In cases where a Director has multiple Board representations, the NC assesses whether such Director has been adequately carrying out his duties as a Director of the Company. The NC noted the confirmations from Directors who held multiple Board representations that their time/effort in carrying out their duties as Directors of the Company would not be compromised.

In determining whether each Director is able to devote sufficient time to discharge his duty, the NC has taken cognizance of the requirement of the revised Code of Corporate Governance issued on 02 May 2012 by the Monetary Authority of Singapore (the "2012 Code"), but is of the view that its assessment should not be restricted to the number of board representations of each Director and his respective principal commitments per se. The contributions by Directors to and during meetings of the Board and Board Committees, as well as their attendance at such meetings, should also be taken into account.

3) Explain how the board of directors plans for the succession of the CEO/Managing Director/President and the top key management positions.

The NC reviews the succession planning of Board members, CEO and Key Executives of the Company. The Company has in place a succession plan, with a portfolio of well-trained candidates to assume the responsibilities of Key Executives in the event of an immediate vacancy.

4) Other Executive, Non-Executive and Independent Directors

Does the company have a policy of ensuring diversity of experience and background of directors in the board? Please explain.

Yes, the Company has, through the NC, adopted procedures for the selection, appointment and re-appointment of Directors, in order to increase transparency of the nominating process. All appointments and re-appointments of Directors are first reviewed and considered by the NC and then recommended for approval by the Board.

The NC evaluates the balance of skills and competencies on the Board and in consultation with the Chairman of the Board and Management, determine the desired skill sets and qualities for a particular appointment.

The NC evaluates the suitability of a prospective candidate based on his qualification and experience, ability to commit the time and effort in the effective discharge of his duties and responsibilities, independence, past business and related experience and track record. The NC also identifies any core competencies that will complement those of current Directors on the Board to ensure diversity of experience.

The current Directors of the Company bring invaluable experience, extensive business network and expertise in specialized fields such as strategic planning, mergers and acquisitions, corporate finance and restructuring, accounting, marketing and business development, risk and crisis management, corporate communications and investor relations.

The size, composition, range of experience and the varied expertise of current Board members allow discussions on policy, strategy and performance to be critical, informed and effective.

Does it ensure that at least one non-executive director has an experience in the sector or industry the company belongs to? Please explain.

Yes; in selecting potential new directors, the NC will seek to identify the competencies required to enable the Board to fulfill its responsibilities.

Dr. Emil Q Javier, one of the Company's non-executive directors, is a Filipino agronomist widely recognized in the international community for his academic leadership and profound understanding of developing country agriculture. His experience and knowledge are extremely helpful to the Company's agro operations.

Define and clarify the roles, accountabilities and deliverables of the Executive, Non-Executive and Independent Directors:

	Executive	Non-Executive	Independent Director
Role	As a working employee of the Company, he is responsible for and involved in its day-to-day affairs.	The Non-Executive Directors contribute to the Board process by monitoring and reviewing Management's performance against pre-determined goals and objectives.	The Independent Director provides a non-executive perspective and contributes a balanced viewpoint to the Board. They exercise independent judgment and discretion on the Group's business activities and transactions, in particular, in situations involving conflict of interest and other complexities.
Accountabilities			
Deliverables			

Provide the company's definition of "independence" and describe the company's compliance to the definition.

The NC, on an annual basis, determines whether or not a director is independent, taking into account the 2012 Code.

Independence is taken to mean that Directors have no relationship with the Company, or its related corporations, its 10% shareholders or its officers that could interfere, or be reasonably perceived to interfere, with the exercise of the Director's independent business judgment.

The 2012 Code states that the independence of any Director who has served on the Board beyond nine (9) years from the date of his first appointment should be subject to particularly rigorous review.

The NC had assessed the independence of each Director, including Directors whose tenure had exceeded nine (9) years from the date of their first appointment. In this regard, the NC noted that Mr. Patrick L Go (first appointed on 19 April 2001) and Mr. Godfrey E. Scotchbrook (first appointed on 28 December 2000) would be deemed non-independent under the guidelines of the 2012 Code.

The NC had noted that Mr. Patrick L. Go, although first appointed in 2001, was re-designated as an Independent Director in 2006. In addition, based on the NC's observation, both Mr. Patrick L. Go and Mr. Godfrey E. Scotchbrook had demonstrated independent mindedness and conduct at the Board and Board Committee meetings. The NC is of the firm view and opinion that both Mr. Patrick L. Go and Mr. Godfrey E. Scotchbrook are able to exercise independent judgment in the best interest of the Company in the discharge of their duties as Directors despite their extended tenure in office.

The NC having reviewed the individual Directors' judgment and conduct in carrying out their duties for the year in review, deems that Mr Patrick L Go, Dr Emil Q Javier, Mr Benedict Kwek Gim Song and Mr Godfrey E Scotchbrook continue to be independent.

Does the company have a term limit of five consecutive years for independent directors? If after two years, the company wishes to bring back an independent director who had served for five years, does it limit the term for no more than four additional years? Please explain.

The Company does not have a policy on term limits. The Company, however, follows the rules and guidelines of the 2012 Code.

To legally and ethically perform its business function and ensure consistency of its behavior, the Company has a Code of Business Ethics which Directors, Management and all employees abide by.

Business Conduct & Ethics	Directors	Senior Management	Employees

The Board of Directors has overall responsibility for the establishment and oversight of the Group's risk management framework. The AC is responsible for developing and monitoring the Group's risk management policies. The committee reports regularly to the Board of Directors on its activities. The Group's risk management policies are established to identify and analyze the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits.

The AC oversees how management monitors compliance with the Group's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Group. The AC is assisted in its oversight role by Internal Audit. Internal Audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the AC.

Identified risks are also included and monitored in the corporate risk register, and mitigating measures are followed up.

The Board continually monitors the Group's risk management process to ensure that an appropriate balance between risk and control is achieved.

2) Risk Policy

(a) *Company/Group*

Give a general description of the company's risk management policy, setting out and assessing the risk/s covered by the system (ranked according to priority), along with the objective behind the policy for each kind of risk:

Risk Exposure	Risk Management Policy	Objective
Enterprise-Risk Management Program	The Group has an established enterprise-wide risk management program that aims to provide a structured basis for proactively managing financial, operational, compliance and information technology risks in all levels of the organization. Risk management is a regular board agenda item.	
Group Assets	<p>It is the Group's practice to assess annually with its insurance brokers and insurance companies the risk exposure relating to the assets of, and the possible liabilities from, its operations. Assets are insured at current replacement values. Additions during the current year are automatically included with provision for inflation protection.</p> <p>During the year in review, all major risks were adequately covered, except where the premium costs were considered excessive in relation to the probability and extent of a loss.</p>	
Foreign Currency	<p>The Group normally enters into transactions denominated in various foreign currencies. In addition, the Group maintains their respective books and accounts in their functional currencies. As a result, the Group is subject to transaction and translation exposures resulting from currency exchange rate fluctuations, especially between the Philippine peso and US dollar.</p> <p>To a certain extent, the Group has a natural hedge between the two currencies due to its revenue and cost mix. It is the Group's policy to optimize its natural hedge.</p>	
Inflation	The Group's costs are affected by inflation. However, the Group has lessened the impact of cost increases by actively controlling its overall cost structure and introducing productivity-enhancing and cost management measures. The Group also considers inflation in pricing adjustments with its market customers.	
Cash and Interest Rate Management	<p>The Group's cash balances are placed with reputable global and major Philippine banks and financial institutions. The Group manages its interest income by placing the cash balances with varying maturities and interest rate terms. This includes investing the Company's temporary excess liquidity in short term low-risk securities from time to time. The Group obtains financing through bank borrowings and leasing arrangements. Financing is obtained from bank credit facilities, for both short-term and long-term requirements and/or through the sale of assets, particularly receivables from its customers.</p> <p>The Group's policy is to obtain the most favorable interest rate available without increasing its foreign currency exposure.</p>	
Credit Risk	<p>The Group sells its products through major distributors and buyers in various geographical regions. Management has a credit risk policy which includes, among others, the requirement of certain securities to ensure prompt observance and performance of the obligations of its distributors and other buyers from time to time.</p> <p>The group monitors its outstanding trade receivables on an ongoing basis. There is no significant concentration of credit risk with any distributor or buyer.</p>	

International Business	<p>The Group's overall earnings from its trading activities with international customers are primarily affected by movements in the worldwide supply, demand and prices of its products. Prices for pineapple juice concentrate are largely affected by the supply situation in Thailand and the demand situation in the international markets. Given that this is an industrial commodity product, prices are quite volatile. The Group is shifting production towards more branded ready-to-drink beverage to decommo-ditize its concentrate product.</p>
Branded Business	<p>The Group's branded business in the US, the Philippines and the Indian subcontinent through Del Monte, and in Asia and the Middle East through S&W, is affected by a number of factors, including, but not limited to competition, acceptance of new products, industry trends, distribution expansion, penetration and business partners' risks.</p> <p>The Group's exposure to these risks is managed through the following processes, among others:</p> <ul style="list-style-type: none"> • Focus on consumption-driven marketing strategies; • Shift to branded value-added, packaged products with emphasis on innovation, health and wellness, quality, competitiveness and consumer appeal; • Market and customer diversification; • Increased penetration of high-growth distribution channels and markets; • Building on closer working relationships with business partners.
Agricultural Output	<p>The output of the plantation is subject to certain risk factors relating to weather conditions, crop yields, outgrowers and service providers' performance, and leasehold arrangements. To manage any impact from heavy rainfall and floods, plantings are done in various locations to minimise tonnage loss, and towing units have been augmented to ensure continuity of harvest during wet conditions.</p>
Natural Disasters	<p>The Company's plantations are located in the northern part of Mindanao which is outside the typhoon belt and any earthquake faults. The plantations are located on a high elevation which minimises the risk of flooding. However, there can be no assurance that natural catastrophes will not materially disrupt the Group's business operations (either in Mindanao or other places in the Philippines in the future), or that the Group is fully capable to deal with these situations with respect to all the damages and economic losses resulting from these catastrophes.</p> <p>To manage these risks, the Group develops and executes a long-term strategic plan and annual operating plan, supported by a contingency plan and risk management measures. It also has in place disaster recovery plans and business continuity plans.</p>
Access to Land	<p>The Group's pineapple growing operations cover a total of approximately 23,000 hectares of land in Mindanao, the Philippines. Growership agreements typically provide for an initial 10-year period renewable at the Group's option on a cycle-to-cycle basis, up to five cycles, with each cycle averaging 40 months. Other agreements have been negotiated to provide for an extended period of 20 years.</p> <p>In January 1997, the Group concluded negotiations with the Del Monte Employees' Cooperative for the renewal of their agreement covering approximately 8,000 hectares for a term of 25 years effective from 11 January 1999. This may be further renewed by agreement of the parties.</p> <p>In addition, the Group has under lease approximately 1,000 hectares from the National Development Corporation, a Philippines government-owned and controlled corporation. This lease was renewed for a term of 25 years</p>

	on 1 March 2007.
Operations	As an integrated producer of processed and fresh fruit products for the world market, the Group's earnings are inevitably subject to certain other risk factors, which include general economic and business conditions, change in business strategy or development plans, production efficiencies, input costs and availability, litigious counterparties, insurgent activities and changes in government regulations, including, without limitation, environmental regulations. The Group develops and executes a long-term strategic plan and annual operating plan, supported by a contingency plan and risk management measures. It also pursues productivity-enhancing and efficiency-generating work practices and capital projects. To manage insurgency risks in its operating units in the Philippines, the Group has strengthened security measures.
Compliance	The Group closely monitors changes in legislation and government regulations affecting the Group's business, including, but not limited to, environmental matters, labor, and food safety. It has a compliance program that aims to monitor and ensure the Group's compliance with laws and regulations. Compliance is a regular board agenda item.

In 2014, close to 100 percent of Cannery and Plantation-based employees and service contractors targeted for Occupational Health and Safety (OSH) training completed over 13,000 training hours.

All newly-hired regular employees, service providers and project-based contractors underwent a comprehensive Safety Orientation within 6 days of work deployment.

- **Handling and Use of Industrial Materials and Equipment**

The Group complies with government standards in the use of fertilizers and industrial chemicals, including safe transport and handling, and collection and recovery of packaging materials.

Government regulatory permits and licenses required for fertilizer-handling operations were renewed by the Fertilizer and Pesticide Authority of the Philippines, which included 4 licenses as institutional use of fertilizer and pesticide and as importer-end user of these chemicals; registration of 14 Fertilizer Warehouses; and accreditation of Supervisors and Managers overseeing chemical application. Regular in-house safety audits were also conducted in the Group's fertilizer and chemical storage, and work areas.

Workers handling chemicals were issued new protective equipment and have undergone regular medical check-ups. A total of 645 chemical handlers (both regular and service

providers) gained valuable lessons as they completed a total of 2,777 training hours through 13 training sessions on Chemical Handlers and Applicators Safe use Education (CHASE).

- Water Sampling

Water samplings were conducted twice-a-year in 105 sampling points to monitor pesticide residue in areas within and around our plantation sites, as required by Philippine regulatory bodies, including the Fertilizer and Pesticide Authority and Department of Environment and Natural Resources-Environment Management Bureau. Analysis results are submitted in a quarterly self-monitoring report to the DENR-EMB.

Within the Group's manufacturing site, a Renewable Energy Plant, completed in 2014, converts bio-waste to energy to help power processing lines as it cleanses industrial waters and sustains marine life.

- Fleet and Safety Program

The Group's Fleet Safety Program at the plantation and cannery addresses the regulation of vehicles (lift trucks, moving farm equipment, motor and other vehicles) deployed within worksites. This covers the issuance of vehicle entry passes, orientation and continuing education of drivers on road safety rules and regulations, assessment of driver competency through written and actual tests, and issuance of Operators Permit to qualified regular employees and service providers/contractors. Close to 10,000 training hours were devoted to training 1,400 individuals on defensive driving techniques, road safety and emergency preparedness.

- Hazard Identification, Risk Assessment, and Determining Controls (HIRADC) Program

The HIRADC program helps teams identify potential and existing workplace hazards, assess levels of risk, and determine controls necessary to address these identified hazards. Under the Group's site-wide 5S/TPM (Total Productive Maintenance) program, workteams actively transform the Environment, Health and Safety (EHS) Pillar to enhance machine and equipment safety and attain Overall Equipment Effectiveness.

- Site-Wide Preparedness during Natural and Man-Made Calamities

Collaborative efforts between labor and management members of Safety, Health, Environment and Emergency Preparedness (SHEEP) Committees have ensured site-wide preparedness and response during natural and man-made calamities. This has been showcased by overwhelming support from "Volunteer Brigades" during recent floods and typhoons that hit operational areas in Mindanao.

Many of the employees, service contractors and plantation-based families had earlier participated in day or night drills covering earthquake evacuation; first aid response; fire drill covering product recovery and spill response; and terrorist attack. SHEEP teams cascade directives to shop floor level and ensure its effectiveness; they submit quarterly to the local office of the Philippines Labor Department Minutes of Monthly Meetings. A similar organization and set-up among service contractors provides Site Management with a forum to discuss contractor safety performance, compliance and other issues.

- Health Awareness Lectures

Supplementing safety and health training, Site Management provides employees and families with opportunities to enhance over-all health and wellness. Health awareness lectures focusing on work-related and lifestyle-induced illnesses and outbreaks (in specific worksites) of life-threatening viruses and illnesses were conducted by our health service provider for over 300 participants on Cardiovascular Diseases, Diabetes Mellitus and Ebola during the year.

- To recognize excellent safety performance, leadership and initiatives of individuals and teams, Zero Accident awards and incentives are given to deserving employees (quarter, year).

M. BOARD, DIRECTOR, COMMITTEE AND CEO APPRAISAL

Disclose the process followed and criteria used in assessing the annual performance of the board and its committees, individual director, and the CEO/President.

The Board has, through the NC, implemented an annual evaluation process to assess the effectiveness of the Board as a whole. The evaluation process is undertaken as an internal exercise and involves Board members completing a questionnaire covering areas relating to the following:

- Board composition;
- Information to the Board;

- e. Communication with CEO and Key Executives;

2) Individual Directors

The NC is tasked with reviewing the Directors' performance and contributions in order to nominate them for re-election or re-appointment. The NC will review, in particular, the Directors' attendance and participation at meetings of the Board and Board committees, and their efforts and contributions towards the success of the Group's business and operations.

In cases where a Director has multiple Board representations, the NC also assesses whether such Director has been adequately carrying out his duties as a Director of the Company. (The NC noted the confirmation from Directors who held multiple Board representations that their time/effort in carrying out their duties as Directors of the Company would not be compromised.)

In determining whether each Director is able to devote sufficient time to discharge his duty, the NC has taken cognizance of the 2012 Code requirement, but is of the view that its assessment should not be restricted to the number of board representations of each Director and his respective principle commitments per se. The contributions by Directors to and during meetings of the Board and Board Committees, as well as their attendance at such meetings should also be taken into account.
