UPDATE ON THE CIEMAS GOLD PROJECT – FIRST GOLD POUR

The Board of Directors (the "**Board**" or "**Directors**") of Wilton Resources Corporation Limited ("**Company**"), and together with its subsidiaries, (the "**Group**") refers to the announcement dated 26 July 2017 in relation to the update on the Ciemas Gold Project, further to which the Board is pleased to announce that the first gold pour from the initial trial batch of leaching and processing which commenced in June 2017 has produced 936 grams of gold with 99.0% purity.

The 500 tonne trial batch of ore had an average feed grade of approximately 2.9 grams per tonne and the recovery rate was approximately 65%. As further optimisation remains on-going, the second trial batch of leaching will remain at 500 tonnes of oxide ore before the eventual utilisation of the full leaching pool capacity of 1,000 tonnes of oxide ore in subsequent cycles. Barring any unforeseen circumstances, the second gold pour from this trial phase is expected to be produced in September 2017.

Mining of ore to be processed via leaching is on-going. The Company is also constructing a second leaching pool, which is expected to be completed during September 2017. Additional leaching pools will be constructed in stages to increase production capacity over time.
