumlah tercatat investasi dari transaksi ini diakui sebagai "Selisih Nilai Transaksi Kombinasi Bisnis Entitas Sepengendali" dan disajikan sebagai bagian "Tambahan Modal Disetor" di bagian ekuitas pada laporan posisi keuangan konsolidasian. Rincian jumlah imbalan yang diterima dan jumlah tercatat yang dialihkan adalah sebagai berikut:

On 26 June 2024, Bank Mandiri and IFG Life signed the Share Acquisition Deed No. 88, and Kimia Farma and IFG Life signed the Share Sale and Purchase Deed No. 89, both made before Mala Mukti S.H., LL.M., notary in Jakarta. Since the signing of the Share Acquisition Deed and Share Sale and Purchase Deed, the composition of Mandiri Inhealth's shareholders has become IFG Life owning 80% of the shares and Bank Mandiri owning 20% of the shares. Thus, Bank Mandiri lost control over Mandiri Inhealth which resulted in Bank Mandiri derecognizing Mandiri Inhealth's net assets at their carrying value. The transfer of shares was previously approved through the Mandiri Inhealth General Meeting of Shareholders as stated in the Deed of Decision Statement of Mandiri Inhealth Shareholders No. 90, made before Mala Mukti S.H., LL.M., notary in Jakarta and the notification has been recorded in the Legal Entity Administration System of the Ministry of Law and Human Rights of the Republic of Indonesia according to letter dated 27 June 2024 No. AHU-AH.01.09-0219371.

The share transfer transaction of Mandiri Inhealth is a business combination of entity under common control where the ultimate shareholder of Mandiri Inhealth's shareholders, namely Bank Mandiri, Kimia Farma, and IFG Life, is the Government of the Republic of Indonesia. Therefore, the divestment transaction is recorded using the pooling of interest method in accordance with the Statement of Financial Accounting Standards ("SFAS") No. 338 (Revised 2014), "Business Combinations of Entity under Common Control".

The difference between the consideration received and the carrying amount of the investment from this transaction is recognised as "Difference in Value from Transactions of Business Combinations of Entity under Common Control" and presented as part of "Additional Paid-in Capital" in the equity section of the consolidated statement of financial position. The details of the consideration received and the carrying amount transferred are as follows:

	Jumlah imbalan yang diterima/ *The consideration received*	**Jumlah tercatat investasi/ *Investment carrying Amount***	**Tambahan modal disetor/ *Additional paid-in capital***	
PT Asuransi Jiwa Inhealth Indonesia	1.710.000	1.257.990	452.010	*PT Asuransi Jiwa Inhealth Indonesia*

Setelah pengukuran awal, nilai investasi Mandiri Inhealth kemudian ditambah atau dikurangkan bagian Bank Mandiri atas laba rugi Mandiri Inhealth sesuai dengan PSAK No. 228 "Investasi Pada Entitas Asosiasi dan Ventura Bersama".

After initial measurement, the value of the investment in Mandiri Inhealth is then adjusted by adding or subtracting Bank Mandiri's share of Mandiri Inhealth's profit or loss in accordance with PSAK No. 228 "Investments in Associates and Joint Ventures".

c. Instrumen keuangan

A. Aset keuangan

Grup mengklasifikasikan aset keuangannya dalam kategori (a) aset keuangan yang diukur pada nilai wajar melalui laba rugi, (b) aset keuangan yang diukur pada nilai wajar melalui penghasilan komprehensif lain dan (c) aset keuangan yang diukur pada biaya perolehan diamortisasi.

Grup memiliki instrumen keuangan utang dan instrumen keuangan ekuitas. Grup selanjutnya mengukur semua investasi ekuitas pada nilai wajar. Saat pengakuan awal, Grup dapat membuat pilihan yang tak terbatalkan untuk menyajikan perubahan selanjutnya pada nilai wajar investasi dalam instrumen ekuitas dalam penghasilan komprehensif lain.

Grup menggunakan 2 (dua) dasar untuk mengklasifikasikan aset keuangan yaitu model bisnis Grup dalam mengelola aset keuangan dan karakteristik arus kas kontraktual pembayaran pokok dan bunga (*Solely Payment of Principal and Interest* ("SPPI")) dari aset keuangan.

Pengujian SPPI

Sebagai langkah pertama dari proses klasifikasi, Grup menilai persyaratan kontraktual keuangan untuk mengidentifikasi apakah mereka memenuhi pengujian SPPI.

Pokok pinjaman untuk tujuan pengujian ini didefinisikan sebagai nilai wajar dari aset keuangan pada pengakuan awal dan dapat berubah selama umur aset keuangan (misalnya, jika ada pembayaran pokok atau amortisasi premi/diskon).

Elemen bunga yang paling signifikan dalam perjanjian kredit biasanya adalah pertimbangan atas nilai waktu dari uang dan risiko kredit. Untuk membuat penilaian SPPI, Grup menerapkan pertimbangan dan memperhatikan faktor-faktor yang relevan seperti mata uang dimana aset keuangan didenominasikan dan periode pada saat suku bunga ditetapkan.

c. Financial instruments

A. Financial assets

The Group classified its financial assets in the following categories (a) financial assets measured at fair value through profit or loss, (b) financial assets measured at fair value through other comprehensive income, and (c) financial assets measured at amortised cost.

The Group has debt financial instruments and equity financial instruments. The Group further measures all equity investments at fair value. On initial recognition, the Group may make an irrevocable choice to subsequent changes in the fair value of investments in equity instruments in other comprehensive income.

The Group used 2 (two) methods to classify its financial assets, which based on the Group's business model in managing the financial asset, and the contractual cash flow of the financial assets Solely Payment of Principal and interest ("SPPI").

SPPI test

As a first step of its classification process, the Group assesses the contractual terms of financial to identify whether they meet the SPPI test.

Principal, for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium/discount).

The most significant element of interest within a credit contract are typically the consideration for the time value of money and credit risk. To perform the SPPI assessment, the Group applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

Penilaian model bisnis

Grup menentukan model bisnisnya berdasarkan tingkat yang paling mencerminkan bagaimana Grup mengelola kelompok atas aset keuangannya untuk mencapai tujuan bisnisnya.

Model bisnis Grup tidak dinilai berdasarkan masing-masing instrumennya, tetapi pada tingkat portofolio secara agregat yang lebih tinggi dan didasarkan pada faktor-faktor yang dapat diamati seperti:

- Bagaimana kinerja model bisnis dan aset keuangan yang dimiliki dalam model bisnis tersebut dievaluasi dan dilaporkan kepada personel manajemen kunci;
- Risiko yang mempengaruhi kinerja model bisnis (dan aset keuangan yang dimiliki dalam model bisnis tersebut) dan khususnya, bagaimana cara risiko tersebut dikelola;
- Bagaimana manajer bisnis dikompensasi (misalnya, apakah kompensasi didasarkan pada nilai wajar dari aset yang dikelola atau pada arus kas kontraktual yang tertagih);
- Frekuensi, nilai dan waktu penjualan yang diharapkan, juga merupakan aspek penting dari penilaian Grup.

Penilaian model bisnis didasarkan pada skenario yang diharapkan secara wajar tanpa mempertimbangkan skenario "*worst case*" atau "*stress case*". Jika arus kas setelah pengakuan awal direalisasikan dengan cara yang berbeda dari yang awal diharapkan, Grup tidak mengubah klasifikasi aset keuangan dimiliki yang tersisa dalam model bisnis tersebut, tetapi memasukkan informasi tersebut dalam melakukan penilaian atas aset keuangan yang baru atau yang baru dibeli selanjutnya.

(a) Aset keuangan yang diukur pada nilai wajar melalui laba rugi

Aset keuangan diukur pada nilai wajar melalui laba rugi kecuali tes model bisnis dan tes arus kas kontraktual menunjukkan bahwa aset keuangan masuk ke dalam klasifikasian diukur pada biaya perolehan diamortisasi atau nilai wajar melalui penghasilan komprehensif lain.

Business model assessment

The Group determines its business model at the level that best reflects how the group manages a group of financial assets to achieve its business objective.

The Group's business model is not assessed by each instrument, but at a higher level of aggregated portfolios and is based on observable factors such as:

- *How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel;*
- *The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular the way those risks are managed;*
- *How business managers are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected);*
- *The expected frequency, value, and timing of sales are also important aspects of the Group's assessment.*

The business model assessment is based on reasonably expected scenarios without taking "worst case" or "stress case" scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Group's initial expectations, the Group does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

(a) Financial assets measured at fair value through profit or loss

Financial assets are measured at fair value through profit or loss unless the business model test and the contractual cash flow test show that financial assets entering into classifications are measured at amortised cost or fair value through other comprehensive income.

(a) Aset keuangan yang diukur pada nilai wajar melalui laba rugi (lanjutan)

Klasifikasi ini ditujukan untuk instrumen keuangan yang dimiliki untuk diperdagangkan atau pada saat pengakuan awal telah ditetapkan oleh Grup untuk diukur pada nilai wajar melalui laba rugi.

Aset keuangan dikategorikan sebagai dimiliki untuk diperdagangkan jika diperoleh atau dimiliki terutama untuk tujuan dijual atau dibeli kembali dalam waktu dekat atau jika merupakan bagian dari portofolio instrumen keuangan tertentu yang dikelola bersama dan terdapat bukti mengenai pola ambil untung dalam jangka pendek yang terkini.

Untuk entitas anak asuransi, aset keuangan dikategorikan sebagai aset keuangan diukur pada nilai wajar melalui laba rugi, jika dimiliki untuk mencadangkan liabilitas asuransi yang diukur pada nilai wajar dari aset terkait. Instrumen keuangan yang dikelompokkan ke dalam kategori ini diakui pada nilai wajarnya pada saat pengakuan awal. Biaya transaksi diakui secara langsung ke dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian.

Keuntungan dan kerugian yang timbul dari perubahan nilai wajar, penjualan instrumen keuangan dan pendapatan bunga dari instrumen keuangan dalam kelompok nilai wajar melalui laba rugi dicatat di akun pendapatan dari kelompok nilai wajar melalui laba rugi - neto pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian.

(b) Aset keuangan yang diukur pada nilai wajar melalui penghasilan komprehensif lain

Aset keuangan dikelola dalam model bisnis yang tujuannya akan terpenuhi dengan mendapatkan arus kas kontraktual dan menjual aset keuangan dan persyaratan kontraktual dari aset keuangan yang pada tanggal tertentu memperoleh arus kas yang semata dari pembayaran pokok dan bunga (*solely payments of principal and interest*) dari jumlah pokok terutang.

Dividen dari instrumen ekuitas diakui di dalam pos laba rugi.

Kerugian kredit ekspektasian diakui sebagai penambah dari penghasilan komprehensif lain di dalam laporan posisi keuangan (tidak mengurangi jumlah tercatat aset keuangan dalam laporan keuangan). Pendapatan bunga dihitung menggunakan metode suku bunga efektif.

Grup selanjutnya mengukur semua investasi ekuitas pada nilai wajar. Jika manajemen Grup telah memilih untuk menyajikan keuntungan dan kerugian nilai wajar atas investasi ekuitas dalam penghasilan komprehensif lain, tidak ada reklasifikasi keuntungan dan kerugian nilai wajar ke laba rugi setelah penghentian pengakuan investasi tersebut. Dividen dari instrumen ekuitas diakui di dalam pos laba rugi.

(c) Aset keuangan yang diukur pada biaya perolehan diamortisasi

Aset keuangan diukur pada biaya perolehan diamortisasi jika aset keuangan dikelola dalam model bisnis yang bertujuan untuk memiliki aset keuangan dalam rangka mendapatkan arus kas kontraktual dan persyaratan kontraktual dari aset keuangan yang pada tanggal tertentu memperoleh arus kas semata dari pembayaran pokok dan bunga (*solely payments of principal and interest*) dari jumlah pokok terutang.

Expected credit losses are recognised as additions of other comprehensive income in the statement of financial position (not reducing the number of recorded financial assets in financial statements). Interest income is calculated using the effective interest rate method.

The Group further measures all equity investments at fair value. If Group management has chosen to present fair value gains and losses on equity investments in other comprehensive income, there is no reclassification of fair value gains and losses to profit or loss upon derecognition of those investments. Dividends from equity instruments are recognised in profit or loss.

B. Liabilitas keuangan (lanjutan)

(b) Liabilitas keuangan yang diukur dengan biaya perolehan diamortisasi

Grup mengklasifikasikan seluruh liabilitas keuangan sehingga setelah pengakuan awal liabilitas keuangan diukur pada biaya perolehan diamortisasi, kecuali:

1. Liabilitas keuangan yang diukur pada nilai wajar melalui laba rugi;
2. Liabilitas keuangan yang timbul ketika pengalihan aset keuangan tidak memenuhi syarat penghentian pengakuan atau ketika pendekatan keterlibatan berkelanjutan diterapkan;
3. Kontrak jaminan keuangan;
4. Komitmen untuk menyediakan pinjaman dengan suku bunga di bawah pasar;
5. Imbalan kontijensi yang akan diselesaikan dengan kas, dimana Grup bertindak selaku pihak pengakuisisi dalam kombinasi bisnis.

Pada saat pengakuan awal, liabilitas keuangan yang diukur dengan biaya perolehan diamortisasi diukur pada nilai wajar dikurangi biaya transaksi. Setelah pengakuan awal, Grup mengukur seluruh liabilitas keuangan yang diukur dengan biaya perolehan diamortisasi dengan menggunakan metode suku bunga efektif. Amortisasi suku bunga efektif diakui sebagai "Beban bunga".

C. Penghentian pengakuan

Penghentian Pengakuan Aset Keuangan

Penghentian pengakuan aset keuangan dilakukan ketika hak kontraktual atas arus kas yang berasal dari aset keuangan tersebut berakhir, atau ketika aset keuangan tersebut telah ditransfer dan secara substansial seluruh risiko dan manfaat atas kepemilikan aset tersebut telah ditransfer (jika, secara substansial seluruh risiko dan manfaat tidak ditransfer, maka Grup melakukan evaluasi untuk memastikan keterlibatan berkelanjutan atas kendali yang masih dimiliki tidak mencegah penghentian pengakuan).

c. Financial instruments *(continued)*

B. Financial liabilities *(continued)*

(b) Financial liabilities at amortised cost

The Group classifies all financial liabilities after initial recognition as measured at amortised cost, except:

1. *Financial liabilities measured at fair value through profit or loss;*
2. *Financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach is applied;*
3. *Financial guarantee contracts;*
4. *Commitment to provide loans at below market interest rates;*
5. *Contingent reward recognised by the acquirer in the business combination.*

At initial recognition, financial liabilities at amortised cost measured at fair value are deducted by transaction cost. After initial recognition, the Group measures all financial liabilities at amortised cost using the effective interest rate method. Effective interest rate amortisation is recognised as "Interest expense".

C. Derecognition

Derecognition of Financial Assets

Financial assets are derecognised when the contractual rights to receive the cash flows from these assets have expired or matured or the assets have been transferred and substantially all the risks and rewards of ownership of the assets are also transferred (if substantially all the risks and rewards have not been transferred, the Group evaluates to ensure that continuing involvement on the basis of any retained powers of control does not prevent derecognition).

C. Penghentian pengakuan (lanjutan)

Penghentian Pengakuan Aset Keuangan (lanjutan)

Agunan yang diserahkan oleh Grup di dalam perjanjian efek-efek yang dijual dengan janji untuk dibeli kembali dan transaksi *securities lending* dan *borrowing* tidak dihentikan pengakuannya karena Grup secara substansial masih memiliki seluruh risiko dan manfaat atas agunan tersebut, berdasarkan kesepakatan bahwa harga pembelian kembali telah ditentukan di awal, sehingga kriteria penghentian pengakuan tidak terpenuhi.

Aset keuangan yang dialihkan kepada pihak ketiga tetapi tidak memenuhi syarat penghentian pengakuan disajikan di dalam laporan posisi keuangan konsolidasian sebagai "Aset lain-lain - Tagihan atas efek-efek dan obligasi pemerintah yang diagunkan", dimana pihak penerima memiliki hak untuk menjual atau mentransfer kembali.

Penghentian Pengakuan Liabilitas Keuangan

Penghentian pengakuan liabilitas keuangan dilakukan jika liabilitas keuangan tersebut telah berakhir karena kewajiban yang ditetapkan dalam kontrak telah dilepaskan, dibatalkan atau kedaluwarsa atau apabila terdapat perubahan yang substansial dalam persyaratan suatu liabilitas keuangan, maka kontrak liabilitas keuangan sebelum perubahan akan dihapus dan Grup akan mengakui liabilitas keuangan baru.

Hapusbuku

Dalam hal penghapusbukuan aset keuangan merupakan kelanjutan dari tindakan penyelesaian aset keuangan dengan cara pengambilalihan agunan, maka jumlah yang dihapusbuku adalah sebesar selisih kurang antara nilai wajar agunan yang diambil alih setelah memperhitungkan taksiran biaya penjualan dengan nilai tercatat aset keuangan.

Aset keuangan dapat dihapusbuku apabila cadangan kerugian penurunan nilai telah dibentuk 100%.

Penghapusbukuan dilakukan secara keseluruhan terhadap nilai tercatat aset keuangan dengan mendebit cadangan kerugian penurunan nilai.

c. Financial instruments *(continued)*

C. Derecognition *(continued)*

Derecognition of Financial Assets *(continued)*

Collateral that is submitted by the Group under the agreement of securities sold under agreements to repurchase and securities lending and borrowing transactions are not derecognised because the Group substantially has all the risks and benefits of the collateral, based on the requirement that the repurchase price that has been determined at the beginning, so that the criteria for derecognition are not met.

Financial assets that are transferred to third parties but do not qualify for derecognition criteria are presented in the consolidated statements of financial position as "Other assets - Receivables from securities and government bonds pledged as collateral", which the recipient has the right to sell or transfer back.

Derecognition of Financial Liabilities

Financial liabilities are derecognised when the financial liabilities have expired because the obligations specified in the contract have been released, canceled or expired or if there is a substantial change in the terms of a financial liability, the financial liability contract before the change will be written off and the Group will recognize the new financial liability.

Write-offs

In the case of financial assets' write-off is a continuation of the financial assets' settlement by taking over collaterals, the written-off amount is approximately equal to the difference between the fair value of repossessed assets after taking into account the financial assets' cost of sales and carrying amount.

Financial assets can be written-off when the allowance for impairment losses have been 100% established.

Full write-off is done to the financial assets' carrying amount by debiting the allowance for impairment losses.

D. Modifikasi atas arus kas aset keuangan

Penilaian apakah modifikasi atau restrukturisasi atas suatu aset keuangan menghasilkan atau tidak menghasilkan penghentian pengakuan, dilakukan oleh unit bisnis yang berwenang melakukan restrukturisasi aset keuangan tersebut.

Grup mengakui aset keuangan dimodifikasi atau direstrukturisasi secara substansial dan menghasilkan penghentian pengakuan ketika:
(a) aset keuangan (atau bagiannya) berakhir, yaitu jika debitur secara hukum dibebaskan dari tanggung jawab utama atas aset tersebut (atau bagiannya), baik melalui proses hukum maupun oleh kreditur pembuatan kontrak kredit baru (sebagai contoh, opsi *equity conversion*); atau
(b) terdapat konversi mata uang.

Grup menilai apakah modifikasi atau restrukturisasi atas suatu aset keuangan menghasilkan atau tidak menghasilkan penghentian pengakuan dengan cara berikut:

(a) Modifikasi aset keuangan yang menghasilkan penghentian pengakuan aset keuangan
1. Saat arus kas kontraktual atas aset keuangan direstrukturisasi atau dimodifikasi (antara lain ketika kredit direstrukturisasi) dimana restrukturisasi atau modifikasi tersebut menghasilkan penghentian pengakuan aset keuangan, Grup akan mencatat aset keuangan tersebut sebagai aset keuangan baru/modifikasian pada tanggal modifikasi/restrukturisasi.
2. Selisih nilai tercatat aset keuangan sebelum modifikasi/restrukturisasi dengan nilai wajar aset setelah modifikasi/restrukturisasi diakui di laba rugi.
3. Pendapatan atau biaya transaksi yang terjadi sehubungan dengan kejadian modifikasi diakui sebagai bagian dari keuntungan atau kerugian atas modifikasi tersebut.
4. Grup melakukan penilaian apakah aset keuangan baru/modifikasian merupakan aset yang berasal dari aset keuangan memburuk atau *Purchased or Originated Credit-Impaired* ("POCI") *Financial Asset.*
5. Pengakuan pendapatan bunga atas aset yang berasal dari aset keuangan memburuk ditentukan berdasarkan suku bunga efektif yang telah disesuaikan dengan risiko kredit (*risk-adjusted effective interest rate*) untuk mendiskontokan arus kas aset keuangan yang telah dimodifikasi.

D. Modification of financial assets cash flow

An assessment of whether a financial asset has been modified or restructured substantially or not substantially derecognised is carried out by a business unit whose authorised to modify or restructure financial assets.

Modifications or restructuring to financial assets are considered substantial and the Group will cease to recognize the original financial assets when:
(a) the financial asset (or portion thereof) expires, that is, if the debtor is legally released from primary responsibility for the asset (or any portion thereof), either by legal process or by the creditor entering into a new credit contract (for example, the equity conversion option); or

(b) there is a currency conversion.

The Group will measure the substantially and not substantially modified financial assets as follows:

(a) Substantial Modification of Financial Assets

1. When the contractual cashflow on a financial asset is restructured or modified (including when a credit is restructured) and the restructuring or modification results in derecognition of the financial asset, therefore the Group will record the financial asset as a new/modified financial asset on the modification/restructuring date.

2. The difference between the gross amount of the initial financial assets and the fair value of the modified or restructuring assets recorded as profit or loss.
3. Transaction income or costs incurred in connection with a modification event recognised as part of gain or loss on the modification.

4. Group assess whether new/modified financial assets are assets originating from impaired financial assets or Purchased or Originated Credit-Impaired ("POCI") Financial Asset.

5. Recognition of interest income on assets originating from Impaired financial assets is calculated based on an effective interest rate adjusted for credit risk (risk-adjusted effective interest rate) to discount the cash flows of modified financial assets.

c. Instrumen keuangan (lanjutan)

D. Modifikasi atas arus kas aset keuangan (lanjutan)

Grup menilai apakah modifikasi atau restrukturisasi atas suatu aset keuangan menghasilkan atau tidak menghasilkan penghentian pengakuan dengan cara berikut (lanjutan):

(b) Modifikasi aset keuangan yang tidak menghasilkan penghentian pengakuan aset keuangan
1. Saat Grup melakukan renegosiasi atau modifikasi arus kas kontraktual atas aset keuangan (antara lain ketika kredit direstrukturisasi) yang tidak memenuhi kriteria modifikasi aset keuangan yang substansial di atas, maka restrukturisasi atau modifikasi tersebut tidak menghasilkan penghentian pengakuan aset keuangan.
2. Jumlah tercatat bruto aset keuangan dihitung sebesar nilai kini (*net present value*) dari arus kas neto kontraktual yang telah dimodifikasi atau direstrukturisasi yang didiskontokan menggunakan suku bunga efektif awal.
3. Grup kemudian mengakui keuntungan atau kerugian dari modifikasi (yaitu sebesar perubahan jumlah tercatat bruto aset keuangan) dalam laporan laba rugi.
4. Pendapatan atau biaya transaksi yang terjadi sehubungan dengan kejadian modifikasi diakui sebagai penyesuaian terhadap jumlah tercatat aset keuangan yang telah dimodifikasi dan diamortisasi selama sisa jangka waktu aset keuangan modifikasian tersebut dengan menggunakan suku bunga efektif awal.
5. Selisih antara jumlah tercatat bruto aset keuangan sebelum dan sesudah modifikasi atau restrukturisasi diakui sebagai kerugian atau keuntungan aset keuangan modifikasian, yang merupakan penyesuaian terhadap jumlah tercatat bruto awal dan diamortisasi selama sisa jangka waktu aset keuangan dengan menggunakan suku bunga efektif awal (*unwinding interest*).

E. Reklasifikasi aset keuangan

Grup diperkenankan untuk melakukan reklasifikasi atas aset keuangan yang dimiliki jika Grup mengubah model bisnis untuk pengelolaan aset keuangan dan Grup tidak diperkenankan untuk melakukan reklasifikasi atas liabilitas keuangan.

c. Financial instruments *(continued)*

D. Modification of financial assets cash flow *(continued)*

The Group will measure the substantially and not substantially modified financial assets as follows (continued):

(b) Non-Substantial Modification of Financial Assets

1. When the Group renegotiates or modifies contractual cash flows of financial assets (including when loans are restructured) that do not meet the criteria for substantial modification of financial assets above, the restructuring or modification does not result in derecognition of the financial assets.

2. The gross carrying amount of financial assets is computed at the net present value of modified or restructured contractual cash flows, discounted at the initial effective interest rate.

3. The Group then recognizes the gain or loss from the modification (i.e the change in the gross carrying amount of the financial asset) in the profit or loss.

4. Transaction income or costs incurred in connection with a modification event are recognised as an adjustment to the carrying amount of the modified financial asset and amortised over the remaining term of the modified financial asset using the initial effective interest rate.

5. The difference between the gross carrying amount of a financial asset before and after modification or restructuring is recognised as a gain or loss of the modified financial asset, which is an adjustment to the initial gross carrying amount and is amortised over the remaining term of the financial asset using the initial effective interest rate (unwinding interest).

E. Reclassification of financial assets

The Group is allowed to reclassify the financial assets owned if the Group changes the business model for managing the financial assets and the Group is not allowed to reclassify the financial liabilities.

E. Reklasifikasi aset keuangan (lanjutan)

Perubahan model bisnis sifatnya harus berdampak secara signifikan terhadap kegiatan operasional Grup seperti memperoleh, melepaskan, atau mengakhiri suatu lini bisnis. Selain itu, Grup perlu membuktikan adanya perubahan tersebut kepada pihak eksternal.

Grup akan mereklasifikasi seluruh aset keuangan yang terkena dampak dari perubahan model bisnis. Perubahan tujuan model bisnis Grup harus berdampak sebelum tanggal reklasifikasi.

Yang bukan merupakan perubahan model bisnis adalah:
(a) perubahan intensi berkaitan dengan aset keuangan tertentu (bahkan dalam situasi perubahan signifikan dalam kondisi pasar).
(b) hilangnya sementara pasar tertentu untuk aset keuangan.
(c) pengalihan aset keuangan antara bagian dari Grup dengan model bisnis berbeda.

Dampak reklasifikasi aset keuangan

Grup menerapkan reklasifikasi secara prospektif dari tanggal reklasifikasi. Grup tidak menyajikan kembali keuntungan, kerugian (termasuk keuntungan atau kerugian penurunan nilai), atau bunga yang diakui sebelumnya.

Dampak reklasifikasi aset keuangan pada laba rugi atau ekuitas dan pengukuran awalnya adalah sebagai berikut:

E. Reclassification of financial assets *(continued)*

Changes in the business model should significantly impact the Group's operational activities such as acquiring, disposal or discontinued a line of business. In addition, the Group needs to prove the change of business model to external parties.

The Group will reclassify all financial assets impacted by changes in the business model. The changes of the Group's business model must occur before the reclassification date.

The following are not considered as change in business model:
(a) the change of intention related to certain financial assets (even in situations of significant changes in market conditions).
(b) temporary loss of certain markets for financial assets.
(c) the transfer of financial assets between parts of the Group and different business models.

Impact of reclassificaton of financial assets

The Group applies the reclassifications prospectively from the reclassification date. The Groups does not restate gain, losses (including gains and impairment losses), or previously recognised interest.

G. Saling hapus instrumen keuangan

Aset keuangan dan liabilitas keuangan saling hapus disajikan dalam laporan posisi keuangan konsolidasian jika memiliki hak yang berkekuatan hukum untuk melakukan saling hapus atas jumlah yang telah diakui tersebut dan berniat untuk menyelesaikan secara neto atau untuk merealisasikan aset dan menyelesaikan liabilitasnya secara simultan. Hak yang berkekuatan hukum berarti:

a. tidak terdapat kontinjensi di masa yang akan datang, dan
b. hak yang dapat dipaksakan secara hukum pada kondisi-kondisi berikut ini:
   i. kegiatan bisnis normal;
   ii. kondisi kegagalan usaha; dan
   iii. kondisi gagal bayar atau bangkrut.

H. Cadangan kerugian penurunan nilai aset keuangan

Penerapan PSAK 109 “Instrumen Keuangan” telah mengubah metode perhitungan kerugian penurunan nilai dari pendekatan kerugian yang telah terjadi (*incurred loss)* dalam PSAK 239 “Instrumen Keuangan: Pengakuan dan Pengukuran” dengan pendekatan kerugian kredit ekspektasian (*expected credit loss).*

1. Ruang lingkup penurunan nilai

a) Aset keuangan dalam klasifikasi selain yang diukur pada nilai wajar melalui laba rugi
   1) Penurunan nilai atas aset keuangan pada biaya perolehan diamortisasi diakui sebagai pengurang dari nilai tercatat aset di dalam laporan posisi keuangan konsolidasian, dan diakui di dalam laporan laba rugi konsolidasian sebagai "Beban Pembentukan Cadangan Kerugian Penurunan Nilai".
   2) Penurunan nilai atas aset keuangan (di luar instrumen ekuitas) yang diukur pada nilai wajar melalui penghasilan komprehensif lain diakui sebagai penambah dari penghasilan komprehensif lainnya di dalam laporan posisi keuangan konsolidasian (tidak mengurangi jumlah tercatat aset keuangan dalam laporan keuangan) sebagai "Keuntungan/Kerugian yang Belum Direalisasikan", dan diakui di dalam laporan laba rugi konsolidasian sebagai "Beban Pembentukan Cadangan kerugian penurunan nilai".

G. Offsetting financial instruments

Financial assets and liabilities are offset and the net amount presented in the consolidated statement of financial position when there is a legally enforceable right to offset the recognised amounts and an intention to settle on a net basis or realised the asset and settle the liability simultaneously. This means that the right to offset:

a. must not be contingent on a future event, and
b. must be legally enforceable in all of the following circumstances:
   i. the normal course of business;
   ii. the event of default; and
   iii. the event of insolvency or bankruptcy.

H. Allowance for impairment losses of financial assets

The implementation of SFAS 109 "Financial Instruments" has changed the method of calculating impairment losses from the incurred loss approach in SFAS 239 "Financial Instruments: Recognition and Measurement" with the expected credit loss approach.

1. Scope of impairment

a) Financial assets in other than those measured at fair value through profit or loss
   1) Impairment of financial assets at amortised cost is recognised as a deduction from the asset's carrying amount in the consolidated statement of financial position, and recognised in the consolidated income statement as "Allowance for Impairment Losses".
   2) Impairment of financial assets (excluding equity instruments) measured at fair value through other comprehensive income is recognised as an addition to other comprehensive income in the consolidated statement of financial position (not reducing the carrying amount of financial assets in the financial statements) as "Unrealised Gain or Loss " and recognised in the consolidated income statement as "Allowance for Impairment Losses".

b) Komitmen Pinjaman atau Kelonggaran Tarik yang Sifatnya Tidak Dapat Dibatalkan (*Committed*)

1) Penurunan nilai atas komitmen pinjaman diakui sebagai provisi pada komponen liabilitas Bank yang dicatat secara terpisah dari aset pinjaman yang terkait sebagai "Estimasi kerugian atas komitmen dan kontijensi", kecuali Grup tidak dapat mengidentifikasi secara terpisah.

2) Dalam kondisi tersebut, penurunan nilai atas komitmen pinjaman dan aset pinjaman diakui bersama sebagai pengurang dari nilai tercatat aset di dalam laporan posisi keuangan konsolidasian.

c) Kontrak Jaminan Keuangan
Penurunan nilai atas kontrak jaminan keuangan diakui sebagai provisi pada komponen liabilitas Bank sebagai "Estimasi kerugian atas komitmen dan kontijensi".

2. Evaluasi penurunan nilai yang dilakukan secara periodik

Pada setiap tanggal laporan posisi keuangan konsolidasian, Grup mengevaluasi apakah terdapat peningkatan risiko kredit yang signifikan atau terdapat bukti objektif terjadinya penurunan nilai.

Kriteria yang digunakan oleh Grup untuk menentukan bukti objektif dari penurunan nilai adalah sebagai berikut:

a) Kesulitan keuangan signifikan yang dialami penerbit atau pihak peminjam;
b) Pelanggaran kontrak, seperti peristiwa gagal bayar atau peristiwa tunggakan bunga atau pokok;
c) Pihak pemberi pinjaman, untuk alasan ekonomi atau kontraktual sehubungan dengan kesulitan keuangan yang dialami pihak peminjam, telah memberikan konsesi pada pihak peminjam yang tidak mungkin diberikan jika pihak peminjam tidak mengalami kesulitan tersebut;

1. Scope of Impairment *(continued)*

b) Loan Commitments or Committed Unused Loan Facilities

1) Impairment of loan commitments is recognised as provision for the Bank's liability component which is recorded separately from the related loan assets as "Estimated losses on commitments and contingencies", unless the Group cannot identify it separately.

2) In that case, the impairment of loan commitments and loan assets is recognised together as a deduction from the carrying amount of the assets in the consolidated statement of financial position.

c) Financial Guarantee Contract
Impairment of financial guarantee contracts is recognised as a provision under the Bank's liability component as "Estimated losses on commitments and contingencies".

2. Periodic evaluation on impairment of financial assets

The Group assesses at each reporting date whether there is a significant increase in credit risk or objective evidence that a financial asset or group of financial assets is impaired.

The criteria that the Group uses to determine that there is objective evidence of impairment loss include:

a) Significant financial difficulty of the issuer or obligor;
b) A breach of contract, such as a default or delinquency in interest or principal payments;
c) The lender, for economic or legal reasons relating to the borrower's financial difficulty, granting to the borrower a concession that the lender would not otherwise consider if the borrower is not having that financial difficulty;

d) Terjadi kemungkinan bahwa pihak peminjam akan dinyatakan pailit atau melakukan reorganisasi keuangan lainnya;
e) Hilangnya pasar aktif dari aset keuangan akibat kesulitan keuangan; atau
f) Pembelian atau penerbitan aset keuangan dengan diskon sangat besar yang mencerminkan kerugian kredit yang terjadi.

Grup menggunakan kriteria tambahan untuk menentukan kualitas aset instrumen keuangan sesuai dengan Peraturan Otoritas Jasa Keuangan (POJK) No. 40/POJK.03/2019 tanggal 19 Desember 2019 tentang Penilaian Kualitas Aset Bank Umum.

Selanjutnya, Grup mengelompokkan aset keuangan berdasarkan hasil evaluasi tersebut yang mencerminkan tingkat risiko kredit aset keuangan.

a) *Stage* 1

Pada tanggal evaluasi penurunan nilai, risiko kredit atas instrumen keuangan tidak meningkat secara signifikan sejak pengakuan awal yang dapat dibuktikan dengan terjadinya seluruh hal berikut, yaitu:

Untuk Jenis Aset Keuangan Non-Surat Berharga:
1) Tidak terdapat tunggakan pokok dan/atau bunga lebih dari 30 hari;
2) Instrumen keuangan memiliki kualitas 1 atau 2; dan
3) Tidak direstrukturisasi.

Aset Keuangan Surat Berharga:

d) There is a probability that the borrower will enter bankruptcy or other financial reorganisation;
e) The disappearance of an active market for that financial asset because of financial difficulties; or
f) Purchase or issuance of financial asset at significant discount which reflects the credit loss that occurs.

The Group uses additional criteria to determine the quality of financial instrument assets in accordance with the Financial Services Authority Regulation (POJK) No. 40/POJK.03/2019 dated 19 December 2019 concerning Asset Quality Assessment for Commercial Banks.

Furthermore, the Group classifies financial assets based on the evaluation results, which reflect the level of credit risk of the financial assets.

a) Stage 1

At the evaluation date of impairment, credit risk on financial instruments does not increase significantly since initial recognition, which can be proven by the occurrence of all of the following, namely:

For Types of Non-Securities Financial Assets:
1) There are no arrears of principal and/or interest for more than 30 days;
2) The financial instrument has a collectability of 1 or 2; and

Untuk Jenis Aset Keuangan Surat Berharga:
1) Memiliki peringkat paling rendah 1 (satu) tingkat di bawah peringkat investasi;
2) Tidak terdapat tunggakan kupon dan/atau kewajiban lain yang sejenis; dan

e. If the condition of the financial asset are proven to be impaired, the Group will recognize it in the income statement as an addition to "Allowance for Impairment Losses".

3. Metode penurunan nilai

Grup melakukan evaluasi penurunan nilai dengan metode sebagai berikut:

a) Metode Individual

1) Kriteria Individual

Grup mengevaluasi penurunan nilai secara individual apabila Grup memiliki informasi yang wajar dan terdukung untuk mengukur kerugian kredit ekspektasian sepanjang umurnya pada instrumen secara individual dan aset keuangan memiliki kriteria sebagai berikut:

a. Aset keuangan per debitur memiliki nilai *outstanding* kumulatif lebih dari Rp25.000 (dua puluh lima miliar Rupiah);
b. Kredit segmen *Corporate*, Kelembagaan, *Financial Institutions*, *Commercial*, dan SME *Banking*; dan
c. Aset keuangan termasuk dalam kategori *stage* 2 akibat dari restrukturisasi, *stage* 3, atau POCI.

Grup juga dapat menetapkan aset keuangan untuk dievaluasi secara individual meskipun aset keuangan dimaksud belum memiliki kriteria untuk dievaluasi secara individual.

2) Jika aset keuangan terdapat bukti objektif penurunan nilai dari aset keuangan yang dievaluasi secara individual namun tidak terdapat kerugian penurunan nilai, maka aset keuangan tersebut tetap dimasukkan ke dalam klasifikasi aset keuangan yang akan dievaluasi penurunan nilainya secara individual. Namun, Grup membentuk cadangan kerugian penurunan nilai atas aset keuangan tersebut berdasarkan *probability of default* yang dihasilkan dari evaluasi penurunan nilai kredit secara kolektif.

c. Financial instruments *(continued)*

3. Impairment method

The Group evaluates the impairment using the following methods:

a) Individual Method

1) Individual Criteria

The Group evaluates impairment individually when the Group has reasonable and supportable information to measure the lifetime expected credit losses on an individual instrument and the financial assets have the following criteria:

a. Financial assets per debtor with a cumulative outstanding amount of more than Rp25,000 (twenty five billion Rupiah);
b. Loans for the Corporate, Institutional, Financial Institutions, Commercial, and SME Banking segments; and
c. Financial assets fall into the stage 2 category as a result of a restructuring, stage 3, or POCI.

The Group may also designate financial assets to be evaluated individually even though the financial assets have not yet meet criteria for individual evaluation.

2) If a financial asset has objective evidence of impairment from a financial asset that is evaluated individually but there is no impairment loss, the financial asset is still classified as a financial asset that will be assessed for impairment individually. However, the Group establishes allowance for impairment losses on these financial assets based on the probability of default resulting from a collective evaluation of loans impairment.

3. Metode penurunan nilai (lanjutan)

Grup melakukan evaluasi penurunan nilai dengan metode sebagai berikut (lanjutan):

a) Metode Individual (lanjutan)

3) Evaluasi Penurunan Nilai

Evaluasi penurunan nilai secara individual didasarkan pada konsep estimasi jumlah probabilitas tertimbang kerugian aset keuangan. Konsep tersebut menggunakan pembobotan masing-masing dari 3 (tiga) skenario yaitu skenario optimis, skenario normal, dan skenario pesimis.

1. Optimis

Skenario dengan asumsi terdapat kenaikan atau ekspansi dalam perekonomian yang berakibat pada menguatnya nilai variabel seperti pertumbuhan ekonomi meningkat atau apresiasi nilai tukar.

2. Normal

Skenario yang memiliki peluang terbesar untuk terjadi dibandingkan 2 (dua) skenario lainnya. Nilai variabel dalam skenario *baseline* adalah hasil proyeksi dengan asumsi pergerakan ekonomi tanpa adanya peristiwa luar biasa, guncangan atau gejolak ekonomi.

3. Pesimis

Skenario dengan asumsi terdapat pelemahan atau kontraksi dalam perekonomian yang berakibat melemahnya nilai variabel seperti penurunan pertumbuhan ekonomi atau depresiasi nilai tukar.

3. Impairment method *(continued)*

The Group evaluates the impairment using the following methods (continued):

a) Individual Method (continued)

3) Impairment Evaluation

Individual impairment evaluation is based on the concept of an estimated weighted probability of loss of financial assets. This concept uses the weighting of each of the 3 (three) scenarios, which are the optimistic scenario, the normal scenario, and the pessimistic scenario.

1. Optimistic

A scenario with the assumption that there is an increase or expansion in the economy which results in the strengthening of variable values such as increased economic growth or exchange rate appreciation.

2. Normal

The scenario that has the greatest chance of occurring compared to the other 2 (two) scenarios. The variable value in the baseline scenario is the projection result assuming economic movements without any extraordinary events, shocks or economic turmoil.

3. Pessimistic

Scenarios with the assumption that there is a weakening or contraction in the economy that results in weakening of variable values such as a decrease in economic growth or depreciation of the exchange rate.

1. Kekuatan finansial dan kemampuan debitur untuk membayar kembali kewajiban (*repayment capacity*).
2. Jenis dan jumlah agunan.

Selisih estimasi jumlah probabilitas tertimbang dengan jumlah *outstanding* aset keuangan mencerminkan jumlah kerugian penurunan nilai individual.

Metode evaluasi penurunan nilai secara individual didasarkan pada 2 (dua) konsep, yaitu estimasi jumlah kerugian aset keuangan dan estimasi jumlah yang dapat diperoleh kembali. Metode yang digunakan adalah *discounted cash flow* atau metode *fair value of collateral.* Bank menggunakan metode *fair value of collateral* sebagai arus kas masa datang apabila memenuhi salah satu kondisi berikut:

1. Kredit bersifat *collateral dependent*, yaitu jika pelunasan kredit hanya bersumber dari agunan;
2. Sulit untuk menentukan jumlah dan waktu penerimaan estimasi arus kas yang berasal dari pokok kredit dan/atau bunga dengan andal; dan/atau
3. Pengambilalihan agunan kemungkinan besar terjadi dan didukung dengan aspek legal pengikatan agunan.

Each scenario provides a discounted present value of cash flows, where the cash flows are based on all available information with experienced credit judgment and reflect all information that takes into account various factors such as:

1. *Financial strength and the debtor's repayment capacity.*
2. *Type and amount of collateral.*
3. *Availability of warranty.*
4. *Customers' future business prospects.*
5. *Probability of collateral sale.*
6. *Historical losses.*
7. *Relevant macroeconomic factors.*

The difference between the weighted probability and the total outstanding of financial assets reflects the amount of the individual impairment loss.

The individual impairment evaluation method is based on 2 (two) concepts, which are the estimated amount of loss on financial assets and the estimated amount that can be recovered. The method used are discounted cash flow or fair value of collateral method. The Bank uses the fair value of collateral method as future cash flows if it meets one of the following conditions:

1. *Loans is collateral dependent, if loans repayment source only from collateral;*
2. *It is difficult to reliably determine the amount and timing of receipt of the estimated cash flow from loan principal and/or interest; and/or;*
3. *Foreclosure of collateral is likely to occur and is supported by legal binding aspects of collateral.*

b) Metode Kolektif

1) Kriteria Kolektif

Bank mengevaluasi penurunan nilai secara kolektif apabila aset keuangan memiliki kesamaan dalam karakteristik risiko aset keuangan dengan tujuan untuk memfasilitasi analisis yang didesain untuk memungkinkan peningkatan risiko kredit secara signifikan dapat diidentifikasi tepat waktu. Kriteria aset keuangan yang dievaluasi secara kolektif adalah sebagai berikut:

a. Aset keuangan per debitur merupakan aset keuangan *non-performing* atau memiliki *days past due* > 90 hari dan memiliki nilai kumulatif sebesar ≤ Rp25.000 (dua puluh lima milyar rupiah) untuk Segmen *Corporate*, Kelembagaan, *Financial Institutions*, *Commercial* dan SME *Banking*;
b. Aset keuangan *performing* atau memiliki *days past due* ≤ 90 hari dan tidak direstrukturisasi untuk segmen *Corporate*, Kelembagaan, *Financial Institutions*, *Commercial* dan SME *Banking*; dan
c. Seluruh kredit segmen *Micro Banking* dan *Consumer*.

Secara garis besar, seluruh portofolio kredit yang evaluasi penurunan nilainya tidak dihitung menggunakan metode individual, akan dievaluasi menggunakan metode kolektif.

2) Evaluasi Penurunan Nilai

Evaluasi penurunan nilai secara kolektif didasarkan pada *konsep Probability of Default* (PD), *Loss Given Default* (LGD) dan *Exposure at Default* (EAD) yang mempertimbangkan informasi masa lalu, terkini, dan masa mendatang.

1) Collective Criteria

The Bank assesses impairment collectively if the financial assets share the same risk characteristics of the financial assets with the purpose of facilitating analysis which is designed to allows a significant increase in credit risk to be identified in a timely manner. The criteria for financial assets that are evaluated collectively are as follows:

a. Financial assets per debtor are non-performing financial assets or have days past due > 90 days and have a cumulative value of ≤ Rp25,000 (twenty five billion rupiah) for the Corporate, Institutional, Financial Institutions, Commercial, and SME Banking segments;
b. Performing financial assets or having days past due ≤ 90 days and were not restructured for the Corporate, Institutional, Financial Institutions, Commercial, and SME Banking segments; and
c. All loans in the Micro Banking and Consumer segments.

In general, all loan portfolios for which impairment evaluation is not calculated using the individual method will be evaluated using the collective method.

2) Impairment Evaluation

The evaluation of collective impairment is based on the concepts of Probability of Default (PD), Loss Given Default (LGD), and Exposure at Default (EAD) which consider past, current, and future information.

a. *Probability of Default*

Bank menggunakan metode *Basel, Vasicek, Roll Rate Transition Matrix* maupun pendekatan lainnya dalam menentukan nilai PD dari setiap debitur.

Metode *Basel* dilakukan dengan menentukan hubungan antara PD suatu debitur dengan karakteristik internal dari debitur yang bersangkutan. Model Basel yang telah didapatkan digunakan sebagai dasar penentuan nilai PD dari setiap debitur.

Metode *Vasicek* adalah metode penentuan PD menggunakan formula korelasi aset yang telah ditentukan oleh *Basel Committee*.

Metode *Roll Rate Transition Matrix* menggunakan *historical transition bucket* PD. *Bucket* PD yang digunakan dalam perhitungan *historical* adalah sebagai berikut:
1. *Bucket* 1: *Lancar*
2. *Bucket* 2: 1-30 *days past due* (DPD)
3. *Bucket* 3: 31-60 dpd
4. *Bucket* 4: 61-90 dpd
5. *Bucket* 5: >90 dpd

PD *Forward-Looking Macro Adjustment* adalah metode yang digunakan untuk menentukan nilai PD *forward looking* dari pendekatan baik *Basel* maupun *Roll Rate* berdasarkan hubungan historis antara makro ekonomi dengan nilai PD Bank.

a. Probability of Default

The Bank uses the Basel, Vasicek, Roll Rate Transition Matrix, and other approaches in determining the PD value of each debtor.

The Basel method is performed by determining the relationship between a debtor's PD with the internal characteristics of that debtor. The Basel model that has been obtained is used as the basis for determining the PD value of each debtor.

The Vasicek method is a method of determining PD using the asset correlation formula that has been determined by the Basel Committee.

The Roll Rate Transition Matrix method uses the historical transition bucket PD. PD buckets used in historical calculations are as follows:

1. *Bucket 1: Current*
2. *Bucket 2: 1-30 days past due (DPD)*
3. *Bucket 3: 31-60 dpd*
4. *Bucket 4: 61-90 dpd*
5. *Bucket 5: >90 dpd*

PD Forward-Looking Macro Adjustment is a method used to determine the forward looking PD value of both Basel and Roll Rate approaches based on the historical relationship between the macro economy and the PD value of the Bank.

b. *Loss Given Default*

Bank menggunakan metode *Basel* dan *Historical* dalam menentukan nilai LGD dari setiap debitur. LGD menggambarkan persentase nominal fasilitas yang tidak akan dapat dipulihkan oleh Bank terhadap debitur *default*. LGD biasa dihitung dengan formula 1-*Recovery Rate. Recovery rate* dihitung mempertimbangkan *Time Value of Money* dari pengembalian kewajiban yang telah default. Tingkat suku bunga yang digunakan untuk menghitung *Time Value of Money* dari *Recovery* adalah *Effective Interest Rate* (EIR).

Metode *Basel* dilakukan dengan menentukan hubungan antara LGD suatu debitur dengan karakteristik internal dari debitur yang bersangkutan. Model Basel yang telah didapatkan digunakan sebagai dasar penentuan nilai LGD dari setiap debitur.

Metode *Historical* dilakukan dengan menghitung rata-rata nilai LGD dalam periode jangka panjang pada segmen yang dimaksud.

b. Loss Given Default

The Bank uses Basel and Historical methods in determining the LGD value of each debtor. LGD describes the nominal percentage of the facility that the Bank will not be able to recover against the default debtor. Regular LGD is calculated with formula 1-Recovery Rate. The recovery rate is calculated by considering the Time Value of Money from the recovery of the default obligation. The interest rate used to calculate the Time Value of Money of Recovery is the Effective Interest Rate (EIR).

The Basel method is carried out by determining the relationship between a debtor's LGD and the internal characteristics of the debtor concerned. The Basel model that has been obtained is used as the basis for determining the LGD value of each debtor.

Historical method is done by calculating the average value of LGD in the long term observation period in the respective segment.

Forward-Looking Macro Adjustment pada LGD adalah metode yang digunakan untuk menentukan nilai LGD *forward looking* berdasarkan hubungan historis antara makroekonomi dengan nilai LGD Bank. Jika tidak didapatkan hubungan antara makroekonomi dengan nilai LGD Bank, maka Bank tidak dapat menggunakan *Forward-Looking* dalam penentuan nilai LGD.

c. *Exposure at Default*

Dalam menentukan nilai EAD dari setiap debitur, Bank menggunakan metode *Basel*, *Prepayment Rate* dan *Expected Lifetime*. EAD menggambarkan *exposure* yang akan ditanggung Bank jika terdapat debitur yang *default*.

Metode *Basel* dalam perhitungan EAD dilakukan dengan menentukan hubungan antara EAD suatu debitur dengan karakteristik internal dari debitur yang bersangkutan.

Metode *Prepayment Rate* ialah metode yang mempelajari *behaviour* dari tingkat pembayaran debitur yang lebih besar dibandingkan dengan besaran pembayaran fasilitas yang telah dijadwalkan.

Forward-Looking Macro Adjustment in LGD is a method used to determine the forward looking LGD value based on the historical relationship between macroeconomics and the Bank's LGD value. If there is no relationship between macroeconomics and the Bank's LGD value, the Bank may not use Forward-Looking in determining the LGD value.

c. Exposure at Default

In determining the EAD value of each debtor, the Bank uses the Basel, Prepayment Rate, and Expected Lifetime method. EAD describes the exposure that will be borne by the Bank if there is a debtor become defaults.

The Basel method in calculating EAD is performed by determining the relationship between a debtor's EAD and the internal characteristics of the respective debtor.

The Prepayment Rate method is a method that studies the behavior of the debtor's payment rate that is bigger than the scheduled facility payment amount.

d. *Expected Credit Loss*

Secara umum formula untuk menghitung ECL secara kolektif adalah pengkalian antara *Probability of Default*, *Loss Given Default*, dan *Exposure at Default*.

Dalam menghitung besarnya cadangan kerugian penurunan nilai kolektif, Bank menggunakan nilai saldo rekening kredit dari yang penurunan nilainya dievaluasi secara kolektif.

Perhitungan cadangan kerugian penurunan nilai sesuai pada masing-masing *stage* sesuai pada karakteristik *staging*. Metode perhitungan pada masing-masing *stage* adalah sebagai berikut:
1. *Stage* 1: 12-*months* ECL
2. *Stage* 2: *Lifetime* ECL
3. *Stage* 3: *Lifetime* ECL

12-*Months* ECL adalah perhitungan kerugian ekspektasian yang dihitung untuk 1 tahun ke depan.

d. Expected Credit Loss

In general, the formula for calculating collective ECL is the multiplication of Probability of Default, Loss Given Default, and Exposure at Default.

In calculating the amount of collective impairment, the Bank uses the loan carrying value which the impairment value is assessed collectively.

Calculation of impairment is done for each stage according to the characteristics of the staging. The calculation method for each stage is as follows:

1. Stage 1: 12-months ECL
2. Stage 2: Lifetime ECL
3. Stage 3: Lifetime ECL

12-Months ECL is the calculation of the expected loss for the next 1 year.

4. Pendapatan bunga sebelum dan sesudah penurunan nilai

ECL-Lifetime is the calculation of the expected loss which is calculated for the remaining tenor of the facility.

The probability weighted in the calculation of impairment has been determined by the Group which includes the percentage of optimistic, normal, and pessimistic scenarios.

The total weighted of the estimated cash flow becomes a deduction from the carrying amount of the loans, where the difference will be the allowance for impairment on loans.

a) Aset Keuangan yang Dibeli atau Berasal dari Aset Keuangan Memburuk ("POCI")

Untuk aset keuangan tersebut, Grup menerapkan suku bunga efektif yang disesuaikan dengan risiko kredit (*risk-adjusted effective interest rate*) atas biaya perolehan diamortisasi dari aset keuangan sejak pengakuan awal.

b) *Stage* 3

Untuk aset keuangan tersebut, Grup menerapkan suku bunga efektif atas biaya perolehan diamortisasi dari aset keuangan di periode pelaporan, yaitu nilai yang telah dikurangi kerugian akibat penurunan nilai.

Pendapatan bunga selanjutnya diakui atas dasar suku bunga yang digunakan untuk mendiskonto arus kas masa depan dalam pengukuran kerugian penurunan nilai atau yang disebut dengan *unwinding interest*.

Interest income from impaired financial assets (stage 3 or POCI) is calculated by applying an effective interest rate on the net carrying amount of financial assets, which is the outstanding amount after deducting losses due to impairment for:

a) Financial Assets Purchased or Originated Credit-Impaired Financial Assets ("POCI")

For these financial assets, the Group applies a risk-adjusted effective interest rate on the amortised cost of the financial assets since initial recognition.

b) Stage 3

For these financial assets, the Group applies an effective interest rate on the amortised cost of financial assets in the reporting period, which is the amount that has been reduced by any impairment losses.

Interest income is subsequently recognised based on of the interest rate used to discount future cash flows in measuring impairment losses or what is known as unwinding interest.

1) Piutang *murabahah* yang secara individual memiliki nilai signifikan namun tidak memiliki bukti objektif penurunan nilai;
2) Piutang *murabahah* yang secara individual memiliki nilai tidak signifikan; dan

2) Murabahah receivables that are restructured or had been restructured and which individually have a balance of receivables above or equal Rp10,000.

The Subsidiary determines murabahah receivables to be evaluated for impairment through collective evaluation if one of the following criteria is met:
1) Murabahah receivables which individually have significant value but there is no objective evidence of impairment;
2) Murabahah receivables which individually have insignificant value; and
3) Restructured murabahah receivables which individually have insignificant value.

Pada setiap tanggal laporan posisi keuangan konsolidasian, Grup mengevaluasi apakah terdapat bukti objektif bahwa aset keuangan atau kelompok aset keuangan mengalami penurunan nilai. Lihat Catatan 2c.(H).(2) untuk kriteria bukti objektif adanya penurunan nilai.

Penurunan yang signifikan atau penurunan jangka panjang atas nilai wajar dari investasi dalam instrumen utang di bawah biaya perolehannya merupakan bukti objektif terjadinya penurunan nilai dan menyebabkan pengakuan kerugian penurunan nilai. Ketika terdapat bukti tersebut di atas untuk aset keuangan yang tersedia untuk dijual, kerugian kumulatif, yang merupakan selisih antara biaya perolehan dengan nilai wajar kini, dikurangi kerugian penurunan nilai aset keuangan yang sebelumnya telah diakui pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian, dikeluarkan dari ekuitas dan diakui pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian.

Jika, pada tahun berikutnya, nilai wajar aset keuangan yang diklasifikasikan dalam kelompok tersedia untuk dijual meningkat dan peningkatan tersebut dapat secara objektif dihubungkan dengan peristiwa yang terjadi setelah pengakuan kerugian penurunan nilai pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian, maka kerugian penurunan nilai tersebut harus dipulihkan melalui laba rugi dan penghasilan komprehensif lain konsolidasian.

5. Allowance for possible losses on earning assets of Subsidiary based on sharia *(continued)*

(a) Financial assets carried at amortised cost (continued)

The Subsidiary uses the migration analysis method which is a statistical analysis method to assess allowance for impairment losses on collective receivables. The Subsidiary uses 5 (five) years historical data to compute for the Probablitity of Default ("PD") and Loss Given Default ("LGD").

(b) Financial assets classified as available for sale

The Group assesses at each date of the consolidated statement of financial position whether there is objective evidence that a financial asset or a group of financial assets is impaired. Refer to Note 2c.(H).(2) for the criteria of objective evidence of impairment.

A significant or prolonged decline in the fair value of the debt investments below its cost is objective evidence of impairment resulting in the recognition of an impairment loss. If any such evidence exists for available for sale financial assets, the cumulative loss - measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in consolidated statement of profit or loss and other comprehensive income is removed from equity and recognised in the consolidated statement of profit or loss and other comprehensive income.

If, in a subsequent period, the fair value of a financial asset classified as available for sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in the consolidated statement of profit or loss and other comprehensive income, the impairment loss is reversed through the consolidated statement of profit or loss and other comprehensive income.

(c) Kontrak jaminan keuangan dan komitmen

Kontrak jaminan keuangan adalah kontrak yang mengharuskan penerbit untuk melakukan pembayaran yang ditetapkan untuk mengganti uang pemegang kontrak atas kerugian yang terjadi karena debitur tertentu gagal untuk melakukan pembayaran pada saat jatuh tempo, sesuai dengan ketentuan dari instrumen utang. Jaminan keuangan tersebut diberikan kepada bank-bank, lembaga keuangan dan badan-badan lainnya atas nama debitur untuk menjamin kredit dan fasilitas-fasilitas perbankan lainnya.

Jaminan keuangan awalnya diakui dalam laporan keuangan konsolidasian sebesar nilai wajar pada tanggal jaminan diberikan. Nilai wajar dari jaminan keuangan pada saat dimulainya transaksi pada umumnya sama dengan provisi yang diterima untuk jaminan diberikan dengan syarat dan kondisi normal. Setelah pengakuan awal, liabilitas Bank atas jaminan tersebut diukur pada jumlah yang lebih tinggi antara jumlah awal, dikurangi amortisasi provisi dan estimasi terbaik dari jumlah yang diharapkan akan terjadi untuk menyelesaikan jaminan tersebut. Estimasi ini ditentukan berdasarkan pengalaman transaksi yang sejenis dan kerugian historis masa lalu, dilengkapi dengan penilaian manajemen. Pendapatan provisi yang diperoleh diamortisasi selama jangka waktu jaminan dengan menggunakan metode garis lurus.

Bank menentukan cadangan kerugian penurunan nilai aset keuangan atas kontrak jaminan keuangan yang memiliki risiko kredit dan komitmen berdasarkan nilai yang lebih tinggi antara nilai amortisasi (nilai tercatat) dan nilai kini atas pembayaran liabilitas yang diharapkan akan terjadi (ketika pembayaran atas jaminan tersebut menjadi *probable*) atau nilai cadangan kerugian penurunan nilai yang dihitung berdasarkan data kerugian historis untuk evaluasi penurunan nilai secara kolektif.

(c) Financial guarantee contracts and commitments

Financial guarantee contracts are contracts that require the issuer to make specified payments to reimburse the contracts holder for a loss incurred because a specified debtor defaulted to make payments when due, in accordance with the terms of a debt instrument. Such financial guarantees are given to banks, financial institutions and other institutions on behalf of customers to secure loans and other banking facilities.

Financial guarantees are initially recognised in the consolidated financial statements at fair value on the date which the guarantee was given. The fair value of a financial guarantee at inception is likely to equal with the provision received because all guarantees are agreed on arm's length terms. Subsequent to initial recognition, the Bank's liabilities under such guarantees are measured at the higher amount between the initial amount, less amortisation of provision recognised, and the best estimates of the amount required to settle the guarantee. These estimation are determined based on experience of similar transactions and history of past losses, supplemented by the judgement from management. The provision income earned is amortised over the period of guarantees using the straight-line method.

The Bank determines impairment losses on financial assets of financial guarantee contracts that have credit risk and commitment based on the value that is higher between the amortised value (carrying value) and the present value of the liabilities that are expected to occur (when payment under the guarantee has become probable) or impairment losses that are calculated based on historical loss data for a collective evaluation of impairment.

I. Investasi pada sukuk

Sebelum pengakuan awal, Grup menentukan klasifikasi investasi pada sukuk berdasarkan tujuan investasi Grup. Klasifikasi dalam investasi sukuk terdiri dari:

- Biaya perolehan

  Jika investasi tersebut dimiliki dalam suatu model usaha yang bertujuan utama untuk memperoleh arus kas kontraktual; dan terdapat persyaratan kontraktual untuk menentukan tanggal tertentu pembayaran pokok dan/atau hasilnya. Biaya perolehan sukuk *ijarah* dan sukuk *mudharabah* termasuk biaya transaksi. Selisih antara biaya perolehan dan nilai nominal diamortisasi secara garis lurus selama jangka waktu sukuk.

- Diukur pada nilai wajar melalui penghasilan komprehensif lain

  Jika investasi tersebut dimiliki dalam suatu model usaha yang bertujuan utama untuk memperoleh arus kas kontraktual dan melakukan penjualan sukuk dan terdapat persyaratan kontraktual menentukan tanggal tertentu pembayaran pokok dan/atau hasilnya. Biaya perolehan sukuk *ijarah* dan sukuk *mudharabah* termasuk biaya transaksi. Selisih antara biaya perolehan dan nilai nominal diamortisasi secara garis lurus selama jangka waktu sukuk. Perubahan nilai wajar diakui dalam penghasilan komprehensif lain. Pada saat penghentian pengakuan saldo, perubahan nilai wajar dalam penghasilan komprehensif lain direklasifikasi ke laba rugi sebagai penyesuaian reklasifikasi.

- Diukur pada nilai wajar melalui laba rugi

  Biaya perolehan sukuk *ijarah* dan sukuk *mudharabah* yang diukur pada nilai wajar melalui laba rugi tidak termasuk biaya transaksi. Untuk investasi pada sukuk yang diukur pada nilai wajar melalui laba rugi, selisih antara nilai wajar dan jumlah tercatat diakui dalam laba rugi.

I. Investment in sukuk

Before the initial recognition, the Group determines the classification of investment in sukuk based on the Group's investment objective. Investment in sukuk can be measured as follows:

- *Acquisition cost*

  If the investment is held within a business model that aims to collect contractual cash flows and there is a contractual requirement to determine the specific date of principal payments and/or the returns. The acquisition cost for sukuk ijarah and sukuk mudharabah includes transaction cost. The difference between acquisition cost and nominal value is amortised using straight-line method during the period of the sukuk instrument.

- *Measured at fair value through other comprehensive income*

  If the investment is held within a business model which its primary purpose is to obtain contractual cash flows and sell off sukuk and there is a contractual requirements determined by specific date of payment of principal and/or results. The acquisition cost of sukuk ijarah and sukuk mudharabah includes transaction costs. The difference between the acquisition cost and nominal value is amortised on straight-line basis over the terms of sukuk. The changes in fair value are recognised in other comprehensive income. At the time of derecognition, the changes in fair value in other comprehensive income are reclassified to profit or loss as a reclassification adjustment.

- *Measured at fair value through profit or loss*

  The acquisition cost of sukuk ijarah and sukuk mudharabah is measured at fair value through profit or loss excluding transaction costs. For investments in sukuk which are measured at fair value through profit or loss, the difference between the fair value and the carrying amount is recognised in profit or loss.

c. Instrumen keuangan (lanjutan)

J. Sukuk *mudharabah* yang diterbitkan

Sukuk *mudharabah* yang diterbitkan disajikan sebesar nilai nominal. Biaya-biaya yang timbul dari penerbitan surat berharga dicatat sebagai beban yang ditangguhkan yang disajikan dalam akun "Aset lain-lain" dan diamortisasi secara garis lurus selama jangka waktu sukuk *mudharabah*.

K. Penentuan nilai wajar

Nilai wajar adalah pengukuran berbasis pasar. Pengukuran/penetapan nilai wajar bertujuan untuk mengestimasi harga dimana transaksi teratur (*orderly transaction*) untuk menjual aset atau mengalihkan liabilitas akan terjadi antara pelaku pasar (*market participants*) pada tanggal pengukuran.

Ketika tidak terdapat pasar aktif atau harga suatu instrumen keuangan yang identik tidak dapat diobservasi, Grup dapat mengukur nilai wajar menggunakan teknik penilaian sesuai jenis instrumen keuangan.

Grup dapat melakukan pengukuran nilai wajar, dengan hirarki sebagai berikut:
1. Input Level 1, yaitu harga kuotasian (tanpa penyesuaian) di pasar aktif untuk aset atau liabilitas yang identik yang dapat diakses Grup pada tanggal pengukuran.
2. Input Level 2, yaitu input selain harga kuotasian yang termasuk dalam level 1 yang dapat diobservasi untuk aset atau liabilitas, baik secara langsung atau tidak langsung.
3. Input Level 3, yaitu input yang tidak dapat diobservasi untuk aset atau liabilitas.

Pengukuran nilai wajar mengasumsikan bahwa transaksi untuk menjual aset atau mengalihkan liabilitas terjadi:
- Di pasar utama untuk aset dan liabilitas tersebut; atau
- Jika tidak terdapat pasar utama, di pasar yang paling menguntungkan untuk aset atau liabilitas tersebut.

2. MATERIAL ACCOUNTING POLICY INFORMATION *(continued)*

c. Financial instruments *(continued)*

J. Sukuk mudharabah issued

Sukuk mudharabah issued is recognised at nominal amount. Transaction costs from the issuance of sukuk mudharabah are recognised as deferred expense and presented as "Other assets" and amortised using straight-line over the terms of sukuk mudharabah.

K. Determination of fair value

Fair value is a market based measurement. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction among market participants at the measurement date.

When there is no active market or the price of an identical financial instrument cannot be observed, the Group can measure fair value using valuation techniques according to the type of financial instrument.

The Group can measure fair value, with the following hierarchy:
1. *Input Level 1, the quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group can access at the measurement date.*
2. *Input Level 2, the input other than quoted price included in level 1 that can be observed for assets or liabilities, either directly or indirectly.*
3. *Input Level 3, the unobservable input for an asset or liability.*

A fair value measurement assumes that the transaction to sell the asset or transfer the liability takes place either:
- *In the principal market for the asset or liability; or*
- *In the absence of a principal market, in the most advantageous market for the asset or liability.*

K. Penentuan nilai wajar (lanjutan)

Nilai wajar suatu aset atau liabilitas diukur menggunakan asumsi yang akan digunakan pelaku pasar ketika menentukan harga aset dan liabilitas tersebut dengan asumsi bahwa pelaku pasar bertindak dalam kepentingan ekonomi terbaiknya.

Pengukuran nilai wajar aset non-keuangan memperhitungkan kemampuan pelaku pasar untuk menghasilkan manfaat ekonomi dengan menggunakan aset dalam penggunaan tertinggi dan terbaiknya atau dengan menjualnya kepada pelaku pasar lain yang akan menggunakan aset tersebut dalam penggunaan tertinggi dan terbaiknya.

Nilai wajar untuk instrumen keuangan yang diperdagangkan di pasar aktif, seperti efek-efek dan obligasi pemerintah, ditentukan berdasarkan nilai pasar yang berlaku pada tanggal laporan posisi keuangan konsolidasian menggunakan harga yang dipublikasikan secara rutin dan berasal dari sumber yang terpercaya, seperti Bloomberg, Reuters atau harga yang diberikan oleh broker (harga kuotasian). Investasi dalam unit reksa dana dinyatakan sebesar nilai pasar sesuai nilai aset bersih dari reksa dana pada tanggal laporan posisi keuangan konsolidasian.

Instrumen keuangan dianggap memiliki kuotasi di pasar aktif, jika harga kuotasi tersedia sewaktu-waktu dan dapat diperoleh secara rutin dari bursa, pedagang efek (*dealer*), perantara efek (*broker*) dan harga tersebut mencerminkan transaksi pasar yang aktual dan rutin dalam suatu transaksi yang wajar. Jika kriteria di atas tidak terpenuhi, maka pasar aktif dinyatakan tidak tersedia. Indikasi-indikasi dari pasar tidak aktif adalah terdapat selisih yang besar antara harga penawaran dan permintaan atau kenaikan signifikan dalam selisih harga penawaran dan permintaan dan hanya terdapat beberapa transaksi terkini.

Untuk efek-efek yang tidak mempunyai harga pasar, estimasi atas nilai wajar efek-efek ditetapkan dengan mengacu pada nilai wajar instrumen lain yang substansinya sama atau dihitung berdasarkan arus kas yang diharapkan terhadap aset bersih efek-efek tersebut.

c. Financial instruments *(continued)*

K. Determination of fair value *(continued)*

The fair value of an asset or a liability should be measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset at its highest and best use or by selling it to another market participant that would use the asset at its highest and best use.

The fair value of financial instruments traded in active markets, such as marketable securities and government bonds, is determined based on quoted market prices at the consolidated statement of financial position date using price that published regularly and from credible sources such as quoted market prices from Bloomberg, Reuters or broker's quoted price. Investments in mutual fund units are stated at market value, in accordance with the net value of mutual fund assets at the consolidated statement of financial position date.

A financial instrument is deemed to be quoted in an active market if quoted prices are available at any time and can be obtained regularly from stock exchanges, dealers, and brokers. These prices reflect actual and regular market transactions in a fair transaction. If the criteria above are not met, the active market is declared unavailable. Indications of an inactive market are that there is a large gap between the bid and ask prices or a significant increase in the difference between the bid and ask prices, and there are only a few recent transactions.

For marketable securities with no quoted market price, a reasonable estimate of the fair value is determined by reference to the current market value of another instrument which substantially has the same characteristic or calculated based on the expected cash flows of the underlying net asset base of the marketable securities.

K. Penentuan nilai wajar (lanjutan)

Untuk obligasi pemerintah yang tidak memiliki nilai pasar, estimasi nilai wajar ditentukan dengan menggunakan model internal berdasarkan nilai kini dari arus kas masa depan yang diharapkan (pendekatan *next-repricing method*) dengan menggunakan faktor *deflator*.

L. Reformasi acuan suku bunga

Untuk pengukuran instrumen keuangan yang menggunakan biaya perolehan diamortisasi (aset keuangan instrumen utang yang diklasifikasikan sebagai biaya perolehan diamortisasi dan nilai wajar melalui penghasilan komprehensif lain, serta liabilitas keuangan yang diukur pada biaya perolehan diamortisasi), perubahan arus kas kontraktual masa depan dari instrumen keuangan tersebut yang terjadi akibat reformasi suku bunga (perubahan suku bunga acuan kontraktual dari sebelumnya suku bunga LIBOR menjadi suku bunga acuan alternatif) akan mengubah tingkat suku bunga efektif instrumen keuangan tersebut. Perubahan arus kas kontraktual tersebut tidak mempengaruhi biaya perolehan diamortisasi instrumen keuangan dimaksud, dan tidak berdampak pada laba atau rugi (penerapan praktis). Penerapan praktis tersebut dapat diterapkan jika dan hanya jika 2 (dua) persyaratan berikut terpenuhi:

1. Perubahan arus kas kontraktual tersebut diperlukan sebagai akibat langsung dari reformasi acuan suku bunga; dan
2. Suku bunga acuan alternatif pengganti secara ekonomis setara (*economically equivalent*) dengan suku bunga acuan yang digunakan sebelumnya.

d. Prinsip-prinsip konsolidasian

Laporan keuangan konsolidasian meliputi laporan keuangan Bank Mandiri dan Entitas Anak yang mayoritas sahamnya dimiliki atau dikendalikan oleh Bank Mandiri.

Pengendalian didapat ketika Bank terekspos atau memiliki hak atas imbal hasil variabel dari keterlibatannya dengan Entitas Anak dan memiliki kemampuan untuk mempengaruhi imbal hasil tersebut melalui kekuasaannya atas Entitas Anak.

K. Determination of fair value *(continued)*

For government bonds with no quoted market prices, a reasonable estimate of the fair value is determined using the internal model based on the present value of expected future cash flows using the next-repricing method approach with a deflator factor.

L. Interest rate benchmark reform

For the measurement of financial instruments using amortised cost (financial assets of debt instruments classified as amortised cost and fair value through other comprehensive income, as well as financial liabilities measured at amortised cost), changes in the future contractual cash flows of those financial instruments occurs as a result of interest rate reform (change in the contractual benchmark interest rate from the previous LIBOR interest rate to an alternative benchmark interest rate) will change the effective interest rate of the financial instrument. The change in contractual cash flows does not affect the amortised cost of the financial instrument, and has no impact on profit or loss (practical expedient). Such practical expedient can be applied if and only if the following 2 (two) requirements are met:

1. *The change in contractual cash flows is necessary as a direct result of the reform of benchmark interest rates; and*
2. *The alternative reference interest rate is economically equivalent to the previously used benchmark interest rate.*

d. Principles of consolidation

The consolidated financial statements include the financial statement of Bank Mandiri and its Subsidiaries in which the majority shares are owned or controlled by Bank Mandiri.

Control is presumed to exist where the Bank is exposed, or has rights, to variable returns from its involvement with the Subsidiaries and has ability to use its power to affect its returns from its involvement with the Subsidiaries.

Bank mengendalikan Entitas Anak jika dan hanya jika Bank memiliki hak berikut ini:
a) Kekuasaan atas Entitas Anak (hak yang ada saat ini yang mempengaruhi kemampuan kini untuk mengarahkan aktivitas relevan yang secara signifikan mempengaruhi imbal hasil Entitas Anak).
b) Eksposur atau hak atas imbal hasil variabel dari keterlibatannya dengan Entitas Anak.
c) Kemampuan untuk menggunakan kekuasaannya atas Entitas Anak untuk mempengaruhi jumlah imbal hasil Bank.

Pada laporan keuangan konsolidasian Bank Mandiri, semua saldo dan transaksi yang signifikan antar perusahaan yang dikonsolidasi telah dieliminasi. Kepentingan non-pengendali atas laba bersih Entitas Anak disajikan sebagai pengurang dari laba bersih konsolidasian untuk mendapatkan jumlah laba yang menjadi hak pemilik entitas Bank. Kepentingan non-pengendali dalam aset bersih disajikan sebagai bagian dari ekuitas kecuali kepentingan non-pengendali yang berasal dari konsolidasi atas reksa dana disajikan sebagai bagian dari liabilitas dalam laporan posisi keuangan konsolidasian.

Laporan keuangan konsolidasian disusun dengan menggunakan kebijakan akuntansi yang sama untuk peristiwa dan transaksi sejenis dalam kondisi yang sama. Kebijakan akuntansi yang digunakan dalam laporan keuangan konsolidasian telah diterapkan secara konsisten oleh Entitas Anak, kecuali bila dinyatakan lain.

Bila pengendalian atas suatu entitas diperoleh atau berakhir dalam tahun berjalan, hasil usaha entitas tersebut dimasukkan dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian sejak tanggal pengendalian dimulai atau sampai dengan tanggal pengendalian berakhir.

Transaksi kombinasi bisnis entitas sepengendali, berupa pengalihan bisnis yang dilakukan dalam rangka reorganisasi entitas-entitas yang berada dalam suatu kelompok usaha yang sama, bukan merupakan perubahan kepemilikan dalam arti substansi ekonomi, sehingga transaksi tersebut tidak dapat menimbulkan laba atau rugi bagi kelompok usaha secara keseluruhan ataupun bagi entitas individual dalam kelompok usaha tersebut.

Oleh karena transaksi kombinasi bisnis entitas sepengendali tidak mengakibatkan perubahan substansi ekonomi kepemilikan atas bisnis yang dipertukarkan, maka transaksi tersebut diakui pada jumlah tercatat berdasarkan metode penyatuan kepemilikan.

The Bank controls the Subsidiaries if and only if the Bank acquires these rights:
a) Power over the Subsidiaries (has existing rights that affect the current ability to direct the relevant activities, that significantly affect the Subsidiaries' returns).
b) Exposure or rights of variable returns from its involvement with the Subsidiaries.
c) The ability to use its power over the Subsidiaries to affect the amount of the Bank's returns.

In the consolidated financial statements of Bank Mandiri, all significant inter-company balances and transactions have been eliminated. The non-controlling interest net income of Subsidiaries is presented as a deduction to consolidated net income in order to present the Bank's income. Non-controlling interest in net assets is presented as part of equity in the consolidated statement of financial position, except for non-controlling interest from mutual fund consolidation is presented as part of liabilities in the consolidated statement of financial position.

The consolidated financial statements are prepared using a consistent accounting policy for transactions and events in similar circumstances. The accounting policies adopted in preparing the consolidated financial statements have been consistently applied by the Subsidiaries, unless otherwise stated.

If the control on an entity is obtained or ends in the current year, the entity's net income is included in the consolidated statement of profit or loss and other comprehensive income from the date of acquisition of the control or until the date the control ceased.

Business combination transaction amongst entities under common control, in the form of transfer of business conducted for the reorganisation of entities under common control, does not represent a change of ownership in terms of economic substance, therefore, there shall be no gain or loss recognised by the group as a whole and by individual entities within the group.

Since the business combination transaction amongst entities under common control does not cause any change in the economic substance of ownership of the transferred business, therefore the transaction is recognised at book value using the pooling interest method.

Hak atas tanah dalam bentuk hak guna usaha, hak guna bangunan dan hak pakai tidak disusutkan, kecuali terdapat bukti yang mengindikasikan bahwa perpanjangan atau pembaruan hak atas tanah tersebut kemungkinan besar atau pasti tidak diperoleh.

PSAK No. 236 (Revisi 2014) tentang "Penurunan Nilai Aset" mensyaratkan bahwa nilai tercatat aset tetap dikaji ulang setiap tanggal laporan posisi keuangan konsolidasian untuk menilai apakah aset tetap tersebut nilai tercatatnya lebih tinggi dari nilai terpulihkan (*recoverable amounts*) dari aset tetap tersebut. Jika nilai tercatat aset tetap melebihi taksiran nilai terpulihkan dari aset tetap tersebut, nilai tercatat aset tetap harus diturunkan menjadi nilai terpulihkan dari aset tetap tersebut.

ii. Aset dan liabilitas sewa

Grup telah menerapkan PSAK No. 116 "Sewa" sejak tanggal 1 Januari 2020.

PSAK No. 116 menerapkan persyaratan baru atau amendemen sehubungan dengan akuntansi sewa. Standar ini memperkenalkan perubahan signifikan untuk akuntansi penyewa dengan menghapus perbedaan antara sewa operasi dan pembiayaan, serta mensyaratkan pengakuan aset hak guna dan pengakuan liabilitas sewa pada saat dimulainya sewa untuk seluruh sewa, kecuali untuk sewa jangka pendek dan sewa aset bernilai rendah. Berbeda dengan akuntansi penyewa, persyaratan untuk akuntansi pesewa sebagian besar tidak berubah.

PSAK No. 116 menentukan apakah kontrak merupakan, atau mengandung sewa atas dasar jika penyewa memiliki hak untuk mengendalikan penggunaan aset selama suatu jangka waktu tertentu untuk dipertukarkan dengan imbalan.

Grup menggunakan tingkat diskonto tunggal untuk portofolio sewa dengan karakteristik yang hampir sama.

In accordance with SFAS No. 216 (Revised 2011) regarding "Fixed Assets", the cost of land rights in the form of right to cultivate, right to build and use rights are recognised as fixed assets. The acquisition cost is the cost that are directly attributable to obtain land rights, including the cost of legal rights to the land when the land was first acquired.

Land rights in the form of right to cultivate, right to build and use rights are not amortised, unless there is evidence to indicate that the extension or renewal of land rights is likely to or definitely not obtained.

SFAS No. 236 (Revised 2014) regarding "Impairment of Assets" requires that the carrying amounts of fixed assets are reviewed at each consolidated statement of financial position date to assess whether they are recorded in excess of their recoverable amounts of the fixed assets. If the carrying value exceeds this estimated recoverable amount, assets are written down to their recoverable amounts of the fixed assets.

ii. Leased assets and liabilities

The Group has implemented SFAS No. 116 "Lease" since 1 January 2020.

SFAS No. 116 applies new or amended requirements with respect to lease accounting. This standard introduces significant changes to lessee accounting by eliminating the distinction between operating and financing leases, and requires recognition of right-of-use assets and recognition of lease liabilities at lease inception for all leases, except for short-term leases and leases of low-value assets. In contrast to lessee accounting, the requirements for lessor accounting are mostly unchanged.

SFAS No. 116 determines whether a contract is, or contains a lease on the basis that the lessee has the right to control the use of the asset for a specified period of time in exchange for certain consideration.

The Group uses a single discount rate for lease portfolios with similar characteristics.

ii. Aset dan liabilitas sewa (lanjutan)

Grup menerapkan pendekatan pengakuan dan pengukuran tunggal untuk seluruh sewa, kecuali untuk sewa jangka pendek dan sewa aset bernilai rendah. Grup mengakui liabilitas sewa untuk melakukan pembayaran sewa dan aset hak guna yang mewakili hak untuk menggunakan aset pendasar.

Grup mengakui aset hak guna pada tanggal dimulainya sewa. Aset hak guna diukur pada biaya perolehan, dikurangi akumulasi penyusutan dan kerugian penurunan nilai, dan disesuaikan untuk setiap pengukuran kembali liabilitas sewa. Liabilitas sewa merupakan jumlah pembayaran sewa yang masih harus dibayar hingga akhir masa sewa yang didiskontokan dengan menggunakan suku bunga pinjaman inkremental. Biaya aset hak guna mencakup jumlah liabilitas sewa yang diakui, biaya langsung awal yang dibayarkan, biaya pemulihan dan pembayaran sewa yang dilakukan pada atau sebelum tanggal mulai sewa dikurangi insentif sewa yang diterima. Aset hak guna disusutkan dengan metode garis lurus selama jangka waktu yang lebih pendek antara masa sewa dengan estimasi masa manfaat aset, sebagai berikut:

- Bangunan	: 20 tahun/*years*	*Buildings*	-
- Mesin kantor	: 5 tahun/*years*	*Office machines*	-
- Komputer perangkat keras	: 5 tahun/*years*	*Computer hardware*	-
- Komputer perangkat lunak	: 5 tahun/*years*	*Computer software*	-
- Inventaris kantor	: 5 tahun/*years*	*Office equipment*	-
- Inventaris rumah dinas dan mess	: 5 tahun/*years*	*Equipment of official houses and mess*	-
- Kendaraan bermotor	: 5 tahun/*years*	*Motor vehicle*	-

Jika kepemilikan aset sewa dialihkan ke Grup pada akhir masa sewa atau pembayaran sewa mencerminkan pelaksanaan opsi pembelian, penyusutan dihitung menggunakan estimasi masa manfaat ekonomis aset. Aset hak guna diuji penurunan nilainya sesuai dengan PSAK No. 236 "Penurunan Nilai Aset".

Pada tanggal dimulainya sewa, Grup mengakui liabilitas sewa yang diukur pada nilai kini dari pembayaran sewa masa depan yang akan dilakukan selama masa sewa. Pembayaran sewa termasuk pembayaran tetap (termasuk pembayaran tetap secara-substansi) dikurangi piutang insentif sewa, pembayaran sewa variabel yang bergantung pada indeks atau suku bunga, dan jumlah yang diharapkan akan dibayar dalam jaminan nilai residu. Pembayaran sewa juga termasuk harga eksekusi opsi pembelian yang wajar jika dipastikan akan dilakukan oleh Grup dan pembayaran penalti untuk mengakhiri sewa, jika jangka waktu sewa mencerminkan Grup mengeksekusi opsi penghentian sewa. Pembayaran sewa variabel yang tidak bergantung pada indeks atau suku bunga diakui sebagai beban pada periode di mana peristiwa atau kondisi yang memicu pembayaran terjadi.

r. Fixed assets, leased assets and liabilities, and intangible assets *(continued)*

ii. Leased assets and liabilities *(continued)*

The Group applies a single recognition and measurement approach to all leases, except for short-term leases and low-value asset leases. The Group recognises a lease liabilities to make lease payments and rights of use assets that represent the right to use the underlying asset.

The Group recognised the rights of use assets at the inception date of the lease. The rights of use assets are measured at cost, less accumulated depreciation and impairment losses, and adjusted for any remeasurement of the lease liabilities. Lease liabilities are the amount of lease payments accrued until the end of the lease term, discounted using the incremental loan interest rate. The cost of right of use assets includes the amount of lease liability recognised, initial direct costs paid, recovery costs and lease payments made on or before the start date of the lease less lease incentives received. Rights of use assets are depreciated using the straight-line method over the shorter period between the lease term and the estimated useful life of the asset, as follows:

If the ownership of the leased asset is transferred to the Group at the end of the lease term or the lease payments reflect the exercise of the purchase option, depreciation is calculated using the estimated useful life of the asset. Rights of use assets are assessed for impairment in accordance with SFAS No. 236 "Impairment of Assets".

At the inception date of the lease, the Group recognises lease liabilities which measured at the present value of future lease payments to be made over the lease term. Lease payments include fixed payments (including substantially fixed payments) less lease incentive receivables, variable lease payments that are index or interest rate dependent, and the amount expected to be paid in a residual value guarantee. Lease payments also include the reasonable exercise price for the purchase option if it is determined to be made by the Group and the payment of a penalty to terminate the lease, if the lease term reflects the Group exercising the lease termination option. Variable lease payments that are not dependent on an index or interest rate are recognised as an expense in the period in which the event or condition that triggers the payment occurs.

ii. Aset dan liabilitas sewa (lanjutan)

Dalam menghitung nilai kini dari pembayaran sewa, Grup menggunakan suku bunga pinjaman inkremental penyewa pada tanggal dimulainya sewa karena suku bunga implisit dalam sewa tidak dapat ditentukan. Setelah tanggal dimulainya sewa, jumlah liabilitas sewa ditingkatkan untuk mencerminkan pertambahan bunga dan dikurangi pembayaran sewa yang dilakukan. Selain itu, jumlah tercatat liabilitas sewa diukur kembali jika terdapat modifikasi, perubahan jangka waktu sewa, perubahan pembayaran sewa, atau perubahan dalam penilaian opsi untuk membeli aset pendasar.

Sewa jangka pendek dengan durasi kurang dari 12 bulan dan sewa aset bernilai rendah, serta elemen-elemen sewa tersebut, sebagian atau seluruhnya tidak menerapkan prinsip-prinsip pengakuan yang ditentukan oleh PSAK No. 116. Grup akan mengakui pembayaran sewa tersebut dengan dasar garis lurus selama masa sewa dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian. Beban ini ditunjukkan pada beban umum dan administrasi dalam laporan laba rugi.

Penerapan pencatatan PSAK No. 116 berlaku untuk seluruh sewa (kecuali sebagaimana yang disebutkan sebelumnya), yaitu sebagai berikut:

(a) Menyajikan aset hak-guna sebagai bagian dari aset tetap dan liabilitas sewa disajikan sebagai bagian dari liabilitas lain-lain dalam laporan posisi keuangan konsolidasian, yang diukur pada nilai kini dari pembayaran sewa masa depan;
(b) Mencatat penyusutan aset hak-guna dan bunga atas liabilitas sewa dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian; dan
(c) Memisahkan jumlah pembayaran ke bagian pokok (disajikan dalam kegiatan pendanaan) dan bunga (disajikan dalam kegiatan operasional) dalam laporan arus kas konsolidasian.

iii. Aset takberwujud

Aset takberwujud terdiri dari perangkat lunak dan *goodwill*.

r. Fixed assets, leased assets and liabilities, and intangible assets *(continued)*

ii. Leased assets and liabilities *(continued)*

In calculating the present value of lease payments, the Group uses the incremental loan interest rate of the lessee at the inception date of the lease because the interest rate implicit in the lease cannot be determined. After the inception date of the lease, the amount of the lease liability is increased to reflect the increase in interest and less lease payments made. In addition, the carrying amount of the lease liability is remeasured if there are modifications, changes in the term of the lease, changes in lease payments, or changes in the valuation of the option to purchase the underlying asset.

Short-term leases with a duration of less than 12 months and leases of low value assets, as well as elements of such leases, partially or wholly do not apply the recognition principles prescribed by SFAS No. 116. The Group will recognise the lease payment on a straight-line basis over the lease term in the consolidated statement of profit or loss and other comprehensive income. This expense is shown under general and administrative expenses in the income statement.

The implementation of SFAS No. 116 payment applies to all leases (except as stated earlier), as follows:

(a) Present right of use assets as part of fixed assets and leased liabilities are presented as part of other liabilities in the consolidated statement of financial position, measured at the present value of future lease payments;
(b) Record the depreciation of right of use assets and the interest of lease liability in the consolidated statement of profit or loss and other comprehensive income; and
(c) Separating the total payment into principal (presented in financing activities) and interest (presented in operating activities) in the consolidated statement of cash flows.

iii. Intangible assets

Pengujian kecukupan liabilitas (lanjutan)

Untuk asuransi jiwa, liabilitas kepada pemegang polis khususnya liabilitas untuk klaim masa depan diuji untuk menentukan apakah liabilitas tersebut cukup untuk menutupi semua arus kas keluar di masa depan termasuk semua manfaat yang dijamin dan manfaat tambahan yang dijamin, manfaat partisipasi yang tidak dijamin (jika ada), semua biaya untuk penerbitan polis dan pemeliharaan polis, serta mencerminkan arus kas masuk masa depan yaitu penerimaan premi masa depan, yaitu premi yang diterima di masa depan. Liabilitas dihitung berdasarkan diskonto dari arus kas untuk semua arus kas yang terkait yaitu arus kas keluar dan arus kas masuk seperti yang disebutkan di atas dengan menggunakan seperangkat asumsi estimasi terbaik terkini yang ditetapkan oleh aktuaris Entitas Anak, termasuk asumsi tingkat mortalita, morbidita, tingkat pembatalan polis, biaya, tingkat inflasi dan tingkat suku bunga, serta asumsi marjin atas risiko pemburukan. Entitas Anak yang bergerak dalam bidang asuransi jiwa menerapkan metode *Gross Premium Reserve* dalam perhitungan cadangan premi atas manfaat polis masa depan kepada pemegang polis dengan menggunakan asumsi aktuaria berdasarkan asumsi estimasi terbaik dan marjin atas risiko pemburukan, sehingga pengujian kecukupan liabilitas tidak diperlukan lagi.

Reasuransi

Entitas Anak mereasuransikan sebagian porsi risikonya kepada perusahaan reasuradur. Jumlah premi yang dibayar atau porsi premi atas transaksi reasuransi prospektif diakui selama periode kontrak asuransi sesuai dengan proporsi jumlah proteksi reasuransi yang diterima.

Aset reasuransi termasuk saldo yang diharapkan dibayarkan oleh perusahaan reasuransi untuk *ceded* liabilitas manfaat polis masa depan, *ceded* estimasi liabilitas klaim dan *ceded* cadangan atas premi yang belum merupakan pendapatan. Jumlah manfaat yang ditanggung oleh reasuradur diperkirakan secara konsisten sesuai dengan liabilitas yang terkait dengan polis reasuransi.

Entitas Anak menyajikan aset reasuransi secara terpisah sebagai aset atas liabilitas manfaat polis masa depan, cadangan atas premi yang belum merupakan pendapatan dan estimasi liabilitas klaim.

Jika aset reasuransi mengalami penurunan nilai, Entitas Anak mengurangi nilai tercatat dan mengakui kerugian penurunan nilai tersebut dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian. Aset reasuransi mengalami penurunan nilai jika ada bukti objektif, sebagai akibat dari suatu peristiwa yang terjadi setelah pengakuan awal aset reasuransi, bahwa Entitas Anak tidak dapat menerima seluruh jumlah karena di bawah syarat-syarat kontrak dan dampak pada jumlah yang akan diterima dari reasuradur dapat diukur secara andal.

Liability adequacy test (continued)

For life insurance, the liabilities to policyholder in particular the liabilities for future claim are tested to determine whether the liabilities sufficient to cover all related future cash out flow including all guaranteed benefit and guaranteed additional benefit, non-guaranteed participation benefit feature (if any), all expenses for policies issuance and maintenance, as well as reflecting the future cash inflow, i.e. future premium receipt. The liabilities are calculated based on discounted cash flow basis for all related cash flows i.e. both of cash outflows and cash inflows as mentioned above using a set of most recent best estimate assumptions set by the Subsidiaries' appointed actuary, includes mortality, morbidity, lapses, expenses, inflation rates, and interest rate, assumptions as well as margin for adverse deviation assumptions. Subsidiaries operate in life insurance use Gross Premium Reserve in the premium allowance calculation for future policy benefits to the policyholders using actuary assumptions with best estimate and margin for adverse deviation, therefore liability adequacy test is not required.

Reinsurance

The Subsidiaries reinsure a portion of its risk to reinsurance companies. The amount of premium paid or portion of premium from prospective reinsurance transactions is recognised over the reinsurance contract in proportion with the protection received.

Reinsurance assets include balances expected to be recovered from reinsurance companies for ceded liability for future policy benefits, ceded estimated claim liabilities and ceded unearned premiums allowance. Recovery amount from reinsurers are estimated in a consistent manner with the liability associated with the reinsurance policy.

Subsidiaries present separately reinsurance asset of future policy benefit liabilities, unearned premium allowance, and estimated claim liabilities.

If a reinsurance asset is impaired, the Subsidiaries deducted the carrying amount accordingly and recognise that impairment loss in the consolidated statement of profit or loss and other comprehensive income. A reinsurance asset is impaired if there is objective evidence, as a result of an event that occurred after initial recognition of the reinsurance asset, that the Subsidiary may not receive all amounts due to it is below the requirement of the contract, and the impact on the amounts that the Subsidiary will receive from the reinsurer can be reliably measured.

ad. Perpajakan (lanjutan)

Manajemen Grup mengevaluasi secara periodik implementasi terhadap peraturan perpajakan yang berlaku terutama yang memerlukan interpretasi lebih lanjut mengenai pelaksanaannya termasuk juga evaluasi terhadap surat ketetapan pajak yang diterima dari kantor pajak. Lebih lanjut, Bank Mandiri membentuk cadangan, jika dianggap perlu berdasarkan jumlah yang diestimasikan akan dibayarkan ke kantor pajak.

Bank Mandiri dan Entitas Anak menerapkan metode liabilitas laporan posisi keuangan (*balance sheet liability method*) untuk menentukan beban pajak penghasilan. Menurut metode liabilitas laporan posisi keuangan, aset dan utang pajak tangguhan diakui untuk semua perbedaan temporer antara nilai aset dan liabilitas yang tercatat di laporan posisi keuangan dengan dasar pengenaan pajak atas aset dan liabilitas tersebut pada setiap tanggal pelaporan. Metode ini juga mensyaratkan adanya pengakuan manfaat pajak di masa datang yang belum digunakan apabila besar kemungkinan bahwa manfaat tersebut dapat direalisasikan di masa yang akan datang.

Aset pajak tangguhan diakui apabila terdapat kemungkinan besar bahwa jumlah laba fiskal pada masa datang akan memadai untuk mengkompensasi aset pajak tangguhan yang muncul akibat perbedaan temporer.

Pajak tangguhan dihitung dengan menggunakan tarif pajak yang berlaku atau secara substansial diberlakukan pada periode dimana aset tersebut direalisasi atau liabilitas tersebut diselesaikan. Perubahan nilai tercatat aset dan liabilitas pajak tangguhan yang disebabkan oleh perubahan tarif pajak dibebankan pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian tahun berjalan, kecuali untuk transaksi-transaksi yang sebelumnya telah langsung dibebankan atau dikreditkan ke ekuitas.

Koreksi atas liabilitas pajak diakui pada saat surat ketetapan pajak diterima, atau apabila diajukan keberatan dan/atau banding, maka koreksi diakui pada saat keputusan atas keberatan dan/atau banding tersebut diterima. Manajemen juga dapat membentuk pencadangan terhadap liabilitas pajak di masa depan sebesar jumlah yang diestimasikan akan dibayarkan ke kantor pajak jika berdasarkan evaluasi pada tanggal laporan posisi keuangan konsolidasian terdapat risiko pajak yang *probable*. Asumsi dan estimasi yang digunakan dalam perhitungan pembentukan cadangan tersebut memiliki unsur ketidakpastian.

The Group's management periodically evaluates the implementation of prevailing tax regulations especially for those that are subject to further interpretation for its implementation, including evaluation on tax assessment letters received from tax authorities. Futhermore, the Bank establishes provisions based on the necessary amounts expected to be paid to the tax authorities.

Bank Mandiri and Subsidiaries apply the balance sheet liability method to determine income tax expense. Under the balance sheet liability method, deferred tax assets and liabilities are recognised for all temporary differences arising between the tax base of assets and liabilities and their carrying amount in the consolidated statement of financial position at each reporting date. This method also requires the recognition of unused future tax benefits, to the extent that realisation of such benefits are probable in the future.

Deferred tax assets are recognised only to the extent that is probable that future taxable income will be sufficient to compensate deferred tax asset arising from temporary differences.

Deferred tax is calculated using tax rates enacted or substantively applied to the period during which the asset is realised or the liability is settled. The changes to the carrying value of deferred tax assets and liabilities due to the changes of tax rates are charged in the current year, consolidated statement of profit or loss and other comprehensive income except for transactions which previously have been directly charged or credited to equity.

Adjustments to taxation obligations are recognised when tax assessment letter is received or, if objection/appeal is submitted, adjustments are recognised when the result of objection/appeal is received. Management provides provision for future tax liability at the estimated amount that will be payable to the tax office if there is a probable tax exposure, based on management's assessment as of the date of consolidated statement of financial position. Assumptions and estimation used in the calculation of provision may involve element of uncertainty.

Jika aset keuangan atau kelompok aset keuangan serupa telah diturunkan nilainya sebagai akibat kerugian penurunan nilai, maka pendapatan bunga yang diperoleh setelahnya diakui atas bagian aset keuangan yang tidak mengalami penurunan nilai dari aset keuangan yang mengalami penurunan nilai, berdasarkan suku bunga yang digunakan untuk mendiskonto arus kas masa datang dalam menghitung kerugian penurunan nilai.

Interest income and expense for all interest-bearing financial instruments are recognised as "Interest income" and "Interest expense" in the consolidated statement of profit or loss and other comprehensive income using the effective interest method.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to obtain the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Group estimates cash flows considering all contractual terms of the financial instrument but does not consider future credit losses. The calculation includes all commissions, provision and other fees received between parties in the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Once a financial asset or a group of similar financial assets has been written down as a result of an impairment loss, subsequently, interest income is recognised for the non-impaired portion of the impaired financial assets using the interest rate used to discount the future cash flows for measuring the impairment loss.

Liabilitas pensiun

Bank Mandiri menyelenggarakan program pensiun iuran pasti yang pesertanya adalah pegawai aktif Bank Mandiri sejak tanggal 1 Agustus 1999, serta program pensiun manfaat pasti yang berasal dari masing-masing dana pensiun Bank Peserta Penggabungan. Program ini didanai melalui pembayaran kepada pengelola dana pensiun sebagaimana ditentukan dalam perhitungan aktuaria yang dilakukan secara berkala.

Liabilitas imbalan pensiun Bank Mandiri dan Entitas Anak dihitung dengan membandingkan manfaat yang akan diterima oleh karyawan dari program pensiun pada usia pensiun normal dengan manfaat yang akan diterima berdasarkan UU Ketenagakerjaan No. 13/2003 dimana telah diperbaharui menggunakan UU Cipta Kerja No. 11/2020 sebagaimana diubah dengan UU No. 6/2023 tentang Penetapan Peraturan Pemerintah Pengganti Undang-Undang No. 2 Tahun 2022 Tentang Cipta Kerja Menjadi Undang-Undang berdasarkan Perjanjian Kerja Bersama yang telah diperbaharui pada akhir 2021 setelah dikurangi dengan akumulasi kontribusi karyawan dan hasil investasinya. Apabila manfaat pensiun lebih kecil dari pada manfaat menurut UU Cipta Kerja No. 11/2020, maka Bank dan Entitas Anak membayar kekurangan tersebut.

Program pensiun berdasarkan UU Ketenagakerjaan adalah program imbalan pasti karena UU Ketenagakerjaan menentukan rumus tertentu untuk menghitung jumlah minimum imbalan pensiun. Program pensiun iuran pasti adalah program pensiun yang iurannya ditetapkan dalam peraturan dana pensiun dan seluruh iuran serta hasil pengembangannya dibukukan pada rekening masing-masing peserta sebagai manfaat pensiun sebagaimana tercantum dalam UU No. 4 tahun 2023 tanggal 12 Januari 2023 tentang Pengembangan dan Penguatan Sektor Keuangan.

ai. Employee benefits

Pension liability

Bank Mandiri established a defined contribution pension plan covering substantially all of its eligible active employees since 1 August 1999 and also defined benefit pension plans, which were derived from each of the Merged Banks' pension plan. This program is funded through payment to pension fund's management as defined in the actuarial calculation which done regularly.

Bank Mandiri and Subsidiaries' pension liability have been calculated by comparing the benefit that will be received by an employee at normal pension age from the Pension Plans with the benefit that will be received as stipulated under the Employment Law No. 13/2003 which has been updated using the Employment Regulations No. 11/2020 as amended by UU No. 6/2023 concerning Government In Lieu Of Law No. 2 Of 2022 Concerning Stipulation Employment Regulations Become Law based on the Collective Labor Agreement which was renewed at the end of 2021 after deducting accumulated employee contributions and the results of its investments. If the pension benefit from the Pension Plans is less than the benefit as required by the Employment Regulations No. 11/2020, the Bank and Subsidiaries will have to pay such shortage.

The pension plan based on the Labor Law is a defined benefit plan because the Labor Law sets a certain formula to calculate the minimum pension benefit. A defined contribution plan is a pension plan that defines an amount of pension contribution based on pension fund regulation and all contribution including investment return are recorded in its account's member as pension benefit as stated in Law No. 4 year 2023 dated 12 January 2023 regarding Development and Strengthening Financial Sector.

The defined benefit pension liability recognised in the consolidated statement of financial position is the present value of the defined benefit obligation at the consolidated statement of financial position date less the fair value of plan assets, adjusted with unrealised actuarial gains or losses and past service cost. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method on a regular basis for periods not exceeding one year. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using the discount rate of government bonds' yield that are denominated in the currency in which the benefit will be paid, and that have terms to maturity approximating the terms of the related pension liability.

3. PENGGUNAAN ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING

Beberapa estimasi dan asumsi dibuat dalam rangka penyusunan laporan keuangan konsolidasian dimana dibutuhkan pertimbangan manajemen dalam menentukan metodologi yang tepat untuk penilaian aset dan liabilitas.

Manajemen membuat estimasi dan asumsi yang berimplikasi pada pelaporan nilai aset dan liabilitas atas tahun keuangan satu tahun ke depan. Semua estimasi dan asumsi yang diharuskan oleh Standar Akuntansi Keuangan di Indonesia adalah estimasi terbaik serta berdasarkan pada standar yang berlaku. Estimasi dan pertimbangan dievaluasi secara terus menerus dan berdasarkan pengalaman masa lalu dan faktor-faktor lain termasuk harapan atas kejadian yang akan datang.

Walaupun estimasi dan asumsi ini dibuat berdasarkan pengetahuan terbaik manajemen atas kejadian dan tindakan saat ini, hasil yang timbul mungkin berbeda dengan estimasi dan asumsi semula.

3. USE OF CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Several estimates and assumptions are created in the preparation of the consolidated financial statements in which management judgment is required in determining the methodology in the valuation of assets and liabilities.

Management makes estimation and assumptions that affect the reported amounts of assets and liabilities within the one next financial year. All estimation and assumptions required in conformity with Statement of Financial Accounting Standard are the best estimation undertaken in accordance with the applicable standards. Estimation and judgements are evaluated on a continuous basis, and are based on past experience and other factors, including expectations with regard to future events.

Although these estimates and assumptions are based on management's best knowledge of current events and activities, actual results may differ from those estimates and assumptions.

3. PENGGUNAAN ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (lanjutan)

Sumber utama ketidakpastian estimasi

a. Cadangan kerugian penurunan nilai aset keuangan

Evaluasi atas kerugian penurunan nilai aset keuangan yang dicatat pada biaya perolehan diamortisasi dan efek utang yang diklasifikasikan sebagai nilai wajar melalui pendapatan komprehensif lain dijelaskan di Catatan 2c.

Cadangan kerugian penurunan nilai terkait dengan pihak lawan spesifik dalam seluruh cadangan kerugian penurunan nilai dibentuk atas tagihan yang penurunan nilainya dievaluasi secara individual berdasarkan estimasi terbaik manajemen atas nilai tunai arus kas yang diharapkan akan diterima. Dalam menghitung cadangan kerugian penurunan nilai, manajemen membuat pertimbangan mengenai kondisi keuangan dari pihak lawan dan nilai neto yang dapat direalisasi dari agunan yang diterima. Setiap aset yang mengalami penurunan nilai dievaluasi dan strategi penyelesaiannya serta estimasi arus kas yang dinilai dapat diperoleh kembali dan disetujui secara independen oleh *Credit Risk Management Unit*.

Evaluasi cadangan kerugian penurunan nilai secara kolektif meliputi kerugian kredit yang melekat pada portofolio tagihan dengan karakteristik ekonomi yang serupa ketika terdapat kenaikan risiko kredit yang signifikan atau terdapat bukti objektif bahwa telah terjadi penurunan nilai tagihan dalam portofolio tersebut, namun penurunan nilai secara individu belum dapat diidentifikasi. Dalam menentukan perlunya untuk membentuk cadangan kerugian penurunan nilai secara kolektif, manajemen mempertimbangkan faktor-faktor seperti kualitas kredit, besarnya portofolio, konsentrasi kredit dan faktor-faktor ekonomi. Dalam mengestimasi cadangan yang dibutuhkan, asumsi-asumsi dibuat untuk menentukan model kerugian ekspektasian dan untuk menentukan parameter input yang diperlukan, berdasarkan pengalaman historis, kondisi ekonomi saat ini, dan prakiraan kondisi ekonomi di masa mendatang (*forecasting*). Ketepatan dari cadangan ini bergantung pada seberapa tepat estimasi arus kas masa depan untuk menentukan cadangan individual serta asumsi model dan parameter yang digunakan dalam penentuan cadangan kolektif.

b. Menentukan nilai wajar instrumen keuangan

Dalam menentukan nilai wajar aset dan liabilitas keuangan yang tidak mempunyai harga pasar, Grup menggunakan teknik penilaian seperti yang dijelaskan dalam Catatan 2c untuk instrumen keuangan yang tidak diperdagangkan secara aktif dan memiliki informasi harga yang terbatas, nilai wajar yang kurang objektif dan membutuhkan berbagai tingkat penilaian tergantung pada likuiditas, konsentrasi, faktor ketidakpastian pasar, asumsi harga dan risiko lainnya.

***3. USE OF CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS** (continued)*

Key sources of estimation uncertainty

a. Allowances for impairment losses of financial assets

Evaluation of impairment losses on financial assets which is recognised at amortised cost and debt securities classified as fair value through other comprehensive income are described in Note 2c.

Allowance for impairment losses related to a specific counterparty as part of the entire allowance for impairment losses are established for receivables that are individually evaluated for impairment based on management's best estimate of the present value of cash flows expected to be received. In calculating the allowance for impairment losses, management makes judgements regarding of the financial condition of the counterparty and the net realizable value of the collateral received. Each impaired asset is evaluated, and its settlement strategy and estimation of cash flows considered recoverable are independently approved by the Credit Risk Management Unit.

Collectively assessed impairment allowances cover credit losses inherent in portfolios with similar economic characteristics when there is a significant increase in credit risk or objective evidence to suggest the impairments are exist within the portfolio, but the individual impaired items cannot yet be identified. In determining the need to establish allowance for collective impairment, management considers factors such as credit quality, size of portfolio, credit concentrations, and economic factors. In estimating the required allowance, the assumptions made to determine expected default and loss model and to determine the required input parameters which are based on historical experience and estimated future economic conditions (forecasting). The accuracy of this allowance depends on how precise the estimated future cash flows to determine the individual allowance and the model assumptions and parameters used in determining collective allowance.

b. Determining fair values of financial instruments

In determining the fair value for financial assets and financial liabilities for which there is no observable market price, the Group uses the valuation techniques as described in Note 2c for financial instruments that are traded infrequently and have limited pricing information, fair value is less objective and requires varying degrees of judgement depending on liquidity, concentration, uncertainty of market factors, pricing assumptions and other risks.

3. PENGGUNAAN ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (lanjutan)

Sumber utama ketidakpastian estimasi (lanjutan)

c. Imbalan pensiun

Program-program pensiun ditentukan berdasarkan perhitungan dari aktuaria. Perhitungan aktuaria menggunakan asumsi-asumsi seperti tingkat diskonto, tingkat pengembalian investasi, tingkat kenaikan gaji, tingkat kematian, tingkat pengunduran diri dan lain-lain (Catatan 2ai dan 51). Perubahan asumsi ini akan mempengaruhi nilai liabilitas pensiun.

Grup menentukan tingkat diskonto yang sesuai pada akhir periode pelaporan, yakni *zero coupon bond* yang digunakan untuk menentukan nilai kini arus kas keluar masa depan estimasian yang diharapkan untuk menyelesaikan liabilitas pensiun. Dalam menentukan tingkat suku bunga yang sesuai, Grup mempertimbangkan imbal hasil obligasi pemerintah yang didenominasikan dalam mata uang imbalan akan dibayar dan memiliki jangka waktu yang serupa dengan jangka waktu liabilitas pensiun yang terkait. Asumsi kunci liabilitas pensiun lainnya sebagian ditentukan berdasarkan kondisi pasar saat ini.

d. Liabilitas asuransi untuk kontrak asuransi

Liabilitas kepada pemegang polis (manfaat polis masa depan dari produk non-*unit link* dan estimasi liabilitas klaim) Entitas Anak dicatat di laporan posisi keuangan konsolidasian sebagai bagian dari “Liabilitas lain-lain” berdasarkan perhitungan aktuaris dengan menggunakan asumsi aktuarial yaitu asumsi estimasi terbaik dan marjin atas risiko pemburukan.

e. Aset pajak tangguhan

Aset pajak tangguhan diakui atas seluruh perbedaan temporer yang dapat dikurangkan, sepanjang besar kemungkinannya bahwa penghasilan kena pajak akan tersedia sehingga perbedaan temporer tersebut dapat digunakan. Estimasi signifikan oleh manajemen disyaratkan dalam menentukan jumlah aset pajak tangguhan yang dapat diakui, berdasarkan saat penggunaan dan tingkat penghasilan kena pajak serta strategi perencanaan pajak masa depan. Bank tidak memperhitungkan sebagian manfaat aset pajak tangguhan karena manajemen Bank berpendapat bahwa aset pajak tangguhan tersebut tidak dapat terpulihkan di masa yang akan datang.

3. USE OF CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS *(continued)*

Key sources of estimation uncertainty *(continued)*

c. Pension benefits

Pension programs are determined based on actuarial valuation. The actuarial valuation uses assumptions such as discount rate, expected rate of return on investments, future salary increases, mortality rate, resignation rate and others (refer to Note 2ai and 51). Any changes in those assumptions will impact the liability balance of employee benefit obligations.

The Group determines the appropriate discount rate at the end of each year, which is the zero coupon bond that used to determine the present value of estimated future cash outflows expected to settle the pension obligations. In determining the appropriate discount rate, the Group considers the government bonds' yields denominated in currency and have similar period with payments that will be made and have terms to maturity approximating the terms of the related employee benefit liability. Other key assumptions for pension obligations mostly are determined based on current market conditions.

d. Insurance liabilities on insurance contracts

Liabilities to policyholders (future policy benefits from non-unit linked products and estimated claim liabilities) of Subsidiaries are recorded in the consolidated statement of financial position as part of "Other liabilities" based on actuarial calculations using actuarial assumptions, which is the best estimate assumptions and margin for risk of deterioration.

e. Deferred tax assets

Deferred tax assets are recognised for all deductible temporary differences, as long as taxable income most likely will be available so that the temporary differences can be utilised. Significant estimation by management are required in determining the amount of deferred tax assets that can be recognised, based on utilisation period and the level of taxable income and future tax planning strategies. The Bank does not consider some of the benefits of deferred tax assets as management believes that those part of deferred tax assets will not be recoverable in the future.

3. PENGGUNAAN ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (lanjutan)

Sumber utama ketidakpastian estimasi (lanjutan)

f. Penyusutan dan estimasi umur manfaat aset tetap

Biaya perolehan aset tetap disusutkan dengan menggunakan metode garis lurus berdasarkan taksiran masa manfaat ekonomisnya. Manajemen Bank mengestimasi masa manfaat ekonomis aset tetap antara 4 (empat) sampai dengan 20 (dua puluh) tahun.

Perubahan tingkat pemakaian dan perkembangan teknologi dapat mempengaruhi masa manfaat ekonomis dan nilai sisa aset, dan karenanya biaya penyusutan masa depan mungkin direvisi.

Nilai tercatat atas aset tetap Bank diungkapkan pada Catatan 18.

g. Penurunan nilai aset non-keuangan

Bank Mandiri dan Entitas Anak mengevaluasi penurunan nilai aset non-keuangan apabila terdapat kejadian atau perubahan keadaan yang mengindikasikan bahwa nilai tercatat aset non-keuangan tidak dapat dipulihkan kembali. Faktor-faktor penting yang dapat menyebabkan penurunan nilai aset non-keuangan adalah sebagai berikut:

a) Performa yang tidak tercapai secara signifikan terhadap ekspektasi historis atau proyeksi hasil operasi di masa yang akan datang;
b) Perubahan yang signifikan dalam cara penggunaan aset atau strategi bisnis secara keseluruhan; dan
c) Industri atau tren ekonomi yang secara signifikan bernilai negatif.

Manajemen Bank dan Entitas Anak mengakui kerugian penurunan nilai apabila nilai tercatat aset melebihi nilai terpulihkannya. Nilai terpulihkan adalah nilai yang lebih tinggi antara nilai wajar dikurang biaya pelepasan dengan nilai pakai aset (atau unit penghasil kas). Nilai terpulihkan diestimasi untuk aset individual atau, jika tidak memungkinkan, untuk unit penghasil kas yang mana aset tersebut merupakan bagian daripada unit tersebut.

h. Revaluasi atas nilai wajar tanah

Grup menggunakan spesialis penilai independen untuk menilai nilai wajar atas tanah. Tanah dinilai berdasarkan referensi atas bukti berdasarkan pasar, menggunakan nilai yang dapat diukur setelah disesuaikan dengan faktor pasar spesifik seperti lokasi dan kondisi dari tanah.

***Key sources of estimation uncertainty** (continued)*

f. Depreciation and estimated useful life of fixed assets

Cost of acquisition of fixed assets are depreciated using the straight-line method based on their estimated economic useful life. Bank's management estimates the useful lives of the fixed assets between 4 (four) to 20 (twenty) years.

Changes in the level of usage and technological developments could affect the economic useful lives and residual value of assets, and therefore future depreciation charges may be revised.

The carrying value of the Bank's fixed assets is disclosed in Note 18.

g. Impairment of non-financial assets

Bank Mandiri and its Subsidiaries assess impairment of non-financial assets whenever there are events or changes in circumstances indicate that the carrying value of non-financial assets cannot be recovered. Important factors that could cause impairment of non-financial assets are as follows:

a) Performance is not achieved significantly against historical expectations or projected operating results in the future;
b) A significant change in the way of the asset usage or the overall business strategy; and
c) Industry or economic trends are significantly negative.

The Management of the Bank and its Subsidiaries recognise an impairment loss if the carrying amount of the asset exceeds its recoverable amount. Recoverable amount is the higher value between the fair value minus costs of disposal and the value in use of the asset (or cash-generating unit). Recoverable amount is estimated for individual assets or, if not possible, for the cash-generating unit in which the asset is part of the unit.

h. Revaluations of land

The Group engaged independent valuation specialists to assess fair value of land. Lands were valued by reference to market-based evidence, using comparable prices adjusted for specific market factors such as location and condition of land.

3. PENGGUNAAN ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (lanjutan)

Sumber utama ketidakpastian estimasi (lanjutan)

i. Menentukan jangka waktu kontrak dengan opsi perpanjangan dan penghentian kontrak - Grup sebagai penyewa

Grup menentukan jangka waktu sewa sebagai jangka waktu sewa yang tidak dapat dibatalkan, bersama dengan periode yang dicakup oleh opsi untuk memperpanjang masa sewa jika dipastikan akan dilaksanakan, atau periode apa pun yang dicakup oleh opsi untuk menghentikan sewa, jika cukup wajar untuk tidak dilakukan.

Grup memiliki beberapa kontrak sewa yang mencakup opsi perpanjangan dan penghentian jangka waktu sewa. Grup menerapkan penilaian dalam mengevaluasi apakah dapat dipastikan jika akan menggunakan opsi untuk memperpanjang atau menghentikan sewa. Hal tersebut dilakukan dengan mempertimbangkan seluruh fakta dan keadaan yang relevan yang memberikan insentif ekonomi untuk melakukan perpanjangan atau penghentian sewa. Setelah tanggal dimulainya, Grup menilai kembali masa sewa, jika terdapat peristiwa atau perubahan signifikan dalam keadaan yang berada dalam kendali dan mempengaruhi apakah penyewa cukup pasti untuk mengeksekusi opsi memperpanjang atau menghentikan sewa.

Pertimbangan akuntansi yang penting

Pertimbangan akuntansi yang penting dalam menerapkan kebijakan akuntansi Bank dan Entitas Anak meliputi:

a. Usaha yang berkelanjutan

Manajemen Bank dan Entitas Anak telah melakukan penilaian atas kemampuan Bank dan Entitas Anak untuk melanjutkan kelangsungan usahanya dan berkeyakinan bahwa Bank dan Entitas Anak memiliki sumber daya untuk melanjutkan usahanya di masa mendatang. Selain itu, manajemen tidak mengetahui adanya ketidakpastian material yang dapat menimbulkan keraguan yang signifikan terhadap kemampuan Bank dan Entitas Anak untuk mempertahankan kelangsungan hidupnya. Oleh karena itu, laporan keuangan konsolidasian telah disusun atas dasar usaha yang berkelanjutan.

***3. USE OF CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS** (continued)*

***Key sources of estimation uncertainty** (continued)*

i. Determine the contract term with options for extension and termination of the contract - the Group as lessee

The Group determines the lease term as the term of the lease that cannot be canceled, together with the period covered based on the option to extend the lease if it is determined to be exercised, or any period covered by the option to terminate the lease, if it is reasonably not to do so.

The Group has several lease contracts that include options for extension and termination of the lease terms. The Group applies its judgment in evaluating whether it is certain to exercise the option to extend or terminate the lease. This is done by considering all relevant facts and circumstances that provide economic incentives to extend or terminate the lease. After the commencement date, the Group reassesses the lease term, if there is a significant event or change in circumstances which is under its control and affects whether the lessee is certain enough to exercise the option to extend or terminate the lease.

Significant accounting judgements

Accounting judgements that are important in applying accounting policies of the Bank and its Subsidiaries include:

a. Going concern

The Management of the Bank and its Subsidiaries have assessed the ability of the Bank and its Subsidiaries to continue its business and believes that the Bank and Subsidiaries have the resources to continue their business in the future. In addition, management is not aware of any material uncertainties that may cause significant doubt on the ability of the Bank and Subsidiaries to maintain its viability. Therefore, the consolidated financial statements have been prepared on the basis of a going concern.

3. PENGGUNAAN ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (lanjutan)

Pertimbangan akuntansi yang penting (lanjutan)

b. Klasifikasi aset dan liabilitas keuangan

Manajemen Bank dan Entitas Anak menetapkan klasifikasi atas aset dan liabilitas tertentu sebagai aset keuangan dan liabilitas keuangan dengan mempertimbangkan bila definisi yang ditetapkan PSAK No. 109 telah dipenuhi sejak 1 Januari 2020. Dengan demikian, aset keuangan dan liabilitas keuangan diakui sesuai dengan kebijakan akuntansi Bank dan Entitas Anak seperti diungkapkan pada Catatan 2.c.f.

3. USE OF CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS *(continued)*

Significant accounting judgements *(continued)*

b. Classification of financial assets and liabilities

The Management of the Bank and its Subsidiaries determine the classification of certain assets and liabilities as financial assets and financial liabilities by considering whether the definitions set under SFAS No. 109 have been fulfilled since 1 January 2020. Accordingly, financial assets and financial liabilities are recognised in accordance with the accounting policy of the Bank and its Subsidiaries as disclosed in Note 2.c.f.

4. Nilai wajar tingkat 2 dari tanah dihitung dengan menggunakan pendekatan perbandingan harga pasar dan estimasi pendapatan dan biaya yang dihasilkan oleh aset. Harga pasar dari tanah yang paling mendekati disesuaikan dengan perbedaan atribut utama seperti ukuran aset, lokasi dan penggunaan aset. Input yang paling signifikan dalam pendekatan penilaian ini adalah asumsi harga per meter.

5. Hak atas tanah diperoleh berdasarkan Sertifikat Hak Guna Bangunan ("HGB") yang dapat diperbaharui dengan masa yang akan berakhir antara tahun 2024 sampai tahun 2053. Mengacu pada praktik di masa lampau, Grup memiliki keyakinan dapat memperpanjang HGB tersebut.

Penetapan modal ditempatkan dan disetor sebesar Rp4.000.000 oleh Pemerintah Republik Indonesia pada tanggal pendirian Bank Mandiri, telah dilaksanakan sebagai berikut:

1. Pembayaran secara tunai melalui Bank Indonesia sejumlah Rp1.600.004.

Penempatan dalam saham yang dicatat sebagai penyertaan saham pada Bank Peserta Penggabungan sejumlah Rp599.999 untuk setiap Bank atau jumlah keseluruhannya Rp2.399.996, melalui pengalihan saham milik Pemerintah Republik Indonesia pada setiap Bank Peserta Penggabungan kepada Bank Mandiri, seperti yang telah disebut dalam Rapat Umum Pemegang Saham Luar Biasa dari Bank Peserta Penggabungan. Berdasarkan perjanjian *inbreng* yang telah diaktakan dengan Akta No. 9 yang dibuat oleh Notaris Sutjipto, S.H., tanggal 2 Oktober 1998, Bank Mandiri dan Pemerintah Republik Indonesia setuju untuk mengalihkan saham-saham tersebut sebagai pembayaran untuk saham baru yang akan dikeluarkan oleh Bank Mandiri.

Berdasarkan perubahan anggaran dasar Bank Mandiri yang dituangkan dalam Akta No. 98 yang dibuat oleh Notaris Sutjipto, S.H., tanggal 24 Juli 1999, pemegang saham memutuskan untuk meningkatkan modal disetor (modal saham) Bank Mandiri dari Rp4.000.000 menjadi Rp4.251.000 dan jumlah tersebut akan dibayar oleh Pemerintah Republik Indonesia. Penambahan sebesar Rp251.000 merupakan hasil konversi dari tambahan modal disetor menjadi modal saham akibat dari adanya kelebihan obligasi rekapitalisasi yang diterbitkan dalam Program Rekapitalisasi Pertama berdasarkan Peraturan Pemerintah No. 52 Tahun 1999.

Berdasarkan keputusan RUPS-LB tanggal 29 Mei 2003 yang dituangkan dalam Akta No. 142 yang dibuat oleh Notaris Sutjipto, S.H., tanggal 29 Mei 2003, pemegang saham Bank Mandiri antara lain menyetujui:

***a. Authorised, issued and fully paid capital** (continued)*

The determination of issued and fully paid capital amounted to Rp4,000,000 by the Government of the Republic of Indonesia at the date of establishment of Bank Mandiri was carried out as follows:
1. Cash payment through Bank Indonesia amounted to Rp1,600,004.
2. Placements in shares recorded as investments in shares of the Merged Banks amounted to Rp599,999 each or totaling Rp2,399,996, through the transfer of shares of the Government of the Republic of Indonesia in each of the Merged Banks to Bank Mandiri, as resolved during the respective Extraordinary General Shareholders' Meetings of the Merged Banks. Based on the inbreng agreement approved by Notarial Deed No. 9 of Notary Sutjipto, S.H., dated 2 October 1998, Bank Mandiri and the Government of the Republic of Indonesia agreed to transfer those shares as payment for new shares to be issued by Bank Mandiri.

Based on the amendments to the Articles of Association of Bank Mandiri which stated in the Notarial Deed No. 98 of Notary Sutjipto, S.H. dated 24 July 1999, the shareholders resolved to increase the paid-in capital (share capital) of Bank Mandiri from Rp4,000,000 to Rp4,251,000 to be entirely paid by the Government of the Republic of Indonesia. The increase of Rp251,000 was a conversion from additional paid-in capital to share capital as a result of an excess from recapitalisation bonds issued under the First Recapitalisation Program based on Government Regulation No. 52 year 1999.

Based on the RUPS – LB decision dated 29 May 2003, which was documented in Notarial Deed No. 142 of Notary Sutjipto, S.H., dated 29 May 2003, the shareholders approved these following matters:
(i) Execution of Initial Public Offering (IPO).
(ii) Changes in capital structure of Bank Mandiri.
(iii) Changes in articles of association of Bank Mandiri.

In relation to the shareholders decision to change the capital structure, Bank Mandiri increased its issued and fully paid capital to Rp10,000,000 and stock split from Rp1,000,000 (full amount) per share to Rp500 (full amount) per share. Selanjutnya, kondisi perdagangan saham di Bursa Efek Indonesia sejak awal tahun 2020 sampai dengan tanggal 9 Maret 2020 mengalami tekanan yang signifikan yang diindikasikan dari penurunan Indeks Harga Saham Gabungan ("IHSG") sebesar 18,46%. Selanjutnya, untuk memberikan stimulus perekonomian dan mengurangi dampak pasar yang berfluktuasi secara signifikan maka OJK mengeluarkan SEOJK No. 3/SEOJK.04/2020, yang bertujuan untuk memberi kemudahan bagi Emiten atau Perusahaan Publik untuk melakukan aksi korporasi pembelian saham kembali tanpa melanggar peraturan perundang-undangan yang berlaku. Hal ini menjadi salah satu pertimbangan bagi Bank untuk melakukan proses pembelian kembali saham (*buyback*).

Furthermore, the condition of stock trading on the Indonesia Stock Exchange from the beginning of 2020 to 9 March 2020 experienced significant pressure as indicated by a decrease in the Composite Stock Price Index ("IHSG") of 18.46%. Furthermore, in order to provide an economic stimulus and reduce the impact of a significantly fluctuating market, Financial Service Authority (FSA) issued SEOJK No. 3/SEOJK.04/2020, to ease Issuers or Public Companies to carry out corporate action to buy back shares without violating applicable laws and regulations. This is one of the considerations for the Bank to carry out the buyback process.

For the share buyback, the Bank also refers to FSA Regulation No. 2/POJK.04/2013 regarding the Buyback Shares Issued by Issuers or Public Companies in Market Conditions that Flu ctuate Significantly ("POJK No. 2/POJK.04/2013") as amended by POJK No. 13 Year 2023 regarding Policy In Maintaining Performance And Capital Market Stability In Significantly Fluctuating Market Conditions. 2. Aktivitas-aktivitas terkait Pengelolaan Risiko Kredit

A. Segmen *Wholesale*

Proses pengelolaan kredit di segmen *Wholesale* diawali dengan menentukan target pasar melalui *Loan Portfolio Guideline* yang menetapkan *Industry Classification* (menarik, netral, dan selektif) dan *Industry Limit* yang sesuai, serta memilih dan menyaring target nasabah melalui *Industry Acceptance Criteria* dan *Name Clearance* untuk menghasilkan *pipeline* debitur yang berkualitas.

Proses selanjutnya adalah melakukan *credit risk assessment* menggunakan serangkaian *credit risk tools* (*credit risk rating*, *spreadsheet*, CPA, NAK, dan sebagainya) yang kemudian diputus oleh Pemegang Kewenangan Memutus Kredit (melalui Rapat Komite Kredit) dengan *four-eyes principle* yang melibatkan *Business Unit* dan *Credit Risk Management* Unit secara independen. Mekanisme *four-eyes principle* dilakukan oleh *Credit Committee* sesuai limit kewenangan, dimana proses pemutusan kredit dilaksanakan melalui mekanisme.

Setelah proses *disbursement* kredit, risiko kredit dan potensi kegagalan debitur harus senantiasa dimonitor dan dideteksi secara dini Khusus untuk debitur berpotensi bermasalah maka perlu dilakukan penanganan lebih lanjut antara lain mencakup aktivitas restrukturisasi, *collection,* maupun *recovery*.

B. Segmen *Retail*

Dengan mempertimbangkan karakteristiknya yang *mass market*, maka proses kredit dilakukan secara lebih otomatis menggunakan *credit risk scorecard*, dengan mengacu pada *Risk Acceptance Criteria* setiap produk, serta diproses melalui *work-flow* yang terotomasi (*loan factory*). The credit management process in the Wholesale segment begins with determining the target market through the Loan Portfolio Guideline which determines the appropriate Industry Classification (attractive, neutral, and selective) and Industry Limit, as well as selecting and filtering target customers through Industry Acceptance Criteria and Name Clearance to produce a high quality debtor pipeline.

The next process is to carry out a credit risk assessment using a series of credit risk tools (credit risk rating, spreadsheet, CPA, NAK, etc.) which is then decided by the Credit Approval Authority Holder (through a Credit Committee Meeting) with a four-eye principle involving the Business Unit and Independent Credit Risk Management Unit. The four-eye principle mechanism is carried out by the Credit Committee in accordance with the limits of authority, where the credit termination process is carried out through the RKK mechanism.

After the credit disbursement process, the debtor's credit risk and potential failure must always be monitored and detected early. Specifically for debtors with potential problems, further handling needs to be carried out, including restructuring, collection, and recovery activities.

B. Retail Segment

By considering its mass market characteristics, the credit process is carried out more automatically using a credit risk scorecard, referring to the Risk Acceptance Criteria for each product, and processed through an automated work-flow (loan factory). The monitoring process is carried out in a portfolio manner.

Lending in the Retail segment especially for productive loan also refers to the Loan Portfolio Guideline.

Selama masa pandemi Covid-19 berlangsung, Bank Mandiri secara aktif berpartisipasi dalam berbagai program Pemulihan Ekonomi Nasional (PEN) yang dicanangkan Pemerintah antara lain penyaluran dana berdasarkan penempatan uang negara pada Bank, penjaminan kredit, dan subsidi bunga. Diantara program tersebut adalah program untuk debitur terdampak Covid-19 berdasarkan POJK No. 11/POJK.03/2020 serta perubahan keduanya POJK No. 17/POJK.03/2021 yang telah berakhir pada Maret 2023, maupun Keputusan Dewan Komisioner ("KDK") OJK No. 34/KDK.03/2022 terkait sektor, segmen serta wilayah yang masih memerlukan perlakuan khusus terhadap kredit atau pembiayaan bank yang berlaku sampai dengan Maret 2024.

Adapun sebagai tindak lanjut dari berakhirnya KDK OJK No. 34/KDK.03/2022 pada tanggal 31 Maret 2024, OJK menerbitkan Siaran Pers ("SP") OJK Nomor SP-41/OJK/GKPB/III/2024 perihal Pengumuman Berakhirnya Stimulus Restrukturisasi Kredit Perbankan Dalam Rangka Penanganan Pandemi Covid-19, Bank melanjutkan skema restrukturisasi kredit kepada debitur yang sudah berjalan sampai dengan pelunasan kredit.

Credit Risk Management in Endemic COVID-19 Condition

During the Covid-19 pandemic, Bank Mandiri actively participated in various national programs initiated by the Government to boost economy recovery (Pemulihan Ekonomi Nasional (PEN)), including Government fund's distribution, loan guarantees, and interest subsidies. Among those programs was a program for debtors affected by Covid-19 which was regulated based on POJK No. 11/POJK.03/2020 as well as it's second POJK No. 17/POJK.03/2021 which ended in March 2023, and also the OJK Board of Commissioners Decree ("KDK") No. 34/KDK.03/2022 regarding sectors, segments, and regions that still require special treatment for credit or bank financing that valid until March 2024.

Following the expiration of OJK Board of Commissioners Decree No. 34/KDK.03/2022 on 31 March 2024, OJK issued a Press Release ("SP") numbered SP-41/OJK/GKPB/III/2024 regarding the Announcement of the Termination of the Credit Restructuring Stimulus for Banks in the Context of Handling the Covid-19 Pandemic. Banks will continue the credit restructuring scheme for borrowers that have already commenced until the repayment of the loan.

Post-Covid-19 pandemic, economic development has shown increasingly positive signs of recovery, accompanied by a significant decrease in the COVID-19 Restructuring portfolio from its highest position of Rp96,490,149 in June 2021 to Rp9,245,517 in December 2024.

At bankwide level, in December 2024, Bank Mandiri NPL% and NPL coverage was adequate. Considering these conditions, the Bank is quite confident that it has successfully managed the pandemic-affected credit portfolio. This confidence is also reflected in the fact that the end of the limited relaxation period under KDK OJK No. 34/KDK.03/2022 on 31 March 2024 did not result in any significant spike, demonstrating the Bank's success in achieving a post-relaxation soft landing.

B. Risiko pasar dan risiko likuiditas

(i) Manajemen risiko likuiditas

Risiko likuiditas adalah risiko akibat ketidakmampuan Bank untuk memenuhi kewajiban yang jatuh tempo dari sumber pendanaan arus kas dan/atau dari aset likuid berkualitas tinggi yang dapat diagunkan, tanpa mengganggu aktivitas dan kondisi keuangan Bank.

Untuk mengukur besarnya risiko likuiditas, Bank menggunakan beberapa indikator, antara lain adalah rasio Giro Wajib Minimum ("GWM") pada Bank Indonesia dan kas, Penyangga Likuiditas Makroprudensial ("PLM"), cadangan likuiditas, Rasio Intermediasi Makroprudensial ("RIM"), *Liquidity Coverage Ratio* ("LCR"), *Net Stable Funding Ratio* ("NSFR"), dan ketergantungan terhadap pendanaan nasabah besar.

B. Market risk and liquidity risk

(i) Liquidity risk management

Liquidity risk represents the risk of Bank's inability to fulfill all financial liabilities when they become due from its financing cash flows and/or high quality liquid assets that can be pledged, without negatively impacting the Bank's activities and financial condition.

The Bank's liquidity risk is measured through several indicators, which are minimum statutory reserve ratio ("GWM") in Bank Indonesia and cash, Macroprudential Liquidity Reserve ("PLM"), liquidity reserve, Macroprudential Intermediation Ratio ("RIM"), Liquidity Coverage Ratio ("LCR"), Net Stable Funding Ratio ("NSFR"), and dependency on large customer deposits.

B. Risiko pasar dan risiko likuiditas (lanjutan)

(i) Manajemen risiko likuiditas (lanjutan)

GWM adalah simpanan minimum yang wajib dipelihara oleh Bank dalam bentuk saldo rekening giro pada Bank Indonesia atau surat berharga yang besarnya ditetapkan oleh Bank Indonesia sebesar persentase tertentu dari dana pihak ketiga (DPK). PLM merupakan persentase kepemilikan surat berharga Rupiah yang dapat digunakan dalam operasi pasar terbuka, antara lain SBI, SDBI, SBN, dan SRBI.

Cadangan likuiditas adalah alat likuid Bank di atas GWM dengan fungsi untuk pemenuhan kebutuhan likuiditas yang tidak terjadwal. Dalam mengelola cadangan likuiditas, Bank memiliki batasan dalam bentuk limit *safety level*, yaitu proyeksi cadangan likuiditas Bank untuk 1 bulan ke depan. Pada tanggal 31 Desember 2024, cadangan likuiditas berada di atas *safety level*.

RIM adalah rasio hasil perbandingan antara kredit yang diberikan dan surat berharga korporasi yang memenuhi persyaratan tertentu yang dimiliki bank terhadap dana pihak ketiga, surat-surat berharga yang memenuhi persyaratan tertentu yang diterbitkan oleh Bank, dan pinjaman yang memenuhi persyaratan tertentu yang diterima oleh Bank. Pada tanggal 31 Desember 2024, RIM Bank Mandiri saja sebesar 94,83%.

LCR merupakan rasio antara *High Quality Liquid Assets* (HQLA) dengan estimasi total arus kas keluar bersih (*net cash outflow*) selama 30 (tiga puluh) hari ke depan dalam skenario krisis. LCR bertujuan untuk meningkatkan ketahanan likuiditas jangka pendek Bank dalam kondisi krisis. Pada tanggal 31 Desember 2024, LCR Bank Mandiri saja sebesar 139,21%.

NSFR merupakan rasio perbandingan antara pendanaan stabil yang tersedia (*available stable funding*) dengan pendanaan stabil yang diperlukan (*required stable funding*). Pada tanggal 31 Desember 2024, NSFR Bank Mandiri saja sebesar 107,60%.

B. Market risk and liquidity risk (continued)

(i) Liquidity risk management (continued)

GWM is a minimum deposits required to be maintained by the Bank in the form of current accounts with Bank Indonesia or marketable securities in which the amount is determined by Bank Indonesia based on certain percentage from total deposits from customers. PLM is an ownership percentage in Rupiah marketable securities which can be used in open market operations i.e, SBI, SDBI, SBN, and SRBI.

Liquidity reserve is the Bank's liquidity on top of GWM to anticipate unscheduled liquidity needs. In managing the liquidity reserve, Bank has liquidity reserve limit in the form of safety level limit, which represents the Bank's liquidity reserve projection for one following month. As of 31 December 2024, the liquidity reserve balance is above the safety level.

RIM is a ratio of loans and qualified marketable securities owned by the Bank to the customer deposits, qualified debt securities issued by the Bank and qualified borrowing received by the Bank. As of 31 December 2024, the Banks's RIM is 94.83%.

LCR is a ratio between High Quality Liquid Assets (HQLA) with the estimation of total net cash outflow for the next 30 (thirty) days under a crisis scenario, LCR is used to improve the short-term liquidity of the Bank under a crisis conditions. As of 31 December 2024, the Bank's LCR is 139.21%.

NSFR is a ratio comparing the available stable funding to required stable funding. As of 31 December 2024, the Bank's NSFR is 107.60%.

62. MANAJEMEN RISIKO (lanjutan)

B. Risiko pasar dan risiko likuiditas (lanjutan)

(i) Manajemen risiko likuiditas (lanjutan)

Kondisi likuiditas Bank di masa mendatang diproyeksikan melalui metodologi *liquidity gap*, yang merupakan *maturity mismatch* antara komponen-komponen aset dan liabilitas (termasuk *off-balance sheet*), yang disusun ke dalam periode waktu (*time bucket*) berdasarkan *contractual maturity* ataupun *behavioral maturity*. Pada tanggal 31 Desember 2024, proyeksi likuiditas Bank sampai dengan 12 bulan ke depan berada dalam posisi surplus. Meskipun proyeksi likuiditas 12 bulan ke depan surplus, Bank selalu mempersiapkan alternatif *funding* apabila kondisi likuiditas pasar menjadi ketat atau tidak sesuai dengan prediksi Bank.

Untuk mengetahui dampak perubahan faktor pasar maupun faktor internal pada kondisi ekstrim (krisis) terhadap kondisi likuiditas, Bank melakukan *stress testing* risiko likuiditas secara berkala. Hasil *stress testing* yang dilakukan telah dipaparkan kepada Manajemen. Hasil *stress testing* menunjukkan bahwa Bank dapat bertahan pada kondisi krisis likuiditas.

Meskipun hasil *stress testing* menunjukkan bahwa risiko likuiditas dapat dikelola dengan baik, Bank memiliki *Liquidity Contingency Plan* (LCP) yang meliputi strategi pendanaan dan strategi *pricing* dalam kondisi krisis, antara lain pinjaman pasar uang, *repo*, pinjaman bilateral, FX *swap* dan *wholesale funding*. Dalam LCP, penetapan kondisi likuiditas dan strategi-strategi pendanaan telah mempertimbangkan kondisi internal dan eksternal.

Dalam rangka mengantisipasi timbulnya risiko likuiditas akibat adanya perubahan faktor ekonomi global, Bank Mandiri memonitor indikator - indikator eksternal di antaranya: indONIA, suku bunga kebijakan Bank Indonesia (BI Rate), *yield* SUN 10 tahun, *outstanding* likuiditas perbankan Rupiah, Indeks Harga Saham Gabungan (IHSG), *rate interbank call money*, *yield* UST 10 tahun, nilai tukar USD/IDR, *Credit Default Swap* (CDS) 5 tahun Indonesia, serta informasi pasar terkini.

Pelaporan jatuh tempo pada tanggal 31 Desember 2024 dan 2023, didasarkan pada jangka waktu yang tersisa sejak tanggal-tanggal tersebut. Secara historis, terdapat bagian dari simpanan dalam jumlah yang cukup besar yang diperpanjang pada saat jatuh tempo. Selain itu, jika terdapat keperluan likuiditas, obligasi pemerintah (portofolio diukur pada nilai wajar melalui laba rugi dan tersedia untuk dijual diukur pada nilai wajar melalui penghasilan komprehensif lain) dapat dicairkan dengan menggunakannya sebagai jaminan dalam pasar antar bank.

***62. RISK MANAGEMENT** (continued)*

B. Market risk and liquidity risk (continued)

(i) Liquidity risk management (continued)

The Bank uses liquidity gap methodology to project its liquidity conditions for the future. Liquidity gap is basically a maturity mismatch between components of assets and liabilities (including off-balance sheet), which are classified into time bucket based on their contractual maturity or behavioral maturity. As of 31 December 2024, the Bank's liquidity forecast up to next 12 months is at a surplus position. Even in the surplus position for the next 12 months, the Bank always prepares for alternative funding to anticipate tight liquidity in the market or the liquidity is not as expected.

To determine the impact of changes in market factors and internal factors under extreme conditions (crisis) to the liquidity, the Bank conducts stress testing of liquidity risk on a regular basis. The results of stress testing performed was presented to the Management. The stress testing result showed that the Bank will be able to survive under liquidity crisis conditions.

Although the stress testing result showed liquidity risk is well managed, Bank has Liquidity Contingency Plan (LCP) in crisis condition which covers funding strategy and pricing strategy including money market borrowing, repo, bilateral borrowing, FX swap and wholesale funding. In LCP, determination of liquidity situations and funding strategies have considered internal and external conditions.

To anticipate liquidity risks due to volatility of global economic condition, Bank Mandiri monitors external indicators, including indONIA, BI Rate, 10-years SUN Yield, Rupiah Banking Liquidity Outstanding, Composite Stock Price Index (IHSG), Rate Interbank Call Money, 10-years UST Yield, USD/IDR Exchange Rate, Indonesia's 5-years Credit Default Swap (CDS) and the current market informations.

The maturity profile as of 31 December 2024 and 2023 are based on the remaining period from these dates. Historically, there were a large portion of deposits to be renewed upon maturity. In addition, if there is a need for liquidity, Government bonds (at fair value through profit or loss and fair value through other comprehensive income) can be exercised by utilising as collateral in interbank market.

(ii) Manajemen risiko suku bunga *portfolio banking book*

Risiko pasar adalah risiko pada posisi neraca dan rekening administratif, termasuk transaksi derivatif, akibat perubahan secara keseluruhan dari kondisi pasar, termasuk risiko perubahan harga *option*.

Pengelolaan risiko pasar *banking book* dilakukan dengan mengoptimalkan struktur laporan posisi keuangan Bank untuk mendapatkan imbal hasil yang maksimal sesuai tingkat risiko yang dapat diterima Bank. Pengendalian risiko pasar *banking book* dilakukan dengan menetapkan *limit* yang mengacu pada ketentuan Regulator dan internal yang dimonitor secara mingguan maupun bulanan oleh *Market Risk Management Unit*.

(ii) Interest rate risk management on banking book portfolio

62. MANAJEMEN RISIKO (lanjutan)

B. Risiko pasar dan risiko likuiditas (lanjutan)

(ii) Manajemen risiko suku bunga *portfolio banking book* (lanjutan)

Sumber risiko suku bunga *banking book* adalah *repricing risk* (*repricing mismatch* antara komponen aset dan liabilitas), *basis risk* (penggunaan suku bunga acuan yang berbeda), *yield curve risk* (perubahan bentuk dan *slope yield curve*) dan *option risk* (pelunasan kredit atau pencairan deposito sebelum jatuh tempo). Bank menggunakan *repricing gap* dan melakukan *sensitivity analysis* guna memperoleh proyeksi perubahan *Net Interest Income* ("NII").

a. Sensitivitas terhadap pendapatan bunga - neto

Tabel di bawah ini mengikhtisarkan sensitivitas pendapatan bunga - neto Bank Mandiri untuk 1 (satu) tahun ke depan terhadap pergerakan suku bunga dari portofolio aset dan liabilitas yang memiliki suku bunga pada tanggal 31 Desember 2024 dan 2023 (Bank Mandiri saja) yaitu:

***62. RISK MANAGEMENT** (continued)*

B. Market risk and liquidity risk (continued)

(ii) Interest rate risk management on banking book portfolio (continued)

The sources of banking book's interest rate risk are repricing risk (repricing mismatch between asset and liability components), basis risk (usage of different interest rate reference), yield curve risk (changes in shape and slope of the yield curve) and the option risk (loan repayment or redeem of deposit before maturity). The Bank uses the repricing gap and performs sensitivity analysis to obtain the projected Net Interest Income ("NII").

a. Sensitivity of net interest income

The table below shows the sensitivity of net income for the next 1 (one) year to interest rate movement of interest bearing assets and liabilities of Bank Mandiri as of 31 December 2024 and 2023 (Bank Mandiri only) as follows:

31 Desember 2023			***31 December 2023***
Menambah/(mengurangi) pendapatan bunga	211.716	(212.083)	*Increase/(decrease) interest income*

Proyeksi di atas mengasumsikan bahwa seluruh variabel lainnya adalah konstan pada tanggal pelaporan keuangan.

Sensitivitas pendapatan bunga untuk kelompok nilai wajar melalui pendapatan komprehensif lain, tidak memperhitungkan efek dari lindung nilai dan tindakan-tindakan Bank Mandiri untuk mengurangi risiko atas tingkat suku bunga. Dalam kenyataannya, Bank Mandiri secara proaktif melakukan mitigasi atas efek prospektif pergerakan tingkat suku bunga.

The above projections assumed that all other variables are held constant at reporting date.

The sensitivities of interest income from fair value through other comprehensive income without considering the effect off hedging and actions that Bank Mandiri would take to mitigate the impact of this interest rate risk. In practice, Bank Mandiri proactively seeks to mitigate the effect of prospective interest movements.

62. MANAJEMEN RISIKO (lanjutan)

B. Risiko pasar dan risiko likuiditas (lanjutan)

(ii) Manajemen risiko suku bunga *portfolio banking book* (lanjutan)

Untuk mengetahui dampak perubahan suku bunga dan nilai tukar pada kondisi ekstrim (krisis) terhadap pendapatan dan modal, Bank melakukan *stress testing* risiko pasar *banking book* secara berkala.

(iii) Manajemen *pricing*

Bank menerapkan kebijakan *pricing* baik untuk produk dana maupun produk kredit. Kebijakan *pricing* merupakan salah satu strategi untuk memaksimalkan *Net Interest Margin* ("NIM") dan sekaligus mendukung Bank menguasai *market share* dengan mempertimbangkan kondisi persaingan.

Bank secara konsisten berupaya menerapkan strategi sebagai *market leader* dalam hal *pricing* pendanaan. Namun demikian, dengan mempertimbangkan kondisi likuiditas dan kebutuhan dana, Bank dapat menerapkan strategi agresif (lebih besar dari pesaing utama) atau defensif (sama atau lebih kecil dari pesaing utama).

Dalam menetapkan suku bunga kredit, Bank menerapkan *risk based pricing* yaitu pemberian suku bunga kredit kepada nasabah bervariasi berdasarkan tingkat risiko kreditnya. Dalam rangka meminimalkan risiko suku bunga, maka suku bunga kredit disesuaikan dengan suku bunga sumber dana pembiayaan. Selain biaya dana, suku bunga kredit ditetapkan dengan mempertimbangkan biaya *overhead*, premi risiko kredit dan marjin keuntungan Bank dengan tetap memperhatikan *competitiveness* dengan pesaing utama. Suku bunga kredit dapat berupa suku bunga mengambang (*floating rate*) atau suku bunga tetap (*fixed rate*) untuk tenor tertentu.

***62. RISK MANAGEMENT** (continued)*

B. Market risk and liquidity risk (continued)

(ii) Interest rate risk management on banking book portfolio (continued)

To assess the impact of changes in interest rates and exchange rates at extreme conditions (crisis) to earnings and capital, the Bank conducts stress testing on the market risk of banking book regularly.

(iii) Pricing management

The Bank implements pricing policy for loans or deposit products. The pricing policy is one of the Bank's strategy to maximise Net Interest Margin ("NIM") and to support the Bank to dominate the market share by considering the competition condition.

The Bank consistently manages to apply the strategy as market leader in terms of fund pricing. However, considering the liquidity conditions and funding needs, the Bank may implement an aggressive strategy (greater than major competitors) or defensive (equal to or smaller than major competitors).

In determine interest rates, the Bank implements risk-based pricing by providing a range of interest rate of loan to customers based on credit risk level. In order to minimize interest rate risk, the loan interest rate is adjusted with interest rate from cost of funds. Other than cost of funds, loan interest rates are determined with consideration to overhead costs, credit risk premiums and profit margins as well as taking into account the Bank's competitiveness with its major competitors. Interest rates for loan can be either a floating or a fixed rate for certain tenors.

62. MANAJEMEN RISIKO (lanjutan)

B. Risiko pasar dan risiko likuiditas (lanjutan)

(iv) Manajemen risiko nilai tukar

Risiko nilai tukar adalah potensi kerugian yang timbul akibat pergerakan nilai tukar di pasar yang berlawanan pada saat Bank memiliki posisi terbuka. Bank menerapkan manajemen risiko nilai tukar yang memadai sehingga terhindar dari kerugian akibat perubahan atau volatilitas nilai tukar. Risiko nilai tukar berasal dari transaksi valuta asing dengan nasabah atau *counterparty* yang menyebabkan posisi terbuka dalam valuta asing maupun posisi struktural dalam valuta asing akibat penyertaan modal. Bank mengelola risiko nilai tukar dengan melakukan pemantauan dan pengelolaan Posisi Devisa Neto ("PDN") sesuai dengan limit internal dan ketentuan Bank Indonesia.

Perhitungan PDN pada tanggal 31 Desember 2024 dan 2023 berdasarkan Peraturan Bank Indonesia No. 12/10/PBI/2010 tanggal 1 Juli 2010 yang telah diperbaharui oleh Peraturan Bank Indonesia No. 17/5/PBI/2015 tanggal 29 Mei 2015 yang mengatur mengenai penghapusan peraturan PDN 30 menit. Sesuai dengan Peraturan Bank Indonesia, rasio PDN secara keseluruhan adalah penjumlahan nilai absolut dari selisih bersih antara aset dan liabilitas dalam laporan posisi keuangan untuk setiap mata uang asing yang dinyatakan dalam Rupiah ditambah dengan selisih bersih dari tagihan dan liabilitas komitmen dan kontinjensi, yang dicatat dalam rekening administratif, untuk setiap mata uang asing, yang dinyatakan dalam Rupiah. PDN untuk laporan posisi keuangan adalah selisih bersih jumlah aset dan jumlah liabilitas dalam mata uang asing yang dinyatakan dalam Rupiah. Terhitung tanggal 20 Maret 2020 sesuai dengan Surat BI No. 22/53/DPPK/Srt/B, transaksi *Domestic Non-Deliverable Forward* ("DNDF") disertakan ke dalam perhitungan PDN.

B. Market risk and liquidity risk (continued)

(iv) Foreign exchange risk management

Exchange rate risk represents potential loss arising from unfavourable exchange rate movements in the market when the Bank has an open position. The Bank applies a proper foreign exchange risk management to avoid loss arising from exchange rate changes or volatility. Exchange rate risk arises from foreign exchange currency transactions with customer or counterparty which leads to an open position in foreign currency or structural positions in foreign currencies due to capital investment. The Bank manages exchange rate risk by monitoring and managing the Net Open Position ("NOP") in accordance with internal limits and the regulation of Bank Indonesia.

The calculation of the net open position as of 31 December 2024 and 2023 is based on Bank Indonesia's Regulation No. 12/10/PBI/2010 dated 1 July 2010 which amended by Bank Indonesia's Regulation No. 17/5/PBI/2015 dated on 29 May 2015 regarding removal implementation NOP 30 minutes. In accordance with Bank Indonesia Regulation, the overall NOP ratio is the total absolute amount from the net difference between assets and liabilities for each foreign currency on statement of financial position which presented in Rupiah added with the net difference between receivables and payables of commitments and contingencies for each foreign currency recorded in administrative which presented in Rupiah. The net open position for the statement of financial position is the net difference between total assets and liabilities for each foreign currency which presented in Rupiah. As of 20 March 2020, in accordance with BI Letter No. 22/53/DPPK/Srt/B, Domestic Non-Deliverable Forward ("DNDF") transactions are included in the NOP calculation.

(v) Nilai wajar aset dan liabilitas keuangan (lanjutan)

Pada tanggal 31 Desember 2024 dan 2023, untuk aset dan liabilitas yang dimiliki pada akhir tahun laporan diukur pada nilai wajar secara berulang, Bank dan Entitas Anak tidak memiliki transfer antara Tingkat 1 dan Tingkat 2 dari hierarki. Selain itu pada posisi tanggal yang sama, tidak terdapat Surat Berharga yang masuk ke dalam Tingkat 3.

Nilai wajar instrumen keuangan yang diperdagangkan dalam pasar aktif (misalnya efek yang diukur pada nilai wajar melalui laba rugi dan nilai wajar melalui penghasilan komprehensif lain) ditentukan berdasarkan harga pasar kuotasian pada tanggal pelaporan. Suatu pasar dianggap aktif apabila informasi mengenai kuotasian dapat dengan mudah dan secara berkala tersedia dari suatu bursa, pedagang efek, atau *broker*, kelompok penilai harga pasar industri tertentu, regulator dan harga-harga tersebut mencerminkan transaksi pasar yang aktual dan reguler pada tingkat yang wajar. Harga pasar kuotasian untuk aset keuangan yang dimiliki Grup adalah harga penawaran sekarang. Instrumen-instrumen tersebut termasuk dalam tingkat 1. Instrumen yang termasuk dalam tingkat 1 umumnya meliputi investasi ekuitas dan surat hutang terdaftar di Bursa Efek Indonesia yang diklasifikasikan sebagai surat berharga yang diukur pada nilai wajar melalui laba rugi dan nilai wajar melalui penghasilan komprehensif lain.

Nilai wajar instrumen keuangan yang tidak diperdagangkan pada pasar aktif (meliputi derivatif *over the counter* dan obligasi pemerintah yang tidak aktif) ditentukan dengan teknik penilaian internal.

Teknik-teknik penilaian tersebut memaksimumkan penggunaan data pasar yang dapat diobservasi dan sedapat mungkin meminimalisir penggunaan estimasi yang bersifat spesifik dari entitas. Seluruh input yang dibutuhkan untuk menentukan nilai wajar instrumen keuangan dapat diobservasi dari pasar, oleh karena itu instrumen tersebut termasuk dalam tingkat 2. Sebaliknya, jika salah satu atau lebih data tidak didasarkan pada data pasar yang dapat diobservasi, instrumen ini termasuk dalam tingkat 3.

(v) Fair value of financial assets and liabilities (continued)

As of 31 December 2024 and 2023, assets and liabilities held at the end of the reporting year are measured at fair value on a recurring basis. The Bank and its Subsidiaries have no transfers between Level 1 and Level 2 of the hierarchy. In addition at the same date, there is no Marketable Securities included in Level 3.

The fair value of financial instruments traded in active markets (such as marketable securities which are measured at fair value through profit or loss and fair value through other comprehensive income) was determined based on quoted market prices at the reporting date. A market is considered active if the information regarding price quotations can be easily obtained and regularly available from an exchange, securities dealer or broker, the market price of a particular industry assessors, regulators and those price reflects actual and regular market transactions at a fair value. Quoted market price for financial assets owned by the Group are using current offering price. These instruments are included in level 1. The instruments included in level 1 generally include investments in shares in IDX and debt securities classified as held for trading and fair value through other comprehensive income.

The fair value of financial instruments that are not traded in an active market (include over-the-counter derivatives and inactive government bonds) are determined by internal valuation techniques.

The valuation techniques maximise the use of observable market data when available and as far as possible to minimise the use of specific estimates of the entity. If all the inputs needed to determine the fair value of financial instruments are observable from market, therefore the instrument is included in level 2. Instead, if one or more data is not based on observable market data, these instrument are included in level 3.

62. MANAJEMEN RISIKO (lanjutan)

B. Risiko pasar dan risiko likuiditas (lanjutan)

(v) Nilai wajar aset dan liabilitas keuangan (lanjutan)

(i) Giro pada Bank Indonesia, giro pada bank lain, penempatan pada Bank Indonesia dan bank lain, tagihan lainnya - transaksi perdagangan, tagihan atas efek-efek yang dibeli dengan janji dijual kembali, tagihan akseptasi dan aset lain-lain

Penempatan pada Bank Indonesia dan bank lain merupakan penanaman dana dalam bentuk *deposit facility*, FASBI syariah, *call money*, penempatan "*fixed term*", deposito berjangka dan lain-lain.

Nilai tercatat dari giro pada Bank Indonesia dan bank lain, penempatan *overnight* dengan suku bunga mengambang adalah perkiraan yang layak atas nilai wajar.

Estimasi nilai wajar terhadap penempatan dengan suku bunga tetap, tagihan lainnya - transaksi perdagangan, tagihan atas efek-efek yang dibeli dengan janji dijual kembali, tagihan akseptasi dan aset lain-lain ditetapkan berdasarkan diskonto arus kas dengan menggunakan suku bunga pasar uang yang berlaku untuk utang dengan risiko kredit dan sisa jatuh tempo yang serupa. Dikarenakan sisa jatuh tempo di bawah satu tahun, nilai tercatat dari penempatan dengan suku bunga tetap, tagihan lainnya - transaksi perdagangan, tagihan atas efek-efek yang dibeli dengan janji dijual kembali, tagihan akseptasi dan aset lain-lain adalah perkiraan yang layak atas nilai wajar.

(ii) Efek-efek dan obligasi pemerintah (diukur pada biaya perolehan dan biaya perolehan diamortisasi)

Nilai wajar untuk efek-efek dan obligasi pemerintah yang diukur pada biaya perolehan dan biaya perolehan diamortisasi ditetapkan berdasarkan harga pasar atau harga kuotasi perantara (*broker*)/pedagang efek (*dealer*). Jika informasi ini tidak tersedia, nilai wajar diestimasi dengan menggunakan harga pasar kuotasi efek yang memiliki karakteristik kredit, jatuh tempo dan *yield* yang serupa atau dinilai dengan menggunakan metode valuasi internal.

(v) Fair value of financial assets and liabilities (continued)

(i) Current accounts with Bank Indonesia, current accounts with other banks, placement with Bank Indonesia and other banks, other receivables - trading transactions, securities purchased under agreements to resell, acceptance receivables and other assets

Placements with Bank Indonesia and other banks represent placements in the form of deposit facility, sharia FASBI, call money, fixed-term placements, time deposits and others.

The carrying amount of current accounts with Bank Indonesia and other banks, placements and overnight deposits, which uses floating rate, is a reasonable approximation of fair value.

The estimated fair value of fixed interest bearing placements, other receiveables - trading transactions, securities purchased under agreements to resell, acceptance receivables and other assets is based on discounted cash flows using prevailing money market interest rates for debts with similar credit risk and remaining maturity. Since the remaining maturity is below one year, the carrying amount of fixed interest bearing placements, other receiveables - trading transactions, securities purchased under agreements to resell, acceptance receivables and other assets is a reasonable approximation of fair value.

(ii) Marketable securities and government bonds (measured at cost and amortised cost)

The fair value for marketable securities and goverment bonds measured at cost and amortised cost is determined based on market prices or intermediary (broker)/dealer quotes. If this information is not available, the fair value is estimated using market prices of similar credit, maturity and yield securities or evaluated using internal valuation methods.

(iii) Kredit yang diberikan dan piutang/pembiayaan syariah, piutang pembiayaan konsumen serta investasi bersih dalam sewa pembiayaan

Kredit yang diberikan dan piutang/pembiayaan syariah, piutang pembiayaan konsumen serta investasi bersih dalam sewa pembiayaan dinyatakan berdasarkan jumlah nilai tercatat setelah dikurangi dengan penurunan nilai. Estimasi nilai wajar dari kredit yang diberikan dan piutang/pembiayaan syariah, piutang pembiayaan konsumen serta investasi bersih dalam sewa pembiayaan mencerminkan jumlah diskonto dari estimasi kini dari arus kas masa depan yang diharapkan akan diterima. Nilai wajar dari kredit yang diberikan dan piutang/pembiayaan syariah, piutang pembiayaan konsumen serta investasi bersih dalam sewa pembiayaan ditentukan dengan mendiskontokan arus kas yang diharapkan pada tingkat suku bunga pasar terkini.

(iv) Simpanan nasabah dan simpanan dari bank lain, liabilitas atas efek-efek yang dijual dengan janji dibeli kembali, liabilitas akseptasi dan liabilitas lain-lain

Estimasi nilai wajar simpanan yang bisa ditarik kembali sewaktu-waktu, termasuk simpanan tanpa bunga, adalah sebesar jumlah terutang/nilai tercatat ketika utang tersebut dibayarkan.

Estimasi nilai wajar simpanan dengan tingkat suku bunga tetap, liabilitas atas efek-efek yang dijual dengan janji dibeli kembali, liabilitas akseptasi dan liabilitas lain-lain yang tidak memiliki kuotasi di pasar aktif ditetapkan berdasarkan diskonto arus kas dengan menggunakan suku bunga utang baru dengan sisa jatuh tempo yang serupa. Dikarenakan sisa jatuh tempo di bawah satu tahun, nilai tercatat dari simpanan dengan tingkat bunga tetap, liabilitas akseptasi dan liabilitas lain-lain adalah perkiraan yang layak atas nilai wajar.

(iii) Loans and sharia receivables/financing, consumer financing receivables and net investment in finance leases

Loans and sharia receivables/financing, consumer financing receivables and net Investment in finance leases are recorded at carrying amount net of charges for impairment. The estimated fair value of loans and sharia receivables/financing, consumer financing receivables, and net investment in finance leases represents the discounted amount of estimated future cash flows expected to be received. The fair value of loans and sharia receivables/financing, consumer financing receivables, and net investment in finance leases is determined by discounting the expected future cash flows at current market interest rates.

(iv) Deposits from customers and other banks, securities sold under agreements to repurchase, acceptance payables and other liabilities

The estimated fair value of deposits that can be withdrawn at any time, includes non-interest bearing deposits, is the payable amount/carrying amount when the payable is paid.

The estimated fair value of fixed interest bearing deposits, securities sold under agreements to repurchase, acceptance payables and other liabilities not quoted in an active market is based on discounted cash flows using interest rates for new debts with similar remaining maturity. As the remaining maturity is below one year, the carrying amount of fixed interest bearing deposits, acceptance payables and other liabilities is a reasonable approximation of fair value.

(vi) *Value at Risk* (VaR)

Dalam pelaksanaan pengelolaan risiko pasar *trading*, Bank menerapkan prinsip *segregation of duties* dengan cara melakukan pemisahan antara unit *front office* (melaksanakan transaksi *trading*), unit *middle office* (melaksanakan proses manajemen risiko serta menyusun kebijakan dan prosedur) dan unit *back office* (melaksanakan proses *settlement* transaksi).

Analisa risiko pasar atas aktivitas *trading treasury* dilakukan secara harian menggunakan pendekatan sesuai *best practice* yang ada dan mengacu pada ketentuan internal dan eksternal yang berlaku, salah satunya melalui perhitungan VaR.

VaR adalah potensi kerugian maksimum dari posisi portofolio Bank (*open position*) dengan *confidence level* dan *holding period* tertentu dalam kondisi pasar yang normal. Metode perhitungan VaR yang digunakan Bank yaitu metode *Historical Simulation* yang tidak membutuhkan asumsi bahwa pergerakan faktor pasar terdistribusi normal. Bank menghitung VaR berdasarkan 250 hari data faktor pasar historis.

(viii) Dampak Reformasi Acuan Suku Bunga

Pada tahun 2017, *Financial Conduct Authority* (FCA) Inggris mengumumkan rencana untuk menghentikan penggunaan LIBOR pada akhir tahun 2020. Pada November 2020, ICE *Benchmark Administration* (IBA) mengumumkan secara resmi rencana untuk menghentikan publikasi suku bunga acuan LIBOR. Sebagai tanggapan atas kondisi terbaru, pada tanggal 5 Maret 2021, FCA mengumumkan rencana penundaan sebagian penghentian publikasi suku bunga acuan LIBOR oleh IBA tersebut yang telah diadakan dalam 2 (dua) tahap sebagai berikut:

1. Pada 31 Desember 2021 untuk suku bunga acuan LIBOR semua tenor dalam mata uang GBP, EUR, CHF dan JPY serta dalam mata uang USD untuk tenor 1 (satu) minggu dan 2 (dua) bulan.
2. Pada 31 Desember 2023 untuk suku bunga acuan LIBOR dalam mata uang USD untuk tenor *overnight*, 1 (satu) bulan, 3 (tiga) bulan, 6 (enam) bulan dan 12 (dua belas) bulan.

Eksposur risiko Bank yang secara langsung terdampak dari reformasi acuan suku bunga terdiri dari *portfolio* kredit korporasi, transaksi derivatif dan *borrowing* yang menggunakan suku bunga acuan USD LIBOR.

Saat ini Bank telah menggunakan suku bunga acuan *Secured Overnight Financing Rate* (SOFR) atau suku bunga acuan lain yang disepakati untuk menggantikan suku bunga acuan USD LIBOR. Terkait suku bunga acuan SOFR, terdapat beberapa perbedaan antara USD LIBOR dan SOFR. USD LIBOR adalah "*term rate*", yang berarti USD LIBOR dipublikasikan untuk beberapa periode pinjaman (sebagai contoh 3 (tiga) bulanan atau 6 (enam) bulanan) dan bersifat "*forward looking*" (LIBOR dipublikasikan pada awal periode), sedangkan SOFR merupakan suku bunga acuan yang bersifat "*backward looking*", berdasarkan suku bunga *overnight* dari transaksi *actual*, dan dipublikasikan pada akhir periode *overnight*. Selain itu, LIBOR merupakan tingkat suku bunga yang telah memperhitungkan *credit spread*, sementara SOFR saat ini adalah suku bunga yang hampir *risk free* berdasarkan transaksi pasar *repurchase agreement* (repo) US Treasury. Untuk melakukan transisi atas kontrak dan perjanjian yang saat ini mengacu ke USD LIBOR menjadi mengacu ke suku bunga acuan alternatif (SOFR), diperlukan penyesuaian untuk memastikan bahwa kedua suku bunga acuan tersebut secara ekonomis setara.

Pada tahun 2020, Bank telah membentuk komite, yang terdiri dari unit kerja Treasury, Kredit, Risk, IT, Legal, Compliance, dan Keuangan untuk menyusun strategi transisi USD LIBOR. Komite Transisi LIBOR ini dibentuk untuk meminimalisasi potensi disrupsi bisnis dan memitigasi risiko operasional, hukum, kepatuhan serta keuangan. Inisiatif transisi LIBOR mempertimbangkan perubahan pada sistem informasi, proses, manajemen risiko, dan model valuasi instrumen keuangan serta mengkaji dampak akuntansi dan perpajakan.

(viii) Impact of Interest Rate Benchmark Reform

In 2017, the UK Financial Conduct Authority (FCA) announced plans to stop using LIBOR by the end of 2020. In November 2020, the ICE Benchmark Administration (IBA) officially announced plans to stop publishing the LIBOR benchmark interest rate. In response to the latest conditions, on 5 March 2021, FCA announced a plan to partially suspend the publication of the LIBOR benchmark interest rate by the IBA which has held in 2 (two) stages as follows:

1. *As of 31 December 2021, the reference interest rate is LIBOR for all tenors in GBP, EUR, CHF and JPY and in USD for 1 (one) week and 2 (two) months tenors.*
2. *On 31 December 2023, the reference interest rate is LIBOR in USD for the overnight tenor, 1 (one) month, 3 (three) months, 6 (six) months and 12 (twelve) months.*

The Bank's risk exposures that are directly affected by the interest rate benchmark reform consist of a portfolio of corporate loans, derivative transactions and borrowing using the USD LIBOR benchmark interest rate.

Currently, the Bank has used to use the Secured Overnight Financing Rate (SOFR) benchmark interest rate or other agreed benchmark interest rate to replace the USD LIBOR benchmark interest rate. Regarding the SOFR benchmark interest rate, there are several differences between USD LIBOR and SOFR. USD LIBOR is the "term rate", which means that USD LIBOR is published for several loan periods (for example 3 (three) months or 6 (six) months) and is "forward looking" (LIBOR is published at the beginning of the period), while SOFR is the rate "backward-looking" benchmark interest rate, based on the overnight interest rate of actual transactions, and published at the end of the overnight period. In addition, LIBOR is an interest rate that has taken into account credit spreads, while SOFR is currently an almost risk free interest rate based on US Treasury repurchase agreement (repo) market transactions. In order to make the transition of contracts and agreements that currently refer to USD LIBOR to refer to the alternative benchmark interest rate (SOFR), adjustments are needed to ensure that the two benchmark interest rates are economically equivalent.

In 2020, the Bank has formed a committee, consisting of Treasury, Credit, Risk, IT, Legal, Compliance, and Finance work units to formulate a USD LIBOR transition strategy. The LIBOR Transition Committee was formed to minimize the potential for business disruption and mitigate operational, legal, compliance and financial risks. The LIBOR transition initiative considers changes to information systems, processes, risk management and financial instrument valuation models and examines the impact of accounting and taxation.

B. Risiko pasar dan risiko likuiditas (lanjutan)

(viii) Dampak Reformasi Acuan Suku Bunga (lanjutan)

Dari segi manajemen risiko pasar, Bank telah mengidentifikasi dan mengantisipasi perubahan yang terjadi pada aspek - aspek antara lain perubahan *market data*, yang selanjutnya berdampak pada hasil perhitungan *mark to market*, perhitungan dan monitoring VaR, dan perhitungan lain - lain terkait risiko pasar. Terhadap perubahan-perubahan yang terjadi tersebut, Bank telah melakukan penyesuaian pada sistem manajemen risiko pasar dan ketentuan internal terkait, serta telah melaporkan realisasi *enhancement* pada sistem ke regulator. Pada tahun 2024, seluruh transaksi derivatif Treasury dengan mata uang USD telah menggunakan USD SOFR sebagai suku bunga acuannya.

Dalam hal kaitannya dengan risiko likuiditas, perubahan atas suku bunga acuan LIBOR menjadi suku bunga acuan alternatif lain juga dapat berdampak pada kondisi likuiditas Bank. Dalam hal ini, perubahan nominal pembayaran bunga kredit, transaksi derivatif dan/atau bunga pinjaman dapat berpengaruh pada nilai arus kas yang diterima atau dibayarkan oleh Bank, antara lain yang terukur dalam indikator *Liquidity Coverage Ratio* (LCR) dan *Net Stable Funding Ratio* (NSFR). Namun demikian, dampak tersebut diperkirakan tidak signifikan mempengaruhi kondisi likuiditas Bank secara keseluruhan.

Sebagai bentuk mitigasi risiko pasar, per posisi 31 Desember 2024 dan 2023, Bank telah mengidentifikasi kebutuhan perubahan pada sistem informasi dan Bank telah melakukan penyesuaian pada sistem tersebut. Bank juga telah melakukan kajian yang dibutuhkan dalam proses transisi terkait proses dan model valuasi instrumen keuangan. Pada tahun 2023, Bank telah melakukan komunikasi dengan *counterparty* dan/atau nasabah yang terdampak untuk memberikan informasi terkini terkait perubahan yang mungkin terjadi akibat dari reformasi acuan suku bunga, secara khusus USD LIBOR, baik melalui sosialisasi, diskusi maupun tertulis. Bank telah mengidentifikasi area yang memiliki risiko yang signifikan terhadap penghentian USD LIBOR, yaitu melakukan pengembangan pada sistem informasi dan penyesuaian proses bisnis untuk dapat mengakomodasi penggunaan suku bunga acuan alternatif, melakukan amendemen kontrak/*repapering* dan/atau melakukan kajian *fallback clause* pada kontrak *existing*. Selain melakukan usaha berkelanjutan dalam pemantauan kondisi terkini terkait transisi USD LIBOR, Bank juga telah melakukan diskusi lebih intensif dengan pelaku industri baik yang berasal dari dalam maupun luar negeri dalam rangka *benchmark* serta komunikasi dengan Regulator untuk memastikan transisi perubahan suku bunga acuan dari USD LIBOR ke suku bunga acuan alternatif berjalan dengan baik, sekaligus meminimalisasi risiko yang muncul dari proses transisi tersebut.

(viii) Impact of Interest Rate Benchmark Reform (continued)

In terms of market risk management, the Bank has identified and anticipated changes that occured in aspects including changes in market data, which in turn will have an impact on the results of the mark to market calculation, VaR calculation and monitoring, and other calculations related to market risk. With regard to these changes, the Bank has made adjustments to the market risk management system and has reported system enhancement realisation to the regulator. In 2024, all Treasury derivative transactions with USD currency have used USD SOFR as benchmark interest rate.

In terms of liquidity risk, changes in the LIBOR benchmark interest rate to another alternative benchmark interest rate may also have an impact on the Bank's liquidity condition. In this case, changes in the nominal payment of credit interest, derivative transactions and/or loan interest may affect the value of cash flows received or paid by the Bank, including those measured in the Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR) indicators. However, this impact is not expected to significantly affect the Bank's overall liquidity condition.

As a form of market risk mitigation, as of 31 December 2024 and 2023, the Bank has identified the need for changes to the information system and the Bank has made adjustments to the system. The Bank has also conducted studies needed in the transition process related to the process and model of the valuation of financial instruments. In 2023, the Bank has communicated with affected counterparties and/or customers to provide the latest information regarding changes that may occur as a result of the reform of the interest rate reference, specifically USD LIBOR, either through socialization, discussion or in writing. The Bank has identified areas that have a significant risk of discontinuing USD LIBOR, namely developing information systems and adjusting business processes to accommodate the use of alternative reference interest rates, conducting contract amendments/repapering and/or reviewing fallback clauses on existing contracts. In addition to carrying out continuous efforts in monitoring the latest conditions related to the USD LIBOR transition, the Bank has also conducted more intensive discussions with industry players both from within and outside the country in the context of benchmarking and communication with Regulators to ensure the transition of changes in the benchmark interest rate from USD LIBOR to alternative interest rates went well, also to minimize the risk arising from the transition process.

KI mengindikasikan besar kecilnya kemungkinan suatu risiko akan terjadi (*risk based*) atau mengindikasikan besar kecilnya kemungkinan suatu kontrol tidak dilaksanakan sebagaimana mestinya *(control based)*. KI ditetapkan ambang batasnya *(threshold)* dan dicatat skor realisasinya secara berkala.

(iv) *Issue & Action Management* (IAM), merupakan perangkat untuk memantau tindak lanjut yang telah disusun atas isu-isu yang ditemukan dari berbagai sumber, seperti dari hasil *Control Testing*, hasil *monitoring Key Indicator*, terjadinya insiden, teridentifikasinya suatu permasalahan *(self-identified issue)* dan lainnya.
